THE CALIFORNIA FARMER

And Journal of Useful Sciences.

VOLUME X. SAN FRANCISCO, CALIFORNIA, FRIDAY MORNING, JANUARY 8, 1858. NUMBER I.

The California Farmer

AND JOURNAL OF USEFUL SCIENCES.

WARREN & CO.

PUBLISHED EVERY FRIDAY MORNING.

Office—No. 130 *Washington street (up stairs), San Francisco*

TERMS.—*Five dollars per annum, in advance. For a club of five new subscribers, we will send a sixth copy gratis*

☞ *Advertisements in this journal will have a circulation and notice unequaled.*

☞ **Advertisements and Subscriptions must be paid for in Advance.**

Letter from "Wash" in the Mountains.

Oh, it gladdeth much my very soul
The smallest p to see;
For I know, ere'r a sail is spread,
God speaketh dibly. [MARY HOWITT.

Princes or Lords may flourish, or may fade;
A breath can make them, as a breath hath made;
But a bold peasantry, their country's pride,
When once destroyed, can never be supplied.
[GOLDSMITH'S DESERTED VILLAGE.

WE give the nguage of two of the world's best writers, eaclaiming for their theme great merit. Truthful, there is "good in everything," and Goeverywhere; on the sea and on the land. Ourfriend Wash asks a question, and tells his owntory. It is indeed a case of *quien sabe*, if a our friend describes should happen to all, butWash writes so happily upon the *ills* of farming we believe he likes it. One thing is certain, heas a glorious support in is trials, and we suppse he has realized, in prt, at least, the pretty ines:

A *little* farm well tilled,
A *little* wife well willed, &c.

So we can say, p ahead Wash, you are ple to *hoe your row*, in spite of panthers, grizzlis, or *kicking cows*. Don't be in haste again to et all the *cream* of the pail at once:

"Who would not sell a Farm and go to Sea"

The above quotation is from no authoin particular, but is often used by sailors dedingly, whenever they have an extra occaon for complaining of their hard lot, or growlin! as it is called in sea parlance. A sailor thits that a farmer "has the easiest time in e world!" Nothing to do, but to watch thigs grow in summer; and in winter, set by the fe, crack walnuts and drink cider!

The life of a Mariner is a hard one, but wt profession is there that does not have its hships? In my lifetime, I have found but fr, who were satisfied with their calling. Oft have I been guilty of envy, and also of mali, when comparing my lot with the Farmer, dl joined in with others in abusing him for s imaginary happiness. We had perhaps, jt returned below, after being called up to rf topsails; wet, cold and hungry, everybody bad humor. But Jack must make a joke of and then comes the remark I have previous quoted, "who would not sell a farm and go sea." Somebody else suggests, that "it is nice growing time for turnips," and others f low with, "what a beautiful shower we ha had;" "how this will make things grow!" an "*this will bring everything out of the ground*" This last remark brings in response (from son old joker, who has lost his regard for the fa sex), "I hope not, for I have two wives und it!" This, partially, restores good humor, a all drop to sleep, perhaps to be called again b fore the watch below is up.

I have always had a desire to live in th country, and to raise and own cattle; hear "th music of the lowing kine" we read about, e fresh milk and butter, etc., etc.

I have tried it; the romance of the thing gone, and in a short time you will have amon your advertisements, *Farm for sale, eligibl located, with the best breed of stock upon it, etc etc.* If some man buys it immediately he wi be fortunate in securing an elegant place, wit the kindest and "best broke" cattle upon i he ever saw. For the benefit of my brothor *matelots* who may contemplate turning farmers, I will give you an abstract of my Log-book:

Hear of an elegant Rancho for sale, cheap. A friend has visited it, describes it as the most beautiful place he ever saw! Scenery magnificent; high mountains in front and rear. "Meandering creek running close by the door." The creek makes me determine to purchase immediately. Could smell salt water still, and enjoy sea food. Resolved to plant oysters. Knew that the Rancho was in the Coast range of mountains, but had no idea it was so near the coast. Have heard that there is some difficulty about titles in California, but am assured that this is all right, it is a *pre-emption*. Don't exactly fathom it, but overhaul my Noah Webster. Conclude they mean pre-*eminent*, "excellent above all others." That is the kind I am after. I purchase.

Pack up everything and start next day, with wife and child. Wife delighted with the prospect of a country life; she was raised in Western Pennsylvania; suspect her of being Dutch extraction; always denies the "soft impeachment;" won't look at sour-krout; knows *all about* (!) farming, though. Go by the way of the Russian-river Valley, up Petaluma creek; think this creek meanders some! Wonder if ours is as crooked! Take stage next morning; ride all day. Notice all the farms, some of them look very pretty, but they are too much on a dead level; have no scenery.

Make a new discovery in Natural History. See a number of hogs in a meadow, each one with a bird upon his back. Asked driver what kind of birds they were, and what they were doing? Said they were blackbirds; did not know what they were doing; saw them in that position every day; may be they were hunting fleas. Thought this conjecture plausible, but watched them closely. Found each hog had but one rider, who seemed impatient at this slow means of locomotion, for he was continually flying down in front of the porker's nose. At last I came to a conclusion, and as the fact is not laid down in any book upon animals that I have ever read, and Audubon says nothing of it in his work upon birds, I therefore claim the discovery: that what the jackal is to the lion, and the pilot fish to the shark, the blackbird is to the hog. They travel in company, the animal in this instance doing all the work; he digs up the ground and takes all the big roots and grubs, and the bird has for his share the small worms and bugs.

Next day take a private conveyance and ride within twelve miles of my Rancho; find I can go no further on wheels, must finish the journey on horseback. Am a little astonished! Was told that there was a good road all the way. Resolve to take another day for it; send carriage back, and stop with a farmer, who I find is my nearest white neighbor. He kindly offers to furnish me with horses for the morrow; thinks though that I had better take mules, as they are the safest in a "bad trail." Things begin to "look dubious," but Wife is still cheerful and sanguine.

The evening was cold; our new friends made a blazing fire in an immense old-fashioned fireplace. Enjoyed the fire exceedingly; had not seen one of the kind for many a year. Sat a long time looking into it; could hear the roar of the sea, and the wind, and see figures of ships and houses, men and horses flit before me in the live coals, as they used to in the days of my boyhood. Retired to bed early; dreamed of my Rancho all night; towards morning was awakened from a horrid nightmare—an enormous, pumpkin, I had found growing upon my farm, and which weighed two thousand pounds (!) had fallen while I was hoisting it upon the back of one of the Government camels, and rolled over me, mashing me "flat as a flounder."

Early the following morning, "got under weigh." Three saddle-mules and a pilot, commenced ascending a mountain; go up two hours then down two hours; ask pilot if we are nearly there; pilot points to another mountain, about two miles ahead, and says we must cross that. Am nearly tired out already; my mule has run into the chaparral, and raked me off a dozen times. He steers very badly; it was "hard a starboard, and hard a port" with me all the time. At last reached the top of the last mountain, and commenced the descent. We went down! down! down! My place seemed a Will o' the Wisp, receding from us. After going a mile (which the serpentine course of the trail makes at least three) we are are last home.

Spend first day examining my new purchase. It is in the bottom of a ravine; the mountains rise to an immense hight on either side; we have the sun about four hours a day. Look about for the farming land; cannot find ten square yards of level ground; see a spot which must have been intended for a garden; lot of brush piled around it for a fence, and ground so steep that turnips would roll down hill before they had time to ripen. My creek, I find to be, after every rain, a mountain torrent (river we would call it in the Eastern States). A creek, with us, "makes up" out of the sea, tide ebbs and flows, etc. Wife assures me that they call these fresh water streams, creeks, at the West, and this is the prettiest one she ever saw. I find that we are thirty-five miles from the Pacific ocean, and at an altitude of fifteen hundred feet above the level of the sea.

Give up all idea of farming; resolve to turn my attention to stock, full confident that although not *Abel* to till the ground, I can beat *Cain* raising sheep!

Hunt up my cattle; find them five miles from home, high up on the mountain sides. Try to drive them down into the ravine towards home; all break and run the other way; work "Tom Cox's traverse" on them; pretend I want to drive them up the hill—whole band nearly run over me to get down. After an awful quantity of yelling, and throwing rocks; arrive home, and with the assistance of the family, "corral" them. Determine to select two milch cows, and turn the rest loose. Wife selects an old-fashion American cow, "because she looks so gentle"; I have my eye on a beautiful black one, clipper-built, long and narrow spars, light and of great length, had an eye like an eagle. Turn the balance out.

Black cow begins to give indications that she is not going to stay with us. Run for a lasso (have some experience in throwing lines), and just as she clears the fence, at a bound, succeed in getting the "bowline" over her horns. Rush round from tree to tree, trying to "catch a turn;" before I can do so, cow jumps over a precipice, drawing rope through my hands, and burning them to the bone. Suspend operations for the day!

Next try my hand at milking, am proud of my success; call everybody to witness it. Gentle cow lets me get pail half full, is dissatisfied with something, and kicks bucket plump against the bridge of my nose! Am nearly blinded by the lacteal flood, and discover several new constellations in the heavens! Wife asks if they are the "Milky-way." Cant give up the black cow yet, bring a new power to bear upon her, employ the force of maternal affection; secure her calf and bring him home, cow walks behind as "quiet as a lamb." Am fully impressed with the belief that "sure bind, is sure find," therefore fasten her securely, by mooring her with strong hawsers, stem and stern.

Have a great fancy for Poultry, think this an elegant place for chickens, determine, in time, to monopolize the whole San Francisco market. Make a start, with fifty laying hens. Let them all out to sun themselves, and stretch their legs after their long journey. Immediately the air is darkened by a flight of eagles, kites and hawks; get my double-barrel shot gun and blaze away, but find that every one I kill, a dozen come to his funeral. Cannot leave home a moment, every time I do, lose three or four hens. End of first week take an inventory and find twenty-seven left.

It is singular what becomes of the eggs; hear the poultry "cackle," and see shells; something must take them, keep awake all night, on the look out! There is a terrible commotion among the "feathered tribe," I rush out! half dressed, into the cold night air, resolved to make a desperate fight with the intruder, and conquer or die. Poke my head into the chicken coop, and am greeted with an awful smell of "cheap perfumery!" retire gracefully, and leave my enemy in quiet possession; he is *a little too strong for me*.

An evening or two after my arrival, had my sympathies exceedingly excited by a cry of distress, a few rods from the house. The voice was like a woman's or child's. Had no time to seize my gun; ran in the direction of the sound, found it proceeded from a tree; saw a pair of shining eyes and a large, dark body between me and the moon; think it must be a young bear; go back for my gun, but during my absence the animal had retreated to a ledge of rocks. Directly hear his plaintive moan again; make it out this time to be co-oo-a! know then that I have been within the spring of a Cougar or Panther. I have since ascertained that there are a number of families of them in my vicinity, and conclude it would be useless to attempt sheep raising.

Have noticed a tall mountain within a few miles of us. Think that from the top there must be a beautiful view, and, may be, another sight of salt water. Determine to make the ascent; start at daylight, taking along my horse and gun, one barrel loaded with ball, as a protection from bears and other "varmints." At noon arrived at the edge of the chaparral, near the summit. This is called the "chemise," because, as I suppose, it is a shirt collar or ruffle near the head of the mountain. It consists mostly of shrub oak and other tough bushes, and when once it has been burned over, the brush becomes seasoned as hard as iron. Tied my horse and commenced making my way through, part of the time on hands and knees. Heard an immense crackling before me among the bushes; rise up and see a head and a tremendous pair of antlers, within ten feet of me another head without antlers, a few steps off. What beautiful creatures! what eyes! and with what astonishment they seem to look at me How I would like to have one of them; for the first time think of my gun, and they are gone; console myself with the thought, well I did not come hunting!

Proceed to the top of the mountain; am repaid for all my trouble; can see the ocean and everything else for a hundred miles around.

It is getting late, I must start back. Shaped my course toward my horse (southwest by west half west a little westerly) and crowded all sail. After going far enough to reach my horse, find myself entirely of my course; get excited, thinking of a night in the mountains, rattlesnakes too, and no antidote with me; commenced making tremendous bounds, in every direction; soon found that I had been "carrying a heavy press of canvas," but "sail was coming off of me fast;" coat, pantaloons and garments of a lighter texture (to say nothing of the cutaneous covering), were hanging about upon the bushes, in small pieces, signals of distress.

I at last stopped and recovered my presence of mind again, went deliberately back and shaped a new course. This time found my horse easy enough, and late at night arrived home safe, but as ragged as Billy Barlow; wife said I looked like one of the last of the Bare-uns.

On inquiry afterwards found I had ascended Mount St. Helens. There was formerly a copper plate with the name and an inscription, placed, a number of years since, on the top of this mountain, by the Russian authorities; but some vandal, fearful, perhaps, that they might claim the mountain and carry it off, has taken the plate away.

"Satis Superque," WASH.

WILLARD'S PATENT SEED-SOWING AND HARROWING MACHINE.

THE machine illustrated by the above plate, is intended for broad-cast seed-sowing and harrowing in. The grain to be sowed is contained within the two cylindrical holders, A A; both revolve upon a common shaft, I. Motion is given to the shaft by belts and pulleys, which connect with the hubs of the wheels (cast iron) of the cart. The slides, C, cover in the plate, triangular apertures in the cylinder, and are connected together by a wire, through which, when opened by moving the slides, the grain escapes and falls to the ground. The quantity escaping may be adjusted by moving the slides, to enlarge or contract the apertures in the cylinder, thus accurately regulating the quantity of seed to the acre. H is a revolving harrow, for pulverizing the soil and covering the grain. It is attached to the rear of the machine, and receives motion by a chain connected to a pully on the outside of the wheels, as shown in the plate.

The chain being cross-banded, gives a reverse motion to the harrow from the onward motion of the wheels.

The machine is provided, if required, with another set of smaller cylinders, for sowing grass, clover or *Alfalfa* seed, which may be attached at pleasure, if it is required to seed and sow at the same time.

For further information with regard to the above machine, address Dr. H. HEWITT, care of Warren & Co., FARMER Office, 130 Washington street, San Francisco.

Cultivation of the Alfalfa.

Letter from Gov. Bigler, in Chili, to Samuel Norris, Esq., of Sacramento.

RANCHO DE PASSO, January 2d, 1858.

MR. WARREN: Dear Sir: Feeling considerable interest in regard to the cultivation of the Alfalfa in Chile, and thinking that any information in relation to it would advance the Agricultural interest in this State, I requested Mr. John Bigler to inform me in regard to the manner of its cultivation. To my request he has written me a long letter upon the subject, a copy of which you will find inclosed.

You will please give it a place in your paper.

SAMUEL NORRIS.

SANTIAGO DE CHILE, Nov. 15, 1857.

SAMUEL NORRIS, Esq.: Dear Sir: In compliance with your request I have made many inquiries in relation to the cultivation of Alfalfa in Chile. In this country Alfalfa is cultivated, less or more, by all engaged in farming. It is generally irrigated, and when well watered and attended to will produce four, and some say as many as six or seven crops within the year.

It grows very rankly, and sometimes as high as five feet. It is said to be quite as nutritious as California wild Clover, and will certainly yield four times the quantity to the acre.

It takes very deep root, if left in the ground over three years; but even after having been in the ground as much as four years, the sod can be easily turned over with a prairie plow and two yoke of cattle. I think that Alfalfa can be cultivated advantageously in California, if attended to, as is the red Clover in the Atlantic States. In Pennsylvania the red Clover is sown among the rye or wheat in the spring of the year, and the year following produces a crop. After cutting two or three crops of Clover the ground is turned down again, and sown in wheat or planted in corn; the Alfalfa can be profitably cultivated in the same manner in California. The roots formed after two years' growth, or even three, can be easily cut with a good plow, and turned under without much difficulty. The Alfalfa when growing, or soon after cut, is the richest looking grass I have ever seen in any country, and is devoured by horses, mules and horned cattle, with great eagerness.

I find that the seed of the Alfalfa is scarce, and cannot be easily obtained clear of the seed of several kinds of weeds common in this country. I have thus complied with your request, and given you all the information I could obtain in relation to the cultivation of Alfalfa in Chile.

Very truly, yours, &c.,

JOHN BIGLER.

THE shipment of treasure, on Tuesday, by the John L. Stephens, was $1,966,636 45—the number of passengers only 181.

THE amount of the Stamp Tax paid into the State Treasury, from July 1st to December 31st, 1857, amounts to $53,023 21.

STATE LIBRARY

Letter from Mrs. Eliza W. Farnham.

Good news from California at the East..The good influence of the CALIFORNIA FARMER *there..Their disbelief of our climate and productions..The desire of Californians to return..The great desire of many persons to come to California, and the difficulty, on account of high price of passage on the Mail Steamers..The Gallery of British Paintings..The Greek Paintings by a Lady..Rosa Bonheur, called "The Horse Fair," Painting of it..Exhibition of Mayor in New York..Compliment to the Vigilance Committee for their triumph..Tribute to California for honesty in paying the State debt, and its good influence abroad..Caution to all newspapers who praise and flatter politicians and office-holders, whether good or bad, living or dead. The whole letter is of deep interest to Californians:*

NEW YORK, Dec. 2d, 1857.

EDITORS FARMER: If you ever saw the face of an old friend in a far-away country, a face that was freighted with good news for you, every hue recording something pleasant to your ear and profitable to your soul, you can judge how we, lost Californians, hail the sight of the FARMER. We read the delicious fruit items over, and say, with sparkling eyes and proud hearts, "Ah, that is the country."

We dilate, mentally, if there be no audience present, on the grain crops; and potato crops; and big trees; and grand Fairs; and gold products; and if there be a man or men, woman or women at hand, we relieve the pent up enthusiasm by a few words which astonish or provoke their unblessed apathy into expression. "Oh, you are insane with regard to California," say they; "clean daft, we never expect to hear a reasonable word from you about it."

That, retorts the exile, is because of your benighted ignorance. When you have never grown a California crop, how can you know its wealth; when you have never trodden California soil, how can you know its richness; when you have never felt a California breeze, how can you know the freight of life it bears; when you have never seen a California sky, how can you know the glory of its deep, clear, tranquil blue! It is we who are wholly reasonable and sane, and you who are ——.

My friend S—— was moved by much eloquence in regard to that country, and intense disgust with extreme caloric, cold and corruption here, to consider the feasibility and desirableness of moving thither. He had a wife and four children, three splendid girls and a son; each one of whom would have been a treasure in any neighborhood of your State—our State, I intended to say. He came to the city to see what the expense of going would be, and the second day wrote back to his family that they must no longer think of California as a future home, for it would cost more to get there than to buy a large farm in one of the Western States. Comment is unnecessary; and besides, could not be very graciously made by any true friend of the State.

In this crisis, had there been any reasonable means of getting to San Francisco, you would have received great numbers of good citizens from the East; people who were broken up and had to look for new homes somewhere. It is cheering in the midst of all the discouragement that has bent every body to the earth here, to get good tidings from anywhere, and yours come with especial welcome to our pride as well as our affection for the land they speak of.

The lovers of Art are now enjoying a rare treat for America, at this time. There is on exhibition in this city a collection of French Pictures, a gallery of British Paintings, and separately, the great work of Rosa Bonheur, the Horse Fair. Indisputably this is *the* picture of the day, though painted by a woman and though the study is so purely an out-door one. Thank God, the women are getting out of the cabinet and *boudoir* for their subjects, when they have an inspiration to do something. Never was such a *mass* of rollicking, snorting, rearing, plunging, willful and vicious life put upon canvas by any masculine hand, as this lady hath portrayed in this group of brutes: some mounted by figures equally well done with themselves, some led by cautious or confident hostlers, and some, like certain animals whose acquaintance we have aforetime enjoyed upon the plains of California, defying both riders and hostlers, and incontinently showing heels when they should be showing points and paces. It is a picture to rejoice in, to draw inspiration from, to make the basis of grand and glowing hopes for our own sex, in the divine world of Art. Rosa Bonheur is only a representative woman. She speaks to-day for the future of womanhood, which has not in all the ages, ever had such a promise as now is made for it. The painting is owned by a gentleman in Hoboken, who, it is said, paid $4000 for it, and has been offered $16,000. It is cheering to see that the wealth of the country is coming to such liberal uses, and that we can *produce* as well as *buy* fine pictures; as witness Church's Niagara, which went abroad last spring, and has received the most liberal praise at the hands of jealous foreign critics—liberal that is, if just praise can ever be so called, for the picture was powerful, true and noble, the only one painted that was worthy the subject. It is being engraved in England.

You will see by the papers how narrowly the city has escaped the perpetuation, through another year, of the infamy of the last three. The election for Mayor yesterday, under the new Metropolitan law, was a triumph which the friends of order and decency breathe more freely for having achieved, though they only carried it by a vote of 2500. The wonder is that a man of such character as the defeated candidate should dare to run, and that he should come so near succeeding. It is a sad commentary on the soundness of public opinion, that despot of Republics. But for this toward event, New York would have needed and have had a Vigilance Committee, before another December came around. So say, at least, some of her gravest citizens. That was a noble lesson which California taught the old States last year, and one feels proud at hearing honorable and appreciative mention made of it by good and thoughtful men here.

We hope you will keep all that it won for you, and add to it, yearly, a record we shall never be ashamed to read anywhere. All that our State wants, to make it the most desirable home on the face of the globe, is a civil history from this day, worthy the manhood of Americans. Preserve that to her, and her future will surpass our conceptions of those great elements of a State, wealth, power, and freedom. Keep up in public life, the standards by which men can live and grow in honor and self-respect, as a Commonwealth, and you will have fewer departures from them in private life.

One feels here, jealous and zealous for the honor of California, as for one's own family; and so we jubilated, in quiet ways, over your majority "to pay the State debt." "Accuse us again," we said, tauntingly, to the slanderers, "but while you are doing it, show us, if you please, another State that has done so nobly for herself as California has, in the last eighteen months, by her Vigilance Committee, and her election to pay the illegal debt"

One word of caution, Mr. FARMER, and I have done. You have yet some bad men in office in California. When death comes to relieve you of them, as he good naturedly does, once in a while, don't let him transform them from living ruffians and debauchees, into *gentlemen*—from ignoramuses into scholars, and from corrupt placemen, into patriots and noblemen. It is astonishing how instantly and greatly death magnifies the infinitesimal virtues of public men. I have known him make heroes of arrant cowards in a single day, and honest men of the veriest rascals, in the twinkling of an eye. We exhaust ourselves praising men dead, whom, alive, we warned our sons and brothers against. I do not see any great merit in a bad man dying in office. It may be very convenient and suitable that he should do so; the most suitable thing perhaps possible to him, except leaving his place to a better, without awaiting that dismissal. But we are guilty of something worse than folly, I think, when we pour out eulogy upon a man whose vices we abhorred in life, and whose memory in death has only their bad odor clinging to it. E. W. F.

[For the California Farmer.]

Poteen, Postmasters and Expressmen.

MESSRS. EDITORS: At our friends Messrs. McCray and Rivercome's we get excellent whiskey toddies. It is undeniably true. Dispute that fact, and the whole superstructure of my communication falls to pieces. Just listen. It was only the other evening that I had the good fortune to be seated at the comfortable stove in the bar-room of their highly respectable hotel at Millerton, along with a number af the steadiest fellows in the world from Temperance Flat. They had come to town for the express purpose of receiving good news from the old folks at home, and also from their friends in San Francisco and other places; and as not one of them had received a single letter, they had come to the conclusion of hunting me up, as the most reliable penny-a-liner in our quarter, for the purpose of having their private grievances brought within public notice. As I have the same respect for miners which every other good Californian has, I listened to their several tales of expectation and disappointment with becoming decorum, and drank their healths again and again, singly and collectively, as each man treated in his turn, besides taking a closing night-cap to wind up with, to the tune of "better luck next time."

Now, Messrs. Editors, let me ask you, do you think it was owing to the inspiration of some homely Muse, whose words are not sufficiently important to be translated out of the original prose into halting rhyme, or to the whiskey toddy, or to some other spiritual influence—or was from mere accident, to be accounted for according to the doctrine of chances—that I had a wonderful dream that night?

I was in the hotel again, with all my friends of the evening about me, and a number of others, whose names I do not recollect to have heard mentioned before in this place, but who were so bent on talking that not a single one of our miners could edge in a word for them. We had converted one of the billiard tables into our festive board, and they had done me the honor to make me chairman on the occasion. I really felt comfortable as I looked into the deep, old-fashioned punch-bowl before me, reminding me of olden times in a distant land; and also proud to find that, as I ladled about the inimitable mixture, every eye was glistening with delight, and for a time all minor considerations overlooked.

But business is business. As well as coming to the resolution to "taste the barley-bree," we had concluded to have the *questio vexata* of mails and expresses brought under consideration, and consequently, on the motion of Mr. Boulderflint, a quartz-miner from Kern River, with three strokes of my toddy-ladle I called the meeting to order.

Mr. Boulderflint, who seemed a man of considerable importance (at least in his own estimation), spoke warmly on the subject. He commenced by saying that we had been shamefully misused in regard to our letters and other matter, not only from the absence of proper supervision over this important branch of the domestic duties of the government, in securing to us the certainty of communication with the Atlantic States and Foreign Countries, but, what was less excusable, in the careless manner in which the business of the department was conducted in our own State. He pointed out the conviction in the public mind of the unsafe character of our mail arrangements, the round-about course the mail sometimes had to make, and the unnecessary length of time it frequently took to have a letter at its destinatton; and concluded by saying, that, although sending by express involved more expense, he saw no other way in which a person who valued time, and the proper dispatch of business, could communicate with his friends at a distance.

He was followed by Mr. Bluenose, whose whereabouts none of the company seemed to know anything about. Mr. Bluenose said that he lived away up in the mountains, among a lot of boys of the right sort, who were determined to stand this sort of thing no longer. He complained that not one-half of his letters reached their destination, whether far or near; and as to newspapers, the few he did get were in such a tattered condition, owing to previous perusal, that they were perfectly illegible, and seldom received sooner than a fortnight after the date they should have reached him. He said the boys in his diggings had resolved on club-law, and were determined in future to use the cudgel on the nearest postmaster, whether he were guilty or not; as by so doing he was sure either to resign, which would not make things a bit worse than they were, or find out the guilty parties for the purpose of saving his own bacon.

Mr. Barebone wished to call the gentleman to order. His conduct, he said, was perfectly unjustifiable, and he for one had his doubts in regard to how far the meeting ought to give credit to his statements. It certainly had a right to demand proof. If the gentleman meant to move resolutions on such a basis, he should certainly propose a counter-motion, that a committee of inquiry be appointed for the purpose of ascertaining the real facts, as his remarks contained some very serious charges. He believed Mr. Bluenose's object was to turn the legitimate business of the Post Office into other hands. He was informed that he was connected with an Express Company, and was not sure but he had been sent by them, on this occasion, for the purpose of making misstatements to serve their interest. (Cries of "hear!" "hear!") He had strong suspicions that whether such was actually the case or not, there were not wanting many who raised a deal of clamor about missing letters to whom their friends had never written. He did not see any reason for supposing that the Expresses were more reliable than the Mail. He considered postmasters were honest in their intentions; and if any newspapers were missing, that they had either never been sent, or else had been stolen by the rascally minions of the Expressmen. (Repeated cries of "order!")

The Chairman regretted that gentlemen should deem it necessary to use such strong language, and proposed that they should have another bowl of punch before they said another word on the subject; which was unanimously agreed to.

The punch being discussed, the Chairman proposed that they should proceed to discuss the other matters before the meeting.

Mr. Barebone again rose: "I fully appreciate," said he, "the sensible manner in which the Chairman conducts the business of the meeting; but I tell you, gentlemen, I am not sure even of him. Is he not in some measure connected with the Press? Is not the whole tribe too partial to the Express folks? and are they not repeatedly telling us of favors received from gentlemanly Expressmen, who do their business gratuitously, but ours at such a high premium? (Discordant cries of "Hear! hear!" "Yes! yes! yes!" "No! No!" and "Order.") I say, Mr. Chairman, I am in order. I am an American citizen, and I only ask my rights, and I will have them. I am a working-man. I earn my living by hard licks, and I cannot afford to give two dollars for a parcel sent by Express, for which I would only have to pay two bits if sent by mail; or two bits for a letter, after my friend who sent it had paid one bit before, for which the mail would only charge three cents altogether; and I will not submit to it." ("Hear! hear!")

Mr. Bluenose said he considered Mr. Barebone small potatoes. He supposed if he sent his two or three bits, which he seemed to estimate so highly, to a bookseller in San Francisco, for the first number of the Atlantic Monthly, he would grumble if he were charged three bits more by the Express Agent; but was this not better than that it should be forwarded by mail and not received at all?

Mr. Barebone did not see what potatoes big or little had to do in the matter. If money was sent for a Magazine, and it did not come, there were evidently other folks who were smaller potatoes than he was.

Mr. Hardfist said he had listened to the arguments *pro* and *con* in regard to the propriety of sending by the Mail or by Express, and had heard with regret that those who ought to be the guardians of our rights were not above suspicion. He said he had lived long enough in California to come to the conclusion that there were many people in it who would bear watching; that the question did not appear to him to be one of the relative value of three bits and three cents, but whether rogues or honest men were to be countenanced and supported; that whether we sent by Mail or by Express ought to be entirely at the discretion of each separate individual, but that it was the duty of every one who respected his country to take immediate steps to prevent the evils complained of, and make the transmission of letters, packages, and money, perfectly secure by whichever of these means it was sent. He thought it only required a firm determination on the part of the people to accomplish this desideratum.

The gentleman sat down amid cheers so loud and continuous as to awaken me.

Was not mine a singular dream?

AGRICOLA.

MILLERTON, Dec. 15, 1857.

Useful Knowledge Respecting the Vegetable Food of Man.

DURING the early part of the winter of 1857, the Rev. H. Wood, of Lowell, Mass., addressed the distinguished Dr. S. L. Dana, requesting information relating to the cheapest and best kinds of food. The answer of Dr. Dana has been published in the Medical World; it is scientific—as might be expected, coming from such high chemical and physiological authority; and it also contains much useful information, little known to the community in general. We will endeavor to present the substance of its most important points, because we believe such knowledge should be circulated through every corner of the world, concerning, as it does, the welfare of every human being.

It has been laid down as a law of physiological chemistry that all food serves two distinct purposes: one part, for building the body, forms the blood out of which comes all the animal tissues; the other part forms fat, and furnishes the fuel by which the animal heat is kept up through the process of breathing. Food contains flesh, blood, and tissue formers in proportion to their amount of nitrogen. When chemistry, therefore, determines the amount of nitrogen in any kind of food, it expresses the relative value of that food for these purposes. The starch, gum, fat, sugar, and water, and occasionally a portion of woody fiber or grain, rarely ministers to the wants of nutrition. These substances are the fuel formers, out of which fat may be formed, which is as essential as blood. Ten parts of fat are equal to twenty-four parts of starch, grape, and milk sugar in heating power.

Life cannot long be maintained by any food that fulfills only one part of the process of nutrition. A man fed only on that food which forms blood and tissue soon dies of starvation, and so does the man that is only fed on fuel-forming food; and if a man is deprived of certain salts, such as common salt, compounds of sulphur, phosphorus, potash, soda, lime, magnesia, and iron, he cannot long survive. And even if fed on all these three classes of substances, he will die of starvation, unless allowed a certain proportion of ready formed fat, in addition to the fat that may be formed out of the other elements of his food.

Nature has taught us the type of our food, viz., milk. It contains the essentials of four great groups of substances on which nutrition in its widest sense depends. The elements of milk are, 1st, *Curd*, which is a blood former; it contains all the nitrogen and all the sulphur. 2d, *Butter*, which is fat. 3d, *Sugar*, which is a fuel former or heater. 4th, *Salts*—soluble and insoluble—the earth of bones, potash, soda, and phosphoric acid.

Such are the substances which Nature has prepared for our first food—a mixture of four groups of substances. To suit human wants, according to its age, we should imitate this best natural mixture of those substances designed as the food of man.

In vegetable and animal food there are substances representing those contained in milk. Dr. Dana merely alludes to those of fish and flesh, and states (which is something new to most persons) that the flesh of fish contains the same amount of nutrient matter, as the flesh of oxen. Albumen forms gristle, sinews, membrane, muscle, nails, and is found in the nerve tubes. Fat is a lubricant, assists to form cells, and it forms part and parcel of all the chemical changes which the body undergoes, and is required for more purposes than merely heating the body. Sugar never forms part of the animal tissues, but it performs an important office in the changes of all these tissues. It forms lactic acid, and contributes largely to the formation of fat.

The waste of anything essential to life, and all its healthy functions must be supplied by a like substance. Food, therefore, is nutritious just in proportion as it contains the elements, properly mixed, which go to sustain the body and supply its waste. What is the best and cheapest food for this purpose? This is a great question, and one respecting which much *reliable* information has been wanting.

Wheat, Indian corn, rye, rice, and buckwheat, are the principal grains used in our country for food. Wheat holds the highest place in the market, and its finest flour—that which is deprived of most bran—is the dearest, and the most admired. This cherished flour—the costliest—is actually the least valuable for food. The fat and salts of wheat reside chiefly in the bran, and the flour deprived of these, does not contain well-mixed nutrient matter.

Dr. Dana places Indian corn and rye above wheat for our food, and he surprises us by giving oatmeal the highest place of all—it contains the greatest amount of albumen, its starch is equal to that of fine wheat flour, and its fat exceeds that of any other cereal grain. Buckwheat and rice are poor articles of food: one pound of beans is equal to three and a half of rice or potatoes. Cabbage contains a great amount of albumen, but no fat, sugar, or salts, but it is excellent for mixing with other substances, such as potatoes, which contain these. Oatmeal cake, bean and pea soup, baked beans, Indian meal pudding sweetened with molasses, are the vegetable food, which he esteems to be the best and cheapest for common and general use.—[Scientific Am.

Oil of Male Fern—Tænia.

IN Guy's Hospital Reports, Dr. W. W. Gall has published a paper containing notes of *fifty* cases of tape-worm treated by the use of the oil of the *Lastræ Felix Mas*. In about the year 1830 Peschcir, of Geneva, proved the value of this plant as an Anthelmentic in several hundred cases. In 1852 Dr. Christison, of Edinburgh, published a paper on its use. In 1853, Dr. Chirtison gave the results of his experience with this agent in tape-worm in twenty cases, in all of which, with no exception, it led to the discharge of the worm after a single dose.

The experience of Dr. Gall fully confirms the experience of Dr. Christison. In each of the fifty cases, in his own practice, as well as in others under the care of his friends, the remedy proved effectual. The preparation used by Dr. Hall was the *Etherial Tincture of the rhizome*, in doses of from one and a half to two fluid drachms, in mucilaginous draught. The average time after the administration of the medicine, and the expulsion of the worm, was five and three-fifth hours.

THE POPPY.—A letter received at the Patent Office from Germany, says, the poppy is cultivated in southern Germany, to a large extent as a substitute for sweet oil. It has supplanted the use of the imported olive oil wholly in the country. It is further stated that the soil and climate of the New England States is highly suited for the culture of this article, and that might provide the whole Union with sweet oil and thus save a large sum of money, which goes to France and Italy.

HORTICULTURAL.

PARSONS & CO.,
FLUSHING, near NEW YORK,

OFFER FOR SALE an assortment of Trees and Plants which they have grown for the use of amateurs, and have prepared, by frequent transplanting and other modes, for success in moving.

They are of fine size and symmetrical form, and among them will be found

Standard Apples of fine quality.
Standard Pears, Plums, and **Cherries.**
Peaches, Apricots, and **Nectarines** on Plum stocks, and their own roots.
Dwarf Pears, of fine form, and ready bearing.
Gooseberries and **Currants,** stronants of the best sorts.
Raspberries, Fastolf, Red Antwerp, Easket, and other known sorts.
Strawberries, of all the best varieties
Native Grapes—Isabella, Catawba and other hardy varieties.
Foreign Grapes: all the well-known sorts, with some new varieties of great excellence. The plants are propagated from vines that have borne mildly for some years, and are known to be correct.

Great care is taken in the cultiva of Fruit Trees, and none but those of the best qualities allowed to be sent out.

The Ornamental Department

Contains trees of all sizes for lawns or streets, including ELM, SILVER, NORWAY, and SUGAR MAPLES, CATALPAS, LINDENS, TULIP TREE, CYPRESS, LARCH, WILLOWS, ASH, ABELE, ORIENTAL PLANE, and all the best varieties of deciduous trees.

It also includes EVERGREENS of each size for single planting, and of small sizes at low rates, from one foot upwards, for massing; among them are NORWAY SPRUCE, BALSAM FIR, AUSTRIAN PINE, HEMLOCK, WHITE PINE, SCOTCH FIR, and other varieties.

The best Shrubs include many fine varieties at low prices, for massing, of which the RHODODENDRON CATAWBIENSE can be particularly recomended for its fine evergreen foliage, showy bloom, and perfect hardiness.

The ROSES are cultivated in very large quantity, on their own roots, of all the most recent varieties, and to those who purchase in quantity, will be sold at greatly reduced rates.

The Exotic Department

Contains a fine assortment of CELLIAS, grown as bushy, rather than tall, slender plants, and also contains all the well-known varieties of exotic plants and many rare sorts, introduced from Europe, annually. These are all carefully grown for those who desire plants of symmetry and beauty.

CATALOGUES of all the departments will be furnished on application. Great care will be taken in packing, and trees will be delivered in New York and thence shipped as directed. v8-16-1f

LAWTON OR NEW ROCHELLE
BLACKBERRY PLANTS!!
PRICES REDUCED!

THE subscribers announce to the friends and customers that they have now
OVER SIX ACRES
OF THE
GENUINE LAWTON (or New-Rochelle)
BLACKBERRY PLANTS,
under cultivation, and in good condition.

They are therefore prepared to fill large orders the coming FALL and the next SPRING, at the following reduced prices:

One Thousand Plants	$125 00
One Hundred Plants	15 00
Fifty Plants	8 00
Two Dozen Plants	4 50
One Dozen Plants	2 50
One Half Dozen Plants	1 50

☞ Good Plants for setting, of a second size, will be sold at $100 per 1000 Plants, or $12 per 100 Plants.

N. B.—All Plants ordered of us will be taken up and packed with the greatest care, and under our own personal supervision.

Of the many thousands sent out by us last year, we have had very few instances of failure, notwithstanding that they have been forwarded to *every part of the country, and to California, with perfect success*, and the setting out has often been entrusted to unskillful hands.

Printed directions for setting and cultivating are sent with every package. GEORGE SEYMOUR & CO.,
v8-13 3m South Norwalk, Conn.

Established 1828.....Rebuilt and Enlarged 1856
BRIDGEMAN'S
HORTICULTURAL ESLABLISHMENT,
NOS. 876 AND 878 BROADWAY,
NEW YORK.

ALWAYS on hand, in season, a large and choice selection of FIELD, HERB, VEGETABLE AND FLOWER SEEDS; BULBOUS AND TUBEROUS ROOTS, Etc.

Every article appertaining to the business furnished at reasonable rates, and warranted as represented. The Seeds are grown to order by experienced cultivators, and fully tested before being offered.

For sale by the quantity, or in packages for retail trade.

*** Goods packed securely to go any distance. Orders by mail (with remittances) will be attended to with exactness and promptitude.

Catalogues furnished on application. v8-10 3m

Ornamental Shrubbery.

THE Greatest Variety in the State may be found at the
GOLDEN GATE NURSERY,
Corner of Fourth and Folsom streets,
COMPRISING
5,000 Monthly Roses, of 150 varieties;
2,000 Carnations, of 120 kinds;
500 Monthly Honeysuckles, of 8 varieties;
500 Acacias, of 10 varieties;
Laburnums, Arbor Vitæ, Myrtles, Euonymous, Silver Maples, Mimosa, Clematis, Cytisus, Eucalyptus, Lilacs, Jasmines, Mock Orange, Althæas, Spireas, Weigelias, Deutzias;

Ravenswood Fruit Garden
PLANTS.
WHOLESALE AND RETAIL.

Brinckle's Orange Raspberry,	$70 ₱ thousand,	$8 ₱ hundred.
Col. Wilder Raspberry,	do	do
Cushing Raspberry,	do	do
Thunderer Raspberry,	do	do

Linnæus Rhubarb, $50 ₱ thousand, $6 ₱ hundred.

ALSO,

Blackberries: New Rochelle or Lawton, Newman's or Thornless, $15 ₱ hundred.
Strawberries: Hovey's Seedling, Boston Pine, Large Early Scarlet, $6 ₱ thousand, $1 ₱ hundred.
Currants: Black Naples and Cherry, $10 and $12 ₱ hundred.

ALL the above plants of best quality; we cultivate most of them for market fruits.

THE BRINCKLE'S ORANGE RASPBERRY, for market or garden, is considered the best of all Raspberries: is unequaled in flavor and beauty; flavor is rich and vinous; and color beautiful bright orange: a very vigorous grower; hardy and exceedingly prolific.

The Cushing and Col. Wilder are the best for making jams, preserves, syrups, &c.

THE LINNÆUS RHUBARB is a new variety originated by Myatt of England, who also originated the Victoria, on which this is a great improvement in both *flavor* and *productiveness*.

Its flavor is deliciously aromatic and spirited, and it is entirely free from the toughness and stringiness which characterize the Victoria, but when cooked becomes a fine uniform pulp, like the most tender apple. The plant is a very strong grower, more productive than the Victoria, and very hardy.

We cultivate most of the above Fruits for market, and selected them from our Fruit Gardens, as the choicest varieties known. Brinckle's Orange Raspberry and Linnæus Rhubarb especially are of exceeding excellence.

Orders will be promptly attended to in the order in which they are received, and Plants packed in careful manner.

Terms cash. Bills payable on delivery of Plants to the agents, or order of the purchaser.

Our plants will be ready to ship any time between the first of November and first of April. Circulars with full description of varieties and testimonials, can be had at the office of the California Farmer, San Francisco.

FREEMAN & KENDALL,
RAVENSWOOD, L. I. NEAR NEW YORK,
54 William street, New York City.

"We have visited Messrs. Freeman & Kendall's Fruit Gardens, from which they are now offering to sell Plants; and we can say their Plants are of very superior varieties and well grown, the Orange Raspberry and Linnæus Rhubarb particularly; we take pleasure in recommending them to the public."

T CHAMBER OF REST.

BY FLORENCE PERCY.

[It is with great pleasure that we lay before our readers, in the first num ber of our new volume, the following beautiful production of distinguished Florence Percy, "a star in the East," one w brilliancy has often illuminated the poetry of the present a

We are happy to announce that Florence Percy will often honor this Corner of the Ladies' Department hereafter. The pr appearance of this gifted writer in our columns, only irms the stronger our belief in the doctrine that "behind thud the sun's still shining;" for it will be recollected that, s months since, some little controversy was had with some ur cotemporary journals, relative to the writings which peared in our paper over the signature of Florence Percy that little squibbing of said journals, however, has only s as a means of opening the way by which we have now ired the honor of contributions from the original Florence ercy.]

I had wandered rom morn till the twilight was grey,
In a lonely wearisome quest,
When I came love-lighted home in my way,
And the dear ; who dwelt there, besought me to stay
With pleading warm that I could but obey,—
So they led by slumber oppressed,
To a dear littlem, which I think of to-day,
As the Beau Chamber of Rest.

For it seemed hough angels, in visible form
Kept watch the travel-worn guest,—
And though thk midnight was frantic with storm,
All bright withi's atmosphere, rosy and warm,
Was the Beau Chamber of Rest.

How soft was low couch's draping—how light
Its weight on dream-laden breast!
And the loose ped curtains, so snowily white
Mocked the ror the tempest that raged in its might,
And shut out tormy and boisterous night
From the Beau Chamber of Rest.

And when the morning was gilding the skies
I heard in m mbers so blest
A gentle voice muring sweetly "Arise!"
And I woke fr my dream with a joyous surprise,
To meet the soldiance of loving blue eyes
Whose smiling t formed to a bright Paradise
The Beautiful mber of Rest.

Ah me! by and when my life-dream is told
And I cease fr its wearisome quest,
Then slumber's arms will my weary frame fold
In the chamber t waits for the young and the old,—
But the room wil dark, and the bed will be cold,
And the pillow dreamlessly pressed,
And the curtains g damply, all covered with mould,
In that, my last amber of Rest.

But though long ony eyelids the death-slumber lies,
I shall wake to supiness blest,
If the bright morn angel who bids me arise
Have the dear lovin voice, and the dewy blue eyes
Which woke me th morn with a joyful surprise,
In the Beautiful amber of Rest!

Yung America.

HAVING been favored with a copy of "Yoog America," a very spirited semi-monthly periodhl published at th Collegiate Institute at Benicia, by the young gentlemen there, we have e-rused its pages nd found much to commend ad approve. The number sent is very neatly pri—no, *pendyped*, that is the style. The present copy is Number 8, of Volume III., and of sily pages. The work is neatly bound together wh tri-colored ribbons, and upon the cover a Goddess (a beatiful woman of course), holding in e hand a evergreen wreath, in the other the scess of Justice; the American Eagle sits perched upon the American shield of Stars and Stripes, holdg in his beak the motto, "Justice and Impartiali." Round the head of the Goddess is a circle of sts, while above are placed a group of banners, wh the temple and column in the centre. The wk bears the name of H. F. Hastings, Editor. As a whole we esteem it a very happy emanation fr one of the best institutions of our State, mt happily executed, reflecting great credit upon .

We have extracted one of the articles, and shl give it the name of the

Gallant Criticism,

for like all literary works, we notice the rival springing up between Young America and literary work from the Female Institute near b, but we hope nothing *serious* will happen, at lea nothing more alarming than a—rriage:

Mr. Editor! It appears that our cotempora the Wreath has been making the Young Ameri the unworthy object of its attention lately, a as a natural consequence, has picked several flaw or thinks it has, in our composition, gramm spelling, &c.; *of course it is all right.*

We are very sorry indeed to have incurred t displeasure of the Wreath, in such a manner, to warrant its making public our manifold ir perfections, mistakes, &c. Having always h the greatest respect and veneration for that u exceptionable sheet, it was with no little surpri and horror, that we heard of Young America, being the subject of such unerring criticism.

As I said before, however, we are very sor indeed, that we did not know that *which* was n used in referring to boys, or that "which boy (that is, if I remember rightly, the manner which it was written), was not correct, we ha always supposed that *which*, in that case, was definitive adjective, and showed what boys we spoken of; but thanks to the timely assistance the Wreath, we have discovered our error, an next time, it being willing, shall write it "*wh* boys." The unfortunate object who spelled green g-r-e-a-n, is doubly to be pitied, since to his dis may and chagrin he has discovered that he has been spelling *reading*, r-e-a-d-i-n-g, while the proper spelling is r-e-d-i-n-g, it being written thus in one of the Programmes of Exercises at the Seminary; also, that *oblivion* was spelled ob-liv-i-an.

It is owing probably, to our having none but Webster's Dictionary at our school, that we have made such unfortunate blunders; and I think that it would be a good plan to appoint a committee of three, to wait upon the young ladies, with an humble petition for the name of the dictionary which they use, as by its acquisition we may perhaps be able to spell correctly by next examination.

As we have a paper the personification of self-conceit, ungrammatical sentences, misspelled words, &c., it is not to be wondered at, that in the sentence, "the fibers of which the wick is composed," we should express it in that manner, while according to the Chemistry class, it should be expressed, "the fibers of which the wick are composed." We have also been informed by those "most perfect" grammarians that "horse" is a pronoun, we are such stupid dolts that we did not discover that before. The digestive apparatus of Alexis St. Martain, must have been unusually strong to be in working order, after a cannon ball had torn its way through him. We had, *erroneously of course*, supposed that it was the breech-pin of a gun which did the mischief. We would respectfully inquire of the Geography class, whether there are any fish in the commodious bay, upon which the city of Mexico is situated, and if so, would they inform us, what would be the probable cost of catching and barreling them up ready for market.

Now, Mr. Editor, I think it rather unfair that the young ladies should have the inspection of all our papers, in their primitive state, and that we should be debarred the privilege of inspecting theirs; even when we see a composition, it has been under the hands of their preceptress, so that there is but small chance for criticism.

When we unwittingly made the remark, that the Wreath had stopped operations, such was the case, it being near the end of the term, and in pure fun there was placed after the statement a supposed cause, not with the intention of jarring, in the slightest degree, the social relations which existed, and I hope still exist, between the Wreath and Young America. We however acknowledge *her* superiority and humbly bend our knee to solicit forgiveness for past transgressions, and hope that now and hereafter the Wreath may occupy a position above the Young America, thus forming a pleasing union of beauty, intellectuality, strength and courage. I remain, yours, ABRIGO.

LINDSEY'S
Double Acting Rotary Force Pump.

THIS is a new Pump, patented in America and England in 1855, and for Cisterns, Wells, Mines, Engines, Railroads, &c., has no rival: in that it works easier at great depths, discharges water at different hights, can be used for a hose, is made entirely of wrought and cast iron, without suction or packing, simple in construction, easily put in, not likely to get out of order, will last for an age, and is cheaper than any other Pump. It has a wrought iron pipe, side gearing and balance wheels, with everything complete to raise water by hand, from one to one hundred feet; and costs, boxed and shipped, from $18 to $60.

It must stand in the water, and will not rust.

Drawings and a full description sent to all parts of the world, free of postage, by addressing the general agent.

The Collegiate Institute at Benicia, Cal.

THE School Year at this Institution, is divided into two terms of five months each. The Sessions will open on the 4th of January and the 5th of July; closing on the 4th of June and December.

To the Patrons of the Institute we would say, that the facilities for obtaining a good education have been much increased this year. The range of studies will be ample, embracing the Ancient and Modern Languages, and a thorough course in the Physical Sciences. Neither are the accomplishments overlooked: in Piano and Vocal Music, we have the best Teachers in the State Thoroughness in the Elementary Branches, before advancing into the higher studies, will be a primary requirement. We shall continue to follow, in our government, school arrangements and method of instruction, the Normal School or Prussian system, which has been adopted in the Eastern States with so much success.

Pupils will be fitted for the University, or will be trained with a view to the completion of their education in this School, as may be requested by the parents. Where no special directions are given, the course of the Institution will regard the Modern Languages, Natural Sciences and Practical Avocations of life, as the sina qua non of a good education, and the Ancient Languages as accomplishments.

A daily account of recitations and deportment will be kept and sent monthly to parents.

The location of the School is easy of access from all parts of the State; the buildings are excellent; and the quietness and healthfulness of the village are unsurpassed by any place on the Pacific.

TERMS, PAYABLE QUARTERLY IN ADVANCE:

	PER MONTH.
Tuition in the Higher English Studies (including Natural Philosophy, Chemistry, Algebra, Geometry, &c,.	$ 8 00

SEED, PLANTS, ETC.

COLLECTION OF
KITCHEN GARDEN SEEDS.

THE favorable reports received from our customers in various sections of the country, respecting the superior quality of the FLOWER SEEDS contained in the assortments sent out by us for the past three years, have induced us to adopt a similar plan in putting up

VEGETABLE SEEDS,
In Collections for Large and Small Gardens.

The Seeds for the following have been selected with great care from the best varieties in cultivation, and can be recommended to all lovers of good vegetables.

The collections are offered as follows:

No. 1—*Complete Collection*—Sufficient for a large Garden for one year's supply—comprising 12 quarts of Peas, of the very best sorts for succession; 6 varieties each of Beans, Cabbage, Turnips, Corn; 4 varieties each of Lettuce, Onions, Radish, Muskmelons, Watermelons, Cucumbers; 3 varieties each of Tomatoes, Cauliflowers, Celery, Broccoli; with a full supply of Spinach, Beet, Carrot, Cress, Parsley, Parsnip, Salsify, Egg Plant, Peppers, Endive, Rhubarb, Sweet and Pot Herbs, and many other sorts of culinary and vegetable Seeds in liberal quantities.....$10 00

No. 2—*Complete Collection* for a moderate size Garden, comprising 6 quarts of Peas, and most of the other varieties in proportion.....$5 00

No. 3—*Complete Collection* for a small Garden.....$3 00

The quantities included in the above collections will be found detailed at length in our new Vegetable Seed List, which will be issued about the 10th of January, 1858, and sent to all applicants.

N. B.—The Seeds will be carefully packed in tin, and forwarded by Express, or otherwise, as the purchaser may direct. B. K. BLISS,
v8-23 1mis* *SPRINGFIELD, MASS.*

To Seedsmen, Planters, &c.

THORBURN'S Preliminary Wholesale Priced List of **Vegetable and Agricultural Seeds, Dutch Bulbous Roots, Double Dahlias, &c.,** for the Fall of 1857, is just published, and will be mailed to dealers and others requiring seeds in quantities, inclosing a stamp for return postage.

This year's Seeds, so far as harvested, are of prime quality, generally abundant, and prices correspondingly moderate.

Great Collection of Strawberry Plants.

THE UNDERSIGNED WOULD INform all Cultivators of the Strawberry throughout the State and Oregon, that they are now prepared to offer them a collection of STRONG AND HEALTHY STRAWBERRY VINES, that have proved to be well adapted to our climate, and also have been fully tested as to their bearing qualities, by the splendid exhibitions of Fruit which they have exhibited throughout the season, in the markets of San Francisco. They now offer them to the public, with the assurance that they will not only prove equal to any plants offered, but superior, as their constant bearing qualities have so proved them, they having received the first premiums at all the Exhibitions thus far the present year. The subscribers offer the following kinds the present season:

THE BRITISH QUEEN.

This magnificent perpetual bearer has won laurels from all good judges of fruit, both as to its excellence of flavor, its remarkable size—often measuring five to six inches—and the abundant crop it yields, it has been generally adopted as one of the very best marketable fruits grown.

THE HOVEY'S SEEDLING.

Whatever may be said of other varieties, this splendid fruit should be grown in every collection. It is large, beautiful and delicious, and always brings the highest prices in the market. With the Virginia Scarlet as an impregnator a crop can always be secured.

THE LONGWORTH PROLIFIC.

This famous Strawberry is fully up to the great name it bears, and is one of the best varieties known. The Longworth Strawberry often measures five and six inches, and none more beautiful can be found.

THE EARLY OR VIRGINIA SCARLET.

This is the earliest variety, a great bearer, and should be in every collection.

The subscribers, having a very large stock on hand, can furnish plants in large quantities for making plantations, and for market, and persons wishing orders of from 10,000 to 25,000 plants will be dealt with on very liberal terms.

As the undersigned are fully able to supply the market, purchasers will do well to call at the office of one of the partners, on the CORNER OF SACRAMENTO AND DRUM STREETS, where specimens can be seen, and also at the Gardens at Oakland, where terms and prices can be known, which will always be the most liberal.

WOLF, LUSK & CO.,
STRAWBERRY PLANTATIONS,
Oakland.

N. B. Samples of the Plants can be seen at the office of the FARMER, where orders can be left. v8-16-3m

Seeds! Seeds! Seeds!

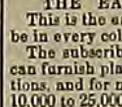
SEED WAREHOUSE.
No. 110 CALIFORNIA STREET,
(Established in 1850.)



THE undersigned, successor to the late firm of J. M. MOORE & Co., has constantly on hand, and receives by every Express and clipper ship from the Atlantic States and Europe, additions to his already large assortment of choice

Field and Garden seeds, Flower do., Fruits do., Tree seeds, Canary, Hemp, Millet, Rape and Maw seeds, Herb seeds, French Sugar-Beet seed, Chinese Sugar-Cane seed,

DUTCH BULBOUS ROOTS, and other FLOWERING ROOTS, BULB GLASSES, GARDEN TOOLS, &c. &c.,

which he offers to the Farmers and to the trade throughout the State on liberal terms. The old and wide-spread reputation of this House, of furnishing the best Seeds that can be procured in the Eastern States and Europe, is a sure guarantee that every article sold will prove true to the label, and will grow, if properly planted. Most of the Garden Seeds are raised and put up by the Shakers, at New Lebanon, New York.

N. B—Parties wishing small papers of Seeds for samples, can have the same forwarded by mail (postage paid), by forwarding the cash, at the rate of 25 cents per paper; also, packages of Flower Seeds forwarded through the mail at the same rates.

CATALOGUES furnished, on application, with prices attached.

For sale, wholesale and retail, by
S. W. MOORE,
Importer and Dealer in Seeds, &c.,
v8-19-3m No. 110 California st., San Francisco.

Alfalfa Seed.

THOSE who desire fresh Alfalfa Seed, can be supplied either at wholesale or retail. Sample bags of the seed can be seen at all times at our office. Orders or letters of inquiry, by mail, relative to the nature and cultivation of it, will be promptly responded to, and the seed shipped as directed. As this species of clover will soon be in great demand, orders should be forwarded early

☞ Orders for seed should be accompanied with cash, or payment by the Express companies on receipt of the order. WARREN & CO.

A. P. SMITH'S

POMOLOGICAL GARDEN
AND
NURSERY,

On the American River, 3½ miles from the Steamboat Levee,
SACRAMENTO.

THE Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of THE VARIETIES—embracing as they do

All Kinds FRUIT TREES,
SHADE AND ORNAMENTAL TREES,
GREENHOUSE PLANTS,
SHRUBS, ROSES,

And also an unusually fine crop of

GENUINE GARDEN VEGETABLE SEEDS.

All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,

Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:

From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.

We call particular attention to our splendid stock of

CHERRY TREES,

THE FINEST AND LARGEST IN THE STATE,

embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from these. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase their, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most RELIABLE SOURCES IN THE EAST, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being

CORRECT AS TO NAMES AND VARIETIES,

are as PERFECT AS IS POSSIBLE TO MAKE THEM.

In the department of

Shade and Ornamental Trees,

We have a very fine stock of all the leading varieties, some very fine extra large trees of the

ELMS, LABURNUMS AND LOCUST,

particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.

A very extensive collection of all that is rare and desirable.

The Greenhouse Department is quite full, and our really superb stock of

CAMELLIAS

is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,

Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, WARRANTED PURE and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish GRATIS to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.
v8-18-6m A. P. SMITH.

SANTA CLARA
NURSERY.

Half a Mile West of Santa Clara, on the San Francisco Road.

The Proprietor of this extensive and well-known Nursery, informs the public that he has for sale this winter, a large and very choice stock of the very best varieties of

FRUIT TREES, VINES AND PLANTS.

Consisting in part of

3,000 two year old Apples;
12,000 one year old Apples;
2,500 one year old Pear, on Pear stock;
2,500 one and two year old Cherry.

Besides a large stock of

PEACH, PLUM, APRICOT AND NECTARINE TREES.

Also a lot of

Fig Trees, Raspberries,
Currants, Gooseberries,
and about 20,000 Grape Vines.

500 lbs. China Sugar-Cane Seed,
At $1 25 per Pound;

One pound and a-half being a great plenty to seed one acre of ground.

The Proprietor will sell his Trees, Bushes and Vines as low as any other responsible nursery in the country. His stock is taken wholly from trees which have borne fruit in California, and is therefore known and reliable.

☞ All orders will be promptly attended to. The expense of packing and freight will be charged to the purchaser. Terms cash.
L. A. GOULD, Proprietor.
Santa Clara, Nov. 24, 1857. v7-22 3m

STOCKTON-RANCH NURSERY.
50,000 FRUIT TREES.

50,000 NURSERY TREES of the VERY CHOICEST Varieties, of the most important kinds of Fruit, raised under the personal care of the subscribers.

The Varieties consist of Apple, Pear, Plum, Cherry, Peach, Apricot, Nectarine, and all the needed kinds of fruit trees for the Orchard and Private Garden.

The undersigned having had the experience of years in England, and many years in the Nursery of Hovey & Co. of Massachusetts, need only say that they can warrant Trees to be what they are represented, and that they have taken pains to offer as choice a collection as can be be found in the State.

Purchasers are invited to visit the Nursery, as they may rest assured the quality of the Trees and the price will be sure to suit.

☞ C. W. LECOUNT, of San Francisco, is our only Agent. (23) B. S. FOX & CO.

HORTICULTURAL.

FRUIT TREES! FRUIT TREES!!

50,000

FRUIT TREES!

—AT THE—

SAN LORENZO NURSERIES,

FOUR MILES FROM SAN LEANDRO,
On the Stage Road leading from Oakland to Mission of San Jose.

THE subscriber would respectfully invite the attention of all those wishing to plant ORCHARDS, the coming Winter and Spring, to his extensive stock of FRUIT TREES, containing all the choicest varieties of Fruits congenial to our climate: comprising

APPLE, PEAR, PEACH, PLUM, CHERRY,
APRICOT, NECTARINE, FIG,
AND ALMOND TREES.

FOR SALE
AT REDUCED PRICES, AT THE
HOPE NURSERY.

THE Nursery is located second block northeast of the new Steam Flour Mill, on Seventh street, San Jose.

The stock consists of over seventy varieties, carefully selected. No pains or expense has been spared to obtain the best sorts, and to render these Trees what they are, THE BEST APPLE TREES, OF THEIR AGE, in California. D. T. ADAMS.
v8-23-3m

THOMPSON'S
SUSCOL NURSERIES.
Situated on the Napa River, at Suscol Ferry,
NAPA COUNTY.

THE undersigned wishes to call the attention of the public and patrons of these well-known Nurseries to the present extensive stock of

FRUIT AND SHADE TREES,
GRAPE-VINES, etc;
Also a choice lot of *GARDEN and GREENHOUSE PLANTS, ROSES, SHRUBS, &c.,*
Comprising all of the Very Best Varieties of Cultivated Fruits, such as
APPLE, PEAR, PEACH, PLUM, NECTARINE, APRICOT, CHERRY, ALMOND, QUINCE, and FIG TREES, GOOSEBERRY, CURRANT, and RASPBERRY BUSHES, &c.,
Together with a large lot of
Nut-Bearing and Shade Trees,
Consisting in part of Black Walnut, English Walnut (or Madeira Nut), Shell-bark Hickory, Elm, Weeping Willow, Locust, Sugar and Silver Maples, &c.

Grape-vines of all the Best Foreign and Native Varieties.

The Fruit Trees offered for sale are all budded and grafted from the best, most approved and popular varieties now cultivated in the United States and Europe: all of which are growing, and a large majority of which have fruited in our own orchards and vineyards, under our own immediate inspection.

Our trees are of one and two year's growth from Bud and Graft, thrifty and of large size; all of which have been grown *without irrigation.*

We would call particular attention to our large stock of Apple Trees, which for vigor of growth and beauty of form, cannot be excelled in the State.

Our stock of Garden and Greenhouse Plants, Roses, Shrubs, &c., comprise all the leading varieties most desirable for beautifying private gardens and residences.

CATALOGUES containing a full list of all the varieties, with a brief description of each, together with their time of ripening *in this State*, will be forwarded either by mail or express, to all who are desirous of purchasing trees.

Orders from a distance will be promptly attended to, and carefully packed for shipment.

Our prices will be as low as *reliable Trees, Vines,* &c., of like quality, can be bought for in any Nursery in the State.

Our terms are CASH on delivery of the trees at the Nursery or *approved* notes for a short time, bearing interest. Parties desiring to purchase can apply either in person or by mail, or by Wells, Fargo & Co's Express, to
S. THOMPSON, at the Nurseries.
Or to S. PERKINS & Co., corner of Second and M streets, Sacramento; DERBY & BALDWIN, Petaluma; GOODMAN & Co., Napa City.—*Agents who will show samples and receive orders.*

☞ The above-named gentleman are our sole agents, in whom the public can place implicit confidence, and all who may favor them with their patronage can be assured that they are not getting Trees from *Auction Houses* and *Peddler's Wagons.* 21-3m

The California Farmer.

SAN FRANCISCO, FRIDAY, JANUARY 8, 1858.

Letters and Exchanges.

Our correspondents are kindly requested to direct all letters to us at our principal office, San Francisco.

Those journals and periodicals with whom we exchange will much oblige us if they will be particular to note this, that we may be in receipt of their favors at earliest date.

The Glorious Eighth of January.

Our New Volume.

We feel this day a propitious one to issue our new Volume. Like the years of toil and struggle which were closed by the battle of New Orleans, so can we look back upon the toil and struggle through which we have passed; and we can say, with all faith and gratitude, the struggle has ended—the victory is won.

Four long years have we bent all our energies to the cause in which we are now engaged, and they have been years of toil and struggle, as was the contest which closed by the victory of the 8th day of January. But ours has not been a strife of blood; ours has been a work of "peace and good will. We commenced by throwing down weapons of strife; we beat our "swords into plowshares" and "spears into pruning hooks," and now we can look back upon a "glorious victory" achieved without blood and without strife.

During the four years past we can say we have never passed a harsh or unkind word among our cotemporaries. If we have occasionally "tilted the lance," it has ever been with the kindliest feelings—more in sport than in anger; and as we look back, we only remember the many kindnesses received. We wish success and prosperity to all; we labor to build up, not to pull down.

Our journal can never enter into the warfare of political and sectarian strife. We have no sectional or party lines, but strive to find the good everywhere, and the bright side is what we seek. We believe in the great power and ability of the Industrials to build up our glorious State; we labor with and for the WORKINGMEN of all parties, creeds and sections. The earnest, industrious and frugal workingman we love; over the whole State we find them; at their dwellings we have been welcomed; at their social board we have fared sumptuously. The *most sumptuous board* is that where the *generous welcome* gives a zest to the food. With the workingmen we have labored, and with them we will continue to labor; their interests are our interests, their prosperity our prosperity.

To those who have been our patrons we tender our sincere gratitude on the opening of the new year and the commencement of a new volume. We trust we shall continue to receive their kind coöperation, and in an increased ratio. We intend to labor with all earnestness, and to devote more means, more ability in coming years than we have yet done.

For the past time we have labored alone on this side, but now we have one by our side who will, like ourselves, do all that can be done to make the CALIFORNIA FARMER the best journal on the Pacific coast.

Steadily and surely have our subscribers and patrons increased, and we are proud to say our lists of patrons have swelled up fifty per cent. within the past year. We ask our patrons to examine this number, and judge if we are not worthy of their continued and their increased support.

Our aim will not only be to make our FARMER the true exponent of the workingman's interest, but the friend and advocate of happy homes—to build up and beautify home; and for this purpose we have secured and intend to secure the very best talent in the land for our "Ladies' Department," and to present all those arguments and interests that shall tend to strengthen the only institutions that can make California a happy or prosperous State—the Home and the Fireside.

As we have said, we have called in aid to this work. One who has labored with us and for us on the Atlantic side, is now with us. Side by side will we work for the objects we have named; and as we shall each and together have much to say in all our future numbers to our friends and patrons, we will now offer our closing sentence in the earnest wish of a prosperous and happy New Year to all our friends and patrons, and introduce one who shall speak briefly in this number for himself.

IT is expected when a new face appears at the editorial table, to hold communion with the readers of a journal, that matters not of an ordinary nature, but those of a personal, familiar and beneficial character will be presented.

The Junior Editor of the CALIFORNIA FARMER would come before the patrons of this long established journal, upon his arrival in a new country, with all due deference—with the most kindly feelings and most earnest wishes, yet with the most sanguine hope of a pleasing, happy and useful intercourse with those who are to make the great body of the Industrials of California.

A long separation from those near and dear to him; a sudden meeting; the living over again many scenes, whose changes have cast deep shadows, and death made cruel havoc; the union again of those whom a kind Providence has still spared to greet the stranger in a strange land—will be a good apology for that lack of interest which might otherwise have been expected from one who comes to take so responsible a post as the one assigned in this important journal.

To the new comer all is new and strange, yet it is grand, beautiful and interesting, and a little time will enable him to unravel what seems so wonderful.

To the kindness of friends of this journal, the co-workers in the good work, he will look for forbearance for a brief time.

Whatever may have been the discouragements of the past, or the clouds which have hung over this glorious State, both in her financial and business interests, we look to the future with more hope, for the bright side is yet to come. Glorious as she has been in her advances in Agriculture, she has not even commenced to enter upon the great field of enterprise to which she is so wonderfully adapted. Her works will be the best proof of her well-earned fame. When we look at her prospects in 1854, and contrast them with 1858, we behold her power. *Then* all was dark, and the field of experiment was a new one; *now* the sun shines upon her fair cities and towns—upon her majestic hills, where herds of stock are grazing; her valleys and plains, from which an abundant harvest has been garnered; orchards that have bent beneath the weight of luscious fruit; gardens even now filled with flowers redolent with perfume—while her presses have been running over with wine. "The earth is full of His glory," and abundance seems showered upon the land. Who cannot say, indeed, "Hail to thee, California—Garden of the world!"

The time has arrived when the public mind is directed to the great improvements within all the boundaries of our country. The cry is raised, Shall not Industry be made pre-eminent, and shall not the science of Agriculture be better regarded among us, and become among men an educated art? It is indeed a worthy subject for the energies of great minds. Much has been done for the cause of Agriculture by the leading governments of Europe even. Agriculture has made giant strides from the Atlantic to the Pacific shores. What can compare with the agriculture of California in the world's history?

The New Year has indeed opened upon us with smiles and sunshine. The cordial greeting of friends, the social re-union of kindred, dear as our only life, has given the assurance, that here in California, even though gold is the reigning idol, there is still blessed social enjoyment to be found. To those who so kindly greeted the stranger in a new land, we would extend our warmest gratitude; may their paths be ever strewn with peace and prosperity, and troops of friends gather around them in life's bright pathway.

"Hope on, hope ever," has been our motto, and with it we shall labor with confidence and trust. We throw ourselves upon the generosity of those who yet know us not, but shall know us. We will advance with true hope. Storms may hang around us, and clouds and shadows cover us through the mountains of life; trials and cares may assail, and lash their burdens on our shoulders, but amid it all, however severe, we will keep that hope, until upon our brow is placed the wreath of triumph. As our feet stand within the goal, and the Eden sunshine falls around us, among these glorious hills and valleys, we will look back to the past, and feel we merit that repose which surrounds us in our evening days.

With all the kindly greetings of the new year, we say—

"Let us then be up and doing,
With a heart for every fate;
Still achieving, still pursuing,
Learn to labor and to wait."

J. Q. A. W.

ACKNOWLEDGMENTS.—To B. K. Bliss, Seedsman, Springfield. Mass., for a very fine collection of Flower Seeds, put in unique packages, which have arrived in perfect order. From the long experience of the above well-known establishment, and their well earned reputation, we can with pleasure introduce their advertisement to our readers, and which will be found in another column. All orders sent will be promptly and carefully filled.

As this branch of business, particularly choice seeds, is assuming so much attention at the present time, we would invite the attention of our many readers to the advertisement of Mr. Bliss, in our new volume, and bespeak for him a warm encouragement.

To Messrs. Ellwanger & Barry, Rochester, N. Y., for a fine collection of Pears, which were sent to our Mr. J. Q. A. Warren, for exhibition in California, but the delay of the steamer, and the rapid ripening of the fruit on the passage, prevented their being received for exhibition, which we deeply regret. Messrs. E. & B. have our warmest thanks for this especial favor, which we shall take occasion to reciprocate.

To Messrs. B. & C. S. Haines, Elizabeth, N. J., for catalogue of choice stock. We have prepared notes of a visit to their Farm, by our associate editor, which will appear very soon.

To Hon. A. B. Conger, Waldberg, Rockland county, N. Y., for Catalogue for '57, of thoroughbred Stock, comprising some eight head of Ayrshires, twenty head of Shorthorns, and fourteen head of Devons—all carefully bred from the best sources. Several head of Southdown Sheep, Suffolk and Essex Pigs, from imported stock, are also included. A fine opportunity for those wishing stock, can be had, and we shall be pleased to show the Catalogue at our office.

THANKS—RECEIVED.—A number of very fine Melons were kindly sent us from Jas. Lick, Esq., of Santa Clara, for which he has our kind regards.

We received many kind invitations for the New Year, from various sources, both public and private—for all these we return our thanks.

From John A. Warder, Esq., President of the Cincinnati Horticultural Society, a Circular, announcing the preparation of a new work on Fruits. To the Pomologists of the country this is welcome intelligence, and we cordially extend our best wishes for its early appearance, when we shall notice it as it deserves.

Circular of the Alameda Collegiate Institute, of Alameda. The names of the Principal and Assistants are well known, and speak well for the management and government of the pupils. We shall refer to this Institute again.

Howard Park—San Mateo.

THE late residence of W. D. M. Howard, Esq., now the Estate of Mr. Geo. H. Howard, at San Matéo, can truly be named *Howard Park*. This is one of the largest and finest Estates in all California. We believe the grounds comprise six miles square, the entire area from the great stage road to the sea. Lawn, hill and dale, woodland and lake, it reminds us more of the beautiful Estate at Chatsworth (the Duke of Devonshire's grounds), than any we have met this side of England; and any person who has visited that noble Park will agree with us.

The mansion is large and in excellent taste, in keeping with the lawn that surrounds it. Here, as at Brookside, which joins this place, it is surrounded by large and fine native trees of the Bay, Holly and Buckeye; the former being now in blossom, and the fragrance is exhaled upon the atmosphere around to a great degree. Some space is devoted to a garden, but the chief portion of the front ground is given to the lawn. Since the decease of Mr. W. D. M. Howard, but little has been done in gardening, as the present owner, Mr. Geo. H. Howard, is more busily engaged in stock-raising, and who has recently imported some of the finest blood stock that has been brought to this country.

It will be recollected that Mr. H. returned from the East last year, and brought with him four splendid animals, two bulls and two heifers (Orion and Young Belvidere, Hopeful and Miss Nightingale.) These splendid animals all figure in the American Herd Book, as being awarded the best stock of the country, and will prove of great advantage to California, as will be seen by the stock that will speak for itself, from these sires, the coming year. Mr. Howard took premiums for this stock at the State Fair, the present year.

We saw the animals, and they are indeed noble creatures. Much is to be hoped from them, and if we had space would give the pedigree of each. We saw some very fine Merino sheep, also, at this place. Such exhibition of good stock is most gratifying, and we are glad to herald it.

Mr. Malone, who is the herdsman at Howard Park, showed us much kind attention, and afforded us all needed opportunity to view this valuable stock. We saw much else to admire, but must defer further remarks till a further visit to this famous "homestead."

Brookside.

This one of the most beautiful spots around the circle of San Francisco. It is the summer residence of F. W. Macondray, Esq., one of the oldest residents, and one of the most esteemed merchants, and we can say one of the most successful ones of the Bay City.

The mansion house at Brookside was erected for home comfort, in modern style, airy, spacious, and elegant. It stands back from the stage-road about 500 yards, embowered in a grove of native trees of the finest growth. The sweet bay, buckeye and holly-cherry border the San Mateo creek, that sweeps round from the left of the lawn to the rear of the mansion, giving it a picturesque appearance. The grounds in the rear stretch back, gradually rising, to the hills, while the beautiful lawn in front, the fruit garden on the right and the fine conservatory, with the other outbuildings, all erected with taste, give to the whole that peculiar pleasing appearance that a finished picture gives to the eye of an artist.

Our visit to this beautiful spot was a short one, yet we were there long enough to admire that excellent judgment which could plan and finish so charming a home. We regretted the absence of the proprietor, whose taste and interest for horticulture we have known and appreciated in the East many years since; and as we viewed the grounds, as we saw the collection of choice pears in the garden, the grapes, figs, cherry, peach and other trees; as we examined the fine grapery, we did not wonder that from this place came the *finest grapes that were shown this year* at the Mechanic's Fair, and at Stockton also.

We have never seen a finer lot of fruit buds upon young trees than we witnessed here recently, the cherry especially; down the entire branches, and even the body of young trees, were full clusters of fruit buds.

We most heartily approve the high state of cultivation of these elegant grounds, and we were also pleased to note the preparations of high trellises for training fruit trees; they must do well in this climate. The use of the muscle shells also upon this heavy adobe land, together with manure, is admirably adapted to enrich the soil and keep it malleable.

We observed a large and valuable collection of domestic fowls, dairy stock, and some fine Merino sheep. These all add to the comforts of home, and build up the industry and improve the resources of our State.

Mr. G. W. Mullen, the gardener, who very kindly and politely waited upon us, deserves great credit for the excellent condition of the orchard, conservatory and garden; it speaks well for him; and we think that next season the abundant crops will testify well for him and for this place.

Brookside is a most glorious spot, and we could envy the owner that home, were it not that we feel that one so public-spirited, and one that has done so much for California, richly deserves it. Long may he and his estimable family enjoy that happy home. Brookside is twenty miles from this city, and opposite the San Mateo Hotel.

APPLE SQUASH SEED.—Those desirous of obtaining this seed for their own use, or for presents to their friends East, can leave their orders at our office. The supply at present is limited.

Willard's Patent Seed-sower and Harrower.

In California the cost of labor is so much more than in the old States, that all labor-saving machinery will be highly prized, and with this view we shall always take pains to bring into notice all that tends to this desirable end. The preparation of the soil by good plowing is the first great step towards a prosperous harvest; next to plowing is the *pulverizing* of the soil by the harrow, to prepare it for the seed. When the soil is prepared, the next wise step is the quality of the seed and the manner of sowing, and for this purpose and to this end we are glad to introduce Willard's Patent Seed-Sower and Harrower, as one of the best inventions of the present day. From the testimony we find in the Scientific American, and from various sources abroad, we have been induced to procure an engraving of the same for the first page of the FARMER, where it appears.

In the last number of the FARMER we presented the subject of a Plowing Match to the consideration of the Executive Officers of the State Agricultural Society, as we believe great good will result from such exhibitions, and as we know every plow maker in the State would be glad to test the capability of his own plows. Should the Executive Board offer a plowing match, these *Seed-Sowers* could also be tested, and the various kinds brought to a trial, so that the very best could probably be known. The owner of the valuable machine presented in our journal this week is here, ready and anxious to test it before the public, and we sincerely trust the Plowing Match will be held as early as possible.

We have had a model of this Seed-Sower at our office the present week, and have tried it. We are fully convinced of its value, and we therefore cheerfully recommend it, with the following twelve strong reasons in its favor:

1st. Simplicity of construction and unquestioned originality.

2d. All metal except pole and axle, and consequently durable, and not likely to get out of repair.

3d. *Insures* even distribution of seed, and is independent of winds or foge, which often interfere with sowing grain.

4th. Its adaptedness to evenly distribute plaster, guano, ashes, lime or any other pulverisable fertilizer.

5th. Its perfect adaptedness to sow any given quantity of seed to the acre.

6th. The motion of the cylinders being governed by that of the hub of the wheel, the same quantity of seed will be sowed to the acre whether the wheels move fast or slow.

7th. The harrow being driven with about thrice the velocity of its driving pulley, and in the opposite direction from its forward motion, tears in pieces any stubble, sods or manure, leaving them behind, instead of drawing them into bunches, as in the common harrow.

8th. Having but about one-fourth of its teeth in the ground at the same instant—aided by the leverage of the pulley and the lifting tendency of the chain, as well as by the wheels of the cart—less power is required to operate the machine than the common harrow.

9th. The teeth of the harrow are screwed in, and may be lengthened or shortened at pleasure.

10th. It covers the seed as soon as it falls, thus avoiding the pillage of the birds.

11th. It is provided with another set of cylinders for sowing grass, clover or *alfalfa* seed, if it is desirable to stock down land to grass while sowing it to grain.

12th. It will sow and harrow in, from fifteen to twenty acres a day.

We have good authority for saying that, from causes before named, the yield of grain sowed by this machine will be from six to ten bushels more to the acre, than from *hand* broadcast sowing and harrowing in by the common harrow.

We can only say, in conclusion, that the machine will be shown over the State by the present holder of the patent right, Dr. H. Hewitt, whose card appears in our columns, and who has also left with us circulars giving full description of this valuable implement.

Grape Culture.

A thorough preparation of the soil for the growth of the Grape-vine, is highly necessary. In order to insure success, every means in the power of the cultivator should be brought to bear upon deepening and enriching the soil in the border or vineyard. A light, porous, virgin soil, made liberally generous with manures of slow decomposition, is the best.

Many who have limited practical acquaintance with the necessary requirements of the Grape-vine, err in selecting *wet* land for their vines. Because they require profuse waterings, in *certain* stages of their growth, it is no reason why they should be forced into contact with continued wetness. The vine suffers by being forced to stand in wet soil, where the vital energies of the plant are expanded in *resisting* the killing influences of continual dampness.

Soil light, dry, deep and rich, is what the want; and water, applied by artificial mean freely, as soon as the fruit commences its secon swelling. Attention at this time adds much t the size and bloom of the fruit. We have a article on the above subject before us, by on skilled in such matters, published some tim since in the San Andreas Independent, one of o most interesting interior exchanges—which, fro the apparent practical acquaintance of the writ with the subject, we will republish next week.

VANCE'S GALLERY.—If there is a true Artistic Galle in California, Vance's Rooms is that place. Aside fro his own very perfect and splendid pictures, there will b found oil paintings, engravings, and other works of Ar where a lover of the beautiful can spend an hour to ad vantage and with pleasure. To those who are desirou of obtaining one of the very best Ambrotypes, Photo graphs, or Daguerreotypes, it is but an act of simp justice to direct them to this artist, who is now admitte to be without a superior on the Pacific Coast, if we migh not also add, in the United States. Let visitors go to the Gallery—that will settle the question at once.

To Our Advertisers

It will be our aim to do as m good as is possible to those who give us th patronage; and as our circulation is large, continually increasing, and extends over a le space of country, we have it in our power great good for advertisers.

We have been obliged to lay o some large and valuable advertisements, both in the East and from this State, our space be more than full.

Our terms are *in advance*. e advertisements which came to us with promise of prompt payment (that promise being kept) are left out; by reference they be known. The wide extent to which we can make known any important business, we feel, will secure us prompt payment.

The San Francisco Post-Office.

We often hear the praises of the New York, Boston and Philadelphia Post-offices, their efficiency, dispatch, &c. Now, we believe we can boast of as good a Post-office in San Francisco as any part of the world. We have ourselves seen the postal arrangements of all these we have named, and those of all the principal cities of our Union; we have seen the great machinery of the London and Paris Post-offices, and we venture the assertion that for prompt efficiency, for dispatch, for quiet order and regularity, none can excel our own Bay City.

We have often been behind the scenes, and witnessed the workings on the arrival of the great Eastern mail and its distribution, and the regular departure of our up-river mails, and we aver that for system, our office cannot be exceeded. For all this desirable success the present Postmaster Weller and his able assistant and other aids deserve an honorable regard; and we were much pleased to notice the pleasing result of all this cheerful co-operation among those engaged in the Post-office, which was made known on Christmas day. On that day a very valuable gold chronometer watch, full jewelled, was presented by Assistant Postmaster Ferguson to Postmaster Weller. The gift was spontaneous, and was presented by Mr. Ferguson in an earnest and heartfelt address, as from him and all the clerks in the office, which was responded to in as beautiful and feeling a manner by Postmaster Weller. It was a sincere tribute to a worthy officer, and the whole matter was one of pleasing and permanent interest. We wish we had space to publish the address of each, for both were mementoes of truth.

What is It?

"WANTED—A man for Pruning; must be a good hand; wages $40."

Such is an advertisement which appears in a morning paper. Now, what *is* Pruning? Is it some wonderful species of promiscuous curtailing of vegetable limbs that requires judgment commensurate with the amount offered above; or is it a process requiring *skill*? Again we ask, *what is Pruning?* Will some practical man answer our interrogation? COM.

SAN MATEO HOTEL.—Among all the Hotels we have found in our country rambles, none have pleased us more than the San Mateo House, at San Mateo. There is at this place an air of neatness and quiet comfort that makes one feel at home. The rooms are in elegant order; fine parlors, airy chambers, well furnished rooms and clean bedding. This splendid establishment is indeed worthy a special visit, and it is a pleasant place for those who wish a pleasure retreat. Mr. Cook, the present proprietor, and his gentlemanly assistant, are prompt in attention to all their guests, and thus the House has become deservedly popular.

Our New Number One.

We shall mail this number to all whom we think will feel an interest in California—to many who are not yet subscribers, as a sample paper, and hope they will become subscribers; and thus help on the work of building up our State and stimulating the industrial and agricultural resources of our highly favored land.

We shall mail it to some who have been subscribers heretofore, with a wish that they may renew their subscriptions, and thus be in weekly receipt of that kind of information which is of more importance than politics, party or sect—and we trust a generous response to every paper we send out.

Our Festival.—As some of our cotemporaries have made a kindly mention of the honor done us by our friends on the 2d of January, and as we were greeted at our office by a glorious bevy of fair friends and their liege lords, beaux &c., we can only return our thanks to the fourscore that came, and say that we will endeavor next time to be ready for all our friends, and give all due notice. The surprise was a pleasant one, and we felt happy in finding our printing office resound with happy voices, and to greet faces beaming with smiles. We venture to say that never were there a fairer or brighter host assembled in a printing office on this coast. Diamonds shone, but bright eyes shone brighter. Our friends were happy; our typos were happy; our copartner in our labors was happy in this new union, and we were happy in seeing others happy; and God grant all may find it a happy beginning for a happy new year.

To Our Readers and Correspondents. Love! by Edith Montressor, will appear next week....The valuable history of Locusts and Grasshoppers, by A. S. Taylor, Esq., will be commenced next week....Manuscript copy from Alice, on file and will appear in No. 2....Lines addressed to a friend on receiving a Portfolio filled with writing paper, by Mrs. S. M. Clarke, will also appear in our next....

We have a mass of letters and communications, all of which will receive due attention.

During the session of the Legislature, the California Steam Navigation Company will dispatch a boat for Sacramento, every Sunday.

Retail Prices at Washington Market, January 8.

Poultry—Ducks, 50 to 75c: Canvass Back, $1 25 @ $1 50; Geese, $1 00; large do. $2 00 @ $2 50; Chickens, $1 @ $1 50, each; Turkeys, 40 @ 45c ₱ lb; Snipe, $2 @ $3 ₱ doz; Quails, $2 50 @ $3 ₱ doz; Hares, $1 each; Venison, 15 @ 25c ₱ lb.

Butter—75c ₱ lb; Cheese, 37½c; Eggs, 75c ₱ dozen.

OBITUARY.

"The lovely bud, so young and fair,
Called hence by early doom,
Just came to show how sweet a flower
In Paradise would bloom."

On the 5th inst, at Sacramento, suddenly, Florence, only child of Josiah and Addie Warren Howell.

That sweet child had looked upon our fair earth but one season, and the cold hand of Death caught it away. It was too fair, too beautiful for earth.

The sun ne'er shone on fairer flower,
Nor brighter bud was crushed by death;
Fond parents' hopes, in one short hour,
Have passed with that sweet child's last breath.

W.

NEW AND RARE PLANTS.

☞ WE HAVE RECEIVED several Cases of New and Rare Plants, and shall receive more by the next steamer, worthy of especial consideration. Catalogues of same will be found at our Office after New Year's day.

☞ **THORBURN'S Wholesale and Retail Catalogues of Dutch Bulbous Roots**, will be published on the 20th JULY, and will be forwarded to Dealers and others inclosing stamps for return postage.

J. M. THORBURN & CO.,
19-tf 15 John street, New York.

THE CALIFORNIA FARMER.
NINTH VOLUME.

Number One, of the Ninth Volume of the CALIFORNIA FARMER, is published THIS DAY, January 8th, 1858.

Contributors to the present Number, from the East, are: "Grace Greenwood,"
Mrs. E. W. Farnham,
"Florence Percy,"
"Rena."

Contributors on this side are:
Mrs. S. M. Clarke,
"Agricola,"
J. B. M., "Wash," and others.

We venture to hope that all who desire a "Home Journal" worthy the Pacific, will look at this Number: the above distinguished writers from abroad, with those who now are the regular correspondents here, will present, we believe, the best family paper in California.

☞ Sample Copies sent if desired. Price $5 per annum (by mail),—always in advance.

WARREN & CO., Editors and proprietors.

Sparkling California
CHAMPAGNE,

For sale, in lots to suit, by
SAINSEVAIN BROTHERS,
No. 188 Montgomery street,
v1-1 3m Basement of Pioche & Bayerque's Building.

SAN FRANCISCO.
P. T. JAMES, Proprietor,
v1-1 3m Formerly of the American Exchange.

Rare Melon and Cucumber Seed.

WE have received a few packages of NEW PRIZE MELON and CUCUMBER SEED, from Europe—worthy especial attention.
WARREN & CO.,
v1 130 Washington street (up stairs)

SPECIAL NOTICES.

TO FARMERS.

☞ 10,000 pounds of ALFALFA or Chile Clover, just received and for sale at 20 cents per pound—by the bag only. This is gathered from the latest crop. Apply to
S. BRANNAN,
v1-1 1m Corner Montgomery and California streets.

RARE SEEDS.

☞ WE have just received from the East some of the choicest FLOWER and other rare SEEDS, ever received in California; among them a small invoice of Pure LAWTON BLACKBERRY—the only lot in the country, and warranted fresh and pure, crop of 1857.

The collection was made by Mr. J. Q. A. Warren, and brought out by him on last steamer.

Also, opening, a case of FOREST TREE SEEDS—the finest assortment ever imported.

Those desirous of finding choice Seeds will do well to call at once at our office, 130 Washington st (up stairs).

NEW BOOKS.

☞ JUST received, from New York, several cases choice works; also, a complete assortment of Agricultural Books, to which we would invite the attention of our customers.

Frank Forester's Horse and Horsemanship of the United States, in two volumes; the finest work of the kind ever published in the country, can now be seen at our office, bound in different styles—Plain, and Turkey Antique. Having the sole agency of this valuable work, in California, we would invite lovers of the beautiful to call and examine the copies. Subscription books are now open, and those entering their names before the 20th inst., will receive this work at the earliest day. v1-1

☞ Six Reasons why Everybody Uses LYON'S KATHAIRON.—1st. It is the Cheapest preparation for the hair ever made. 2d. It is pronounced by all to be the Most Beneficial. 3d. It is the most Agreeable to use. 4th. It is the Cleanest and most Carefully Prepared. 5th. It is the most Highly Perfumed. 6th. It is the only article that never fails to give Entire Satisfaction.

The immense sale of the KATHAIRON—nearly 1,000,000 bottles per year—attest its excellence and universal popularity Sold by all dealers, everywhere, for 25 cents per bottle.
HEATH, WYNKOOP & CO.,
Proprietors and Perfumers,
63 Liberty street, New York.
PARK & WHITE, Wholesale Dealers,
1 1m *San Francisco, California.*

NOTICE TO NURSERYMEN.

☞ Parties who have ordered Nursery Stock from the Eastern States, to be forwarded by Express, should have made arrangements for the receipt of the same, or remitted charges, as all such freight must be prepaid without exception. Hitherto, a satisfactory guarantee from the shipper was considered sufficient—the charge to be paid at destination. Should any disappointment occur to our friends, this will be a sufficient explanation.
23 A. FROST & CO.

☞ **THORBURN'S Preliminary Wholesale** CATALOGUE OF VEGETABLE SEEDS, *of the present year's growth*, will be published on the 20TH JULY, and will be mailed to Dealers and others requiring Seeds in quantities, inclosing stamps for return postage.
J. M. THORBURN & CO.,
19-tf 15 John street, New York.

☞ **Wigs! Wigs!! Wigs!!!** — BATCHELOR'S WIGS AND TOUPEES surpass all. They are elegant, light, easy and durable.

Fitting to a charm—No turning up behind—No shrinking off the Head. Indeed this is the only establishment where these articles are properly understood and made.
v8-13 1y 233 Broadway, New York.

☞ **Dyspepsia Cured.**

Boston, December 6.

Dr. Geo. B. Green—Dear Sir: In reply to your question in regard to the action of the *Oxygenated Bitters*, I feel much pleasure in stating that from its prompt and decisive effect in alleviating and overcoming a severe and chronic case of indigestion and Dyspepsia in my own family, and from a knowledge of its wonderful results in curing several attacks quite as severe in other families of my acquaintance, I consider it a sovereign and infallible remedy in that distressing complaint, and would cordially and earnestly recommend it to all who may be thus afflicted.

Respectfully yours,
ISAAC DANFORTH, 17 South Market street.

The above certificate is from a well-known and highly respectable Merchant of Boston, and is entitled to the fullest confidence.

Seth W. Fowle & Co., 138 Washington street, Boston, Proprietors. Sold by their agents everywhere.
Agents—C. Morrill, cor. Third and K, sts., Sacramento; H. Johnson & Co., Washington st., San Francisco. 22-1m

☞ **HAIR DYE! HAIR DYE!! HAIR DYE!!!**
Batchelor's Hair Dye is the Best in the World!

GRAY, RED, OR RUSTY HAIR DYED INSTANTLY TO a beautiful Natural Brown or Black, without the least injury to Hair or Skin.

Fifteen Medals and Diplomas have been awarded to Wm. A. Batchelor since 1840, and over 80,000 applications have been made to the Hair of his patrons of his famous Dye. Prejudice against Dying the Hair and Whiskers is unjust, as it would be against covering a bald head with a wig.

WM. A. BATCHELOR'S HAIR DYE produces a color not to be distinguished from nature, and is warranted not to injure in the least, however long it may be continued.

Made, sold or applied (in 12 private rooms) at the Wig Factory, 233 Broadway, N. Y.

Sold in all cities and towns of the United States, by Druggists and Fancy Good Dealers.

☞ The Genuine has the name and address upon a steel plate engraving on four sides of each bottle, of
WILLIAM A. BATCHELOR,
v8-13 1y 233 Broadway, New York.

☞ **A. W. FABER'S LEAD PENCILS.**—Lead Points, Propelling Pencils, Colored Pencils, White Crayons, Black Crayons, Slate Pencils, Red Chalk, etc.

These popular Pencils can be had of Stationers, Fancy Goods Dealers, and others in the various cities of California.

Extract of a letter from the eminent artist, Chevalier P. von Cornelius, Director of the Royal Academy in Berlin, 27th Oct., 1842: "It is scarcely necessary to say that I find Faber's Polygrade Lead Pencils in every respect most excellent. They are of all degrees of hardness and shade, and adapted as well for fine and firm outline as for finished drawing. The wood which incloses them has the necessary strength, but yields easily to the knife, and the lead never breaks away."

Extract from the Official Report of the Industrial Exhibition of the German Federal States, 1844, 3d Vol.: "Especially have the Pencils of Mr. A. W. Faber set at defiance all competition, and supplied every desideratum that the Artist can expect or desire in this particular."

Extract from the Report of the Great London Exhibition, 1851:

On referring to the Report, page 450, it will be seen that the Jurors have considered A. W. Faber's Pencils deserving of a more extended notice than has been accorded to any other Pencil Manufacturer. The Report further states as follows: "A. W. Faber's Pencils are of the best description, and the prices extremely low. They are exported throughout the whole civilized world, the demand being created by their good quality and cheapness."

Beware of Counterfeits!

The reputation of A. W. Faber's Lead Pencils has not failed to attract the attention of certain individuals, who have either attempted an imitation of the same, or have undertaken the sale of a counterfeit article, which, though of a totally different manufacture and very inferior quality, are marked, some with the name of the genuine, some with the names, *W. A. Faber, A. W. Febre, A. K. Faber, C. W. Faber*, etc., and are disposed of as genuine Faber's Polygrade Lead Pencils.

Every person will please to examine carefully the stamps on each Pencil—"A. W. FABER"—and observe that each dozen bears on the label a fac-simile of A. W. Faber's signature; and and further, that every genuine Pencil sold in the United States, has impressed in the wood itself, "E. FABER, 133 William street, New York."
E. FABER, Sole Agent,
v8-2 6m 133 William street, New York.

NOW READY FOR SUBSCRIBERS.
Herbert's Great National Work
ON THE
HORSE OF AMERICA.
SOLD ONLY BY SUBSCRIPTION.

SEED, PLANTS, ETC.

SEEDS
OF FRUIT and ORNAMENTAL TREES.

THOMAS MEEHAN,
Proprietor of the Germantown Nurseries,
Germantown, Philadelphia, Pa.

Includes in his business the collection and importation of
Every Kind of Tree Seeds
That can be obtained in this country or Europe. A Price Current of over Two Hundred Species which can generally be obtained with certainty, is issued every May, in advance of the season of ripening, so as to afford purchasers an opportunity to forward their orders early enough to get them in prime season; fresh, and in the best order for growing.

Most of this year's crops of seeds are now on hand, and they will be sold at the lowest rates at which they can be collected. The supply of PEAR SEED is large this season, and can be supplied at $5 per pound, or $4 50 per pound when 5 pounds are ordered.

Cranberry Plants.

THE BELL OR EGG SHAPED VARIETY

IS the kind best adapted for cultivation on damp, loamy soil, also on wet bogs or poor land, where nothing else will grow. When cultivated, after two years, they often bear from
200 to 300 Bushels per Acre.
Price 50 cents per 100, or $4 per 1000 for Bearing Plants.

New Rochelle (or Lawton) *Blackberry Plants*, of the genuine variety, at reduced prices.
$2 per dozen.....$12 per hundred.....$50 per 500.

Brinckle's Orange Raspberry,
$8 per hundred.....$1 25 per dozen.

Fine Red Antwerp, Franconia, Knevatts Giant, and Fastolf Raspberries,
$4 per hundred.....62½ cents per dozen.

NEW HOP TREE.
(See cut and description in the Farmer)
Price 50 to 75 cents each.

This Hop is much stronger than the common one, for family use, and highly ornamental. Circulars relating to culture, soil, etc., can be found at the office of the Farmer, or by letter to the subscriber, by inclosing a stamp.

Orders will be received for the above plants, at the office of the Farmer, or by mail to my address, by inclosing the amount. I would also suggest, in addition, the amount of freight to be prepaid here, to secure their safe and speedy transmission.

For sale by F. TROWBRIDGE,

CHOICE SEEDS.

Benjamin K. Bliss,
SPRINGFIELD, - - - - - MASS.,
WHOLESALE AND RETAIL DEALER IN
Garden, Vegetable, and Flower
SEEDS,
Offers for sale a large and well-selected assortment of the above, containing every desirable variety in cultivation. A descriptive catalogue will be sent to all applicants.

FLOWER SEEDS BY MAIL.

For the accommodation of those who love the cultivation of Flowers, but who reside at a distance from where they can be procured, we have selected from our large assortment of Flower Seeds the most showy varieties, and those of easy culture, with full directions for growing, and put them up in assortments, well secured in parchment envelopes, which will be sent, *Post-paid*, to any address in California, at the following prices:

Assortment No. 1	consists of twenty choice varieties of Annuals	$1 00
Assortment No. 2	consists of twenty choice varieties of Biennials and Perennials	1 00
Assortment No. 3	consists of ten extra fine varieties of Annuals and Perennials, embracing many of the new and choicest in cultivation	1 00
Assortment No. 4	consists of five very choice varieties, selected from Prize Flowers of English Panseys, German Carnation and Picotee Pinks, Verbenas, Truffaut's French Asters and Double Hollyhocks, each of which are sold at 25 cents singly	1 00

Persons in ordering will please give the number of the Assortment.

By remitting Three Dollars and Fifty cents, in gold or postage stamps, the purchaser will receive the four Assortments, postage paid.

It is now three years since we commenced putting up the above assortments, during which time they have been sent to every State and Territory in the Union—and notwithstanding the unfavorable weather to which they have been exposed in many localities, have given universal satisfaction. Those who have given them a trial, recommend them freely to their friends, and the most flattering testimonials are daily received of their good quality. Orders must be accompanied with the Cash.

Attention, Farmers!

Broadcast Grain Sowers.

THE subscribers have on hand a few of "SAGE'S PATENT BROADCAST SEED SOWERS," for sowing Wheat Barley, Oats, and all grain sown broadcast. These machines are unrivaled by any, and received complimentary notice at the Agricultural Exhibitions at San Jose and Stockton. They need no explanation, as their simplicity will enable any one to understand, at a glance, the manner in which they perform their work.

They have been introduced but one season, and *three* are now at work at Tehama, Sonora, and Petaluma, giving complete satisfaction, as per letters testimonial.

The undersigned will take pleasure in exhibiting them to Farmers or others, and no Farmer should be without one; the saving of *help* and *economy of seed* effected by their use, will pay for one in a season.

Price, from $100 to $125

BOOKS, &c.

THE FARMER'S GUIDE,
To Scientific and Practical Agriculture.

BY HENRY STEPHENS, F. R. S., of Edinburgh, and the late J. P. NORTON, Professor of Scientific Agriculture in Yale College, New Haven. 2 vols. Royal Octavo, 1600 pages and numerous Wood and Steel Engravings.

This is, confessedly,
The Most Complete Work on Agriculture
ever published, and in order to give it a wider circulation the publishers have resolved to reduce the price to
Five Dollars for the Two Volumes,
When sent by mail (post-paid) to California and Oregon the price will be $7. To every other part of the Union and to Canada (post-paid) $6. ☞ This work is not the old "Book of the Farm."

"Science is made to go hand in hand with practice, throughout the book."—[New England Farmer.

"It is indeed a many chambered storehouse of Agricultural lore."—[Blackwood's Magazine.

"A more valuable work on Agriculture never was written." [Michigan Farmer.

"We recommend it without hesitation to all American Farmers."—[Albany Cultivator.

☞ Remittances for the above work should be addressed, post-paid, to the publishers,

New Treatise on Land Surveying,
JUST PUBLISHED BY
E. C. & J. BIDDLE,
PHILADELPHIA,

A Treatise on Surveying, by S. Alsop. In this work, the theory is plainly and comprehensively presented; directions for practice are given definitely and precisely; and everything which an extensive business in Land Surveying would be likely to require is embraced. Price per copy, mailed to California, $2, postage included. Price of the KEY to the work, mailed to California, 75 cents.

E. C. & J. B. also publish the following popular educational works, and many others extensively used in the Schools and Colleges of our country: and they would respectfully invite School Directors and Teachers to send for a copy of the descriptive catalogue of their publications:

Crittenden's Treatise on Book-keeping. The series comprises the four volumes below named, and for each of them a KEY, and a set of miniature BLANK BOOKS for the exercises:
1. Treatise on Single Entry Book-keeping.
2. On Single and Double Entry, for Common Schools.
3. do do do for High Schools.
4. do do do for the Counting House.

The volumes are severally the text-books in Commercial Colleges in Boston, New York, Philadelphia, Cincinnati, Chicago, St. Louis, Louisville, etc.; in most of the Normal Schools, and a great number of the High Schools of our country in the Public Grammar and Evening Schools of Philadelphia, etc.; while as a book of reference for practical accountants the Counting House edition is, undoubtedly, the most popular work on the Science of Accounts, published in the United States.

Cleveland's English Literature. *Twenty-fifth Thousand just published.* 1. CLEVELAND'S COMPENDIUM OF ENGLISH LITERATURE, from the 14th to close of 18th century: chronologically arranged: consisting of Biographical Sketches of the Authors, and selections from their works, together with Notes explanatory, etc. 2. CLEVELAND'S ENGLISH LITERATURE OF THE NINETEENTH CENTURY. A sequel to the "Compendium"; arranged on the same plan as it. The above two volumes are text-books in many of the Colleges, in the principal Normal Schools, and in a large number of other first-class Seminaries of our country; and they may with confidence be recommended as an admirable guide or chart for private students of English literature.

Cleveland's American Literature. *Cleveland's Compendium of American Literature*, on the same plan as the author's "Compendium of English Literature," will be published early next year.

Harrison on the Rise, Progress, and Present Structure of the English Language.

The Works of Thomas Dick, LL. D. 10 vols. 12mo. Few books are better adapted for the School or the Family Library, than the works of Dr. Dick.

PHILIPS, SAMPSON AND COMPANY
COMMENCED ON THE FIRST OF NOVEMBER
A NEW MAGAZINE, TO BE CALLED
THE ATLANTIC MONTHLY.

IT will be devoted to LITERATURE, ART, and POLITICS. *THE AIM OF THE PERIODICAL WILL BE,*

First: In Literature, to leave no province unrepresented, so that, while each number will contain articles of an abstract and permanent value, it will also be found that the healthy appetite of the mind for entertainment in its various forms of Narrative, Wit, and Humor, will not go uncared for. They wish to say, also, that while native writers will receive the most solid encouragement, and will be mainly relied on to fill the pages of the Atlantic, the publishers will not hesitate to draw from the foreign sources at their command, as occasion may require, relying rather on the competency of an author to treat a particular subject, than on any other claim whatever. In this way they hope to make their Periodical welcome wherever the English tongue is spoken or read.

Second: In the term Art, they intend to include the whole domain of æsthetics, and hope gradually to make this critical department a true and fearless representative of Art, in all its various branches, without any regard to prejudice, whether personal or national, or to private considerations of what kind soever.

Third: In Politics the Atlantic will be the organ of no party or clique, but will honestly endeavor to be the exponent of what its conductors believe to be the American Idea. It will deal frankly with persons and with parties, endeavoring always to keep in view that moral element which transcends all persons and parties, and which alone makes the basis of a true and lasting national prosperity. It will not rank itself with any set of *antics*, but with that body of men which is in favor of Freedom, National Progress and Honor, whether public or private.

As an earnest of the material at their command, they subjoin the following list of literary persons interested in their enterprise; wishing it, however, to be distinctly understood, that they shall hope for support from every kind of ability which desires the avenue of their columns, and in the remuneration of which they shall be guided purely by their sense of intrinsic merit:

William H. Prescott,
Ralph Waldo Emerson,
Henry W. Longfellow,
Rev. F. H. Hedge, D. D.,
Nath'l Hawthorne,
John G. Whittier,
Oliver Wendell Holmes,
James R. Lowell,
J. Lothrop Motley,
Geo. Wm. Curtis,
Herman Melville,
Prof. C. C. Felton,
Prof. F. J. Child,
E. P. Whipple,
Edmund Quincy,
Author of "Wensley,"
J. T. Trowbridge, Author of "Neighbor Jackwood," etc.
C. W. Philleo, Author of "Twice Married."
Mrs. H. Beecher Stowe,
Mrs. Gaskell, Author of "Ruth," "Mary Barton," etc.
Mrs. L. Maria Child.
Mrs. C. M. Kirkland,
Mrs. Pike, Author of "Ida May," "Caste," etc.
Miss Rose Terry,
Wilkie Collins, Author of the "Dead Secret," ect.
G. Ruffini, Author of "Doctor Antonio," etc.
Shirley Brooks, Author of "Aspen Court," etc.
E. M. Whitty, Author of "Political Portraits," etc.
James Hannay, Author of "Singleton Fontenoy,"
Thomas W. Parsons.

Terms.—Three dollars a year, or Twenty-Five Cents a Number, and may be obtained of Booksellers, Periodical Agents, or of the Publishers. For sale by all Booksellers and Newsmen in California. 19-3mis

PACIFIC MUSEUM,
Corner of Clay and Kearny streets.

AT this popular place of amusement there is the LARGEST COLLECTION OF LIVING WILD ANIMALS ever exhibited on this Coast.

Among them may be seen the Grizzly Bear called 'Sampson,' weighing over 1,500 pounds; one Russian Brown Bear, weighing about 1,100 pounds; another Grizzly, weighing 1,000; a Black Hyena Bear; two Rocky Mountain White Bears; the Red Bear of California; three Black Cubs; two Cinnamon Cubs; one Mammoth Pig. Also, a great variety of other Wild Animals, together with the California Lion and Tiger, Elk, Deer, Sea Leopard, Catamount, Ant Eater, Prairie Wolf, Eagles, and other large Birds. Besides a collection of Stuffed Birds, such as cannot be found on this or any other coast.

A full Brass Band is in attendance every evening.

☞ Open every Day and Evening (Sunday excepted.) Admission, 50 cents. v8-13

New Winged Triangular Harrow.

THE undersigned would invite the Farmers and Grain Growers of California to call and examine his newly invented Winged Triangular Harrow.

By the action of this Implement a space of 12 feet of ground is finely pulverized and harrowed, and the work most satisfactorily done. No farmer can look upon the Implement and not be satisfied of its value.

H. G. PRATT, Manufactory 46 Washington st., between Davis and Drum streets.

Union-City Flour,

CONSTANTLY ON HAND and for sale in lots to suit purchasers, by N. REYNOLDS & CO.,
San Francisco, Oct. 29, 1857. 1m Davis street.

Ladies' Department.

INVOCATION TO MY MUSE IN ILLNESS.

[Those who reverance exaulted worth, and all who have a love of the beautiful and good, will read the following Invocation with the deepest feeling, and will send earnest prayers to Heaven for the restoration of one who, from the surroundings of a sick chamber, can breathe such strains as these. God grant that the prayer of the invalid may be answered; that not only the muses shall ever be present, but that the winds of Heaven shall come laden with a balmy breath, wooing back health again, and the voices of true friends gather to welcome and congratulate the restored one.]

Capricious Muse! hast thou too flown
With health and joy? Ah! sad and lone
I tell each slowly passing hour,
Unblest by thy reviving power.
Disease, complaining, wan and pale,
Alarmed thee with her mournful wail,
And misty eye, as through a haze
The soul were struggling hard to gaze,
To learn its real destiny—
For time—or for eternity.

Yet, gentle One, return again—
O, listen to my sad refrain!
Perchance Disease will swiftly fly
Before thy bright, inspiring eye,
Companion sorrowful and sad
For one whose heart was erst as glad
As the first bird-note in the spring,
Or new-born joy upon the wing,—
As the first sunbeam on the river,
Or the first dart from young Love's quiver,—
Who reveled in each new delight
Unconscious of a power to blight,
As though eternity's vast boon were given
To earthly joy, by too indulgent Heaven.

Return, return! for thou hast power
To chase the darkness of the hour
With all the beautiful and fair
Beneath, above, in sea, or air;
For nature hath revealed to thee
Her deep, unwritten mystery;—
The secret the bland Summer Gale
Whispers in Tempe's quiet vale
To lovely flowers, when they impart
The rich aroma of their heart;—
The secret of the laughing rills,
That wakes the echoes of the hills;—
And the softly murmured Theme
Of the smoothly gliding stream;—
And the rapturous delight
Of the waves in morning light,
As sportively the sunbeams play
Amid their *gems* of glittering spray,
The Ocean's tribute to the Day;—
And the fountain's gushing pleasure,
Above measure,
Above measure,
By the mountains quaint and bold,
Ever spending,
Never ending,
Like the written song of old,
Ever spending,
Never ending,
Where the Fairies light and gay
Dance the moon-lit hours away,
To its numbers wild and free,
To its cadenced melody.

Return, return in any mood!
Tell of the tempest or the flood—
The lightning's secret to the rock,
Reported hoarsely by the thunder,
Its stout heart breaking with the shock,
As flying clouds are rent asunder,
And wild and fitfully the blast
Shrieks as it hurries swiftly past,
The traveler with fear appalling,
Awhile the tears of Heaven are falling,
As it bemoaned the elemental strife,
Sad emblem of man's disharmonious life.

Tell me the burden of the song
The changeful winds are ever ringing
Amid the changeful human throng,
And ever to the *inmost* bringing,
Shadowy, dim, and undefined,
Something long vanished from the mind,
Lost in the past eternity—
With a yearning to discover,
And a longing to recover
The banished love,—or joy,—or feeling,—
Or what of pain and bliss it be
Thus spectre-like, thus strangely stealing,
With the wind's Æolian tone,
In lengthening shadows o'er the soul:
Lengthening shadows upward sweeping
From the past, and from the lowly,
To the far remote and holy,
Where eternal Truth is keeping
Record of the ages gone,
And the past and future blending
In a circle never ending:
Lengthening shadows upward sweeping
Toward the unattained ideal—
Toward the undefined, yet real—,
Toward the spirit's lofty goal—
Toward the loved ones of the soul,
Now advancing, now receding,
With the winds Æolian tone,
Where the lengthening shadows lay,
On their far and shining way—
As they listened to our pleading,
Knew the thirsting of the spirit,
And the yearning to inherit
All the future hides from view
Of the beautiful and true.

S. M. CLARKE.

Beautiful Dreams from "Rena."

"Strange is the power of dreams! who has not felt
When in the morning light such visions melt,
How the vail'd soul, though struggling to be free,
Ruled by that deep, unfathomed mystery,
Wakes, haunted by the thoughts of good or ill,
Whose shading influence pursues us still?"

"But ah! 'tis gone, 'tis gone and never
Mine such waking bliss can be;
Oh! I would sleep, would sleep for ever,
Could I thus but dream of thee!"

The beautiful sketch from dream-land, by our new correspondent "Rena," from the "sunny south," brought us by the last steamer, will be perused by our readers with much pleasure we know. Although professing to come from *dream-land*, there is so much of our every-day life in it that we love it; it is a picture of life, true and beautiful. It calls us again to that fair clime where we have wandered with very dear friends, among bright and beautiful flowers. The tribute paid to our own California is doubly beautiful. We hope each steamer will bring us the rich gifts of "Rena;" they shall be duly appreciated.

—

Dear Mr. Editor: Lonely in spirit, I have been wandering to-night in dreams, 'recalling scenes long past, and reviewing the flowery haunts thy feet have oft-times trod," again and again wishing the mystic spell were mine, to summon from the distance some "choice spirit," who would enjoy my wild imaginings. At first I wandered to the sea-shore, where the wild surf roared, and listened to the music of its leaping waters, watched its foaming crests, and wrote loved names upon its fickle sands. Then I followed to the deep vast ocean, whose immensity doth span the world. Its briny billows rolled, and within the heaving flood I read the hapless fate of millions, buried 'neath its ever restless waves. A sad account, old ocean, wilt thou have to give in that great day when thou yieldest up thy treasures; hearts thou hast saddened, homes made desolate, and the midnight cry of anguish and despair drowned by thy mountain surges, has been stilled in thy chill and cold embrace. I pictured to myself the late terrific gale, which spent its fury on the noble ship, dooming it to destruction, and sending to the depths of ocean so many manly hearts. Would to Heaven the storm-king's requiem had been sung, ere our gallant Herndon had braved the angry waters. No monument can mark the spot of his heroic sacrifice; but an angel's wing, laden with the prayers of grateful hearts, will bear the deep-toned wail of sorrow for his loss unto the very gates of Paradise.

I dream again, and now I am beside the streamlet and my native cot. The crystal spring bubbles with clear and sparkling beauty, and the tall trees wave on as in days of yore, when, from amid their branches, the bluebird's throat sent forth its liquid music. The very moments then so swiftly flew, life seemed a joyous dream; my path was lined with flowers, and each succeeding hour revealed some hidden happiness. Youth hath its bright-eyed joys, but like the morn they fade ere it is noonday, and night and age usher in dark shadows which destroy the floweret's bloom. Youth and hope, like summer sunbeams fly; its dreams are evanescent as the morning dew, and ere we know it, hopes and hearts are gathered to the silent tomb. Yet, with the soul-like thoughts that never die, the world may fetter the joyous impulse of the body; but, the spirit God alone can chain. Within the brain are sleeping sweet, sad fancies, that tell us of a goal beyond this mundane sphere; there the imprisoned soul from earthly thralldom fled, shall float in the blue ether, free from care and sorrow, basking in the sunshine of a Savior's love.

Well do I remember the happiness that shed its halo round the faces of my father and my mother dear, as with a parent's pride they looked upon their only child, and with fervent supplication knelt to ask God's blessing and protection for her. The tear steals down my cheek unbidden when I recall those happy hours that time has now so changed, but memory is with me still, and deep enshrined within my soul, helping to banish the dark clouds of present woe; their spirits linger round, and breathe in whispering accents, an influence that comforts and supports. Stern death has chilled the life-blood, sealed the lips with silence, made the form grow cold and rigid, but the spirit has gone forth to God who gave it, and, in a home with angels pure and holy, will intercede for dear ones still left upon the earth.

"A change comes o'er the spirit of my dream," and now I am in Italy's fair clime, the land of poesy and song, a land fraught with golden memories to be treasured in the heart for ever. Rome, the "Eternal City," with its departed glory is before me, and in the dim and shadowy twilight rise its fountains and its seven hills. Lent is nearly over, and now the solemn grandeur of the Roman faith is seen in all its majesty. The "washing of the feet" by his holiness the Pope, where he teaches the lesson of humility, the chant of Rome's grand choir, the splendor of its fountains all in play, and the glorious illumination of the matchless St. Peter, reveal to the astonished gaze scenes of fair enchantment. Listen! to the chant which, like a flood of melody, floats from beneath themighty dome; the famous "Miserere," poured forth in touching strains, resounds through lofty arches, till a sweet and wailing cry, like the tender murmer of a breaking heart, comes with an electric thrill to add sublimity and wonder to the scene. Then the air re-echoes with the note of anguish and the chorus at first swelling louder and still louder, with sighs and sobs melts to the faintest whisper. Who would not feel their heart subdued by this sacred chant, and that too when pealed forth within this sacred sanctuary. Thousands of human beings celebrate high mass, and mighty crowds assemble until the very earth around is a mosaic of living heads, for all true Catholics now come to Rome to receive the benediction of the pious, and, to them, most sacred Pope.

'Tis night of Eastern Sunday, and the noble, grand Cathedral, 300 years in process of erection, is covered by 600 men, absolved from all their sins, for their task is full of danger. When the great bell tolls forth the signal hour, they light the thousand fires, whose silver radiance flashes o'er the noble structure, until it seems one liquid sea of flame; yet look a little longer, and a golden haze is spreading o'er the earth and sky. Statutes, colonades and arches are one continuous blaze of golden light, and jets of innumerable fountains fall like sheets of molten gold into the marble basins ready to receive them. Oh is it not most wildly beautiful? Could we not worship and be holier in a lovely land like this, where religion is clothed in wondrous beauty, and every fete and form speak to the heart, and drape imagination with reverential awe. Dearly would I love to linger in this land of classic and historic memories, and amid its ruins, temples and palaces now crumbling to decay, learn of the wealth and wisdom of its ancient days. Truly has it been called the "City of the Soul," for at every step we see some impress of its never-dying greatness, and immortal history clusters round each object that is left to tell its glorious past.

But I am strangely wandering in my waking dreams, and little thought, with idle fancy to wing my flight so far away from my own green forest-home. But the imagination is a strange and wayward thing, and ofttimes weaves such pleasing pictures, they come with happy welcome to the dreamer's heart. To me 'tis sweet to bar out cold reality, and soar on fancy's wing to the ideal spirit-land; there I can build my fairy castles, and with soul all buoyant, indulge the dreams of sweet poetic fancy. Who would not be a dreamer, if dreams would bring them happiness?

But there is one sweet "spot to memory dear" I fain would visit ere I say good night; a bright and flowery home, neath California's warm sky; a garden where the choicest flowers bloom perpetually; a bower of roses upon which the sun ever smiles, and a bed of tiny blossoms over whose bloom the stars of night stand sentinel, to chase away dark shadows while the pale-blue beauties sleep. One little flower, though frail and small, I have preserved as a memento of the past, for endeared by association is that garden to my heart. Oft has its fragrant beauties brought solace to my loneliness, and the kindness of its messengers a well-remembered joy, never to be forgotten.

Adieu bright Roses! night her mantle spreads
Around thy beauteous blossoms. Fuchsia's brilliant
Petals droop with crystal dew, and dark-eyed
Pansy murmuring, sighs, *Forget me not*, I ofttimes think of thee.

Rena.

Letter from Grace Greenwood.

The annexed letter from this greatly admired and justly appreciated writer, will be received and read with more than usual interest. The various subjects so gracefully though briefly spoken of, glow with a radiance which but very few writers are able to give to their thoughts. We believe we can with a just pride present such correspondence as a worthy "intellectual gift" for the New Year.

—

Philadelphia, Dec. 3d, 1857.

Editor of the California Farmer:

Dear Sir: I wrote you rather a dull, desponding, Novemberish letter by the last mail; but though the natural sky has brightened since then, and we have cold, sparkling, invigorating weather, our moral heavens are yet overcast with thick portentous clouds—our financial atmosphere is still heavy with the dense fogs of doubt and discouragement. Sad news comes to us from England, of suspensions and failures, consequent upon the disruption of international commercial ties and the financial crash and chaos here. Houses that have stood the shock of very considerable earthquakes at home, have been toppled to the ground by ours, which seems to have reached to them, under the sea, like the Atlantic telegraph that should have been. Had that sub-marine marriage of the two nations been happily accomplished, English merchants would have had a little more warning of the fate which awaited them; and soon, perchance, might have effected an escape from their doomed houses—not gone down with them, like so many Blandoises, smiling and smoking in fancied security.

To hear of these great European failures, reminds one of the revolutionary times of '47 and '48—"the times that tried *kings'* souls." The "merchant princes" are taking their turn—at overturn now—are being dethroned and driven to strange straits, as were then the royal "snobs" of France, Austria, Prussia and Italy. May they all come out as well as most of these, and with better deservings than any.

It was beautiful to see how completely the government of England put an extinguisher on the mere panic there, by prompt, wise, energetic action. There is something magnificent in the working of a powerful, popular monarchy. Doubtless a republic is the *ideal* form of human government—the glorious Utopia, of which poets and patriots have had inspiring visions through all the ages—the political Millenium for which "creation groaneth and travaileth;" but it seems evident that we have been too self-confident, or nobly rash, if you will, in claiming in our hot, undisciplined, half-barbarous youth, the last grand result of civilization. It is not possible that republicanism can be a perfectly successful experiment with us, because we are as yet but an experiment as a nation—a mighty, unwilling mass, mixed but not mingled; a conglomeration of all the tribes of men, varied as the face of the earth, and antagonistic as the elements of nature.

But even the partial success of the great democratic principle of republicanism, working against such tremendous disadvantages, proves that it is vital, eternal, divine. All we want is to be civilized and christianized up to it—to a full acceptance of the "glorious liberty," the reign of justice and peace which it declares. Few even of the advanced minds of this time see it as it really is—the hope of the world's political redemption—Freedom's star of Annunciation. Shrewd politicians, worldly-wise statesmen, look upon it as a moral *ignus fatuus*, or a perpetual piece of political pyrotechnics, to allure or amuse the people. But the enlightened patriot, and the simple-hearted Christian, behold it far otherwise; not as born of the earth, not as the cunning contrivance of man, but as a heavenly light, serene and unquenchable, attesting the glorious message which the divine spirit of Freedom brings to the hearts of all true men; just as the magii who studied the heavens more than the world's lore, and honest, reverent shepherds were privileged to recognize "the Star in the East," and to receive the "glad tidings" of the angel of God.

To return to the crisis, which it is now generally acknowledged was the necessary, inevitable consequence of foregone folly, recklessness and dishonesty, and not a causeless, senseless panic, as some wise journalists would still have us believe. One great good will, I trust, come out of the evil, the misfortune, the suffering. Of the thousands who are thrown out of employment in our cities and manufacturing towns, some will surely have wisdom enough to betake themselves to the country, where labor is still in demand; and such as have the means will take up their march Westward ho! and adopt as a last resort the first grand profession of man—Agriculture.

There is some strange, terrible fascination about city-life to the poor. Its feverish excitement, its noise, hurry and discomfort, its confinement and unhealthy gregariousness, all seem to have powerful though unnatural attractions for them. As prisoners, after many years' incarceration, have grown to love a dungeon, with its darkness, its filth, and its vermin, so they cling to their vast Bastile, the city; their damp, dark alleys, in which lurk want and crime, and pestilences breed, and seem to have a vague horror of the freedom, the space, the quiet, pure air, and cleanliness of the country. Nothing but the extremity of degradation and suffering, it would seem, can rouse them to break this wretched thraldom, and drive them forth on their exodus to the new Canaan of the West—the grand "forests primeval" that have never rung to the woodman's ax—the smiling prairies that have lain fallow since the subsiding of the flood.

The mechanic, the artisan, is never truly free. He and his family are in the hands, in the power of his employer, dependent to a fearful degree for comfort and subsistence upon that employer's will, or the accident of his success.

The artisan may "strike," at times, with good effect; but too often, like a blinded pugilist, he strikes aside, and only hurts himself. But the farmer is Nature's freemen; the master of a few acres of earth, he is independent of the world. When he strikes, it is always with effect, the hardest soil gives in to his demand. No agricultural crisis brings him a discharge without warning, and no quarter-day glooms before him, like a small doomsday, fearful to meet. He stands on his own land; it may not be wide, but the sense of possession hallows every foot of it; he may be able to *count* his trees, but they are more beautiful than all other trees; they seem to strike their roots into his heart. His house may be humble and homely; but it is the castle of honor, the palace of content. His flocks may be small, his cattle few, but their faces are as the faces of friends, and every flower of his fields comes up with a special message for him, from the kindly heart of Nature. He stands on his own land, in the pride of complete and sovereign manhood, and he owns down to earth's center and up to the stars.

I scarce know of a more melancholy thought than that one does not own six feet of land, within which to stretch one's self at last—one little spot on the wide breast of Mother Earth, to nestle down into, for the long sleep.

Apropos of flying to the country there has lately been formed in this city, a society, the object of which is to assist laboring women now thrown out of employment, by obtaining for them situations as domestics and seamstresses in the country, and, especially, to send them westward. It is an excellent enterprise, and more worthy of encouragement than some of the older, more pious, and ponderous charities of the time.

We have not much going on in Philadelphia at present. Our winter amusements have scarcely begun as yet. Parodi and Vieuxtemps gave a concert last evening, and succeeded very well, I believe, in exchanging their notes for specie.

Miss E. L. Williams, a young vocalist from London, called, there, "The Welsh Nightingale," has commenced a series of costume-concerts here. She gives a novel and amusing entertainment, written for her by Mr. Samuel Lover, author of Handy Andy. Rory O'More, &c., in which she appears in twelve different characters. She is a clever actress, and sings Irish, Welsh, and Scotch ballads, with great feeling and effect. Her voice is a powerful soprano, of a clear, sweet and sympathetic quality. It strikes me that Miss Williams would do well in California, if some of your good managers had the enterprise to take her out. She brings a warm letter of commendation to me, from Mrs. S. C. Hall, of London, the distinguished authoress, and has been the pupil of Sir Henry Bishop. Signors Cruvelli and Lanzi.

Madame Lola Montez is here in her new character of lecturer. It is said that very good audiences assemble to hear her, or rather to see her, for her lectures are very ordinary affairs, I hear. But the bewitching fall of her lustrous black hair, and the flash and sweep of her magnificent eyes, doubtless make up for the lack of all wit and wisdom in her words. It is wonderful what fire, what spirit, what daring, what deviltry those great Spanish-Irish eyes yet reveal. The unterrified, unsubdued, incorrigible Zingara of the stage is one of the marvels of the world to me. What experiences she has had; what a wild swing of life! It seems that nothing can daunt, or dismay her; it is said that she even contemplates making another trial of matrimony. If so, brave as she is, rash as she is, mad as she may be, there is one braver, rasher, mader—the other party. Adieu, Grace Greenwood.

Aid to Suffering Women.

The following circular came to us by last mail, with a note from that noble hearted woman, Mrs. E. W. Farnham, who, it is well-known, is laboring to elevate the character of her sex, and awaken them to a more just conception of their ability and influence, and to arouse them to a higher and holier ambition for their own sex. Mrs. Farnham's letter in this number of the Farmer will be read with deep interest by all who have a taste for the "good, true and beautiful." We sincerely hope the circular, which we here append, will awaken our people to devise some way by which Californians can either bring the most deserving of those who need our help here, or send aid to them:

New York, November 28, 1857.

Sir: The extreme suffering and destitution of working women in our city call for some immediate measures of relief at the hands of those who may be able to devise and carry them forward. These should be also measures of self-defense against the unparalleled despair and degradation to which vast numbers of these unfortunate persons must come if neglected in their present state.

An investigation into their numbers and condition, has convinced those who have made it that there never was a time in the history of the city when her welfare was more deeply imperiled by crime and depravity than it will be this winter, if charitable and thoughtful persons do not interpose to rescue the destitute from their extremity of exposure; and, also, that never before, in any period of distress, were there such ample means at hand for averting its most deplorable results. Thousands of our homeless, starving females are wanted all over the vast West, only thirty-six or forty-eight hours' travel from us; and could we but bring them there we should have done a lasting service to the place they leave, as well as to that whither they go.

Animated by the hope and purpose of bringing this idea to a practical result, we earnestly invite your presence at a meeting of a few citizens, to be held at Room No. 7 Clinton Hall, on Friday evening, December 4th, at half-past seven o'clock, where interesting statements of facts respecting the numbers and condition of unemployed women in the city will be made, and a general discussion of measures for their relief and the public safety will be had.

Signed, J. W. Edmonds, Peter Cooper, S. M. Pease, Horace Greeley, James Boorman, L. T. Warner, M. D., Rev. Joel Parker, O. R. Potter, F. J. Ottarson, D. C. Van Norman, A. H. Gibbons, H. Chapin, W. G. Hunt, Eliz. B. Phelps, R. S. Beatty, Eliza W. Farnham, Emily Howland, Elizabeth W. Owen.

SAN JOSE
NURSERY.
FRUIT TREES,
ORNAMENTAL TREES.
ORNAMENTAL SHRUBS,
18,000 ROSES.
....ALSO....
GREENHOUSE PLANTS,
GRAPE-VINES,
ETC., ETC., ETC.

COMMERCIAL NURSERY,
SAN JOSE.

THE Proprietors of this old established Nursery are now prepared to furnish to their friends and patrons the

Largest and Most Select Collection of
FRUIT, SHADE, AND ORNAMENTAL TREES, VINES, &c.,
ever offered in this State,
At Reduced Prices!

The FRUIT TREES offered by us are all grown and worked in the Nursery by us, from varieties obtained from the celebrated MOUNT HOPE NURSERIES, of Rochester, most of which we have fruited in our Orchards, and offer for sale only such varieties as we have found to be best adapted to this climate.

We have in Nursery:

25,000 APPLE TREES, of two years' growth, large size, thrifty, fine heads.
10,000 One year from graft.
1,000 Three years' growth, extra large, fine Trees, suitable for planting in yards and gardens, and such as cannot be obtained in any other Nursery in the State.
2,000 PEAR TREES on Pear stocks, one and two years' growth.
2,000 Pear, on Angiers' Quince, one year from bud.
3,000 CHERRY TREES, of twenty-five best varieties.
5,000 PEACH, of twenty varieties, one year from bud.
1,000 PLUM, of twenty best selected varieties.
APRICOTS, six varieties.
NECTARINE, SOFT-SHELLED ALMOND, &c. &c.
10,000 GRAPE VINES, Los Angeles, 1, 2 and 3 years' old.
3,000 Catawba, Isabella, Sweetwater, and foreign varieties.
GOOSEBERRY, STRAWBERRY, RASPBERRY, CURRANTS, &c., &c.

Catalogues can be obtained on application at the Nursery, by mail or otherwise.

All orders from a distance carefully attended to, securely packed and shipped to any part of the State, at the risk of the purchaser.

Our terms are cash, or short credit, on approved notes, on delivery of the Trees at the Nursery.

Explicit directions for marking and shipping should accompany each order, and when particular varieties are wanted, state whether and to what extent others may be substituted, in case the varieties cannot be furnished. Persons trusting to us to select varieties may rely upon being furnished with the leading sorts, and proper proportion for each season.

J. L. POLHEMUS

DRUGGIST

J. St.

OFFICIAL NOTICE!

POLHEMUS' DRUG STORE,

No. 190 J street, corner of Seventh.

SACRAMENTO, CAL.

FELLOW CITIZENS: I have lived among you since the ever glorious FORTY-NINE, have suffered with you in three fires and three floods, and intend to live among you with my family during the term of my natural life, if not longer. I return you my most sincere thanks for your unflattering patronage and support, which has enabled me to pay One Hundred Cents on the Dollar through all my adverse fortune. I would also give you a few reasons for your continued patronage, and inducements to new patrons likewise.

FIRSTLY.

I claim to be the Oldest Established Legitimate Druggist in this City.

Persons in this connection will please observe that there is as much difference between a DOCTOR and a DRUGGIST as there is between a Druggist and a Doctor, and rather more so between those who have picked up the Drug Business and those who have devoted their whole lives to it. To this latter class I have the honor to belong, having learned my business in the Atlantic States, and been engaged in said business for the last eighteen years

SECONDLY.

Believing that life is sweet to all, and that the people wish to know where they can get their prescriptions filled with safety, I will hereafter fill them for

Half the Price Usually Charged

By other Druggists, legitimate or illegitimate, and of **The Purest Drugs and Chemicals.**

THIRDLY.

I intend my store shall be ONE of the best, if not THE BEST place in California to obtain everything, NEW, ODD and STRANGE in the Drug line, and especially to make it the most extensive depot for every valuable Patent Medicine, Drug and Chemical. We invite proprietors of valuable and reliable Patent Medicines to send them along. We have a large and thoroughly fire-proof Drug Warehouse to hold them, and patrons to buy them

FOURTHLY.

We Keep Open all Night!

And charge no more for medicines than in the day time.

FIFTHLY.

We will furnish these in indigent circumstances with MEDICINES AT COST! the same being attested by two or three good citizens.

SIXTHLY.

Hereafter we will do a business on a CASH BASIS ONLY. The amounts we have lost heretofore by crediting we intend to distribute equally among our patrons, in the future, in the decreased price of our goods.

SEVENTHLY.

We have received the agencies for the following valuable articles:

Dr. Carl Warburg's Tincture. This article is particularly recommended for Ague and Fever, when every other article fails to cure.

Budds' Nerve and Bone Liniment, warranted the best in California.

Flower of the West, for Fever and Ague.

Delight's Spanish Lustral, for the Hair.

HUDSON'S CALIFORNIA GROWN MUSTARD.

Also, agencies for all the other popular medicines too numerous to mention.

EIGHTHLY AND LASTLY.

We import nearly all of our goods. We think we know how to import them, and how to sell them to satisfy the public as to price and quality. At all events, give us a call, and WE WILL TRY.

v8-12 J. L. POLHEMUS.

PLOWS! PLOWS!! PLOWS!!!

NOW LANDING,

The Celebrated "Boston Steel Clipper,"

AND

"PEORIA STEEL PLOWS,"

Got up by the subscribers to meet the wants of California, and which, for adaptability, material, finish and cheapness, surpass any plows ever brought to the notice of the public.

These Plows are made by the best manufacturers in the United States, and defy competition in price, and comparison in material and workmanship.

Being made at tide water, and no expense of transportation from the Western States, we are enabled to offer Merchants and Farmers a better Steel Plow for less money than any other in market.

CAST PLOWS (Eagle Pattern),

OF ALL SIZES AND DESCRIPTIONS.

We shall be in constant receipt of the above styles of Plows, and offer better inducements to the trade than can be found elsewhere.

These Plows are packed in cases, very compactly, and can be sent to any part of the country at very small expense, and can be set up easily.

Extra points and parts to all our Plows constantly on hand

Machines and Agricultural Implements,

And goods of all descriptions, constantly on hand and replenished.

PEORIA PREMIUM PLOWS!!

JUST RECEIVED,

GENUINE PEORIA PREMIUM STEEL PLOWS,

Of Nos. 5, 5½ and 6.

THE Plows are from the justly celebrated manufactory of Messrs. TOBEY & ANDERSON, Peoria, Illinois—(the makers named are the ones who have given the reputation to what is known as the "Peoria Plow). Several hundred were sold by us last season, and they have given very general satisfaction when imitations have failed.

These Plows are so completely packed at the place of manufacture, that they can be shipped to Agricultural districts of California and Oregon, at a very small per centage on their costs.

Merchants doing business in Agricultural districts would do well to call upon us before making their purchases of this important article.

AGRICULTURAL.

FIRST PREMIUM IMPLEMENTS.

TO THE FARMER

AND

Dealer in Agricultural Implements.

PLEASE READ.

HAVING erected a good shop, with facilities not heretofore possessed by any house in this State for manufacturing Agricultural Implements, I beg leave to announce that I am now prepared to receive orders to any extent in this line of business. I employ none but the best and most experienced mechanics, and use only the very best materials. In this way I hope to promote the interest of the good mechanic, the interest of the farmer, the interest of our young and growing Agricultural State; and at the same time that interest which is foremost with all mankind—self. I have had twenty years experience in the manufacturing business;

I ESTABLISHED THE FIRST SHOP,

AND

MADE THE FIRST STEEL PLOW

in the State of Wisconsin, in the dawn of her great agricultural improvement. I also

MADE THE FIRST REAPING AND MOWING MACHINE

AND

THE FIRST STEEL PLOW

Ever Made in this State;

Therefore, with my experience, and a knowledge of the wants of the country (which are different from most others), I feel confident that I can and will do much for the interests of the agriculturists of this county; and in my efforts I trust I shall meet with a good share of patronage from the farmer and all interested in this matter, and in the interest and development of the agricultural improvement of our State.

I design, and have under way, the manufacturing of

1,500 Cast Steel California Plows;

THE DEEP TILLER;

OR,

"QUEEN OF THE WEST;"

Of stock entirely superior to any ever worked before in this country. Also,

GANG PLOWS,

HARROWS,

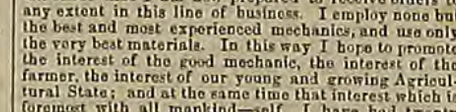
CULTIVATORS,

FANN MILLS,

&c., &c., &c.

In addition to what I manufacture, I shall constantly be receiving implements from the best makers of the Eastern and Western States, amongst which are now due

500 CINCINNATI



EAGLE, STEEL AND ROVER PLOWS,

which stand, in point of true merit and worth, altogether higher than any others in the great agricultural State of Ohio.

☞ Please favor me with a call, and see for yourself, and be convinced that I am publishing no humbug, but simply facts as they are; and that your young State can, within itself, already provide the farmer with implements inferior to none now in use. All kinds of agricultural implements and machines repaired on short notice, and in the best manner, and on reasonable terms.

The Legislature.

The ninth session of the Legislature of California is now convened, and the members are assembled at the capitol to legislate for the people of California. How much depends upon the action of this body the present session. No State in our glorious Union exerts so wide an influence over the world; no State so free from embarrassment; none with brighter prospects; none with such unbounded resources.

How great the responsibilities of the Legislators of such a State, and yet how few can realize that responsibility. The history of the past is but a slight prestige of the future. The past of California has been a series of strange trials and vicissitudes from one end of the Commonwealth to the other. The people have been in a kind of fusion, and from this they must be drawn forth, the pure metal from the base alloy; who are to be the refiners?

To the Legislators of our great Commonwealth we look for a wise direction. Give us wise and wholesome laws; let the industrial interests of the State be the chief care of those who stand in the responsible place of Legislators, and our State is safe.

What Legislator can look upon the great Agricultural interest of California, and not feel a glow of pride at the proud position she has assumed. Look too at the rapid advance made in the Mechanic Art. Where can more skillful artisans be found on earth than in California? Again, view the openings to Manufactures, and conceive what is in the future for this great interest.

These are the great trione that shall elevate California to the highest place in the list of the States of our glorious Union, if our Legislators so will it.

For all the years past, little has been done for these great interests. Let this apathy no longer exist, but let our Legislators labor and work for the development of the vast resources of California, and their names will be handed down with honor to posterity. Who will do most during the present session for these interests?

The Legislature assembled on January 4th. Senate met at 10 o'clock, A. M., Lieut. Gov. Anderson in the chair. The election of officers resulted as follows:

President, *pro tem.*, Hon. Samuel A. Merritt, of Mariposa; Secretary, Thomas N. Cazneau, of Tuolumne; Assistant Secretary, James T. Ewing; Enrolling Clerk, James Shipman, of Amador; Engrossing Clerk, Lewis Bartlett, of Sierra; Sargeant-at-Arms, James Hawkins; Door-keeper, J. McGlenchy.

Assembly—The House was called to order by Hon. Harvey Lee, Speaker *pro tem.* The roll was called by the ex-Clerk. Motion was made by Mr. Lewis, of Tehama, to elect a Speaker, with the following result: N. E. Whitesides, of Yuba, received 66 votes, and W. W. Shephard of San Francisco 6 votes.

After some able remarks by Mr. Whitesides, alluding to the distinguished honor conferred upon him, and his endeavor to merit the esteem and confidence of his associates, to avoid partiality and administer even-handed justice to all. He trusted that the members would unite with him in endeavoring to bring the session to a speedy close, and by thus lighting the heavy burthen of the people, redeem the name of California legislation from the stigma which had been cast upon it. He also trusted that when the Assembly departed from the Capitol they would do so respecting each other and respected by the people.

The House then proceeded to the choice of officers, who were elected and duly sworn in by the Speaker. The result was as follow:

Clerk, J. W. Scobey, of Placer; Assistant Clerk, J. N. Bingay, of Calaveras; Sergeant-at-Arms, J. F. Quin, of San Francisco; Enrolling Clerk, T. W. Mitchell, of Sacramento; Engrossing Clerk, W. McConnell, of Eldorado; Door-keeper, A. F. Wagner, of Nevada.

Eastern News.

THE mail steamer John L. Stephens, Capt. R. S. Pearson, arrived on the 29th ult., making the trip through from New York in twenty-four days. The steamer brought 823 passengers.

Gen. Walker had surrendered to Com. Paulding, of the U. S. steam-frigate Wabash. The General and his forces were to be sent back "from whence they came." Thus has this second expedition of Walker's been broken up.

Daniel F. Tieman has been elected Mayor of New York, over Fernando Wood.

It was stated in Washington, that Senator Gwin, of California, was preparing bills which he would introduce at an early day in Congress, organizing the Territories of "Arizona," and "Sierra Nevada." There was another report to the effect that he would not introduce the bill for the creation of the territorial government of "Sierra," for the reason that a part of the country proposed to be incorporated in the new Territory now belongs to this State, and we have as yet given no official indication of our will, upon which our Senator can propose to cede away our jurisdiction. If the Legislature shall indicate an approval of such an arrangement as is anticipated, there will be no difficulty in accomplishing it.

Gen. Lamar, of Texas, is to go out as Minister to Costa Rica and Nicaragua.

FROM OREGON.—By the steamer Pacific, dates are received from Portland to 2d inst. The following is the only item of importance:

Indians Joining the Mormons.—A gentleman from Wasco county, informs us, says the Standard, that Stock Whitley, the Indian chief, who has recently been out to the Snake country, reports that the Snake Indians are determined to join with the Mormons in a war with the Americans. It is also reported that the Clickitats, at the mouth of the White Salmon, are debating much, of late, in private, giving strong indications that some new plot is being concocted by them. Stock Whitley, for himself and his people, still profess the greatest friendship for the Americans. A few months will develop the intentions of the Indians in relation to the contest between the Mormons and the Government.

HOLLOWAY'S PILLS AND OINTMENT.—Maternity has many cares, and the child's health must depend upon the mother's: there should therefore be double care employed. If the mother is dyspeptic, the child will pine; if the mother has sore breasts, that happy office becomes an agony. Be advised then, and use these remedies, which will give health to both.

Sold at the manufactories, No. 80 Maiden Lane, New York, and No. 244 Strand, London; and by all druggists, at 25c., 62½c., and $1 per box or pot.

How California is Viewed Abroad.

The following is an extract from a letter, dated Paris, Sept. 30, 1857, from one of the best establishments in France, and shows the estimate they put upon the information from our State. After enumerating the various kinds of seeds they desire us to send from California to France, which embrace a large variety of our Pines and Oaks, Shrubbery and Plants, the writer says:

"Your CALIFORNIA FARMER is always received with great pleasure, and the very interesting information concerning the steady progress of Agriculture and Horticulture in your country, is always received with great satisfaction.

"We shall always be glad to receive your valuable paper, and will send you the Journal d'Agriculture Practique in exchange.

"We remain, gentlemen, yours, very respectfully, VILMORIN, ANDRIEUX & Co."

The following is an extract from a letter we received by last mail from Xenia, Ohio, written by a friend who has been a reader of our journal. If strangers view our glorious land thus, how should we view it? All who wish well to California should give their friends a chance to see the true picture of California:

XENIA, Ohio, Dec. 2, 1857.

EDITORS FARMER: * * * * I have read your paper with some degree of interest, and have been pleased to notice the rapid development of the Golden State in its agricultural department. We are very much astonished, or I might say impressed, with the marvelous accounts given of the wonderful products of the soil. California is destined to be a great, wealthy and populous State.

I remain yours, &c. H. P. C.

The Right Spirit.

In a letter received from Gloucester, Mass., from an earnest and excellent farmer, he writes the following, which should stimulate all to work as earnestly; read his words.

MESSRS. EDITORS: I feel deeply interested in Agricultural improvements, and like to know what is doing to better the condition of the human family, on any part of the earth. I have been busily engaged in cultivating this hard and rocky soil for more than half a century, and feel as much interested to try to make improvements as ever I did in my younger days. I now receive the benefit of one of the improvements I have made, and think I cannot spend my time in any more useful manner than to continue on in the same course. I make it a rule, if I make any improvement that I think may be useful to the public, to offer an account of it to some agricultural paper, for publication.

Yours with respect,
THOMAS HASKELL.

GLOUCESTER, Mass., Nov. 25, 1857.

RICHARDSON'S CLOCK-WORK WATER POWER. We paid a visit the present week to the Oriental Hotel, to see the working of the machinery which Mr. Richardson has placed upon the well of that house. A lead pipe had been inserted into the well 28 feet deep, this was attached to the machinery, and by means of the power the water was raised up in a continuous stream and then thrown up an inch pipe 53 feet high. The weight used upon this work is a tun. The plan works well. Mr. R. has prepared a drum for a belt for horse-power, to wind up the machinery, and then he feels his work is complete. It is worth a walk to the hotel to see it.

ARTISTIC.—Every day reveals new proof that the Arts and Sciences are making rapid advances on our Pacific shores. We found upon our table one day last week, a very superior specimen of the Photographic Art in the likeness of our friend M. A. Sarles, Esq., of the Collegiate Institute of Benicia. This specimen of the Art was from the Rooms of Mr. Farden, and whether it arose from the excellence of the friend whose likeness it represents, or the skill of the artist, we know not—only this we know, it is a most perfect likeness, and one that we shall highly prize for that friend's sake.

"GENELLA."—As now is the time for replenishing the house furnishing department, and as many families arrived by last steamer to locate on our shores, we would invite those in want to give a call on Joseph Genella, 180, 182 and 184 Montgomery street, where they will find the most complete assortment of Crockeryware, French, China, Bohemian and American Glassware, Table Cutlery, and in fact everything that pertains to the house furnishing department. He has just received some superb French enameled China Dinner Sets, the richest in the city. His importations are made from Europe direct, which enables him to offer the best and choicest goods in the market. A walk through this large establishment will convince the most fastidious even that here they can find everything suited to their wants; and gentlemanly assistants are prompt and attentive to meet the increasing business of this deservedly popular establishment.

MONTGOMERY RESTAURANT.—There are so many eating houses opening every week, and so many closing up, that one can hardly know which are to be called prominent eating houses; but there are some that bear indubitable signs about them of permanency, by which we may know them, and of such we love to speak. The Montgomery Restaurant, No. 112, Montgomery street, by P. T. James, deserves a special notice from the perfect neatness and order that prevails within, and the care and attention that is bestowed upon the cooking department, as well as the attention bestowed upon the patrons of the place. We should think that, by the crowds that are daily seen there, we can depend upon this restaurant being one of those that can be relied on. Mr. James is well known as formerly at the American Exchange Hotel, and was deservedly popular there, and that popularity follows him to his present place of business.

☞ REGISTRY OF STOCK.—All who are interested in the purchase and sale of Stock, of every description, will find a Register kept at our Office, for the entry of all Stock for sale, and their full and correct pedigrees; so that persons who have Stock for sale, or wish to purchase, can gain important information. Those in want of choice Stock will find this opportunity a valuable one, as we are in correspondence with the principal Stock Breeders in the States, and are fully prepared at all times to make sales of Stock of any quality.

☞ J. Q. A. Warren, just from the East, will be happy to see all interested in the subject, at the FARMER Office. January 9, '58.

FARM STOCK, ETC.

FARMERS OF CALIFORNIA!

I AM BREEDING THOROUGH-BRED

Ayrshire Cattle,

"Competition is the life of trade,"

And we cheerfully yield to all our competitors a fair field and an open trade, and abide the judgment of the public most cheerfully.

v8-1 LYON & CO., Empire Brewery, 106 Jessie street, San Francisco

IS ACKNOWLEDGED to be, by all who have tried it, the BEST TONIC and ANTI-DYSPEPTIC ever presented to the California public.

In New York City, and Buffalo, N. Y., where the Turner Brothers first introduced it to the world, it has secured an unprecedented degree of popularity, owing solely to its sanitary and extraordinary medicinal properties.

Medical Men and Men of Science

All pronounce it to be most healthful and invigorating; and whether it is used by adults or infants, its effects are alike beneficial.

It is purely Vegetable, and is composed of

The juice of berries, herbs, wild plants and roots;
The Spring's first buds, the mellow Autumn's fruits;
The bright wild flowers, whose fragrance charm the bee;
The op'ning leaves, the bark of the forest tree;
The bulbous root, on mountain's slope that's found;
The spreading vine, that grows in marshy ground.

TURNER'S GINGER WINE

Being so well known to this community, as well as to all the inhabitants of the Pacific Coast and its Islands, it is only necessary here to state that it is manufactured in all its purity, as well as the

CONCENTRATED ESSENCE OF PURE JAMAICA GINGER,

And all the Syrups, Cordials and Extracts now in use in this State, by TURNER BROTHERS,

SANDS' SARSAPARILLA,

FOR THE CURE OF

SCROFULA, MERCURIAL DISEASES, RHEUMATISM, CUTANEOUS ERUPTIONS, STUBBORN ULCERS, LIVER COMPLAINT, DYSPEPSIA, BRONCHITIS, SALT RHEUM, LUMBAGO, WHITE SWELLINGS, HIP DISEASE, ENLARGEMENT OF THE BONES AND JOINTS, FEVER SORES, FEMALE COMPLAINTS, ERYSIPELAS, LOSS OF APPETITE, BILES, GENERAL DEBILITY,

AND AS A

SPRING AND FALL PURIFIER OF THE BLOOD,

IT STANDS UNRIVALLED.

Investigation and experiment have demonstrated that the blood contains the elements of the whole animal structure flesh and fibre, glands, muscles, tendons, the nails, the hair, and even the bones themselves, are all sustained by the blood. Well then may it be called the stream of life, and in proportion to its purity will be that of the substances into which it is continually changing. The weight of an ordinary sized man being about one hundred and fifty pounds, is reduced, when the fluids are all separated from the solids, to less than twenty pounds; consequently, when disease in the shape of Scrofula, Blotches, Ulcers, Eruptions, Sores, Liver Complaints, &c., appears, it is at once evident that the secretive functions have become inert, and impurities have been engendered in the blood, which are working their way to the surface. This celebrated Extract will speedily remove all unhealthy secretions, purify the blood, equalize the circulation, produce a healthy action of the stomach and bowels, and gradually, but surely, extirpate the disease.

Liver Complaint.

The following is an extract from a letter received from Rev. WILLIAM GALUSHA, of Berkshire, Vermont. It speaks for itself, and requires no comment.

MESSRS. SANDS: I have been afflicted with a severe pain in my side, occasioned by a diseased liver, for the last twenty years—suffering at times what language cannot convey; but since taking your Sarsaparilla, I have been greatly relieved, so much so as to be able to attend to my business, and preach occasionally, for the last fifteen months. I wholly discarded all other medicine, and thoroughly tried the Sarsaparilla, which I can recommend in truth and sincerity to all those who are in any way afflicted with any species of scrofulous complaints. There have been some remarkable cures effected by its use in this vicinity. Mrs. L. Shaw, by the use of six bottles, was restored to better health than she had before enjoyed for ten years; and Mrs. W. Stevens, who had been severely afflicted with Erysipelas, was entirely cured by the use of a few bottles.

Yours, truly,
WM. GALUSHA.

Prepared and sold by A. B. & D. SANDS, Wholesale Druggists and Chemists, 100 Fulton-street, corner of William, New York. Sold by H. JOHNSON & Co., San Francisco; S. T. WATTS & Co., Marysville; R. H. McDONALD & Co., Sacramento; and by Druggists generally.

PERUVIAN FEBRIFUGE,

FOR THE PREVENTION AND CURE OF

FEVER AND AGUE,

And all the different forms of Bilious Diseases.

Ague and Fever is the most common form of bilious disease, and its prevalence in almost every section of our country, together with its debilitating and disheartening character, is sufficient to insure to a CERTAIN remedy a ready welcome. Such a welcome has greeted this medicine from thousands who have had the unhappy experience of shaking, freezing, and burning by turns, until hope of relief had almost gone. It is the result of practical experience and observation for a number of years in the treatment and cure of this disease; and such has been the uniform success in its use, that no case is known where it has failed to cure when regularly administered. Persons travelling through, or residing in, infected and marshy districts, should not be without it, as a few doses will effectually counteract the poisonous and miasmal influence arising from such location.

Testimony confirming the above has come to us from hundreds in various parts of Illinois, Michigan, Ohio, and Missouri, who are living witnesses of its surprising efficacy.

Prepared and sold by A. B. & D. SANDS, Wholesale Druggists, No. 100 Fulton-street, corner William, New York. Sold by H. JOHNSON & Co., San Francisco; S. T. WATTS & Co., Marysville; R. H. McDONALD & Co., Sacramento; and by Druggists generally.

Sugar Beet and Chinese Sugar-Cane.

A FINE Invoice of Seed of the above, just received and for sale at our office.

THE LAW OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription
2. If subscribers order their papers discontinued, Publishers may continue to send them till all charges are paid.
3. If subscribers neglect or refuse to take their papers from the office or place to which they are sent, they are held responsible until they settle their bill and give notice to discontinue them.
4. If subscribers remove to other places without informing the Publisher, and the paper is sent to the former direction they are held responsible.
5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is prima facia evidence of intentional fraud.

☞ Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify Publishers, once in three months, of papers not taken from their office by subscribers.

Postage of the Farmer.—The Postage of the FARMER to any part of the State is only 6½ *cents per quarter, or 26 cents per year.* This is the lawful postage established by Congress and when more is exacted it is a violation of law

Gophers, Rabbits and Squirrels.—No. 1.

EDITORS FARMER: In the year 1850, the golden era of market gardening, I was following that business at the Mission Dolores. We had glorious times then, and those who were thus engaged were men of some consequence, as they have shown themselves. One became a senator; one, an assembly-man; three have been judges; six, aldermen; one, a Mormon preacher; some, distinguished contractors; and some, newspaper-scribblers. All of us have become, more or less, in some way or other conspicuous. But we had our difficulties. We had but a limited supply of water to divide among a considerable number; and we had Gophers, Pigs, and Cows to contend with. The pigs and bovine cattle we could fence out; and we did so. We managed also to increase our supply of water, and learned to economize it; but the Gophers, though in size the smallest of our enemies, seemed for a while the most difficult to overcome. We had consultations about them, and different schemes for subduing them were argued with appropriate eloquence. Still they kept their ground; and beets, carrots, lettuces and cabbages were carried off triumphantly by those original occupants of the soil, who doubtless looked upon us as intruders on whom they had a right to make reprisals, for daring to interfere with their vested rights, to which they probably considered they were fully entitled by priority of settlement and prescriptive possession. We did not take the same moral view of the subject. We did not argue morally at all. They were our enemies, and we concluded to exterminate them. Like Glossin in Scott's Guy Mannering, our motto was "Might makes right." We despised the Gophers; we would have them rooted out; and to accomplish this object no proposal was thought too base to be adopted. Some said trap them, as they do moles in other places; some said poison them; some said drown them out; some said smoke them out. We differed as to the means; but we all agreed in keeping no terms with the humble Gophers, of whose time-honored homesteads we had unceremoniously taken possession.

I concluded we could easily catch them with such traps as I had seen mole-catchers use so effectively in the old country. But I was not sure that I knew how to catch even moles. In the old country, there is such a complete division of labor and businesses, that the man who catches moles does nothing else. You may see him stepping stoutly and independently along the road with his traps on a string thrown across his shoulder, and his pouch by his side into which to put his *tails*, which he doles out every evening to the farmer for whom he is at work, at the rate of two pence a-piece. He looks on himself as a man of skill, and keeps his secret to himself. He makes twice as much a day as a plowman, and is idle three-fourths of it; during which time he sits cozily by the kitchen fire, and makes love to the housemaids by repeating his wondrous exploits in following out his profession. The girls look upon him as a little hero, and though Miss Mitford has characterized him as "of the earth earthy," he enjoys "the heaven of love" derivable from the witching glances of half the bonny lasses in the country-side. I was consequently ignorant of the business. But I had observed that the mole, though turning up hills all over those fields in which he was at work, had his regular home from which he made roads in different directions, and that those roads he invariably kept as he went out on his daily excursions. In this the mole-catcher's secret seemed to lie. By dint of close observation he had learned to trace out the spot where the chief burrow was; and thence, where the mole would naturally make a road to and from the place where he was laboring. All he had to do was to plant one of his traps in this thoroughfare, and his victim was doomed. He had him for certain.

I set to investigating the habits of Gophers, and had hopes that they used similar means of transition; but I was mistaken. The Gopher is a cunning fellow, and is not to be caught in this manner. The poor blind mole may have to act thus; but the Gopher is sharpsighted, and, being under no necessity of traveling along the old beaten track, probably makes a new one every day. At all events it is by mere accident if he runs into a snare like the other.

I had convinced myself that we must devise other means for catching them, and was puzzling myself how to effect the desired object, when a neighboring gardener called in one afternoon on his homeward journey from San Francisco. He told me to give myself no further trouble about Gophers, for he had got as much in his pocket as would soon clear his garden, and that he hoped to be able to inform me next time I saw him of his perfect success in exterminating them—at the same time producing a pretty large parcel of strychnine, on the virtues of which he discoursed quite volubly. Of course I felt interested, and overjoyed that a man of his acute intelligence was so certain about their destruction, and also that he had promised to give me a full account of the modes of using his poison which he might find it necessary to adopt, and the exact number of Gophers which he succeeded in assassinating.

Having unhesitatingly coalesced in his opinion, I had given up all thoughts on the subject, till I should learn the result of his experience. I did not see him for a week; but as soon as I cast my eyes upon him, I could perceive that his features were graver than usual. I hinted the matter in which we had a deep and mutual interest. He only shook his head. At first, he said, he merely scattered his strychnine loosely over the leaves, and watched the motions of his insidious foes, to discover the effect of the powerful dose which he had provided for them. He rose early next morning, before daylight, gathered fresh leaves with his own hands, and distributed them in those places where he found them busiest in their depredations; and sat down patiently to wait the coming dawn, and the coming Gophers. He had not watched long, he said, when he observed the earth stirring; a Gopher made his appearance; and to his infinite satisfaction made straight for the poisoned leaves. He felt happy, but his gratification was of short duration. The cunning fellow came up as if he smelled a rat. He cautiously put his nose to the leaves, took them up as cautiously by one corner, and shook them lustily; smelled them again, and shook them again; till, at length, convinced that there was no danger, he carried them off to his hole, and was out of sight in a moment. My friend was disappointed, but he did not despair. He believed he was not to be baffled by a Gopher. So, next night, he mixed his poison with paste, and spread it over the leaves like butter. Next morning, as on the former, a Gopher soon made his appearance; he believed the same cunning fellow who had already outwitted him. He hoped it was, for he concluded it would puzzle him to shake off the preparation which he had now provided for him. As on the previous morning, the Gopher again walked cautiously up to the leaves which were lying temptingly in his way; and having smelled them, commenced shaking one as formerly; smelled it again, and shook it again. To imitate the famous ode of "the glorious John," in regard to the love-sick hero of Macedonia,

> He smelled and shook,
> And smelled and shook,
> And smelled and shook,
> And smelled again.

At length, convinced that there was something wrong with them, which he did not care for troubling himself to investigate, he turned scornfully on his heel, and cutting for himself a fine lettuce, worth at least two bits, with a laughing grin carried it off to his burrow, contemptuously; his whole deportment showing that he wondered why he should be taken for an egregious ninny.

But this was not all. The good folks in San Francisco had learned that my friend was spreading poison over his vegetables, and many of his former customers were reluctant to have further dealings with a man by whom, however unintentionally, they ran a risk of being killed. We all took the hint; and nobody, from that day forth, entertained the idea of exterminating our enemies by such doubtful and dangerous means.

But, as Burns says,

> "Though losses an' crosses
> Be lessons right severe,
> There's wit there, to get there,
> We find nae ither where."

Our unsuccessful attempts at their immediate extermination induced me to be more observant of their peculiarities and habits. I found that they are impatient of water, and seldom molest gardens which are properly irrigated; and, though amusingly pugnacious when unearthed, that they are naturally shy and cautious. I also found that two or three of them will do a great deal of harm, and that the clearing of a garden does not generally involve the slaughter of so many individuals as we may have been inclined to believe.

The rather unusual union of courage and caution, in so small an animal, renders the Gopher an easy prey. When he comes out of his hole he reaches himself up, and looks cautiously round him, before proceeding to select those tender vegetables to which he is partial. Now is the time to nail him, particularly in the morning about sunrise. Let any gardener who is molested with Gophers, send a man about this time to look over the garden. He will soon discover their whereabouts from the freshly turned-up earth. He will not have long to wait before he will observe one show his nose. Let him be prepared, and have his gun ready leveled. After knocking off the loose earth from the mouth of his hole, the Gopher will stretch himself up, to see whether there is danger in the way. Now is the time to fire, but the gunner should take a good aim. An ordinary shot will seldom miss, as the poor fellow seems a little bewildered at first with the light, and takes longer to look round him than you would naturally expect.

By adopting this course for only a few mornings it is astonishing what a difference will be found in the amount of damage done, which clearly shows that, though individually very mischievous, they are seldom very numerous in well-cultivated gardens. So far as my own experience goes, I had no trouble with them after the first year; and I believe the same was the case with all my neighbors at the Mission.

Squirrels and Rabbits cannot easily be exterminated by such means. But their case must stand adjourned till next week. AGRICOLA.

MILLERTON, Jan. 2, 1858.

Paint Your Houses and Implements.

While the clear good weather lasts, all who would have their dwellings and other buildings last and prove tight, and water and weather proof, should not forget they can have California Paints to work with, at moderate prices.

Farmers should paint their reapers, mowers, threshers, harrows, plows, and other tools; this will preserve them much longer from the rains of the wet season and the heat of the dry season. The free use of Paint in this country is true economy. Dr. J. L. Polhemus, of Sacramento, is the general agent for the large Paint Works of Covert & Co.

The Grape-Vine.

[The following is the article, on the culture of the grape-vine, to which reference was made in our columns last week:]

THE grape-vine, although held in the emblematical category of plants as the prototype of intoxication, is, nevertheless, the prolific parent of rare and enviable luxuries, which no State or Nation can outrival California in producing.

If Bacchus, who is said to have first taught the use of the vine in making wine (in honor of which he wore the first crown ever made, and which was made of vine leaves), had originated the device of manufacturing this exciting beverage in the nineteenth century, the people would undoubtedly have held him in as high and grateful esteem, as did the Grecians, who conferred upon him the exalted title of a god. Pliny tells us, that "the vine sprang from the blood of the giants; who, having made war on the gods, perished in battle." From the treatment in many instances we have seen given this plant, which holds up its grateful head, and frequently flourishes under the most cruel treatment, we are inclined to believe that the tacit influence of Grecian superstition has still something to do with modern notions, in governing the actions of grape growers. It is believed, by many, that the vine flourishes best planted upon soil saturated with the blood of animals; and in many establishments, great expense has been incurred in collecting carious matter, such as slaughter-house offal, dead cattle and the like, for the purpose of enriching the soil for the grape-vine. Nothing is more erroneous than this system of bringing putrid animal matter into *immediate contact* with the tender filaments of a plant. Instead of having a vivifying influence, it rather destroys the spongioles—the delicate and hair-like organs of absorption. The soil best suited for the grape, is a light porous virgin soil, made generous by liberal applications of decayed vegetable matter, stable manure, road-scrapings, &c.; besides, horns, hoofs, bones, oyster-shells, old shoes, and other substances of slow decomposition—all thoroughly incorporated with the soil before the vines are planted. A position should be selected for a vineyard where the sub-soil is neither cold nor retentive of moisture. In cold, moist sub-soils, the excrementitious discharges of the grape-vine—which are very great—are retained, and produce diseases.

Propagation.—The method of propagation most generally followed, and that requiring the least care and attention, is by slips or cuttings. These cuttings should be at least two feet, or four joints, long—the lower end of which should be cut close to the joint or bud, thereby leaving no wood at its lower extremity except that which the action of the bud incites to active life. They should be planted in a trench, made with the spade at least fifteen inches deep, or sufficiently deep to admit of two joints of the entire cutting being covered with soil. The trench should be so made that the cuttings, when planted, will stand in a leaning posture—say about forty degrees. A foot apart will be none too much for the cuttings to stand in the drill. In planting cuttings, care should be taken *not* to *force* them to the required depth by the hand, for by so doing, the bark at the extremity may be so disturbed that disease of the part is sure to occur; of which there is little danger, if the cuttings are carefully *laid* in the trench, and the soil pressed firmly against them with the hand in sufficient quantity to hold them in their places, while a spade or hoe may be used to finish the filling up, and smooth the ground. Propagation from the *single eye* is to be preferred to slips or cuttings; but as it requires more time and attention to raise plants in this manner, those totally unskilled in the art would fail to have that success they would by the former method. It would be superfluous to say that cuttings ought to be well ripened wood of one summer's growth, gathered at the fall or winter pruning of the vines, which ought to be done towards the close of December, in this locality, at latest; or when the vines have shed all their leaves and the wood is thoroughly ripe. The cuttings now gathered should be buried in sand, or in soil, where there is plenty of drainage, until early spring, when they may be taken up and planted, as already mentioned. When the cuttings have grown *one* summer and ripened their wood in the fall, they should be cut back to *two* eyes from the original stock, and carefully taken up and transplanted in the vineyard. Fall or winter transplanting of the vine in this country, where there is no severity of weather to injure well ripened wood, is preferable to spring planting; for bleeding at the roots, which frequently results from spring planting, is, in a great measure, avoided by transplanting in fall or winter. Where vines are grown on the French vineyard system, six feet apart each way is a good distance for them to stand.

Pruning and General Treatment.—Practical experiment has proved satisfactorily to my own mind, that no mechanical rule can be laid down that can, with strict propriety, be followed under all circumstances, in the culture of the grape. An exercise of individual judgment is ever necessary to insure successful results. Observing practitioners have reasons of their own for varying their treatment of plants, separate and aloof from those of the scientific investigator; yet it is a fact that cannot be gainsayed, that scientific skill combined with practical experience, form the only knowledge that can properly modify and control intermittent circumstances arising from climate and locality, and render them subservient to the interests of husbandry. The concentration of the sap; the office the leaf performs in exhaling moisture; in fact any part of vegetable physiology, would be unnecessary here to touch upon. The only general rule we feel perfectly safe in recommending, in pruning, and the general treatment of the grape-vine, is to check the accumulation of superabundant foliage, and rambling lateral shoots, as much as can be done without danger of bursting or starting the buds on the main stem *of the same year's growth*, for these are what are to be depended upon for a future year's fruit. A lateral shoot will start at every joint, which ought to be cut off at its first joint, thereby leaving one bud on the lateral which will start again, and which ought to be cut off above the first joint of the *new growth*, and so on during the season. Water should not be given in very great quantities while the vine is in flower, because the fecundating dust is sometimes so much affected by inordinate supplies of water, as to prevent the fruit from "*setting*" regularly. Of the early white French varieties—*Chasseles de Fontainbleau*, White Frontignac, &c.,—varieties, which in my opinion would succeed well in some of our mountain gardens, the fruit-bearing shoot will generally show *three* bunches of fruit, and these three within the first five joints of its growth. Not more than *one* bunch ought to remain on each shoot. After the fruit is fairly *set*, and the berries swollen to about the size of a marrowfat pea, the vines will then begin the hardest part of their fruit-bearing labor—the making of stones or seeds, which in all plants, is the fruit proper. The knife should not be used at this time, but rather let the laterals ramble, as by cutting them off, a flow of sap would be forced upon the berries at a time when they are in a state not fitted to receive it. It being the *returning* sap that feeds the fruit, the proper use of the knife in preventing the increase of wood, throws back the sap to sustain the fruit. It must not be understood that to the extent you prevent the increase of wood while the vine is bearing, that to the same extent will you increase the size of the fruit. The knife must never be so liberally used as to prevent the free and healthful operations of *all* the functions of the plant. O completion of the *second* swelling of the fruit (they swell but little when forming the seed), it will begin to color, at which time watering ought, in a great measure, to be suspended. This will accelerate their ripening, and add to their bloom.

G.

A NEW SAWMILL.—A very excellent sawmill has recently been erected at Pleasant Valley, El Dorado county, by Messrs. Fleming & Co. They run two sets of large saws, 72 inches each. An abundance of excellent timber is near by, of pine of various kinds, and spruce and fir. A very superior kind of live oak of extra quality is found suitable for axles, plows, beams, etc. The mill saws 12 hours per day, and throws out 12,000 feet of lumber to each set of saw. The Company are fixing the works so as to saw logs of 7 and 8 feet in diameter. It is a very enterprising firm, and the mill will do good to all around.

California Notes.

ABOUT GRASSHOPPERS AND LOCUSTS
In California and the World.

BY ALEXR. S. TAYLOR, OF MONTEREY.

"A nation is come up upon my land, strong and without number, whose teeth are the teeth of a lion, and he hath the cheek teeth of a great lion. They shall run to and fro in the city; they shall run upon the wall; they shall climb up upon the houses; they shall enter in at the windows like a thief. A fire devoureth before them, and behind them a flame burneth; the land is as the Garden of Eden before them, and behind them a desolate wilderness; yea, and nothing shall escape them. The sound of their wings is as the sound of chariots of many horses running to battle. And they have a king over them, whose name among the Hebrews is Abaddon, but with the Greeks it is Apollyon."

THE facts connected with the visitation of the Locust species of insects to the countries of the North American Continent affected by a similarity in physical geography, soil and climate to our State, are of the most curious and interesting character within the range of the history of the Natural Sciences. From the chroniclers of the Periodical Press we learn, that up to the 11th of October, 1855, and commencing about the middle of May past, these ravagers have extended themselves over a space of the earth's surface much greater than has ever been noted either in ancient or modern times. For example: the entire territories of Washington and Oregon and every valley of the State of California, ranging from the Pacific Ocean to the eastern base of the Sierra Nevada. The entire territories of Utah and New Mexico, and the immense grassy prairies lying on the eastern slopes of the Rocky Mountains. The dry mountain valleys of the Republic of Mexico, and the countries of Lower California and Central America, and also those portions of the State of Texas which resemple the physical characteristics of Utah and California. These records prove that the Locusts have extended themselves in one year over a surface of country comprised within thirty-eight degrees of latitude and eighteen degrees of longitude (in the broadest part), or about one-twelfth the superficial surface of the dry land of our planet.

We have very little doubt that the future records of Russian and British America will disclose the fact, of the entire country on the Pacific Ocean, north of Washington Territory, and extending north and east within the physical characteristics of the Rocky Mountain chain, with its peculiarity of wet and dry seasons which affect this entire district of the Western Hemisphere, —being visited by the different varieties of the *Locusta*. It would be a very singular coincidence if the *Locusta* should have made their visits to the Countries of the Southern Continent in 1855, as their ravages have been several times noted by the historians of Columbia, Peru, Chile, Argentina and Brazil.

On several days in June, July and August of of 1855, the Grasshoppers (or *langostas* of the Spaniards) were seen in such incredible numbers in the valley of the Sacramento, in California; in the valley of Colima, in Southwest Mexico; in the valley of the Great Salt Lake; in Western Texas and certain valleys of Central America—that they filled the air like flakes of snow on a winter's day, and attacked everything green or succulent with a voracity and dispatch, destructive to the hopes of agriculturists and herdsmen. Immense amounts of fruits, vegetables, grain-crops and cultivated plants, have been utterly destroyed by them; and even the eatables and comestibles of travelers have not been spared, as is stated in the Sacramento Union of the 8th September, ultimo, on the authority of Mr. Jacob Harvey, who states that his party of emigrants encountered, on the western slopes of the Rocky Mountains, about the end of June last, such multitudes of Locusts flying to the eastward as to nearly obscure the heavens. In Western Texas, incredible numbers were seen by various travelers, in July and August, who also mention a species of bird which accompanied the flight of the Locust in immense flocks, probably the sterling or blackbird, and devoured them with great avidity. In the survey of the Great-Salt-Lake country, by Captain Henry Stansbury, in 1850, are described and figured three or four species of Gryllidae, which are found in the vicinity of Eastern Utah, and which are very little different from those of California; most likely the very same species. Every traveler, trapper and trader, have made mention of these animals, in writing about those regions.

We may here mention the accounts of the Mexican press of 1854–55, in which are related the extraordinary appearance of the *Locusta* in the valleys of the States of Chiapas, Honduras and Guatamala, about the time of a terrible convulsion of earthquakes, all of which occasioned in those countries an intense scarcity of food, producing indeed actual famine and disease which carried off many of their inhabitants.

The Shasta Courier, printed in the northern Sacramento mountains, remarks that "on Wednesday last (19th September, 1855) an immense flight of Grasshoppers passed over this place, flying westward. The greater portion of them flew very high, and could only be seen by shading the eyes from the sun. They were as thick in the heavens as flakes of snow in a snow-storm. We hope they will not stop flying until they reach the Pacific." And we find in the accounts of the press of Humboldt and Klamath counties, that about this time the Grasshoppers did visit the valleys of their ocean vicinity. The Oregon and Washington Territory papers also notice, that in the first week of September the Grasshoppers were becoming more numerous than ever in their valleys, and doing great damage. The Deseret News (of Utah) notices, in one of its July issues, that at one time the Grasshoppers filled the atmosphere of the Salt-Lake country like flakes of snow in a heavy storm. The same remark has been made by travelers and emigrants (through the periodical press of 1855), of all the territories of the United States whose waters flow to the Pacific Ocean, or those countries in their immediate vicinity.

It is olden knowledge of the natives of California, the frequent visits of the Langostas to this country. They were very numerous in the summer of 1849, as the writer can testify from observation. They are said to appear invariably in great numbers in very dry and hot seasons, succeeding to very inclement winters. Throughout California, with its *ante* 1849 boundaries, throughout Lower California, New Mexico, and all the dry, and the elevated mesas or plateaus of the Republic of Mexico, their ravages have been noted by the old Spanish chroniclers, from the first conquest and settlement of the countries; also, by American trappers, hunters and travelers throught the same regions, for the last fifty-five years; also, by English, Russian and French writers and navigators. The Sacramento-Valley papers mention that whole orchards, gardens and vineyards have been consumed by them, in several instances to the entire destruction of the crops of particular individuals. One gentleman near Sacramento City had the fruits of his orchard and gardens destroyed to the assumed amount of twenty thousand dollars. Entire fields of young grain-crops and gardens have been eaten up within the space of a single day, leaving the ground like a frost-wilted, blackened desert. In some parts of the valley they annoyed the passengers and horses of the public stages to such an extent as to cause the greatest inconvenience, biting the horses, or flying into the faces of the passengers and filling the air so as to obscure the sun. They appear in some cases to have positively endangered human life. The only feasible remedy appears to have been, to sweep them up into great heaps and burn them, or gather them into long ditches and cover them with dirt, or consume them there with fire. The annual conflagrations of our plains occurred this year (1855) very early, from the air being exceedingly arid; the dryest year, indeed, since 1846, which circumstance appears to have had considerable effect in destroying the swarms of Grasshoppers; as, to to escape the heat, the animals seem to have endeavored to keep out of the influence of the fires, and being driven before the winds, were swept into Suisun Bay in incredible numbers. The passengers in the steamer from Sacramento to San Francisco, on Saturday the 14th of July last, state that they fell in such incredible numbers into the waters of the bay as to make, in places, a complete covering over the surface. When driven ashore afterwards with the tides, they filled the air with a disgusting stench.

It would seem that the only feasible means of destroying the propagation and increase of the animal is that which nature and circumstances suggest. The extensive conflagration of the grassy plains and hills of California has been noticed ever since the years 1542–43, in the account of the voyage of Juan Rodrigues Cabrillo, and particularly near San Pedro (the present embarcadero for Los Angeles), which he named the Bay of Smoke.

The French have a very pithy reply to grumblers, and people whose inquisitorial intellects have been shaped into pertinacious notes of interrogation: "What God made, God made good." The entire range of California, Utah and Eastern Oregon, and neighboring countries, being deserts, prairies, or lands of hills and mountains, sparsely covered with trees, and everywhere thickly or thinly clothed with grasses, we know then become excessively dry for three months of the year, when they either take fire from accident or design; or, as is most likely in some cases, from the attrition of the leaves and glazed stalks in a dry and windy day. As soon as the parched vegetation is fired, with a good breeze of wind, it will lick up and burn down an immense district of country before it is stopped by a wide road, a dry river bed, running water, or damp ground. In its progress it consumes and destroys all animated nature not capable of speedy flight or escape; and among the things it does, good and bad, we must include the suffering it causes to sick Grasshoppers, their undeveloped larvæ, and the millions of eggs they lay in the ground, as well as thousands of the healthy plague, whose wings and legs get singed and burnt in trying to make their escape from the devouring heat. The atmosphere, under such circumstances, becomes, in places, of extraordinary parching heat.

The wind, at times, must conspire (in large praire fires) also, to bring immense numbers of the Grasshoppers within the influence of the fire, and so stifling them, bring them to the ground very speedily. In a strong gale, when swarms of Grasshoppers are on the wing, high in the air, they are swept along *nolens volens*, until, as the breeze slackens, they are obliged to descend, and then fall into the waters of large bays, seas, and, as we shall see, even of large extents of the surface of the ocean, where they fall a prey to greedy fishes, of which in particular the waters of every bay and lake of California do most astonishingly abound, and at those very seasons when the Grasshoppers are more plentiful. We have amused ourselves by the hour, when at Benicia in 1851, by throwing Grasshoppers into the waters of the Straits of Carquinez, and witnessing how soon they were picked up by the highly appreciative little fish of various species, that delight in making that sub-salt current their aqueous habitation. And they make very good fish to eat too, as every wayfarer or resident in those parts can testify.

In many parts north of the Bay of San Francisco the wild Indians were seen sweeping the Grasshoppers into piles and holes, for the purpose of roasting them for food, and of which they are very fond. This is always found to sicken the Indians more or less; a fact which has been noted by the pioneer settlers and natives of old, as also by many travelers and voyagers who have visited California and the Rocky Mountain country, and also by the Jesuits of Lower California. The Grasshoppers appeared in 1855 in much larger numbers in the valley of the Sacramento, and the mountains which bound it on the eastern or Sierra Nevada side, etc., than in any other part of the State, and here and in Utah they committed the greatest ravages.

In the southern coast counties they were comparatively few in number, and did very little injury: they were more troublesome around Los Angeles than anywhere else in the south. The species found near Monterey, and examined in October, were of a burnt-sienna color, one inch and three-eighths long by one-eighth of an inch thick, with three black blotches on each outer wing; the legs are also barred black; the lower body parts of ocherous yellow; the inside wings, which are very thin, are yellowish, with a broad black fringe. The head is of a lighter color than the body, and is as hard as the shell of a peanut. The mouth is armed with two hard, black forceps, nearly one-eighth of an inch long, the inside edges of which are beveled inwards, and finely serrated, and very keen. Four of these October grasshoppers (which we take to be males, and full-grown) weigh thirty grains weight, which would make a swarm of two millions of the animals weigh somewhat about thirty-two thousand pounds, or sixteen tuns of two thousand pounds each. If, standing on the plains of the Sacramento, or of Utah, during one of the days of July, when the Grasshoppers "were as numerous as flakes of snow on a winter's day," and describing in the transparent atmosphere a radius of seven miles in diameter, and a quarter of a mile in altitude, and supposing that each grasshopper would occupy the space of one cubic foot, and estimating this radius as the extent of a man's vision in such a place, and under such circumstances, we would arrive at the incredible amount of one thousand, eight hundred and twenty-three billions, and over, of this destructive insect to be seen by human eyes at one time.

The habits of this insect ought to be diligently observed by the cultivators of the soil in our State. It requires from the State authorities the employment of the best naturalists to study and compile, for public use, the most searching investigation into the birth, multiplication, and best methods of checking the increase, of this terribly devouring and consuming pestilence. We may note here that the Grasshopper in July, around Monterey, where but few came this year, is not more than half the size which it is in October; and that the female, or what we take to be the female, is of a yellowish color. This refers to the species found near Monterey, only. But all this requires closer study and continued observation.

Since writing the above we met with the following forcible notices from the Oregon and Salt-Lake papers:

Grasshopper Ravages.—In the southern part of Oregon, the present season, grasshoppers have been ravaging the country, utterly destroying every green vegetable substance. Fruit trees have suffered greatly from their depredations, and in certain localities, whole nurseries of fruit trees have been killed, and whole fields of crops destroyed. The grasshoppers infested Northern California last year, and seem to be making a pilgrimage through Oregon. This year they have done but little damage this side of the Calapooia Mountains, but are getting quite numerous in Linn, Lane, and Benton counties. It is feared that they will make sad havoc next year throughout the Willamette Valley. There seems to be no safety from their depredations, and they would seem to be as bad a pest as the locusts of Egypt. They have infested portions of California the past season—sweeping all before them; and in Utah they have destroyed at least one-half of the crops. Fences, ditches, or streams seem to present no barriers to their ravages.—[Oregon Times, September 29.

THE Great Salt Lake News of 19th Sept. last, states that on Thursday, 29th August, several millions of grasshoppers descended on the settlements north of Utah county, destroying everything green in their way. The county of Tooele was visited by a similar plague.

It is a little singular that though the ravages of the grasshoppers have been noticed by all the 1855 presses of California, Utah, Oregon, and Washington, and particularly by those of the Sacramento and Utah valleys, not one of these presses has made any detailed description of the different species of *Locusta* infesting those districts of country. Nor have any of our naturalists, or observing writers, made more than a passing notice of the animal, whose history hereafter, by future chroniclers, will leave the most melancholy marks of its devastations and destructions on the means of life and subsistence, and, probably even safe prosperity of the people who may fill up these territories with the industrious results of generations of accumulated labor. If they have been recorded in the annals of Africa, Asia, and Europe, for four thousand years, and have been chronicled in the histories of *the Californias* for one hundred years, we may be sure that there is nothing to prevent their periodical famine-making visits within the boundaries of the North-Pacific slope, for four thousand years more. Let it not be forgotten, that the devouring ravages of the *Locusta* have driven races and nations of men to starvation, desperation, and even sanguinary revolutions: overturning dynasties, systems, and governments, and leaving beacons of deserted cities and countries, as mementos of the ignorance and fatuitous folly of man, as well as of the unfathomable mysteries of Divine Providence.

And let us also remember that as California so exceedingly assimilates in its physical characteristics to Palestine, and the countries of the Mediterranean shores that we may yet be afflicted even with the direful malady called *the Plague*, which has ravaged those countries times without number, and desolating thick populations with its black and sickening horrors, has shown that man can be reduced, though trained under influences of the most ennobling and refining civilization, to a level with the poor brute beasts which crop the grass of the earth, or burrow in sands and caves of deserts; for it has been noticed by the historians of antiquity and modern times that pestilence and sickness follow too often in the wake of memorable visitations of the *Locusta*; and probably the plague was born of its distressing afflictions. Let us then not forget the warnings of the past, and particularly of 1855, in our own territories. The Grasshopper will no doubt be upon us in numbers a thousand-fold increased, in future years, as has been indicated before in Upper California, as related by the Jesuit Fathers. Truly, in popular parlance, it is a subject which ought to "be kept before the people." And, doing a small share of duty, we shall say Amen.

Since the year 1823, Grasshoppers have several times ravaged and destroyed the fields and gardens of the Franciscan Missions of Upper California. About the year 1827, or 1828, they ate up nearly all the growing crops, and occasioned a severe scarcity of wholesome food, as their ravages extended to the pastures, which consumed the food of the herds of stock animals, that in turn became deteriorated in sustenative qualities. At the Mission of Santa Clara, Padre José Viadere fired the pastures, and getting all his neophytes together made such an infernal noise, that those which were not killed by the smoke and fires were frightened off so thoroughly as to save his grain crops, and the Mission fruit gardens.

About 1834–35 occurred another visitation of the Grasshopper, when they destroyed a second time the crops of the rancheros, and Missions, with the exception of the wheat. At a third visit, in 1842, an old settler informs us that they committed great ravages near San Rafael, and on the north side of the Bay. He saw them eat up, in a single afternoon, a field of thirty acres of beans and peas, consuming to the surface of the ground. In these parts they stopped for three years running. An old California sea captain informs me that he has sailed through the Santa Barbara Channel, and neighboring waters, when the surface of the ocean was covered for miles and miles with the dead bodies of Grasshoppers; the air being filled with them at the same time. Shoals of fish fed on them.

A gentleman who resided in Colusi county, in the Sacramento valley, in the summer of 1855, informs me that these insects appeared to rise out of the eastern boundaries of the valley, where it is hot, dry, and sandy, and that, on some days, they filled the air so as to obscure the sun. They consumed all garden vegetables, the leaves and bark of the elder tree, and the young leaves and bark of the small branches of the cottonwood and willow, and even the soft green parts of the tules or bullrushes. In Stony Creek, in the same county, their dead bodies were seen, at one time, completely covering the surface of the water, for miles in length. In some parts of this valley, the Grasshoppers attacked and ate through gauze, and textile coverings of all kinds, which had been used to shield animals and plants from their attacks.

The summer of 1855, and up to the 31st of October, was the dryest which has been known for ten years. The estero or laguna on the flat near the town of Monterey, which opens into the ocean in the rainy season, became entirely dry, so that animals, in parts, could cross from one side to the other with safety. The waters of the lagoon appear to partake of the character of a soda and nitrous lake. It is separated from the ocean by some three hundred yards of a sandy beach, and its surface appears to be always lower than that of the sea—about sixteen inches difference. During the months of September and October, 1855, the surface-bed was as white as if covered with a layer of fine salt, and is no doubt identical with the substance called Tequesquite, which the Californians and Mexicans use for making soap. As long as it contains water, it is filled with an astonishing quantity of *infusoria*, and aquatic insects, as well as small frogs at certain years: in the winter and spring months it is the resort of numerous flocks of ducks of every variety. At times, in the summer and fall, the larvæ, or skins of these insects, may be seen in immense quantities on the shore edges of the estero. At their lowest state, the waters are very bitter and milky, and then become filled with a species of infinitesimal infusoria, of a deep arterial color, having the smell of decaying fish, when kept for a few hours in a vessel; when it dries on the ground it has the appearance of flakes of vermillion. At certain periods in the summer months a portion of the estero, when stirred by a gentle breeze of wind, appears like a mass of blood dissolved in water: at other times, the water is intensely yellow, showing as if colored with ocherous earth. These appearances indicate either two species of infusoria, or infusoria in different stages of growth or metamorphosis. It is highly probable that it is a variety of the red species of the above infusoria, which causes the color of the Red Sea of Egypt.

[TO BE CONTINUED.]

TO MAKE NICE SALT FROM BRINE.—Put it over a good fire in an iron kettle, and skim it well when it boils; then cool and strain it, and skim nicely again, then boil it down fast, and the nice salt will settle to the bottom; keep skimming the salt out as fast as it settles, and put it in a linen bag, and it will be as nice table salt as you buy.

Asparagus Beds.—Throw all the skimmings and all the old fish brine on asparagus beds, also the sweepings of the meat houses, if you want fine asparagus.—[Mrs. C. H. P.

HORTICULTURAL.

20,000

APPLE TREES,

FOR SALE

AT REDUCED PRICES, AT THE

HOPE NURSERY.

THE Nursery is located second block northeast of the new Steam Flour Mill, on Seventh street, San Jose.

The stock consists of over seventy varieties, carefully selected. No pains or expense has been spared to obtain the best sorts, and to render these Trees what they are,

THE BEST APPLE TREES, OF THEIR AGE,

in California. D. T. ADAMS.

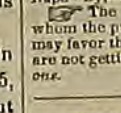
v8-23 3m

THOMPSON'S

SUSCOL NURSERIES.

Situated on the Napa River, at Suscol Ferry,

NAPA COUNTY.



THE undersigned wishes to call the attention of the public and patrons of these well-known Nurseries to the present extensive stock of

FRUIT AND SHADE TREES,

GRAPE-VINES, etc;

Also a choice lot of *GARDEN and GREENHOUSE PLANTS, ROSES, SHRUBS, &c.,*

Comprising all of the Very Best Varieties of Cultivated Fruits, such as

APPLE, PEAR, PEACH, PLUM, NECTARINE, APRICOT, CHERRY, ALMOND, QUINCE, and FIG TREES, GOOSEBERRY, CURRANT, and RASPBERRY BUSHES, &c.,

Together with a large lot of

Nut-Bearing and Shade Trees,

Consisting in part of Black Walnut, English Walnut (or Madeira Nut), Shell-bark Hickory, Elm, Weeping Willow, Locust, Sugar and Silver Maples, &c.

Grape-vines of all the Best Foreign and Native Varieties.

The Fruit Trees offered for sale are all budded and grafted from the best, most approved and popular varieties now cultivated in the United States and Europe: all of which are growing, and a large majority of which have fruited in our own orchards and vineyards, under our own immediate inspection.

Our trees are of one and two year's growth from Bud and Graft, thrifty and of large size; all of which have been grown *without irrigation.*

We would call particular attention to our large stock of Apple Trees, which for vigor of growth and beauty of form, cannot be excelled in the State.

Our stock of Garden and Greenhouse Plants, Roses, Shrubs, &c., comprise all the leading varieties most desirable for beautifying private gardens and residences.

CATALOGUES containing a full list of all the varieties, with a brief description of each, together with their time of ripening *in this State*, will be forwarded either by mail or express, to all who are desirous of purchasing trees.

Orders from a distance will be promptly attended to, and carefully packed for shipment.

Our prices will be as low as *reliable Trees, Vines,* &c., of like quality, can be bought for in any Nursery in the State.

Our terms are CASH on delivery of the trees at the Nursery or *approved* notes for a short time, bearing interest. Parties desiring to purchase can apply either in person or by mail, or by Wells, Fargo & Co's Express, to

S. THOMPSON, at the Nurseries.

Or to S. PERKINS & Co., corner of Second and M streets, Sacramento; DERBY & BALDWIN, Petaluma; GOODMAN & Co., Napa City.—*Agents who will show samples and receive orders.*

☞ The above-named gentleman are our sole agents, in whom the public can place implicit confidence, and all who may favor them with their patronage can be assured that they are not getting Trees from *Auction Houses* and *Peddler's Wagons.* 21-3m

FRUIT TREES! FRUIT TREES!!

50,000

FRUIT TREES!

—AT THE—

SAN LORENZO NURSERIES,

FOUR MILES FROM SAN LEANDRO,

On the Stage Road leading from Oakland to Mission of San Jose.

THE subscriber would respectfully invite the attention of all those wishing to plant ORCHARDS, the coming Winter and Spring, to his extensive stock of FRUIT TREES, containing all the choicest varieties of Fruits congenial to our climate: comprising

APPLE, PEAR, PEACH, PLUM, CHERRY, APRICOT, NECTARINE, FIG, AND ALMOND TREES.

ALSO,

GRAPE VINES one and two years old.

Three varieties CURRANTS; GOOSEBERRIES, and RASPBERRIES;

A few varieties of the most choice DAILY and CLIMBING ROSES, strong plants of one year's growth.

His collection embraces over Two Hundred different varieties of Fruits, the most of which have been grafted from bearing trees, and will be warranted true to the label; and all those varieties that have not fruited have been selected with the greatest care.

All orders for Trees must be accompanied with the cash, and directed to J. LEWELLING, San Lorenzo Post Office, Alameda county, or to R. KING, 154 Clay street, San Francisco, and they will be promptly filled, and the Trees packed in good order and forwarded as directed.

All persons ordering Trees must state explicitly by what conveyance they are to be sent, as I will not be responsible for them after they are forwarded.

My Trees are grown entirely without irrigation, consequently will bear transplanting on any variety of soil.

Prices of Trees.

APPLE TREES, two years' old:

Large size, trained with low heads	50 cents each.
Extra picked Trees	75 " "
One year's growth, from two to five feet long	25 " "

PEAR TREES:

Standard Trees, on pear stocks, two years from graft	$1 00
Extra size	1 25
Pear grafted on the Anglers Quince stock	1 00
Extra size bearing Trees	1 50
One year from graft	75

PLUM TREES:

Two years' growth, large size, trained with low heads	1 00
Extra large size selected	1 25

PEACH TREES:

One year's growth from the bud	50
In the dormant bud	25

APRICOT TREES:

Large size, one year's growth, from bud	1 00
In the dormant bud	50

NECTARINE TREES

Will be charged the same as the Peach.

CHERRY TREES:

Cherry Trees	1 00
Extra bearing Trees	2 00

FIG TREES:

Well rooted, large size	1 00
Small size, one year's growth	50

All other Trees and Shrubs will be charged in proportion.

On all orders for one thousand Trees, or upwards, a discount of ten per cent will be made. A moderate charge will be made for boxing trees.

v8-17 JOHN LEWELLING.

Miscellany.

Life's Compensations.

The happiness of this world is not so unequally distributed as many imagine; the rich have not all the privileges, nor the poor all the privations. Thank God, the purest pleasures of life are those which money cannot buy. The artisan, going from his wearisome labor to his humble home, as he meets the love-lit smile of his wife, and takes his fair and healthy child upon his knee, knows a thrill of sweeter joy than the most lavish expenditure of gold upon costly stimulants can bring the jaded mind of the epicurean in pleasure. The wildwood flowers and the dewdrops are not bought; the glory of sunset and the magnificence of the full moon are free to all. The blushing cheek and beaming eyes of affection cannot be purchased; virtue and beauty receive not their glorious riches from the hand of Mammon; the intellectually wealthy may well hold in contempt the baser coin of the world.

It is true that the bridegroom workingman, as he bears his bride to their lowly home, longs, with the impulse of affection, to attire her graceform in the same adornments which her prouder sisters use to highten their charms; but it is a foolish, though generous impulse. If he loves his bride, and she him, they need not covet the situation of those whose love of rivalry, display, and "pride of place" have most likely driven out simple, heartfelt happiness. The radiant smile of affection, and the clear glance of unsullied virtue, are ornaments above price, and will make the face of a woman beautiful even in its old age.

So, the workingman father, looking around upon his blooming children, is conscious that their intellect is as keen, their perceptions as ready, as those of the nabob's upon the next street; and he determines they shall have similar advantages. This is a noble ambition. But, in these days, it is no reason why a man should spend his years in grumbling discontent, because he is not rich. Our system of common schools places education within reach of the humblest. With mind and education, every son and daughter has a fair chance to achieve *respectability* in this country; and it is a false ambition which would seek the power and honor conferred only by money. Yet, that son or daughter may have yearnings after the development of peculiar talents or genius: the son may thirst to drink deep of the Pierean spring of classical learning, may have a *gift* for a profession (without which especial calling he has no business to attempt competition in the overburdened ranks of the professions); and the daughter may have visions of beauty, or have dreams of melody, which call for her fingers to accomplish themselves in painting or music.

With health, a moderate industry will bring about all this, and still the soul not fall a victim to the prevailing fever—the terrible gold-fever which scorches the sensibilities, and dries up the springs of humanity in so many hearts.

There is still another class who feel yet more keenly the want of wealth; not for the petty pleasures of sense, or the local influence it would give them, but because they worship the Beautiful, and money would give them the means of gratifying their exquisite tastes. With souls aspiring after grace, fitness, and beauty, in all things, they have to struggle with the details of life and poverty. These are the people of genius—poets, artists, men of divine, unworldly gifts. They would convert the glorious Ideal into the Real, if they had the necessary means. They are fretted by the coarseness and ugliness from which they cannot escape; yet they are self-deceived if they do not consider themselves among the most fortunate, as far even as happiness, commonly considered, goes. We doubt not that the painter in his unfurnished garret, with his coffee-pot and loaf of bread, and his hard bed in the same room with him, is filled with a richer pleasure, as he sits, and dreams, and broods over the creation of his genius upon the canvas before him, than it is possible for the wealthy egotist, who buys it of him, to conceive. We doubt not that his Art, his beloved, worshiped Art, is more to him than pyramids of diamonds. Ask him if he would exchange himself, his hopes, his dreams, his ideals, his fine perceptions of beauty, his deep emotions, for the withered soul of yonder Crœsus, who has spent his life in accumulating bonds and mortgages, rents, and interest upon interest.

And the Poet—will he say that he has ever entered the portals of any Fifth Avenue palace, that could begin to equal the splendor of the unearthly palaces through which his imagination daily walks? Will he give up the materials from which he constructs these—gold of the sunset, marble of the clouds, silver of the starlight, gems of the dew and waterfall, draperies of intangible mists and inexpressibly lovely shadows, spray and foliage, with all the delight which they give and the beauty which they suggest—for the brown stone mansion of the millionaire? Will he not say that his day and his night dreams, his fancies, his earnest aspirations after the pure and true, his deep sympathy with the heart of humanity, his mighty store of love, his keen delight in all that is fair, his broad and boundless realm of feeling and imagination, where angels walk, and visitants, more beautiful than flowers, linger to smile upon him—will he not say that *these* are beyond price—a wealth which he has inherited from the Father in Heaven?

The scholar, and the scientific man—will they measure their pleasures along with those of the sensualist and the epicure? Yet, for what nobler purpose are the most of these fortunes acquired, than for indulgence in good eating, good drinking, rich clothes, a showy house, and for the means of rivalry, arrogance, and ostentation?

A good fortune, well spent upon objects of real merit, upon works of Art, the cultivation of the mind and soul, upon the poor, the sick, and upon the struggling men of talent, upon the advancement of science and general intelligence, *is* a desirable thing. But how few acquire money for such purposes!

Take heart, you who belong *not* to the throng of the vulgar "great!" Reconsider your fortunes, and see if you have not cause for true thankfulness. Press not on so madly for the glittering payment. Do you not see how you trample out the flowers by the wayside? Why will you be so unmindful of their fragrance upon the air, and of the blue heaven over your heads?—[Cosmopolitan Art Journal.

If any work of the present age shall survive the tooth of Time, it will be neither place nor temple. If the light of any name shall flash through the mists of the far future, it will not be that of the warrior—it will be that of him, who, in his day, sought the happiness of his fellowmen, and linked his memory to some great work of utility and benevolence. This is the work that will survive the ruins of time—the glory that outlives all others, and shines with undying luster from generation to generation, imparting to each its own immortality.

The Mangosteen.

This extraordinary fruit is just now attracting considerable attention in England, in consequence of its having been fruited successfully at Syon House, the seat of the Duke of Northumberland, where at the same time it bore flowers, and the ripe and ripening fruit, as represented in the drawing.

The mangosteen has long been celebrated by travelers as the best known fruit, and efforts have been frequently made to familiarize it to other countries than the Malay Peninsula and islands to the eastward of Bengal, but, till now, in vain. The fruit is of a spherical form, of the size of an orange—when young, it is of a reddish green color—when ripe, of reddish brown; and, when old, of a chestnut brown.

Its succulent rind is nearly the fourth of an inch in thickness, containing a very powerful astringent juice, and, in wet weather exuding a yellow gum, which is a variety of Gamboge. On removing the rind, its esculent substance appears in the form of a juicy pulp, having the whiteness and solubility of snow, and a refreshing, delicate, delicious flavor; this is the pulp of the cells, and these separate easily from each other, like the lobes of an orange. "The flavor," says one who ate the fruit at Syon House, "was delicious, and compared, by some who partook of it, to that between a first rate peach and of a good grape."

Dr. Abel, when speaking of the fruits of Batavia, says, "to define it by precise language would be difficult. We are all anxious to carry away with us some precise expression of its qualities; but, after satisfying ourselves that it partook of the compound taste of the pine apple and peach, we were obliged to confess that it had many other equally good, but utterly inexpressible, flavors. From its perfect wholesomeness, it may be eaten in any quantity; and, as it possesses no luscious qualities, it does not cloy the palate. It is not a little singular that a plant nearly allied to the Gamboge, should yield so wholesome a fruit. The rind is astringent, and employed in cases of dysentery, and the bark of the wood is used as a dye."

In British stoves, it has attained the hight of ten or twelve feet; in the Malay Islands, it is said to be twenty feet. A botanical description will be found in Curtis' Botanical Magazine, vol. ii., 3d series, plate 4,847. All writers attest its great excellence.—[Horticulturist.

We received a specimen of the above from our friend Sydney Smith, Esq., of Sacramento, who has lately returned from the Sandwich Islands, restored to health, we are happy to say. The fruit, though old, was very delicious, and can be cultivated in this State.

Pay of the State Employees.

By the law passed April 21st, '56, the following are the salaries of the State Officers and their Assistants, together with the pay of the members of the Legislature as fixed by that Act. The reduction of pay effected by this law did not apply to those then in office during the term for which they had been elected:

Governor of State	$6,000
Secretary of State	3,500
Controller of State	3,500
Treasurer of State	3,500
Attorney General	2,000
Surveyor General	2,000
Superintendent of Public Instruction	3,500
Quarter-Master General	2,000
Judges of the Supreme Court, each	6,000
Judges of the 1st, 2d and 13th Districts, each	3,000
Judges of the 3d and 15th Districts, each,	3,500
Judges of the 7th, 8th and 9th Dist., each,	4,000
Judges of the 4th, 5th, 6th, 10th, 11th, 12th and 14th Districts, each	5,000
Governor's Private Secretary	2,000

Clerks of Secretary, Controller and Treasurer of State, each $200 per month.

The Lieutenant Governor (who is President of the Senate), and the Speaker of the House, each receives $12 per diem, during the session of the Legislature, and the same mileage that is allowed members of the Legislature.

The members of the Legislature receive $10 per diem, during the first ninety days of the session, and *five dollars* for the *remainder* of each session, and $4 for every twenty miles' travel, by the *nearest* mail route, from their residences to the place of holding the session, and in returning therefrom.

Members receive no pay when absent from their seat without leave, nor can they draw any of their salary in advance.

The Secretary of the Senate, the Chief Clerk of the Assembly, the Sergeat-at-Arms of the Senate and of the Assembly, each receives $12 per day.

The Assistant Secretary of the Senate and the Assistant Clerk of the Assembly, each, $11.

The Engrossing and Enrolling Clerks, and the Door-Keepers of the Senate and Assembly, each $10. To every additional Clerk actually employed, whether called Assistant, Journal, Copying or other Clerk, $9 per day.

To the Chaplains of the Senate and the Assembly, each $8 per day.

To the Porters of the Senate and the Assembly, each $6 per day. To the Pages of Senate and the Assembly, each $5 per day.

To Destroy Grub in the Head of Sheep. Make a hole in a standing board, 24 inches from the ground, up to the eyes. Let one man hold the sheep in this position, and another with a syringe throw up each nostril of the sheep a slush of yellow snuff and water, strong enough to make them sneeze, and they will thus throw out the eggs of the fly that are deposited in July and August.—[A. W. Allen.

Stock in the United States.—A correspondent of the National Intelligencer, estimates the live stock in the Union, as follows:

Cattle of all kinds	18,378,907
Horses and mules	4,896,050
Sheep	21,722,220
Swine	30,334,213
Value	$655,883,658

It was recently stated at the meeting of an Agricultural Association, in England, that the farmers in that country have within the last three years expended five millions sterling—$25,000,000—in the purchase of guano. Within the same period a million of fresh acres have been brought under cultivation.

Sheep, when fattening, should not be fed oftener than three times a day; namely, when day has fairly dawned, at noon, and an hour before sunset.

Buy what thou needest not and thou shalt sell thy necessaries.

New Treatise on Land Surveying.
JUST PUBLISHED BY
E. C. & J. BIDDLE,
PHILADELPHIA,

A Treatise on Surveying, by S. Alsop. In this work, the theory is plainly and comprehensively presented; directions for practice are given definitely and precisely; and everything which an extensive business in Land Surveying would be likely to require is embraced. Price per copy, mailed to California, $2, postage included. Price of the KEY to the work, mailed to California, 75 cents.

E. C. & J. B. also publish the following popular educational works, and many others extensively used in the Schools and Colleges of our country: and they would respectfully invite School Directors and Teachers to send for a copy of the descriptive catalogue of their publications:

Crittenden's Treatise on Book-keeping. The series comprises the four volumes below named, and for each of them a KEY, and a set of miniature BLANK BOOKS for the exercises:
1. Treatise on Single Entry Book-keeping.
2. On Single and Double Entry, for Common Schools.
3. do do do for High Schools.
4. do do do for the Counting House.

The volumes are severally the text-books in Commercial Colleges in Boston, New York, Philadelphia, Cincinnati, Chicago, St. Louis, Louisville, etc.; in most of the Normal Schools, and a great number of the High Schools of our country. In the Public Grammar and Evening Schools of Philadelphia, etc.; while as a book of reference for practical accountants the Counting House edition is, undoubtedly, the most popular work on the Science of Accounts, published in the United States.

Cleveland's English Literature. *Twenty-fifth Thousand just published.* 1. CLEVELAND'S COMPENDIUM OF ENGLISH LITERATURE, from the 14th to close of 18th century; chronologically arranged: consisting of Biographical Sketches of the Authors, and selections from their works, together with Notes explanatory, etc. 2. CLEVELAND'S ENGLISH LITERATURE OF THE NINETEENTH CENTURY. A sequel to the "Compendium"; arranged on the same plan as it. The above two volumes are text-books in many of the Colleges, in the principal Normal Schools, and in a large number of other first-class Seminaries of our country; and they may with confidence be recommended as an admirable guide or chart for private students of English literature.

Cleveland's American Literature. *Cleveland's Compendium of American Literature*, on the same plan as the author's "Compendium of English Literature," will be published early next year.

Harrison on the Rise, Progress, and Present Structure of the English Language.

The Works of Thomas Dick, LL. D. 10 vols. 12mo. Few books are better adapted for the School or the Family Library, than the works of Dr. Dick.

HORTICULTURAL.

SANTA CLARA
NURSERY.

Half a Mile West of Santa Clara, on the San Francisco Road.

The Proprietor of this extensive and well-known Nursery, informs the public that he has for sale this winter, a large and very choice stock of the very best varieties of

FRUIT TREES, VINES AND PLANTS.

Consisting in part of
3,000 two year old Apples;
12,000 one year old Apples;
2,500 one year old Pear, on Pear stock;
2,500 one and two year old Cherry.

Besides a large stock of

PEACH, PLUM, APRICOT AND NECTARINE TREES.

Also a lot of
Fig Trees, Raspberries,
Currants, Gooseberries,
and about 20,000 *Grape Vines.*

500 lbs. China Sugar-Cane Seed,
At $1 25 per Pound;

One pound and a-half being a great plenty to seed one acre of ground.

The Proprietor will sell his Trees, Bushes and Vines as low as any other responsible nursery in the country. His stock is taken wholly from trees which have borne fruit in California, and is therefore known and reliable.

☞ All orders will be promptly attended to. The expense of packing and freight will be charged to the purchaser. Terms cash.

STOCKTON-RANCH NURSERY.
50,000 FRUIT TREES.

50,000 NURSERY TREES of the VERY CHOICEST Varieties, of the most important kinds of Fruit, raised under the personal care of the subscribers.

The Varieties consist of Apple, Pear, Plum, Cherry, Peach, Apricot, Nectarine, and all the needed kinds of fruit trees for the Orchard and Private Garden.

The undersigned having had the experience of years in England, and many years in the Nursery of Hovey & Co. of Massachusetts, need only say that they can warrant Trees to be what they are represented, and that they have taken pains to offer as choice a collection as can be be found in the State.

Purchasers are invited so visit the Nursery, as they may rest assured the quality of the Trees and the price will be sure to suit.

☞C. W. LECOUNT, of San Francisco, is our only Agent. [23] B. S. FOX & CO.

COMMERCIAL NURSERY,
SAN JOSE.

THE Proprietors of this old established Nursery are now prepared to furnish to their friends and patrons the

Largest and Most Select Collection of
FRUIT, SHADE, AND ORNAMENTAL TREES, VINES, &c.,
ever offered in this State,
At Reduced Prices!

The FRUIT TREES offered by us are all grown and worked in the Nursery by us, from varieties obtained from the celebrated MOUNT HOPE NURSERIES, of Rochester, most of which we have fruited in our Orchards, and offer for sale only such varieties as we have found to be best adapted to this climate.

We have in Nursery:
25,000 APPLE TREES, of two years' growth, large size, thrifty, fine heads.
10,000 One year from graft.
1,000 Three years' growth, extra large, fine Trees, suitable for planting in yards and gardens, and such as cannot be obtained in any other Nursery in the State.
2,000 PEAR TREES on Pear stocks, one and two years' growth.
2,000 Pear, on Angiers' Quince, one year from bud.
3,000 CHERRY TREES, of twenty-five best varieties.
5,000 PEACH, of twenty varieties, one year from bud.
1,000 PLUM, of twenty best selected varieties.
APRICOTS, six varieties.
NECTARINE, SOFT-SHELLED ALMOND, &c. &c.
10,000 GRAPE VINES, Los Angeles, 1, 2 and 3 years' old.
3,000 Catawba, Isabella, Sweetwater, and foreign varieties.
GOOSEBERRY, STRAWBERRY, RASPBERRY, CURRANTS, &c., &c.

Catalogues can be obtained on application at the Nursery, by mail or otherwise

All orders from a distance carefully attended to, securely packed and shipped to any part of the State, at the risk of the purchaser.

Our terms are cash, or short credit, on approved notes, on delivery of the Trees at the Nursery.

Explicit directions for marking and shipping should accompany each order, and when particular varieties are wanted, state whether and to what extent others may be substituted, in case the varieties cannot be furnished. Persons trusting to us to select varieties may rely upon being furnished with the leading sorts, and proper proportion for each season.

Great Collection of Strawberry Plants.

THE UNDERSIGNED WOULD INform all Cultivators of the Strawberry throughout the State and Oregon, that they are now prepared to offer them a collection of Strong and Healthy Strawberry Vines, that have proved to be well adapted to our climate, and also have been fully tested as to their bearing qualities, by the splendid exhibitions of Fruit which they have exhibited throughout the season, in the markets of San Francisco. They now offer them to the public, with the assurance that they will not only prove equal to any plants offered, but superior, as their constant bearing qualities have so proved them, they having received the first premiums at all the Exhibitions thus far the present year. The subscribers offer the following kinds the present season:

THE BRITISH QUEEN.

This magnificent perpetual bearer has won laurels from all good judges of fruit, both as to its excellence of flavor, its remarkable size—often measuring five to six inches—and the abundant crop it yields, it has been generally adopted as one of the very best marketable fruits grown.

THE HOVEY'S SEEDLING.

Whatever may be said of other varieties, this splendid fruit should be grown in every collection. It is large, beautiful and delicious, and always brings the highest prices in the market. With the Virginia Scarlet as an impregnator a crop can always be secured.

THE LONGWORTH PROLIFIC.

This famous Strawberry is fully up to the great name it bears, and is one of the best varieties known. The Longworth Strawberry often measures five and six inches, and none more beautiful can be found.

THE EARLY OR VIRGINIA SCARLET.

This is the earliest variety, a great bearer, and should be in every collection.

The subscribers, having a very large stock on hand, can furnish plants in large quantities for making plantations, and for market, and persons wishing orders of from 10,000 to 25,000 plants will be dealt with on very liberal terms.

As the undersigned are fully able to supply the market, purchasers will do well to call at the office of one of the partners, on the corner of Sacramento and Drum Streets, where specimens can be seen, and also at the Gardens at Oakland, where terms and prices can be known, which will always be the most liberal.

WOLF, LUSK & CO.,
Strawberry Plantations,
Oakland.

COLLECTION OF
KITCHEN GARDEN SEEDS.

The favorable reports received from our customers in various sections of the country, respecting the superior quality of the FLOWER SEEDS contained in the assortments sent out by us for the past three years, have induced us to adopt a similar plan in putting up

VEGETABLE SEEDS,
In Collections for Large and Small Gardens.

The Seeds for the following have been selected with great care from the best varieties in cultivation, and can be recommended to all lovers of good vegetables.

The collections are offered as follows:

No. 1—*Complete Collection*—Sufficient for a large Garden for one year's supply—comprising 12 quarts of Peas, of the very best sorts for succession; 6 varieties each of Beans, Cabbage, Turnips, Corn; 4 varieties each of Lettuce, Onions, Radish, Muskmelons, Watermelons, Cucumbers; 3 varieties each of Tomatoes, Cauliflowers, Celery, Broccoli; with a full supply of Spinach, Beet, Carrot, Cress, Parsley, Parsnip, Salsify, Egg Plant, Peppers, Endive, Rhubarb, Sweet and Pot Herbs, and many other sorts of culinary and vegetable Seeds in liberal quantities.....$10 00

No. 2—*Complete Collection* for a moderate size Garden, comprising 6 quarts of Peas, and most of the other varieties in proportion.....$5 00

No. 3—*Complete Collection* for a small Garden.....$3 00

The quantities included in the above collections will be found detailed at length in our new Vegetable Seed List, which will be issued about the 10th of January, 1858, and sent to all applicants.

N. B.—The Seeds will be carefully packed in tin, and forwarded by Express, or otherwise, as the purchaser may direct.

The California Farmer.

SAN FRANCISCO, FRIDAY, JANUARY 15, 1858.

Letters and Exchanges.

Our correspondents are kindly requested to direct all letters to us at our principal office, San Francisco.

Those journals and periodicals with whom we exchange will much oblige us if they will be particular to note this, that we may be in receipt of their favors at earliest date.

The Mechanic, the Artisan, and the Farmer.

The following contrast between the condition, prospect and hopes, of those named above, were most vividly portrayed in the deeply interesting letter of Grace Greenwood, which appeared in our paper last week, and from that letter we re-publish the following paragraphs, which should not only be remembered by every cultivator of the soil, but they should be placed in *golden letters* before their families, their children, that they may learn and know how glorious is the inheritance of the TRUE FARMER. We would wish to keep these noble and glorious sentiments ever before the FARMERS of California:

"The Mechanic, the Artisan, is never truly free. He and his family are in the hands, in the power of his employer, dependent to a fearful degree for comfort and subsistence upon that employer's will, or the accident of his success.

"The Artisan may "strike," at times, with good effect; but too often, like a blinded pugilist, he strikes aside, and only hurts himself. But the FARMER is Nature's freeman; the master of a few acres of earth, he is independent of the world. When he strikes, it is always with effect, the hardest soil gives in to his demand. No agricultural crisis brings him a discharge without warning, and no quarter-day glooms before him, like a small doomsday, fearful to meet. He stands on his own land; it may not be wide, but the sense of possession hallows every foot of it; he may be able to *count* his trees, but they are more beautiful than all other trees; they seem to strike their roots into his heart. His house may be humble and homely; but it is the castle of honor, the palace of content. His flocks may be small, his cattle few, but their faces are as the faces of friends, and every flower of his fields comes up with a special message for him, from the kindly heart of Nature. He stands on his own land, in the pride of complete and sovereign manhood, and he owns down to earth's center and up to the stars."

The Greatest Farmer in the United States.

On the 18th of December, ult., we published the following sketch of what was supposed to be the largest and most profitable farm in the country. We published it then, well knowing we could soon procure items here, in California, that would far excel it. Here is the Great Farm in Texas:

"*An Extensive Farmer*—A correspondent of the Silver Creek Mirror, says, that Col. Jacob Carroll, of Texas, is the largest Farmer in the United States. He owns 250,000 acres of land (nearly 400 square miles), in that and adjoining counties. His home plantation contains 8000 acres, nearly all valuable bottom lands, along the Guadalupe river. On this farm he has over 600 acres in cultivation, on which he raises annually about 300 bales of cotton, worth at the plantation from $75 to $100 per bale, and 20,000 bushels of corn, worth about 50 cents per bushel. He has a force of about fifty field hands, and he works about sixty mules and horses, and fifteen yoke of oxen. Col. Carroll has, on his immense ranges of pasture lands, about one thousand horses and mules, worth $50,000; one thousand head of cattle, worth $7000; six hundred hogs, worth $2000; three hundred Spanish mares, worth $15,000; fifty jennies, worth $2000; fifteen jacks, worth $9000; and five stallions, worth $2500. Col. Carroll's property, in stock and negroes, is worth at least $150,000; and the value of his landed estate will swell the amount to over half a million of dollars. His annual income from the sale of stock amounts from $5000 to $10,000; and from the sale of cotton, to from $15,000 to $20,000."

And here we present the following:

A. P. Smith, of Smith's Pomological Gardens at Sacramento, on the American river, cultivated about sixty acres the last year; about fifty acres in orchard, nursery and flower garden, and ten acres in a vegetable garden.

Mr. Smith employs from twenty to forty men; runs one team in the spring to the mines with vegetables, one team twice a day to the city with vegetables, and in the fruit season keeps a team constantly going to the mines. He has agencies for the sale of his splendid peaches in San Francisco, Marysville, Stockton and Sacramento; and we learn that the gross amount of his sales in the year 1857, exceeded the round sum of $60,000.

What will our great Planters and Farmers say to this? We can give them the particulars, if they need it.

Each year of those famous Gardens only increases the amount. This should teach men who are laboring on their *thousand*, or *five thousand* acres, that it is the "little farm well tilled," and not the *great Spanish grants* that covers all out doors, that makes the money or brings prosperity. If all our large grants were cut up into small farms, our State, and all, would be better off.

St. Valentine's Day.

The observance of the opening day of the New Year, the reception of friends by the ladies, should be regarded by all well wishers of our social circles, as something more than a mere form; it should be as an interchange of friendly greeting, and a promise of a continuance of that friendship.

We think, as at present conducted, the labor is all on one side. The Ladies are deserving of some return, and as we have often heard it said, the Gentlemen are rather backward in making a return of such courtesies. We would suggest, that on the approach of St. Valentine's day, the gentlemen should return the favors they received on New Year's, by keeping open house. Who will set the example?

The Legislature.

The present session of the Legislature we esteem one of more than ordinary importance. With an overflowing treasury, which allows every member to receive his salary weekly, there is every inducement to work promptly and faithfully.

California is in a proud position, and although the State has a debt of some four millions over her, yet in a few years, we had almost said months, that debt will disappear. Illegal as it was, the response of the people, "No repudiation! Pay the debt!" has proved, and will prove, after all, a good thing for California.

The present session, we trust, will give proof that the members of both houses have come together to work to build up our State; to get her clear of all her difficulties; to awaken the slumbering energies of the people to the boundless resources yet unrevealed, and to labor to reveal them. For this end, it is expedient that the very best and wisest measures will be adopted to awaken, encourage and foster all branches of manufactures, to call out the genius of the mechanic and the artisan, and arouse the agriculturist to a still higher conception of the glorious opportunities within their reach, in this rich and glorious State. It is to be hoped that all these great interests will be set forth before the Legislators, by the people themselves, in full detail, by memorials. If the people feel a need of legislation for their interests, they must make their wants known. How can a Legislator know the full mind of his constituents, unless they meet and consult, and have a free interchange of thought; and we hold to public discussions of the wants of the people, in their several districts. Manufacturers want encouragement and protection; mechanics want it; farmers want it; and all these several wants should be made known to the Legislator, and then he should act for his constituents.

There are very great interests that could be made available, and add greatly to the industry and prosperity of our State, if we could have a wise, fostering and encouraging legislation in aid of these interests. We need liberal State bounties to encourage the growing of rice, sugar, tea, coffee, &c.; to encourage wool-growing, the manufacture of woolens and other species of goods. We need encouraging bounties to arouse the genius of the mechanic and artisan. Every dollar expended from the public treasury on such matters, is sure to roll back into that treasury three or five to one; for everything done to this end increases the taxable property of the State and enriches it.

We sincerely hope a wise, enlarged and liberal policy will be pursued toward these great interests, and that the Legislature will look upon our State and its rich, unrevealed resources, as a wise parent would look upon a very promising child; and be as willing to labor to draw out and educate the resources of the State, as the fond parent would that of his child. When this is done, glorious indeed will be the position of California.

We have great faith in the present Legislature. If we can judge by appearances, then all have much hope. The future will reveal.

Governor Johnson's Message.

We have received a copy of the second Annual Message of Gov. Johnson. It comes to us in a neat pamphlet of eighty pages, including the index, which presents an exhibit of the actual receipts and expenditures of the years of 1855, '6 and '7, together with an abstract of the taxable property of the several counties; receipts for stamp tax; revenue paid in from the several counties; census of the schools; exhibit by the Board of Examiners of accounts; report of Commissioners of the war claim, and matters relative to it—all very interesting and important documents.

The Message itself is one of importance, and presents the various subjects that should be offered to the Legislators of our State, with a clearness and earnestness highly creditable.

The Message, as published, shows its leading features at a glance, so that all who feel interested in any given subject can see at once the whole matter. The following are among the topics: Finance, Revenue Law, Stamp Act, Constitutional convention, State Capitol, State Prison, The Asylum, House of Refuge, Attachment Law, Divorces, Homesteads, State Agricultural Society, Protection of Settlers, State Library, Swamp Land, Education, Military Affairs, Territories &c.

From an examination of these several subjects, as presented in the Message of Gov. Johnson, we feel confident in saying, the sentiments expressed, and the recommendations urged, will receive the general approbation of our citizens. They are opinions that must receive the cooperation of our Legislators, and result in great good. Some of the most important subjects are handled with much force, and the Message, as a whole, reflects much credit upon the retiring Governor.

NEWS FOR THE EAST.—Every well-wisher to our State, all who feel desirous to induce an immigration on our shores, all who wish to make our State a prosperous place for business men, must be convinced that THE CALIFORNIA FARMER will give a better and truer account of the condition of our resources, of the homes, and of the climate, soil and productions of California, than any other journal printed on the Pacific coast; and those who desire to present to their friends in the Eastern States or Europe, a true and familiar picture of California, in all her better and brighter relations, other than mere politics party, murder, robbery and rapine, should send to their friend a herald of the *bright side*, and such is THE CALIFORNIA FARMER. We will mail copies, direct from our office, to any part of the United States, and pay the postage, for $5 per year. Persons wishing this done, have only to send $5 and the address, and it will be done.

Inauguration Day.

Most auspiciously dawned the day upon the people assembled at Sacramento, on the 8th, as if the ceremonies of a Gubernatorial installment were to be of more than ordinary importance. The whole ceremonies of the day, the gathering of the citizens at the Capitol, the meeting of friends, the general prosperity of the State, all conspired to make it a "happy festival holiday," and so it was.

From the Bay City came the Marions, the Continentals, Lancers, and others of our fine military corps, or their delegations; while the Sutter Rifles of the Levee City, came out to do the honors. The parade, and escort duty, was as usual most highly creditable to our State, and we think we do but strict justice when we say that the military of California will compare in point of ability and appearance, with any State in the Union; and when *need* comes for their services (we have augur of it now), they will be found "ready for duty."

After the formation of the escort in front of the Orleans, they proceeded to the residence of Gov. Johnson, to receive him; from thence to the residence of Gov. Weller, and thence to the Capitol. A stage was erected in front of the capitol building, when in open day, amid the masses of his fellow citizens, J. B. Weller took the oath of office and swore allegiance to the Constitution of the United States and to the State of California, and delivered in a clear and resolute tone an Address that does him honor, and one which we believe he will carry out—the result of which we know must be to the glory of California. We say Amen to the great objects there presented, for they are the shield and safeguard of the *workingmen* of California.

We give a most excellent synopsis of the Governor's Inaugural from the Morning Call:

Having pledged himself to administer the affairs of the State with a sole view to advancing its interests, he left the vindication of his character, if assailed, to posterity.

He deprecated the too-prevalent disposition of citizens all over the State to take the law into their own hands, and ascribed the origin to the inefficiency of the tribunals, in many instances, to the laxity of good citizens to serve on juries. He also ascribed the elevation of unworthy men to judicial and ministerial offices, to the fact that respectable citizens do not pay stricter attention to primary elections—thus indirectly encouraging those to the control of the nominations who have not principle to serve. As it is probable the primary election system will last some time, he advised the extension of the election laws, so as to cover these elections.

In reviewing the curse of Mexican grants upon the actual settler, he said: "When individuals have gone in good faith and made improvements upon what was supposed to be a part of the public domain, but which, by the decisions of the Courts is found to be covered by Mexican grants, the settler is entitled, upon every principle of justice, to full remuneration for his labor and improvements. The whole constitutional power of the Legislature should be exerted to protect him. These hardy and industrious pioneers who have gone upon wild and uncultivated land, and by their labor and industry made the earth give forth its richest productions, and surrounded themselves with all the comforts of home, are entitled to our especial consideration. Their energy and their enterprise have already placed California amongst the first first agricultural States of the Union."

He paid a high encomium to our people for having refused to repudiate the State debt, although contracted in violation of the Constitution.

In regard to the State Prison, he said: "Whilst the convicts in many of the States are supporting themselves, we are taxed $120,000 per annum to provide for them, and that, too, under a system which allows a large number to escape every year! If you add to this the amount paid for transportation of convicts ($35,000), you will have a sum equal to the *whole* expenses of some of our sister States, with four times the population? In California the expenditures for State Prison purposes, and for printing, alone, in the year ending 30th June, 1856, amounted to more than *half a million of dollars*. These are certainly crying evils, which demand prompt action on the part of the Legislature."

In referring to Section XI, of the Constitution, that taxation shall be equal and uniform throughout the State, he doubted whether the revenue system was in accordance with either the letter or spirit of the Constitution, and said that it was notorious that many persons held property (meaning miners' claims), on which no taxes whatever are levied.

He alluded justly to financial matters, the necessity of military posts in our territory among the Indians, and to the school fund.

He continued: But, after all, the Federal Government will never be able to give Americans residing on the Pacific coast, that protection to which they are justly entitled, until a railroad connection is given to us with our brethren on the other side of the continent; and I am glad to see that our excellent President, whose ability and patriotism are acknowledged by the whole country, has recommended this subject to the especial consideration of Congress. A war with any respectable maritime power, would cut us off effectually from our sister States, and leave our trade, our commerce, our material wealth, if not our lives, at the mercy of the public enemy. The surveys which have been made during the past four years, have fully demonstrated its practicability; and its necessity for military and political purposes, is no longer questioned.

After expressing himself very emphatically in in regard to the right of States to determine whether they shall or not tolerate slavery, he concluded by invoking Providence to preserve and protect our national ship from the impending storm (slavery agitation), which threatens its destruction.

In addressing the members of the Legislature, he advised expedition in business, and said he would regret very much to differ in any respect with the Legislature; but if they should pass any bills which he considered in violation of the Constitution, or in derogation of the rights or interests of their common constituencies, he should use the veto prerogative.

He deprecated the practice of leaving the most important bills to the last days of the session, and hoped the Legislature would give him ample time to examine them, as he would not attach his signature to any until he understood its contents.

After assuring them he would cordially cooperate with them in all measures calculated to advance the interests of the State, he retired.

After the delivery of the Address, the escort returned to the Orleans, passed through the review and were dismissed. The usual salutes to the day, and to the ceremonies, were paid by the cannon of the California Guard. Thus ended the daylight ceremonies.

Sales of Fruit Trees.

Wherever we go, into every city and town, we find *sales rooms* for Fruit Trees, *sales rooms* for Plants and Seeds. Every body has become a dealer in Fruit Trees: Ministers, Doctors, Lawyers, and professional men of all classes; there is a perfect *mania* for this kind of traffic. Every little town in our State, and every auctioneer in such places, are engaged more or less in scattering over our State, these emblems of our Horticultural wealth.

No one surely can rejoice more than ourselves at these evidences of success in the cultivation of Orchards and Gardens; but while we rejoice at these present efforts and appearances, we would urge with great earnestness that all purchasers should be careful *where they buy*, and *what they buy*. Cheap trees are not always the best trees by any means, and every purchaser should be careful, if he wants reliable fruits of particular kinds, to purchase *only of regular Nurserymen*, or their duly appointed agents.

Much of the great mass of trees and shrubs which are sold at auction are entirely worthless; they belong to a class of unsightly, ill-formed, defective and mis-labeled trees, unfit to *send to order*, and they are crowded off at auction. This the regular Nurseryman knows, is the custom, and every orchardist and planter of trees should reflect that he is laying a foundation for the future, and when his mind is fixed upon raising a choice collection of fruits adapted to the climate, and of the most fruitful character, a disappointment when these trees come into bearing, can never be measured by dollars and cents; and we assert it as utterly impossible for any person to have a reliable and successful orchard or fruit garden, whose trees are purchased here and there at auction, or anywhere, as the case may be, because they are cheap.

Better that the purchasers pay $5 for each tree, and have a reliable kind, a well-formed tree with healthy, well furnished roots, and then plant this tree as *a tree should be planted*, than to buy such trash as is often thrown on the market at a cheap rate, and then plant them as we often see men *plant*—no, we should not use the word *plant*, for they only stick them in the ground as if they were so many stakes for a fence. Whoever would have a good reliable Orchard, or pretty garden, must remember: select the *best varieties* from the best Nurserymen; purchase the *best trees*, plant them in the best manner, and then you will secure the best results.

Gardeners and Gardening.

Why is it, that in this country, where the energy and intelligence of the people will favorably compare with those of any other country on the globe, that no line of demarcation is drawn between the practical gardener, who *knows* his business, is thoroughly acquainted with his profession, and those who *assume* a knowledge of Horticulture? We are favored, in this great State, with both soil and climate, to make it emphatically the "garden of the world;" and it is owing chiefly to the fact of such being the case that thick-headed clodhoppers impose themselves upon the public as *practical* gardeners. Cannot some effort be made by gardeners themselves, to maintain that respect for their profession which is due to it as a calling wherein *knowledge* is necessary, and show the liberal minded the difference between men whose knowledge of Horticulture and Pomology enable them to *assist* nature, and those who exclusively rely upon the providence of God, and the weather.

We hear of gardeners(?) being offered thirty-five dollars per month; when "Biddy," for maltreating codfish, gets forty. The day, we hope, for the benefit of both the employer and the employed, will speedily arrive, when satisfactory evidences of an intimate acquaintance with what every one *professes* to know, will be required, before he or they can secure position in the employ of others.

"OLD STICK IN THE MUD."—We often hear this saying used and applied to many cases where, in our opinion, it don't apply at all; but we believe it will apply to many persons this winter, when the "rainy season comes," especially those who do teaming in the country, or those who travel in any vehicle, unless they are well provided with the well-known *Hucks & Lambert's Axle Grease*. Wheels not well greased are apt to "stick in the mud," but Hucks & Lambert have prepared a remedy that will carry the heaviest loaded team through; and we are happy in knowing that this Axle Grease has become so popular that H. & L. cannot make it as fast as ordered.

CALIFORNIA BEEF, PORK, HAMS, &C.—The *very best quality* of Beef, Pork, Hams, and Bacon-sides are now prepared at Sacramento, by George Cooper, the pioneer packer. No packer in the East can show better. The lard turned out and put up here is superior to any that can be brought across the water.

TO CORRESPONDENTS.—We have been obliged to leave out a large amount of copy, which was intended for this number, even our notes, to make room for the article on Locusts.

SACRAMENTO TANNERY.—Strolling across the slough, at Sacramento, to visit the different manufactories there, we came to a well arranged Tannery, with its bark-mill, lime-vats, hide-blocks and all the paraphernalia of curing and dressing hides and pelts. We examined the leather finished and ready for market, and we felt proud to know that Sacramento was thus adding to the wealth of the Industrials, and to her own wealth. After examining the various departments, we made an inquiry for the Proprietor, and learned with pleasure the name of P. B. Cornwall, Esq. Those of us who are old forty-niners can well remember the old and wealthy house of Priest, Lee & Co., of which Mr. Cornwall was then an active member. Those were the days that this wealthy house handled the gold dust by the hundred weight, daily, as their income for the sales of merchandise and lots; but fire, flood, and death have changed all things, and we now find the youngest member of that firm directing about his *bark dust* at the Tannery; and thus, instead of handling gold dust only for the benefit of the firm, he is now directing the bark dust for the benefit of California and the great working interest of our State; and we feel confident that the gentleman himself feels that he is happier, as well as more beneficial to the community and to the State, and will ere long recognise in the *great Industrial Interest*, the best and most active, as well as the most wealthy men of California.

MARYSVILLE DAILY NEWS.—A "Herald," an "Inquirer" and a "Daily News," a *triune*, or rather the two first merged into a new name, form and management. While we would always regret any loss to friends, or any loss of friends in the great newspaperdom of our golden State, we always believe there is never a loss without some gain, and we must rejoice to know the editorial world will re-gain the earnest efforts of the veteran editor Gen. Allen. Most gladly do we welcome him back to his *sanctum* again. Few men have more or truer friends than Gen. Allen, and we know the cause of Agriculture will gain a friend and co-worker again, and Marysville will feel his influence at the coming Fair for good. Most earnestly do we wish success to all his efforts and prosperity to his labors.

THE
"HORTICULTURIST"
AND
Journal of Rural Art and Rural Taste.
(Commenced by the late celebrated A. J. DOWNING.)
Conducted by J. JAY SMITH, Editor of the North American Sylva.

THE increasing love of Rural Life has brought this popular publication into extended notice. Its success has been amply proved by a large addition of readers, and it is now offered to public patronage with confidence. It embraces in its scope of subjects everything pertaining to the country and country-pursuits, and aims to instruct while it amuses: it is, in short, as now conducted, a popular RURAL MAGAZINE, designed to interest all lovers of the Garden, the Country-house, the Cottage, no less than the Botanist, the admirer of the Green-house, Conservatory, Grape-house, Fruit Cultivator and Planter. Its correspondents are those who have long devoted their energies to these pursuits, and it is believed the number of these, and the information they impart, is greater than any other periodical can boast of either in Europe or America. Indeed, the work has become indispensable to the well-informed country-dweller, who, by a perusal of its varied pages, may maintain an acquaintance with all that is passing in the fruit-garden and orchard, the nursery, the villa, and with the beautiful in nature, whether it is improved by art or adorned by taste. In its Rural Magazine character it is addressed to all who love information, and it has thus become a welcome guest both in town and country. Its circulation now embraces the entire Union and Canada, and endeavors are constantly used to increase its attractions by a liberal outlay in embellishing it with costly engravings of fruit, dwellings, trees, and those numberless rustic adornments which make the individual home attractive.

A NEW VOLUME (13th year) commences with the January number for 1858: and it will be the constant aim to render it still more worthy, by every practicable improvement, of the liberal patronage it is receiving.

The work is issued on the first of each month, in the best style, each number containg 48 pages, embellished with a frontispiece and several other original and well-executed engravings. The volumes, taken for a number of years, will make a valuable Encyclopedia of Horticultural Literature. As an advertising medium it has few superiors.

TERMS—Two Dollars a year; Four Copies for Six Dollars, payable in advance.

An edition is published with plates colored in the best style of the Art. Price, $5.

☞ All subscriptions must be addressed to the Agents, or to ROBERT PEARSALL SMITH,

CURE FOR THE TETANUS IN THE HORSE. Some little time since we made mention of the prevalence of this disease, in the Horse. From one of our correspondents we have received the following, as advice, of a system which he has followed with success: Spirits of turpentine, rubbed on the neck through the mane, and along down the back on the spine. Repeated rubbings will relieve at once, and if taken in season will insure a cure.

THE FARMER'S GUIDE,
To Scientific and Practical Agriculture.
BY HENRY STEPHENS, F. R. S., of Edinburgh, and the late J. P. NORTON, Professor of Scientific Agriculture in Yale College, New Haven. 2 vols. Royal Octavo, 1600 pages and numerous Wood and Steel Engravings.
This is, confessedly,
THE MOST COMPLETE WORK ON AGRICULTURE ever published, and in order to give it a wider circulation the publishers have resolved to reduce the price to
Five Dollars for the Two Volumes,
When sent by mail (post-paid) to California and Oregon the price will be $7. To every other part of the Union and to Canada (post-paid) $6. ☞ This work is not the old "Book of the Farm."
"Science is made to go hand in hand with practice, throughout the book."—[New England Farmer.
"It is indeed a many chambered storehouse of Agricultural lore."—[Blackwood's Magazine.
"A more valuable work on Agriculture never was written." [Michigan Farmer.
"We recommend it without hesitation to all American Farmers."—[Albany Cultivator.
☞ Remittances for the above work should be addressed, post-paid, to the publishers,
LEONARD SCOTT & CO.
23 1m 54 Gold street, New York.

Attention, Farmers!
Broadcast Grain Sowers.
THE subscribers have on hand a few of "SAGE'S PATENT BROADCAST SEED SOWERS," for sowing Wheat Barley, Oats, and all grain sown broadcast. These machines are unrivaled by any, and received complimentary notice at the Agricultural Exhibitions at San Jose and Stockton. They need no explanation, as their simplicity will enable any one to understand, at a glance, the manner in which they perform their work.
They have been introduced but one season, and *three* are now at work at Tehama, Sonora, and Petaluma, giving complete satisfaction, as per letters testimonial.
The undersigned will take pleasure in exhibiting them to Farmers or others, and no Farmer should be without one; the saving of *help* and *economy* of *seed* effected by their use, will pay for one in a season.
Price, from $100 to $125 T. H. & J. S. BACON,
61 California street (up stairs),
v8-23-2mis San Francisco.

New Winged Triangular Harrow.
THE undersigned would invite the Farmers and Grain Growers of California to call and examine his newly invented WINGED TRIANGULAR HARROW.
By the action of this Implement a space of 12 feet of ground is finely pulverized and harrowed, and the work most satisfactorily done. No farmer can look upon the Implement and not be satisfied of its value.
H. G. PRATT, Manufactory 45 Washington st.,
16-1s3m between Davis and Drum streets.

SPECIAL NOTICES.
TO FARMERS.
☞ 10,000 pounds of ALFALFA or Chile Clover, just received and for sale at 20 cents per pound—by the bag only. This is gathered from the latest crop. Apply to S. BRANNAN,
v9-1 1m Corner Montgomery and California streets.

RARE SEEDS.
☞ WE have just received from the East some of the choicest FLOWER and other rare SEEDS, ever received in California; among them a small invoice of Pure LAWTON BLACKBERRY—the only lot in the country, and warranted fresh and pure, crop of 1857
The collection was made by Mr. J. Q. A. Warren, and brought out by him on last steamer.
Also, opening, a case of FOREST TREE SEEDS—the finest assortment ever imported.
Those desirous of finding choice Seeds will do well to call at once at our office, 130 Washington st (up stairs).

NEW BOOKS,
☞ JUST received, from New York, several cases choice works; also, a complete assortment of Agricultural Books, to which we would invite the attention of our customers.
Frank Forester's Horse and Horsemanship of the United States, in two volumes; the finest work of the kind ever published in the country, can now be seen at our office, bound in different styles—Plain, and Turkey Antique. Having the sole agency of this valuable work, in California, we would invite lovers of the beautiful to call and examine the copies. Subscription books are now open, and those entering their names before the 20th inst., will receive this work at the earliest day. v9-1

☞ **Six Reasons why Everybody Uses LYON'S KATHAIRON.**—1st. It is the Cheapest preparation for the hair ever made. 2d. It is pronounced by all to be the Most Beneficial. 3d. It is the most Agreeable to use. 4th. It is the Cleanest and most Carefully Prepared. 5th. It is the most Highly Perfumed. 6th. It is the only article that never fails to give Entire Satisfaction.
The immense sale of the KATHAIRON—nearly 1,000,000 bottles per year—attest its excellence and universal popularity Sold by all dealers, everywhere, for 25 cents per bottle.
HEATH, WYNKOOP & CO.,
Proprietors and Perfumers,
63 Liberty street, New York.
PARK & WHITE, Wholesale Dealers,
1 1m *San Francisco, California.*

NOTICE TO NURSERYMEN.
☞ PARTIES who have ordered Nursery Stock from the Eastern States, to be forwarded by Express, should have made arrangements for the receipt of the same, or remitted charges, as all such freight must be prepaid without exception. Hitherto, a satisfactory guarantee from the shipper was considered sufficient—the charge to be paid at destination. Should any disappointment occur to our friends, this will be a sufficient explanation.
23 A. FROST & CO.

☞ **THORBURN'S Preliminary Wholesale** CATALOGUE OF VEGETABLE SEEDS, *of the present year's growth*, will be published on the 20TH JULY, and will be mailed to Dealers and others requiring Seeds in quantities, inclosing stamps for return postage.
J. M. THORBURN & CO.,
19-tf 15 John street, New York.

☞ **Wigs! Wigs!! Wigs!!!** — BATCHELOR'S WIGS AND TOUPEES surpass all. They are elegant, light, easy and durable.
Fitting to a charm—No turning up behind—No shrinking off the Head. Indeed this is the only establishment where these articles are properly understood and made.
v8-13 1y 233 Broadway, New York.

☞ **Dyspepsia Cured.**
BOSTON, December 6.
DR. GEO. B. GREEN—Dear Sir: In reply to your question in regard to the action of the *Oxygenated Bitters*, I feel much pleasure in stating that from its prompt and decisive effect in alleviating and overcoming a severe and chronic case of indigestion and Dyspepsia in my own family, and from a knowledge of its wonderful results in curing several attacks quite as severe in other families of my acquaintance, I consider it a sovereign and infallible remedy in that distressing complaint, and would cordially and earnestly recommend it to all who may be thus afflicted.
Respectfully yours,
ISAAC DANFORTH, 17 South Market street.
The above certificate is from a well-known and highly respectable Merchant of Boston, and is entitled to the fullest confidence.

Seth W. Fowle & Co., 138 Washington street, Boston, Proprietors. Sold by their agents everywhere.
Agents—C. MORRILL, cor. Third and K, sts., Sacramento; H. JOHNSON & Co., Washington st., San Francisco. 22-1m

☞ **HAIR DYE! HAIR DYE!! HAIR DYE!!!**
Batchelor's Hair Dye is the Best in the World!
GRAY, RED, OR RUSTY HAIR DYED INSTANTLY TO a beautiful Natural Brown or Black, without the least injury to Hair or Skin.
Fifteen Medals and Diplomas have been awarded to Wm. A. Batchelor since 1839, and over 80,000 applications have been made to the Hair of his patrons of his famous Dye. Prejudice against Dying the Hair and Whiskers is unjust, as it would be against covering a bald head with a wig.
WM. A. BATCHELOR'S HAIR DYE produces a color not to be distinguished from nature, and is warranted not to injure in the least, however long it may be continued.
Made, sold or applied (in 12 private rooms) at the Wig Factory, 233 Broadway, N. Y.
Sold in all cities and towns of the United States, by Druggists and Fancy Good Dealers.
☞ The Genuine has the name and address upon a steel plate engraving on four sides of each bottle, of
WILLIAM A. BATCHELOR,
v8-13 1y 233 Broadway, New York.

☞ **A. W. FABER'S LEAD PENCILS.**—Lead Points, Propelling Pencils, Colored Pencils, White Crayons, Black Crayons, Slate Pencils, Red Chalk, etc.
These popular Pencils can be had of Stationers, Fancy Goods Dealers, and others in the various cities of California.
Extract of a letter from the eminent artist, Chevalier P. von Cornelius, Director of the Royal Academy in Berlin, 27th Oct., 1842: "It is scarcely necessary to say that I find Faber's Polygrades Lead Pencils in every respect most excellent. They are of all degrees of Hardness and shade, and adapted as well for fine and firm outline as for finished drawing. The wood which incloses them has the necessary strength, but yields easily to the knife, and the lead never breaks away."
Extract from the Official Report of the Industrial Exhibition of the German Federal States, 1844, 3d Vol.: "Especially have the Pencils of Mr. A. W. Faber set at defiance all competition, and supplied every desideratum that the Artist can expect or desire in this particular."
Extract from the Report of the Great London Exhibition, 1851:
On referring to the Report, page 450, it will be seen that the Jurors have considered A. W. Faber's Pencils deserving of a more extended notice than has been accorded to any other Pencil Manufacturer. The Report further states as follows: "A. W. Faber's Pencils are of the best description, and the prices extremely low. They are exported throughout the whole civilized world, the demand being created by their good quality and cheapness."
Beware of Counterfeits!
The reputation of A. W. Faber's Lead Pencils has not failed to attract the attention of certain individuals, who have either attempted an imitation of the same, or have undertaken the sale of a counterfeit article, which, though of a totally different manufacture and very inferior quality, are marked, some with the name of the genuine, some with the names, *W. A. Faber, A. W. Fabre, A. K. Faber, C. W. Faber*, etc., and are disposed of as genuine Faber's Polygrade Lead Pencils.
Every person will please to examine carefully the stamps on each Pencil—"A. W. FABER"—and observe that each dozen bears on the label a fac-simile of A. W. Faber's signature; and and further, that every genuine Pencil sold in the United States, has impressed in the wood itself, "E. FABER, 133 William street, New York."
E. FABER, Sole Agent,
v8-2 6m]133 William street, New York.

CHARLES DICKENS' WORKS.
TWENTY-NINE DIFFERENT EDITIONS.
NO LIBRARY CAN BE COMPLETE WITHOUT A SET OF THESE WORKS.

CHEAP EDITION.—PAPER COVER.
Complete in Fourteen volumes.
"PETERSON'S" are the only complete and uniform editions of Charles Dickens' works ever published in the world; they are printed from the original London Editions, and are the only editions published in this country. No library, either public or private, can be complete without having in it a complete set of the works of this, the greatest of all living authors. Every family should possess a set of one of the editions. The cheap edition is complete in Fourteen Volumes, paper covers, either or all of which can be had separately, price 50 cents each, as follows:

Little Dorritt.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist
Nicholas Nickleby.	Two Apprentices. 25

A complete set of the above fourteen books, will be sold, or sent to any one, to any place, *free of postage*, for Five Dollars.

LIBRARY OCTAVO EDITION.
Published in Seven Different Styles.
This Edition is complete in SIX very large octavo volumes, with a Portrait on steel of Charles Dickens, containing the whole of the above works, handsomely printed, and bound in various styles.
Vol. 1 contains Pickwick Papers and Curiosity Shop.
" 2 do Oliver Twist, Sketches by "Boz," and Barnaby Rudge.
Vol. 3 contains Nicholas Nickleby, and Martin Chuzzlewit.
" 4 do David Copperfield, Dombey and Son, and Christmas Stories.
" 5 do Bleak House, and Dickens' New Stories.
" 6 do Little Dorrit. In two books—Poverty and Riches.

Price of a set, bound in Black cloth	$9 00
" " Scarlet cloth, extra	10 00
" " Law Library style	11 00
" " Half Turkey, or Half Calf	13 00
" " Half calf, marbled edges, French	14 50
" " Half calf, real ancient antique	18 00
" " Half calf, full gilt backs, etc	18 00

ILLUSTRATED OCTAVO EDITION.
THIS EDITION IS IN THIRTEEN VOLUMES, and is printed on very thick and fine white paper, and is profusely illustrated, with all the original illustrations by Cruikshank, Alfred Crowquill, Phiz, etc., from the original London editions, on copper, steel, and wood. Each volume contains a novel complete, and may be had in complete sets, beautifully bound in cloth, for Nineteen Dollars a set; or any volume will be sold separately at One Dollar and Fifty cents each. The following are their respective names:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist.

Price of a set, bound in Black cloth, in Thirteen volumes	$19 00
" " Full Law Library style	26 00
" " Half calf, or half Turkey	29 00
" " Half calf, marbled edges, French	32 50
" " Half calf, ancient antique	39 00
" " Half calf, full gilt backs	39 00

DUODECIMO ILLUSTRATED EDITION.
Complete in Twenty-five Volumes.
The Editions in Duodecimo form are beautifully illustrated with over *Five Hundred Steel and Wood Illustrations*, from designs by Cruikshank, Phiz, Leech, Browne, Maclise, etc., illustrative of the best scenes in each work, making it the most beautiful and perfect edition in the world, and each work is also reprinted from the first original London editions that were issued by subscription in monthly numbers, and the volumes will be found on examination, to be published on the finest and best of white paper.
This edition of Dickens' Works is now published complete, entire, and unabridged, in Twenty-five beautiful volumes, and supplies what has long been wanted, an edition that shall combine the advantages of portable size, large and readable type, and uniformity with other standard English authors.
The Duodecimo edition alone has been gotten up at an expense of *over forty-five thousand dollars*, but the publishers trust that an appreciative public will repay them for the outlay, by a generous purchase of the volumes. All they ask is for the public to examine them, and they are confident they will exclaim, with one voice, that they are the handsomest and cheapest, and best illustrated Set of Works ever published. This edition is sold in sets, in various styles of binding, or any work can be had separately, price Two Dollars and Fifty cents each, and each work but one being in two volumes, handsomely bound in cloth, as follows:

Pickwick Papers.	Sketches by "Boz."
Nicholas Nickleby.	Barnaby Rudge.
David Copperfield.	Martin Chuzzlewit.
Oliver Twist.	Old Curiosity Shop.
Bleak House.	Christmas Stories.
Little Dorrit.	Dickens' New Stories.
Dombey and Son.	*One volume, cloth* ..$1 25

Price of a complete set in Twenty-five volumes, bound in Black cloth, gilt backs	$30 00
" " " Full Law Library style	40 00
" " " Scarlet, full gilt, sides, edges, etc.	45 00
" " " Half calf, ancient antique	60 00
" " " Half calf, full gilt back	60 00
" " " Full calf, ancient antique	75 00
" " " Full calf, gilt edges, backs, etc.	75 00

PEOPLE'S DUODECIMO EDITION.
Published in Six Different Styles.
This Duodecimo edition is complete in Thirteen volumes, of near One Thousand pages each, with two illustrations to each volume, but is not printed on as thick or as fine paper as the Illustrated Edition, but contains all the *reading* matter that is in the Illustrated Edition, printed from large type, leaded. The volumes are sold separately or together, price One Dollar and Fifty cents each, neatly bound in cloth; or a complete set in this style will be sold for $19. The following are their names:

Little Dorrit.	Nicholas Nickleby.
Pickwick Papers.	Christmas Stories
Dickens' New Stories.	Martin Chuzzlewit.
Bleak House.	Barnaby Rudge.
David Copperfield.	Old Curiosity Shop.
Dombey and Son.	Sketches by "Boz."
Oliver Twist.	

Price of a set, bound in Black cloth	$19 00
" " " Full Law Library style	24 00
" " " Half calf, or half Turkey	26 00
" " " Half calf, marbled edges, French	28 00
" " " Half calf, ancient antique	32 00
" " " Half calf, full gilt backs	32 00
" " " Full calf, ancient antique	40 00
" " " Full calf, gilt edges, backs, etc.	40 00

Copies of any one work, in cloth, or any set, of either of the twenty-nine editions, in any of the various styles of bindings, of Charles Dickens' works, will be sent to any person, to any part of the United States, *free of postage or any other expense*, on their remitting the price of the edition they may wish, to the publisher, in a letter.

PHILIPS, SAMPSON AND COMPANY
COMMENCED ON THE FIRST OF NOVEMBER
A NEW MAGAZINE, TO BE CALLED
THE ATLANTIC MONTHLY.
IT will be devoted to LITERATURE, ART, and POLITICS.
THE AIM OF THE PERIODICAL WILL BE,
FIRST: In Literature, to leave no province unrepresented, so that, while each number will contain articles of an abstract and permanent value, it will also be found that the healthy appetite of the mind for entertainment in its various forms of Narrative, Wit, and Humor, will not go uncared for. They wish to say, also, that while native writers will receive the most solid encouragement, and will be mainly relied on to fill the pages of the ATLANTIC, the publishers will not hesitate to draw from the foreign sources at their command, as occasion may require, relying rather on the competency of an author to treat a particular subject, than on any other claim whatever. In this way they hope to make their Periodical welcome wherever the English tongue is spoken or read.
SECOND: In the term ART, they intend to include the whole domain of æsthetics, and hope gradually to make this critical department a true and fearless representative of Art, in all its various branches, without any regard to prejudice, whether personal or national, or to private considerations of what kind soever.
THIRD: In Politics the ATLANTIC will be the organ of no party or clique, but will honestly endeavor to be the exponent of what its conductors believe to be the American Idea. It will deal frankly with persons and with parties, endeavoring always to keep in view that moral element which transcends all persons and parties, and which alone makes the basis of a true and lasting national prosperity. It will not rank itself with any set of *isms*, but with that body of men which is in favor of Freedom, National Progress and Honor, whether public or private.
As an earnest of the material at their command, they subjoin the following list of literary persons interested in their enterprise, wishing it, however, to be distinctly understood, that they shall hope for support from every kind of ability which desires the avenue of their columns, and in the remuneration of which thy shall be guided purely by their sense of intrinsic merit:

William H. Prescott,	Mrs. H. Beecher Stowe,
Ralph Waldo Emerson,	Mrs. Gaskell, Author of
Henry W. Longfellow,	"Ruth," "Mary Barton," etc.
Rev. F. H. Hedge, D. D.,	Mrs. L. Maria Child.
Nath'l Hawthorne,	Mrs. C. M. Kirkland,
John G. Whittier,	Mrs. Pike, Author of
Oliver Wendell Holmes,	"Ida May," "Caste," etc.
James R. Lowell,	Miss Rose Terry,
J. Lothrop Motley,	Wilkie Collins, Author of the
Geo. Wm. Curtis,	"Dead Secret," ect.
Herman Melville,	G. Ruffini, Author of "Doctor
Prof. C. C. Felton,	Antonio," etc.
Prof. F. J. Child,	Shirley Brooks, Author of
E. P. Whipple,	"Aspen Court," etc.
Edmund Quincy,	R. M. Whitty, Author of
Author of "Wensley,"	"Political Portraits," etc.
J. T. Trowbridge, Author of	James Hannay, Author of
"Neighbor Jackwood," etc.	"Singleton Fontenoy,"
C. W. Philleo, Author of	Thomas W. Parsons.
"Twice Married."

PACIFIC MUSEUM,
Corner of Clay and Kearny streets.
AT this popular place of amusement there is the LARGEST COLLECTION OF LIVING WILD ANIMALS ever exhibited on this Coast.
Among them may be seen the Grizzly Bear called 'Sampson,' weighing over 1,500 pounds; one Russian Brown Bear, weighing about 1,100 pounds; another Grizzly, weighing 1,000; a Black Hyena Bear; two Rocky Mountain White Bears; the Red Bear of California; three Black Cubs; two Cinnamon Cubs; one Mammoth Pig. Also, a great variety of other Wild Animals, together with the California Lion and Tiger, Elk, Deer, Sea Leopard, Catamount, Ant Eater, Prairie Wolf, Eagles, and other large Birds. Besides a collection of Stuffed Birds, such as cannot be found on this or any other coast.
A full Brass Band is in attendance every evening.
☞ Open every Day and Evening (Sunday excepted.) Admission, 50 cents. v8-13

Ladies' Department.

LINES ADDRESSED TO A FRIEND,

On the Reception of a Portfolio filled with Writing Paper.

Thanks for the pretty folio
You kindly sent, a week ago—
The paper, pure as drifting snow!

As leaf by leaf I turned it o'er,
Unwritten thoughts of days of yore,
Like wavelets burst on memory's shore.

What broke the calm of feeling deep?
What called them up from their long sleep
And made my *heart* almost to weep?

The *leaves* were pure unspotted white—
The *thoughts* were gilded with the light
Of other days, ere sorrow's might

Had deepened slowly o'er my years—
Ere I had known life's hopes and fears—
Ere I had shed life's bitter tears.

The key-note of our joy and woe,
The feeling's changeful ebb and flow,
The *spirit's secret*, who may know?

A bird upon its graceful wing,
Or floating cloud, will often bring
The freshness of life's early spring;

Or whispering leaflet of the bower,
Or perfume of a fairest flower,
The memory of its sunniest hour.

A spoken word, a glance, a tone,
Will oft restore a lost loved one,
And leave the lone heart doubly lone.

* * * * * * *

As leaf by leaf I turned them o'er,
Forgotten were the days of yore—
The spotless sheets seemed mine no more.

I saw quaint characters inwrought
Upon their tissue—they were fraught
With ever pleasing, changeful thought.

And, one by one, each leaf took wing,
As if it were a living thing
Thought had made free, like birds of spring.

And over land and over sea,
They sped away, like all things free,
Upon the wings of destiny.

* * * * * * *

Years passed as moments fleet away—
I reached the mental twilight gray
That sheds on life no cheering ray;

When through the dim and misty haze
A flickering light transfixed my gaze,
That filled my being with amaze.

Each little sheet thus written o'er,
Was cast aside as worthless lore—
A flame consumed the leaves of yore.

And, at the solemn evening chime,
Above their ashes free, sublime,
As rose the Phenix of old time,

Each thought arose, a living thing,
Not transient as this offering,
And soared on many-colored wing

Away, away, beyond my sight,
Uprising in the calm twilight
Through the fast deepening shades of night.

* * * * * * *

Those spotless sheets I laid aside,
But, pregnant with the theme, I cried—
My thoughts indite, my pencil guide,

O, Thou, who rulest destiny!
If, nurslings of eternity,
Thoughts are not born to die.

S. M. CLARKE.

Letter from Edith Montressor.

Annexed we present to our readers another communication from our highly esteemed correspondent, "Edith Montressor." The subject is one which, if rightly understood and appreciated, would make the world better and happier. We trust our friend will come often to us and our readers, and hold converse in her own beautiful language.

Love.

Love is the first great attribute of Deity which has been most fully unfolded to man, which pervades all matter, and is the first moving cause of creation. When only applied to inert matter it is called attration, while in chemistry it is styled affinity, and as applied to electricity it is called the positive principle, and in magnetism it is that indescribable attraction between mind and mind, and no doubt is the subtle medium which connects spirit with matter; but it requires more wisdom than God has yet vouchsafed to us, or perhaps will ever reveal to man in this first stage of his existence, to comprehend fully the immutable laws of this great principle and atribute of the Creator. And it not only pervades all matter, but also the universe of mind and spirit; it is the first germ of the divine essence unfolded in the human soul, and if rightly cultivated will return back to its source, stamped with individuality, with new powers to acquire and understand those higher atributes of wisdom and truth, of which but a few faint rays have traveled down to us, or as yet been here revealed: for the laws of love are enough for the government of this primitive and yet undeveloped world, and if we obey not this first inherent law of nature, most certainly we should fail in obeying still higher and holier laws.

Obedience to this law of love is the source of man's highest bliss, and is all that is required in the fulfilling of the moral law as revealed in the Bible, and as taught by the life and precepts of Christ and his Apostles, which may be summed up in these few words, "Love thy neighbor as thyself." How simple and easy this requirement, if the heart was not perverse, how short and direct ther oad to happiness; but mankind are like the children of Israel, who wandered about in the wilderness of sin forty years in search of the promised land, which was hardly more than as many miles distant.

But the bright star of hope now lights up the future, since philosophy and religion go hand in hand, guided by the steady light of reason and truth, which scatters and disperses the mists of ignorance and superstition, dispelling with its bright rays even the darkness and gloom of the grave and of death—enabling us to penetrate the mysterious future, and by inductive reasoning prove that it can only be but a continuation of our present existence, and that our happiness will eternally depend upon the right cultivation of our faculties, and the rational gratification of the same; and that we must work out our own salvation, for it is by our deeds alone we are to be judged.

Man's head is better educated now-a-days than his heart and his affections, and to *woman* this great work more particularly belongs, of training the affections, that they shall entwine around and hide the roughness of human nature; and for this God has fitted her, by endowing her with a double portion of the holy principle of love, which, if wisely exerted, would do wonders in improving our social condition; not in legislative halls, but in the more sacred temples of the heart, where her influence is most felt and needed; for her sphere should extend more into the moral than the physical world. While her brother man is improving and beautifying the latter, woman, if she would wish to be a co-laborer, must do as much in her own sphere, which is as distinct, physically, from that of man's, as is her organization; but the mind is without sex, its vigor and love depending upon the cultivation of the faculties.

The strongest minded advocates of "woman's rights" have but to look upon the wisdom and greast physical power displayed by man in his many wise inventions—such as the magnetic telegraph, which annihilates distance; the almost omnipresent railroad cars; the oak "Leviathans" of the ocean, which bid defiance to wind or tide; the suspension bridges, spanning even the mighty cataract of Niagara; and the artesian wells, making the waters to break forth in the desert,—then they must acknowledge that they can never compete for the honors or emoluments which require so much of physical strength and labor, and that they are best fitted to adorn and beautify the creations of nature and art.

Love is the only true marriage law of God, and all who are united by any other laws or motives, break at once this divine law, and no human law or device can avert the penalty, which inevitably falls upon the heads of the offenders, producing much of the wretchedness and misery of the world, and disturbing the peace and welfare of society.

But this evil is beyond the reach of human legislation, the remedy alone can come from the heart, having the affections educated to obey the law of love, permitting no other motive ever to influence them in choosing a companion for life; and it should be also guided by wisdom, such as the right understanding of one's own self and faculties, as also some sure knowledge of the nature and disposition of the one you are about to marry. ignorance of which often causes the separation and unhappiness of many.

Women can never know the strength of their moral powers until they shall learn to act in concert, actuated by a universal love for humanity; then may they go forth and pluck the fruit from the tree of life, and give to man to eat thereof, and earth again be made a Paradise.

Edith Montressor.

(For the California Farmer.)

Woman Moving in Her Proper Sphere.

As "Edith Montresser" has kindly called for some of her own sex to say something about "Woman and Her Social Condition," I hear a sister spirit calling me from her mountain home to join her in the good work so well begun. I do not write because I can wield a more able pen than our good Edith, or add a new beauty to this all-absorbing subject, which I must confess has made me quite an enthusiast; nor that I can weave a finer fabric from the crude thoughts that are now rising upon the surface of my heart: but that I am a woman, and cannot crush back the painful truth, that woman is, in the nineteenth century (a day and age of light and progress), groveling and moping her way in darkness, and knows not as yet, her true ennobling, elevating, God-like sphere, which man and the Creator are willing to give her. The way that mothers are training their daughters now-a-days, presents a shocking spectacle for bystanders, and they readily become impressed with the truth and conviction that the present mode of living and the physical and moral education are conducive to ill-health, a feeble, crippled intellect, and a puny, dependent, sickly, degenerating race of American women, are now rising up before their wondering vision.

I ask, why are so many homes, so many hearthstones, made lonely and loveless? After the bride has been led from church, to be the polar-star, the center magnet, of home atttraction, to beautify and make lovely the fireside of one who would help to elevate her to a lofty position that she might know and feel her true woman's sphere, which her education has not fitted her for, and every good Yanke of our mother-land would feel proud that his wife occupied a good position in community, and an ornament to the society which she belongs.

From my own observation and experience I have plainly observed, that mothers entertain vastly extravagant ideas about their daughters' future years, and a good match with somebody claims their attention, and imposes upon them only a doll-baby, a novel, superficial education, and in many cases proves a detriment to their well being and after happiness. When old enough to launch their frail and unseaworthy bark upon the broad and vexatious sea of matrimony, they find too late that their deluded parents have not learned them one of the stern realities of life, and that they have been chasing the phantoms of vain pleasures, which now elude their grasp, and like empty bubbles burst and vanish into thin air. Now the world to them is no longer the "garden of paradise," but looks uglier, plainer, and more matter-of-fact, when the gilded mask is drawn aside; then and not till then, do they see its hideous deformities, and find "all is not gold that glitters." Then disappointments, blighted hopes, a sour temper, an inebriate husband, ragged offspring, squalid poverty, is her inevitable doom. Mothers! in this work-a-day world, teach your daughters something better; set before them some example of industry, teach them economy, keep open the avenues of the mind and heart to good deeds of charity, let them feed the hungry, clothe the naked, and take to the home-circle the friendless orphan, that the world has frowned upon; pour different instruction into the young and pliant mind, now so flexible you can easily mould it to your taste.

Did your mothers before you take to imported airs; live in ill-ventilated rooms; love novel reading; never take a peep into the kitchen; thump an old piano till every inmate of the house thought it a young babel or a Dutch wedding; carry a cord or two of whalebone and crinoline, to everybody's annoyance in the crowded street, or sport a dozen moire antique and brocades, wearing them so tight they could not laugh, hollow or sneeze without separating an enormous stay-string, or breaking at one smash all the ribs on the left side? Were these trappings procured from borrowed money, or by the sweat from the brow of the unhappy, care-worn husband? Were their faces painted and powdered till the skin became as wrinkled as a cow's horn, and as yellow as a saffron flower? Did they refuse to do with willing hands what was required of them? The echo answers, No! Ladies, were not our mothers of the Revolution altogether a different race of beings from ourselves? They had more elevating thoughts than to eat, drink and be merry. They were not afraid of cold or exposure, and for medicine they took the vigorous, health-giving, open air; doing out and in-door work when necessary, without grumbling or wry faces, and felt he who made time, gave it not to be squandered away. Their mission on earth was indeed a glorious one. Wearing their home-spun plaids, with comfortable calf-skin shoes—still ladies, in the refined sense of the word; sowing deep in the soil of youth a gem of real worth, which should have taken root and shone with redoubled luster as time and age placed their wrinkles upon the open, manly forehead. When the British troops invaded our borders, they by their cheerful tones urged forward father, son, and husband, who fought the battles of victory and pushed eagerly forward to the feast of death, and fought with good faith in the battle-field, that babes yet unborn might enjoy in the land of liberty, the freedom that despotic tyranny had denied them. Did they droop and faint by the wayside? Had they not something worth living for? Would such deeds die and be forgoten, after their souls had wafted down to the Ocean of Shadows—in their dreamless sleep, alike forgotten and unknown? No! I say. The good Genius of Freedom watches over their peaceful tombs, their names are now handed down to posterity, and their deathless memory inscribed upon the heart of a glorious nation, who rise up and call the Mothers of the Revolution blessed.

Then, woman of to-day! woman of 1857! have your idle hands nothing to do? Rise up and shake off the glitter of tinsel, pomp and show; strive to wean thy heart from this vain pride; banish false modesty and the love of display, and if you yet love humanity, honor yourself, and show to the world and your liege lord, that your soul is a priceless gem, worth saving; and show your influence by wielding the scepter of kindness and wisdom; let it go abroad to the council chamber, debating clubs, to all the assemblages of men, and to that most sacred corner of God's footstool, your Home, the family fireside; here is your great right, maintain it, give not up one footstep of your possessions to the usurping lord, lest it be room as a co-partner in all the joys and sorrows of life. Show some spirit, not of unkindness, but use and take the reins of government into your own hands, be queen of your own home and rule the household with affection and love. Lean not against the opposite sex for protection, like a faint hearted wholly dependent creature, nor show a contempt for honest industry and labor, for all husbands cannot be rich. Keep the heart in the right place, improve and keep alive a vigorous intellect. Catch every pearl of worth, and safely lay it away in the storehouse of knowledge. Be a wife, in the full term of the word; be a *helpmate* to the partner of your choice, a *companion* of his secret griefs and joys; let the mind soar upward beyond this mundane sphere of folly and fashion; seek Wisdom and Understanding; thy soul, like man's, is immortal! and all things of earth are perishable; the footsteps of decay are all around you. Brocades, jewelry, a forty-dollar pocket-handkerchief, will none the better wipe the tears in your dying agonies in the hour of death, nor blot from the heart the unhappy reflection of an aimless misspent life. Wealth does not pave the road to heaven, if it does to worldly distinctions! Your souls are required of you at the terminus of life's turnpike; let not your last moments be embittered and turned to gall, causing you to die mourning, by the remembrance of ill-spent years. Awake, be active! be noble! be generous and charitable to the whole family of suffering humanity, and render at last a good accountability to thy maker for the few days spent on earth!

Woman, know thyself! the destinies of unborn millions are resting in thy hands, their happiness is in thy keeping, and life at best is short and uncertain; strew flowers of beauty and understanding in their pathway; let us do good while we may, and drive the demon of selfishness and pride from out our warm and reciprocating hearts. When we so live as to learn and know our past ignorance and folly, these truths, this wisdom will be more valuable to mankind than the splendor of both Indies, or the hoarded wealth of a Cresus, when we fill this station on earth which it was originally designed we should fill.

Who will refuse to agree with me, that woman, the "last best gift of God to man," is then moving in her true and proper sphere. Then man will be proud of her healthy offspring; proud of your love and help, and proud that gifted woman occupies her own exalted station. Their influence will then live long after they have passed away from earth-born troubles, and like the glittering stars that shine from the distance, when millions yet unborn shall have come and gone, shall still remain as a beacon-light to weary travelers "o'er life's stormy main." When will time dissipate the dismal shadows of folly and pride that hover over our American women (I might say our California women), and open to the brightened mind the glorious feast of truth; you will then remove man's iron hand of oppression that now bows down the spirit and contracts the faculties of the mind. Marriage vows will not be so often sundered, and the yoke of matrimony will be worn as an easy one; be firm I say, and stretch forth thy hand to elevate woman to a nobler position, as lofty as the standard of man, who is now slumbering upon the intellectual plains and lolling upon the flowery beds of ambition and fame, while we lack the energy to reach forth our indolent hands to pluck the pearls and gems that cluster above our pathway. Edith Montressor, I love you; love you as belonging to the sisterhood of woman's reformation. I greet you as one who is striving to roll back the mountain cloud of ignorance which has too long brooded over the mind of lovely woman, where midnight darkness now reigns. Accept my prayers in laboring for their temporal and future welfare, that they may in time reach the highest pinnacle of honor and glory, where they may yet drink deep of the Castalian stream which flows from Mount Parnassus. Edith! who would not bless you for relieving and guiding the many from the dark wing of misfortune? Fearlessly enter the abode of wretchedness, and, Edith, let the genial rays of thy sunny countenance and thy vivifying influence impart to the weary and worn in heart, comfort and consolation, and the approval of thy pure conscience will most assuredly be a noble reward for your heaven-born mission. Adieu.

Ordelle C. Howk.

P. S. Will not sister Bessie let us know what she thinks about this subject of "woman moving in her proper sphere?" She wields a truthful pen, and could touch upon new truths and beauties.

O. C. H.

A. P. SMITH'S

POMOLOGICAL GARDEN AND NURSERY,

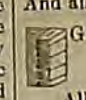
On the American River, 2½ miles from the Steamboat Levee,

SACRAMENTO.

The Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of the varieties—embracing as they do

All Kinds FRUIT TREES,
SHADE AND ORNAMENTAL TREES,
GREENHOUSE PLANTS,
SHRUBS, ROSES,

And also an unusually fine crop of



GENUINE GARDEN VEGETABLE SEEDS.

All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,

Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:

From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.

We call particular attention to our splendid stock of

CHERRY TREES.

The Finest and Largest in the State, embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from these. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase theirs, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most reliable sources in the East, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being

CORRECT AS TO NAMES AND VARIETIES,

are as Perfect as is Possible to Make them.

In the department of

Shade and Ornamental Trees,

We have a very fine stock of all the leading varieties, some very fine extra large trees of the

ELMS, LABURNUMS AND LOCUST,

particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.

A very extensive collection of all that is rare and desirable.

The Greenhouse Department is quite full, and our really superb stock of

CAMELLIAS

is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,

Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, Warranted Pure and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish gratis to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.

v8-18-6m A. P. SMITH.

Ornamental Shrubbery.

THE Greatest Variety in the State may be found at the

GOLDEN GATE NURSERY,

Corner of Fourth and Folsom streets,

COMPRISING

5,000 Monthly Roses, of 150 varieties;
2,000 Carnations, of 120 kinds;
500 Monthly Honeysuckles, of 8 varieties;
500 Acacias, of 10 varieties;

Laburnums, Arbor Vitæ, Myrtles, Euonymous, Silver Maples, Mimosa, Clematis, Cytisus, Eucalyptus, Lilacs, Jasmines, Mock Orange, Athæas, Spireas, Weigelias, Deutzias; and a general variety of

Hardy and Green House Plants.

☞ Skillful Gardeners provided for laying out grounds. Office at the Nursery, and 171½ Clay street, above Montgomery. v7-24

Sliced Apples.

50 HALF BBLS. extra nice Sliced Apples, equal to fresh. BRADSHAW & CO.,

HORTICULTURAL.

LAWTON OR NEW-ROCHELLE
BLACKBERRY PLANTS!!
PRICES REDUCED!

THE subscribers announce to their friends and customers that they have now

OVER SIX ACRES
OF THE
GENUINE LAWTON (or New-Rochelle)
BLACKBERRY PLANTS,
under cultivation, and in good condition.

They are therefore prepared to fill large orders the coming FALL and the next SPRING, at the following reduced prices:

One Thousand Plants	$125 00
One Hundred Plants	15 00
Fifty Plants	8 00
Two Dozen Plants	4 50
One Dozen Plants	2 50
One Half Dozen Plants	1 50

☞ Good Plants for setting, of a second size, will be sold for $100 per 1000 Plants, or $12 per 100 Plants.

N. B.—All Plants ordered of us will be taken up and packed with the greatest care, and under our own personal supervision.

Of the many thousands sent out by us last year, we have heard very few instances of failure, notwithstanding that they have been forwarded to *every part of the country, and to California, with perfect success,* and the setting out has often been entrusted to unskillful hands.

Printed directions for setting and cultivating are sent with every package. GEORGE SEYMOUR & CO.,

BRIDGEMAN'S
HORTICULTURAL ESLABLISHMENT,
NOS. 876 AND 878 BROADWAY,
NEW YORK.

ALWAYS on hand, in season, a large and choice selection of FIELD, HERB, VEGETABLE AND FLOWER SEEDS; BULBOUS AND TUBEROUS ROOTS, Etc.

Every article appertaining to the business furnished at reasonable rates, and warranted as represented. The Seeds are grown to order by experienced cultivators, and fully tested before being offered.

For sale by the quantity, or in packages for retail trade.

*** Goods packed securely to go any distance. Orders by mail (with remittances) will be attended to with exactness and promptitude.

Catalogues furnished on application. v8-10 3m

Ravenswood Fruit Garden
PLANTS.
WHOLESALE AND RETAIL.

Brinckle's Orange Raspberry,	$70 ₱ thousand,	$8 ₱ hundred.
Col. Wilder Raspberry,	do	do
Cushing Raspberry,	do	do
Thunderer Raspberry,	do	do
Linnæus Rhubarb,	$50 ₱ thousand,	$8 ₱ hundred.

ALSO,

Blackberries: New Rochelle or Lawton, Newman's or Thornless, $15 ₱ hundred.
Strawberries: Hovey's Seedling, Boston Pine, Large Early Scarlet, $6 ₱ thousand, $1 ₱ hundred.
Currants: Black Naples and Cherry, $10 and $12 ₱ hundred.

ALL the above plants of best quality; we cultivate most of them for market fruits.

THE BRINCKLE'S ORANGE RASPBERRY, for market or garden, is considered the best of all Raspberries: is unequaled in flavor and beauty; flavor is rich and vinous; and color beautiful bright orange: a very vigorous grower; hardy and exceedingly prolific.

The Cushing and Col Wilder are the best for making jams, preserves, sirups, &c.

THE LINNÆUS RHUBARB is a new variety originated by Myatt of England, who also originated the Victoria, on which this is a great improvement in both *flavor* and *productiveness.*

Its flavor is deliciously aromatic and spirited, and it is entirely free from the toughness and stringiness which characterize the Victoria, but when cooked becomes a fine uniform pulp, like the most tender apple. The plant is a very strong grower, more productive than the Victoria, and very hardy.

We cultivate most of the above Fruits for market, and selected them from our Fruit Gardens, as the choicest varieties known. Brinckle's Orange Raspberry and Linnæus Rhubarb especially are of exceeding excellence.

Orders will be promptly attended to in the order in which they are received, and Plants packed in careful manner.

Terms cash. Bills payable on delivery of Plants to the agents, or order of the purchaser.

Our plants will be ready to ship any time between the first of November and first of April. Circulars with full description of varieties and testimonials, can be had at the office of the California Farmer, San Francisco.

FREEMAN & KENDALL,
Ravenswood, L. I. near New York,

PARSONS & CO.,
FLUSHING, near NEW YORK,

OFFER FOR SALE an assortment of Trees and Plants which they have grown for the use of amateurs, and have prepared, by frequent transplanting and other modes, for success in moving.

They are of fine size and symmetrical form, and among them will be found

Standard Apples of fine quality.
Standard Pears, Plums, and **Cherries.**
Peaches, Apricots, and **Nectarines,** on Plum stocks, and their own roots.
Dwarf Pears, of fine form, and ready for bearing.
Gooseberries and **Currants,** strong plants of the best sorts.
Raspberries, Fastolf, Red Antwerp, Fillbasket, and other known sorts.
Strawberries, of all the best varieties.
Native Grapes—Isabella, Catawba, and other hardy varieties.
Foreign Grapes: all the well-known sorts, with some new varieties of great excellence. These plants are propagated from vines that have borne abundantly for some years, and are known to be correct.

Great care is taken in the cultivation of Fruit Trees, and none but those of the best quality are allowed to be sent out.

The Ornamental Department

Contains trees of all sizes for lawns and streets, including Elm, Silver, Norway, and Sycamore Maples, Catalpas, Lindens, Tulip Trees, Cypress, Larch, Willows, Ash, Abele, Oriental Plane, and all the best varieties of deciduous trees.

It also includes Evergreens of fine size for single planting, and of small sizes at low prices, from one foot upwards, for massing; among them are Norway Spruce, Balsam Fir, Austrian Pine, Hemlock, White Pine, Scotch Fir, and other varieties.

The best Shrubs include many fine varieties at low prices, for massing, of which the Rhododendron Catawbiense can be particularly recommended for its fine evergreen foliage, showy bloom, and perfect hardiness.

The ROSES are cultivated in very large quantity, on their own roots, of all the most rare varieties, and to those who purchase in quantity, will be sold at greatly reduced rates.

The Exotic Department

Contains a fine assortment of Camellias, grown as bushy, rather than tall, slender plants; and also contains all the well-known varieties of exotic plants and many rare sorts, introduced from Europe, annually. These are all carefully grown for those who desire plants of symmetry and beauty.

CATALOGUES of all the departments will be furnished on application. Great care will be taken in packing, and trees will be delivered in New York, and thence shipped as directed. v8-16-tf

J.L. POLHEMUS
DRUGGIST

OFFICIAL NOTICE!

POLHEMUS' DRUG STORE,
No. 190 J street, corner of Seventh.
SACRAMENTO, CAL.

FELLOW CITIZENS: I have lived among you since the ever glorious FORTY-NINE, have suffered with you in three fires and three floods, and intend to live among you with my family during the term of my natural life, if not longer. I return you my most sincere thanks for your unfaltering patronage and support, which has enabled me to pay One Hundred Cents on the Dollar through all my adverse fortune. I would also give you a few reasons for your continued patronage, and inducements to new patrons likewise.

FIRSTLY.

I claim to be the Oldest Established Legitimate Druggist in this City.

Persons in this connection will please observe that there is as much difference between a DOCTOR and a DRUGGIST as there is between a Druggist and a Doctor, and rather more so between those who have picked up the Drug Business and those who have devoted their whole lives to it. To this latter class I have the honor to belong, having learned my business in the Atlantic States, and been engaged in said business for the last eighteen years

SECONDLY.

Believing that life is sweet to all, and that the people wish to know where they can get their prescriptions filled with safety, I will hereafter fill them for

Half the Price Usually Charged

By other Druggists, legitimate or illegitimate, and of **The Purest Drugs and Chemicals.**

THIRDLY.

I intend my store shall be ONE of the best, if not THE BEST place in California to obtain everything, NEW, ODD and STRANGE in the Drug line, and especially to make it the most extensive depot for every valuable Patent Medicine, Drug and Chemical. We invite proprietors of valuable and reliable Patent Medicines to send them along. We have a large and thoroughly fire-proof Drug Warehouse to hold them, and patrons to buy them

FOURTHLY.

We Keep Open all Night!

And charge no more for medicines than in the day time

FIFTHLY.

We will furnish those in indigent circumstances with MEDICINES AT COST! the same being attested by two or three good citizens.

SIXTHLY.

Hereafter we will do a business on a CASH BASIS ONLY. The amounts we have lost heretofore by crediting we intend to distribute equally among our patrons, in the future, in the decreased price of our goods.

SEVENTHLY.

We have received the agencies for the following valuable articles:

Dr. Carl Warburg's Tincture. This article is particularly recommended for Ague and Fever, when every other article fails to cure.

Budds' Nerve and Bone Liniment, warranted the best in California.

Flower of the West, for Fever and Ague.

Delight's Spanish Lustral, for the Hair.

HUDSON'S CALIFORNIA GROWN MUSTARD.

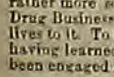
Also, agencies for all the other popular medicines too numerous to mention.

EIGHTHLY AND LASTLY.

We import nearly all of our goods. We think we know how to import them, and how to sell them to satisfy the public as to price and quality. At all events, give us a call, and WE WILL TRY.

v6-12 J. L. POLHEMUS.

Who Wants a Cheap Piano?



THE subscriber has for years been engaged in the purchase and sale of PIANOS, HARPS, MELODEONS, GUITARS, ORGANS, MUSIC, &c., and, being a *practical musician*, has given entire satisfaction. He buys *directly from the manufacturers*, and is thereby relieved from heavy rents and other expenses. Every instrument sold by him receives his personal attention, is *guaranteed* not only as to *quality*, but as being *cheaper* than it can be procured at any wholesale house in America. A printed list of prices, accompanied by the most unquestionable references, will be sent free to all parts of the world, on application to JAMES M. EDNEY,
56 John street, New York City.

AGRICULTURAL.

FIRST PREMIUM IMPLEMENTS.
TO THE FARMER
AND
Dealer in Agricultural Implements.

PLEASE READ.

HAVING erected a good shop, with facilities not heretofore possessed by any house in this State for manufacturing Agricultural Implements, I beg leave to announce that I am now prepared to receive orders to any extent in this line of business. I employ none but the best and most experienced mechanics, and use only the very best materials. In this way I hope to promote the interest of the good mechanic, the interest of the farmer, the interest of our young and growing Agricultural State; and at the same time that interest which is foremost with all mankind—self. I have had twenty years experience in the manufacturing business;

I ESTABLISHED THE FIRST SHOP,
AND
MADE THE FIRST STEEL PLOW

in the State of Wisconsin, in the dawn of her great agricultural improvement. I also

MADE THE FIRST REAPING AND MOWING MACHINE
AND
THE FIRST STEEL PLOW
Ever Made in this State;

Therefore, with my experience, and a knowledge of the wants of the country (which are different from most others), I feel confident that I can and will do much for the interests of the agriculturists of this county; and in my efforts I trust I shall meet with a good share of patronage from the farmer and all interested in this matter, and in the interest and development of the agricultural improvement of our State.

I design, and have under way, the manufacturing of

1,500 Cast Steel California Plows;
THE DEEP TILLER;
OR,
"QUEEN OF THE WEST;"

Of stock entirely superior to any ever worked before in this country. Also,

GANG PLOWS.
HARROWS.
CULTIVATORS,
FANN MILLS,
&c., &c., &e.

In addition to what I manufacture, I shall constantly be receiving implements from the best makers of the Eastern and Western States, amongst which are now due

500 CINCINNATI

EAGLE, STEEL AND ROVER PLOWS,

which stand, in point of true merit and worth, altogether higher than any others in the great agricultural State of Ohio.

☞ Please favor me with a call, and see for yourself, and be convinced that I am publishing no humbug, but simply facts as they are; and that your young State can, within itself, already provide the farmer with implements inferior to none now to use. All kinds of agricultural implements and machines repaired on short notice, and in the best manner, and on reasonable terms.

THOS OGG SHAW,
33 Sacramento street, near Davis,
*** Shop corner Davis and Sacramento streets.
v8-7 6m San Francisco.

PLOWS! PLOWS!! PLOWS!!!

NOW LANDING,
The Celebrated "Boston Steel Clipper,"
AND
"PEORIA STEEL PLOWS,"

Got up by the subscribers to meet the wants of California, and which, for adaptability, material, finish and cheapness, surpass any plows ever brought to the notice of the public.

These Plows are made by the best manufacturers in the United States, and defy competition in price, and comparison in material and workmanship.

Being made at tide water, and no expense of transportation from the Western States, we are enabled to offer Merchants and Farmers a better Steel Plow for less money than any other in market.

CAST PLOWS (Eagle Pattern),
OF ALL SIZES AND DESCRIPTIONS.

We shall be in constant receipt of the above styles of Plows, and offer better inducements to the trade than can be found elsewhere.

These Plows are packed in cases, very compactly, and can be sent to any part of the country at very small expense, and can be set up easily.

Extra points and parts to all our Plows constantly on hand.

Machines and Agricultural Implements,

And goods of all descriptions, constantly on hand and replenished.

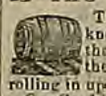
☞ THE PEOPLE'S PREMIUM ALE. ☜



THE undersigned beg leave to make known to their friends and patrons that they are hard at work doing all they can to supply the orders that are rolling in upon them from all quarters.

Our Card in another column will explain that we go for the "PEOPLE'S PREMIUM," and as we feel they have awarded that to us, we do not fear any opposition or competition—

"Competition is the life of trade,"

And we cheerfully yield to all our competitors a fair field and an open trade, and abide the judgment of the public most cheerfully.

LYON & CO., Empire Brewery,
v8-1 106 Jessie street, San Francisco

IS ACKNOWLEDGED to be, by all who have tried it, the BEST TONIC and ANTI-DYSPEPTIC ever presented to the California public.

In New York City, and Buffalo, N. Y., where the Turner Brothers first introduced it to the world, it has secured an unprecedented degree of popularity, owing solely to its sanitary and extraordinary medicinal properties.

Medical Men and Men of Science

All pronounce it to be most healthful and invigorating; and whether it is used by adults or infants, its effects are alike beneficial.

It is purely Vegetable, and is composed of

The juice of berries, herbs, wild plants and roots;
The Spring's first buds, the mellow Autumn's fruits;
The bright wild flowers, whose fragrance charm the bee;
The op'ning leaves, the bark of the forest tree;
The bulbous root, on mountain's slope that's found;
The spreading vine, that grows in marshy ground.

TURNER'S GINGER WINE

Being so well known to this community, as well as to all the inhabitants of the Pacific Coast and its Islands, it is only necessary here to state that it is manufactured in all its purity, as well as the

CONCENTRATED ESSENCE OF PURE JAMAICA GINGER,

And all the Sirups, Cordials and Extracts now in use in this State, by TURNER BROTHERS,
Market street, opposite R. C. Orphan Asylum,
v8-14 San Francisco.

PEORIA PREMIUM PLOWS!!

JUST RECEIVED,
GENUINE PEORIA PREMIUM STEEL PLOWS,
Of Nos. 5, 5½ and 6.

THE Plows are from the justly celebrated manufactory of Messrs. TOBEY & ANDERSON, Peoria, Illinois—(the makers named are the ones who have given the reputation to what is known as the "Peoria Plow"). Several hundred were sold by us last season, and they have given very general satisfaction when imitations have failed.

These Plows are so completely packed at the place of manufacture, that they can be shipped to Agricultural districts of California and Oregon, at a very small per centage on their costs.

Merchants doing business in Agricultural districts would do well to call upon us before making their purchases of this important article.

SOUTHWORTH & CO.,
44 Battery street, near California.
San Francisco, October 1, 1857.

PEORIA PREMIUM STEEL PLOWS.
NOTICE.

We, the undersigned, Inventors and First Manufacturers of the "Peoria Premium Plow," say, to all whom it may concern, that Messrs. SOUTHWORTH & CO., of San Francisco, California, are the only parties whom we have ever supplied with our Plows, or who have received them for sale in California, and are the only parties to whom we are shipping the present season. TOBEY & ANDERSON.
Peoria, Illinois, March 9, 1857. v8-12

From the East.

THE P. M. S. S. Co.'s steamer Golden Age, Capt. Watkins, arrived on Wednesday afternoon, bringing two weeks later intelligence from the Atlantic States, and news from Europe to the 9th ult. The steamer brings 600 passengers, and a large mail.

The thirty-fifth Congress was inaugurated at Washington, at noon, Dec. 7th. The weather was fine, and the Capitol was thronged with spectators, including the whole diplomatic corps. In the Senate fifty senators were present when the body was called to order. The Hon. Benj. Fitzpatrick of Alabama, was chosen President *pro tem.* George W. Bowman of Pennsylvania, was chosen Superintendent of Public Printing. In the House, a quorum being present, Mr. Jas. L. Orr, of South Carolina, was elected Speaker. Mr. Allen, of Illinois, was elected Clerk.

Mr. Gwin has introduced bills for the construction of a Northern, Southern and Central Pacific Railroad; also, a bill to organize the Territory of Arizona. A bill passed the Senate on the 19th of December, authorizing the issuing of $20,000,000 of Treasury notes. The Senate confirmed Austin Smith as Naval Officer at the port of San Francisco.

The following named gentlemen compose the Committee of the Senate, to which was referred that part of the President's Message, relative to a Railroad to the Pacific: Messrs. Gwinn, Bell, Douglass, Bright, Davis, Hunter, Seward, Foot and Iverson.

Hon. Vernon K. Stevenson, President of the Southern Atlantic and Pacific Railroad Company, was in Washington. He has had several interviews with Senator Gwin on the subject of Congressional aid to this great enterprise, as recommended by Mr. Buchanan.

The new Tehuantepec Company, headed by Mr. La Sere of La., the President, arrived at Washington on the 12th ult. The road, they stated, was rapidly progressing, and would shortly be ready for travel and transportation.

A bill has been introduced in the Senate, appropriating 6,300,000 acres of the public domain in aid of Agriculture and the Mechanic Arts.

Mr. Foot, of Vt., has introduced a bill granting a homestead of one hundred and twenty acres of land to actual settlers.

The banks of the city of New York resumed specie payments on the 12th of December. The banks at Albany, and most others throughout the State, and those of Boston, and the New England States, with the exception of the banks of Rhode Island, immediately followed suit. It was supposed that in a very short time the greater portion of the suspended banks would resume specie payments, and the cry of "hard times" would slowly pass away.

The Legislatures of Georgia, South Carolina and Alabama, have legalized the suspension of specie payments in those States.

It is stated, as the very latest accounts reported in Washington, that the Secretary of War had determined upon his Utah policy, but the want of money in the treasury delays a commencement of operations A large force is to be organized in California, and the retreat of the Mormons into Sonora will be cut off.

Gov. Walker has resigned the Governorship of Kansas Territory. Secretary Stanton has been dismissed by the President, and General Denver, of California, appointed in his stead.

Hon. N. P. Banks resigned his seat in Congress, to have taken effect on the 1st January, when he was to have entered upon his duties as Governor of Massachusetts.

The splendid country seat of P. T. Barnum, Iranistan, was destroyed by fire on the 18th of December. It cost $100,000, furniture $20,000, and was insured for about $52,000.

Col. Richardson, of Illinois, has been confirmed by the Senate as Governor of Nebraska, vice Izzard, resigned,

John C. Fremont has visited Boston, where he has been made Knight of the Order of the Sons of Malta.

Gen. Mirabeau B. Lamar, of Texas, has been chosen Minister to Central America.

Very severe storms, with excessive cold, had been experienced in many parts at the East. At St. Paul, Minnesota, on the 4th December, the mercury marked 22 degrees below zero, and there had been good sleighing for a fortnight. The Mississippi was only navigable on skates.

The official canvass of the votes cast for the Mayor of the city of New York, shows that D. F. Tieman received 43,216 votes, and Fernando Wood 40,889—Tieman's majority, 2327,

The flour market at New York was heavy, and the prices were tending downwards.

General Denver, Commissioner of Indian Affairs, has submitted his annual report, in an able review of the general condition of the Indians throughout the country. The following is an extract:

In California, universal peace prevails among the tribes, and the progress of the reservations is such as the most sanguine friends of the Indians could wish for. He states that the Nomee Lackee Reservation raised over 10,000 bushels of wheat, and that the work was done by the Indians, having only two white men as overseers.

A large number of claims has been presented for payment for supplies furnished the Indian service in California during the years 1851–'52, which have not been paid for want of appropriations. The Commissioner recommends that these claims should be investigated, with a view to their final settlement.

The brig E. Drummond has arrived at New York, from Aspinwall, having on board a flock of Lamas, consigned to James Fisher and Son, These animals are Alpacas, and were brought from the Cordilleras to Guayaquil, and from thence shipped to Panama and Aspinwall by railroad. Seventy-one of them were originally taken on board the E. Drummond, but owing to heavy weather on the passage, twenty-nine of their number died.

The Panama Star and Herald says: General Walker left Aspinwall in the steamer Northern Light, for New York, accompanied by Captain Engle, of the U. S. frigate Wabash, who had been deputed to hand him over to the safe keeping of the United States Marshal at New York.

FROM EUROPE.—News had been received at New York from Europe, up to December 8.

Many additional failures had occurred in the principal mercantile cities in England.

The launching of the Leviathan (Great Eastern), was progressing slowly. It is stated she has still 107 feet to move before she floats.

A bill has passed to a third reading in Parliament, declaring the bank of England notes a legal tender.

The Spanish Court refuses to accede to the demand of Mexico, that its Envoy shall be received as a necessary preliminary to the negotiation. Advices received at Madrid from Cuba, state that the fleet destined to operate against Mexico, is ready at a moment's warning.

From Australia.

BY the schr. Vaquero, dates have been received to Nov. 3d. We copy the following from the correspondence of the Evening Bulletin:

The commercial news which I can send you from Australia, does not, I fear, present many new or important features. With regard to the article of flour, the general opinion formed from the present aspect of the crops, is, that the harvest, which takes place in the month of March, will be a very abundant one, and sufficient with the stocks on hand, to meet the consumption of this colony. In the adjoining colony of New South Wales, however, in consequence of the severe inundation to which a portion of it has recently been subjected, it is highly probable that a scarcity will exist, though to what extent, it is impossible to form an opinion. Taking all things into consideration, I think there will be room for moderate shipments of flour to be made at the time this letter reaches—provided, of course, California prices continue at the low rates received here by latest accounts. The present ruling prices here are: Colonial, £22 10s per ton; Haxall and Gallego, £2 10s per barrel; California, not quoted.

The amount of gold brought down from the various mines of this colony, during the past week, is 49,240 ounces. The total shipments from this port for the year amount to 93 tuns, 4 cwt., 1 qr., 10 lbs, 2 ozs.; the value of which at $20 per ounce [Australian gold is purer than California gold], amounts to $44,744,440.

The passage arrivals at this port, during the present year, amount to 15,386. This immigration far exceeds the wants of the colony; consequently, wages have been much reduced, and large numbers of laborers and artisans think themselves fortunate if they can procure any kind of labor at a dollar and a half per day.

The feeling of the mining population against the Chinese continues to be of the most decided character. Indeed, every portion of the community has risen against them. They are accused of committing most unnatural crimes, and nothing but the strong arm of the law saves them from extirpation at the hands of the people.

There appears to be some prospect of steam navigation between California and Australia, *via* a route from Sydney to Panama, with one branch of the English mails.

There is something of a *mania* prevalent for boring Artesian wells in the colony, which, I think, would afford a good chance for California speculators in this line.

SANDWICH ISLANDS.—The Vaquero (which reached the Islands direct from Australia), landed from that continent at Honolulu, a lot of pure blood merino sheep, consisting of ten rams and three ewes. Hawaiian wool of the finest quality is expected hereafter to figure largely in the exports of the Islands.

We learn that the schooner Caroline E. Foote, says the Commercial Advertiser, will be dispatched hence for a guano island off the coast of Mexico, the precise location of which we have not ascertained. She will endeavor to procure here from forty to sixty Hawaiians, to act as laborers in shipping the guano. We understand that a company has been formed in San Francisco for the prosecution of this business, under the Presidency of Captain Isham, formerly a commander on one of the Panama steamers.

Cranberry Plants.

THE BELL OR EGG SHAPED VARIETY

IS the kind best adapted for cultivation on damp, loamy soil, also on wet bogs or poor land, where nothing else will grow. When cultivated, after two years, they often bear from
200 to 300 Bushels per Acre.
Price 50 cents per 100, or $4 per 1000 for Bearing Plants.

New Rochelle (or Lawton) *Blackberry Plants,* of the genuine variety, at reduced prices.
$2 per dozen.....$12 per hundred.....$50 per 500.

Brinckle's Orange Raspberry,
$3 per hundred.....$1 25 per dozen.
Fine Red Antwerp, Franconia, Knevatts Giant, and Fastolf Raspberries,
$4 per hundred.....62½ cents per dozen.

NEW HOP TREE.
(See cut and description in the FARMER.)
Price 50 to 75 cents each.

This Hop is much stronger than the common one, for family use, and highly ornamental. Circulars relating to culture, soil, etc., can be found at the office of the FARMER, or by letter to the subscriber, by inclosing a stamp.

Orders will be received for the above plants, at the office of the FARMER, or by mail to my address, by inclosing the amount. I would also suggest, in addition, the amount of freight to be prepaid here, to secure their safe and speedy transmission.

Assortment No. 2	consists of twenty choice varieties of Biennials and Perennials	1 00
Assortment No. 3	consists of ten extra fine varieties of Annuals and Perennials, embracing many of the new and choicest in cultivation	1 00
Assortment No. 4	consists of five very choice varieties, selected from Prize Flowers of English Pansies, German Carnation and Picotee Pinks, Verbenas, Truffaut's French Asters and Double Hollyhocks, each of which are sold at 25 cents singly	1 00

Persons in ordering will please give the number of the Assortment.

By remitting THREE DOLLARS AND FIFTY CENTS, in gold or postage stamps, the purchaser will receive the FOUR ASSORTMENTS, postage paid.

It is now three years since we commenced putting up the above assortments, during which time they have been sent to every State and Territory in the Union—and notwithstanding the unfavorable weather to which they have been exposed in many localities, have given universal satisfaction. Those who have given them a trial, recommend them freely to their friends, and the most flattering testimonials are daily received of their good quality. Orders must be accompanied with the Cash.

SEEDS
OF FRUIT and ORNAMENTAL TREES.
THOMAS MEEHAN,
PROPRIETOR OF THE GERMANTOWN NURSERIES,
Germantown, Philadelphia, Pa.
☞ Includes in his business the collection and importation of
Every Kind of Tree Seeds
That can be obtained in this country or Europe. A Price Current of over Two Hundred Species which can generally be obtained with certainty, is issued every May, in advance of the season of ripening, so as to afford purchasers an opportunity to forward their orders early enough to get them in prime season; fresh, and in the best order for growing.
Most of this year's crops of seeds are now on hand, and they will be sold at the lowest rates at which they can be collected. The supply of PEAR SEED is large this season, and can be supplied at $5 per pound, or $4 50 per pound when 5 pounds are ordered.

Gophers, Rabbits and Squirrels.—No. 2.

EDITORS FARMER: The greatest and most obvious drawback to gardening at the Mission Dolores, at the time mentioned, was the deficiency of water. It was evident that there was a limit to my operations on that account, if I could not find another field, where I would be better supplied, in which to conduct them. I looked around; and found, about two miles off, a beautiful valley among the hills, where there was a never-failing stream of water all the year. I fenced in the best portion of it on both sides of the stream; and, as I had still my garden at the Mission, congratulated myself that between them I would be able to do a good business.

With the liberal supply of water which I had running through my new garden, I bade the Gophers defiance; but I had other enemies which molested me still more, and which were not to be thus intimidated. Along one side of the valley, there was a wooded bank, which was perfectly alive with Rabbits. They were ten times as mischievous as the Gophers at the Mission, and fifty times as numerous. They threatened to eat up everything; and if it had not been for some kindly Frenchmen who took a liking to them, I believe they would have done so. But though my useful allies prevented them from increasing, they could not exterminate them. They had got possession, and there seemed to be no means of driving them away.

Let the worst happen, thought I, I have my garden at the Mission. So I concluded that the best thing I could do was to plant a large crop—one half for the Rabbits, and the other to go to market. I also got some poultry; and made up my mind, as the place was so well supplied with water, that it was wrong to grumble, although the Rabbits did come in for a share.

The proverb says, "Every dog has his day," and so had the Rabbits. One afternoon, as I was getting a load prepared for being taken to market next morning, I observed a stranger, in the form of a wild cat, creep stealthily from among the trees, and in a moment make a dart at, and carry off one of the best dorkings on the premises. There was a general hue and cry after the cat, but she got away; further pursuit was given up; and as the task of tying up vegetables had been suspended, and the sun was getting low, every one was off, some here, some there, pulling and carrying, and bunching up, as fast as they could; when some one called out, "Here's the cat again." Again she carried off her prize, and was safe!

There was a talk of vengeance at night, against the impudent intruder, and predictions were current that not a hen or duck would be alive in three days. Those who spoke thus were wrong. We managed to secure the poultry, and the cat did its duty. In a few weeks there was not a Rabbit to be seen. Nothing, thought I, like, "set a thief to catch a thief."

I have frequently pondered on the force of this remark, as I brought to remembrance my experience in regard to Rabbits, and wondered whether there might not be some way of so far domesticating those wild-cats as to get them to look after Squirrels, which every one seems at a loss to know how to get rid of. There are also other wild animals of the cat kind, of similar habits, the comparative (de-)merits of which, and the short-tailed wild-cat, seem pretty nearly balanced—for instance, the pole-cat (*Scottice*, foumart).

The foumart is not a favorite in Scotland; and farmers there give good reasons for disliking her. She smells as strongly as the skunk, or nearly so, and kills poultry by the dozen. I know the latter fact from my own experience. The times are changed now from those of Tam O' Shanter's day, when a sly witch, like "Nannie," could

Keep the country-side in fear

of her unjustifiable interference with their live stock, and oats and barley during harvest; but I can never forget the panic produced over half a parish, by the unwelcome sojourn of a foumart, one winter, in the rural district where my father had his farm. There was not a farm-yard in the whole valley to which she did not pay a domiciliary visit, nor one in which the rights of the hen-roost were not violated. Some lost twenty, some thirty, in a single night—my father sixteen in killed and wounded. And she would not be scared away.

Might we not manage, like Providence, to "bring out good from evil" and train such way-ward spoilers to live on animal food of a different kind? Nobody would grudge them an exclusive monopoly of the Squirrels, which have become to California a scourge as afflicting as any that the Man of God brought on the obstinate Egyptians. But there are two objections which seem all but insuperable. We have not got them; and we might find the remedy as inconvenient as the complaint. It appears however, that there are more than one kind of cats, which have all the necessary qualifications for ridding us of the evil, if they had not besides propensities and properties of a more doubtful nature, which render them unsuitable as auxiliaries. Are there not other cats of a more friendly character, which under proper management might be made equally serviceable? Why not the common domestic cat? Nay, do not laugh; let me give you an episode in the life of a cat of my own, which like Nimrod was a "mighty hunter," and did not confine herself to

"Mice, and rats, and such small deer,"

like poor Tom, but occasionally dined on the forbidden hare, and engaged in aquatic adventures for the capture of the large water-rat (or water-dog as it is provincially called in Scotland), with astonishing success.

That she disregarded game-laws and acts of parliament I know. In the romote North of Scotland, where my farm was situate (20° further North than San Francisco), the sun, on the shortest day, only shines six hours, and time has to be economised. It is an established rule in winter, for the plowmen to rise at five o'clock, as in summer; and thresh out, with the water-power machine, the grain (the fresh straw of which is used in feeding the young cattle on the farm) every alternate morning; to clean and feed their horses; eat their breakfast by candle light; and be in the field ready to commence work as soon as there is light enough for that purpose—the alternate mornings being employed in dressing and bagging the threshed-out grain. While the plowman is attending to his horses, before going to breakfast, the cattle-boy feeds his stock. I had a brave young lad in that employment, whose chief boast was, that as soon as he was tall enough he would be a soldier, and already he could march in military fashion, and shoulder his turnip-pluck like a veteran. One morning he encountered a rare adventure, on which he doubtless expected that he could expatiate with increasing enlargement to the wondering house-maids by the ingle-cheek. No sooner did he leave, for the stated purpose, than with surprising expedition he came rushing back to the barn. There was a hare in the edge of the turnip heap, right under a corn-stack, and all he wanted was a stick of any kind with which to demolish her. He never was braver. After rummaging about for some time he got himself properly provided, and dealt the poor hare such a "lundering lick" as bade fair to effect his purpose. But pussey had been before him. On inspection the head was off, and all his expected glory nipped in the bud. There was much merriment by the kitchen-fire for long afterwards, about Sawney's heroism, and how nobly such a valorous youth was likely to acquit himself at some future Waterloo among his decapitated enemies.

But it is not country gawkies, but my cat, that I mean to tell you about. She was as good as Whitington's. So long as she had only herself to provide for, her habits were quite aristocratical. She apparently had recourse to field-sports purely for the amusement they afforded her. But on the birth of an interesting family of six young kittens, she turned her accomplishments to practical account. The kittens had been stowed away in the barn, and, being removed from the immediate supervision of female eyes, were probably neglected. Mother pussey did not require human sympathy; she knew her own resources; and having an instinctive faith in the proverb which tells us, rather flippantly I admit, that "God helps them that help themselves," she turned out to the fields, fully resolved to trust to Providence and her own ingenuity.

At some little distance from the farm yard there was a large open ditch, which served as a channel for conducting off the whole of the drainage of a considerable portion of bottom land, which was conveyed into it by means of covered drains. As the fields on both sides of it were in grain crops, it had become the home of a respectable colony of water-dogs, which could there unmolested enjoy this cool and sequestered retreat, and have abundance of provisions all around them. To this ditch the cat bent her way, and soon returned with a water-dog as big as herself, which she had no sooner consigned to her youthful progeny than she was off again. I kept an account of twenty-six in a couple of weeks; and these evidently were not all, as it was in the summer time, and pussey rose early (probably she did not go to bed at all), and it was no unusual thing for those who were first up to observe her returning with her prey about sunrise.

The cat is not only a cleanly animal, with a particular aversion to anything which would put her well-arranged hair in disorder, but has, as is well known, a special dislike to getting into water. I was curious to know how she contrived to catch this novel kind of venison, on which she had concluded to bring up her infant family; and one afternoon, as I saw her marching off to her favorite haunt, I concluded to follow her, and observe how she behaved. As I took especial care to keep out of her sight, and had to manage artfully to do so, she got considerably ahead of me, and the first glimpse that I had of her showed that she had already got something in her eye. It would have been hard to say which was the closer watcher, I or she. In this respect I was fortunate, as her attention was so riveted with the object of her search, that I could, without risk of detection, get into a position which commanded a full view of the scene of interest. She was perched upon the high bank of the ditch, the water of which was seven or eight feet below her, and of considerable depth. I could see her eye glistening, and fixed on something in the bottom; and she evidently had sufficient generalship to know the exact moment to make the attack. If I had any doubts on that point they were soon put to rest, for with one bold spring she plunged in over head and ears, and brought her captive along with her.

She was a noble cat, and I could write more about her than many would care for reading. Let me only say, as Burns says of "the Deil," that

"A' her doings to rehearse
Wad ding a Lallan tongue or Erse,
In prose or rhyme."

I believe I have said enough to convince any one, that a cat, which would dive from a bank seven feet high, to catch a water-dog, and could kill hares unhurt amid the shots of gamekeepers, would not scruple to make prey of squirrels under ordinary circumstances, and without a single obstacle to prevent her. But let the reader have patience till next week; I have direct evidence to adduce on the subject.

AGRICOLA.

MILLERTON, Jan. 12, 1858.

THE NEW ROCHELLE OR LAWTON BLACKBERRY.

ABOVE, we again present our readers with an engraving of this luscious fruit, showing its actual size, as we feel confident it will be a great acquisition to our State. Our associate editor visited the grounds of Messrs. Seymour & Co., South Norwalk, Conn., where some six acres are devoted entirely to its culture; a portion of which is for fruit and a part for propagating plants for sale. Although the season was far advanced when his visit was made, still he was more than repaid for the trouble, for the fruit even then was hanging in clusters equal in size to the drawing above.

We give below a description of the fruit, etc., and can recommend it safely to our farmers here, as a most valuable acquisition, and one that will repay handsomely for the slight amount of investment. Mr. Seymour in his letter, says:

"The 'New Rochelle Blackberry' sends up annually large and vigorous upright shoots with lateral branches, all of which, under common cultivation, will be crowded with fine fruit, a portion of which ripens daily in moist seasons for six weeks, commencing about the middle of July. They are perfectly hardy, always thrifty and productive, and I have not found them liable to injury by insects or blight.

The vines grow quite large—many of them over an inch in diameter, and the fruit hanging in very thick clusters—in size more like the large Green Gage Plums than ordinary Blackberries. The flavor is not apparently diminished by its large size, and the few seeds is not its least recommendation. We think this berry a valuable acquisition to our domestic fruits, and worth a place in every garden, and are thus particular in describing, in order to answer the numerous inquiries we are continually receiving in regard to it.

In transplanting, Messrs. Seymour & Co. recommend selecting plants from two to three feet high, and to set them about the first of November, or middle of April, in that latitude. They may be put out on almost any soil, at a distance of four to six feet apart. When setting out, it is desirable to cut off the vine at four to six inches from the ground. For field culture, they recommend preparing the ground by plowing in an ordinary coating of barn-yard manure. Two or three experiments with guano dug in around the hill, have been quite successful.

The fruit is juicy and fine flavored, with very few seeds. The size can hardly be appreciated by those who have never seen only the common varieties—sixty to eighty berries of about the ordinary size, will fill a quart measure. The yield is very great, single canes yielding from four to eight quarts. Five hundred to one thousand ripe or growing berries have been counted upon average bearing canes. An inch to an inch and one-half is about the average diameter, though larger berries are quite common. It has been tried for wine, eight quarts of berries producing five quarts of pure juice—making a most palatable as well as medicinal wine.

A word of caution is necessary in reference to securing genuine plants, carefully packed; for unprincipled and irresponsible peddlers and speculators will in this case—as in that of fruit trees—attempt to palm off anything in the shape of a blackberry vine, as the genuine 'New Rochelle.' If carefully packed, they may be carried safely to a considerable distance, provided always, that in taking up or setting out, the roots are never left exposed to wind or sun."

Orders will be received at this Office, and should be sent in at once.

The Best Crosses for Mutton.

A friend of ours who has had experience in raising Mutton Sheep in England, and who is now engaged in that business, called on us the present week and gave us his experience. He had twelve pure China Ewes and twenty China Bucks, of the broad tail species. The great desideratum in crossing is to aim at size, quality and quantity. The China sheep are very prolific, and good mutton sheep. The Mexican sheep are large size, and by the cross of the China with the Mexican a large and excellent mutton sheep is obtained.

Another fact, too, the prolific nature of the China is retained, as we were shown that by means of the China Bucks to a large flock of the Mexican sheep, an average of twin lambs was the result, and many cases of three and sometimes four.

There is no gain, to cross the China upon the American sheep, but the other cross improves the sheep, both the mutton and the wool.

We desire particularly to state, that from long experience, we learn that the China cross of the Mexican, gives superior *restaurant* mutton, *i. e.*, the kind that *chops up* well, as young mutton, without forcing—weigh about sixty pounds.

Success in Sheep-raising.

THOSE splendid Merino Bucks and Ewes which were imported at high cost the last spring, by Messrs. Searle & Wynn, from the choicest flocks of J. D. Patterson, Esq., of Westfield, Chautauque county, N. Y., have proved to be a very great acquisition to California, as well as most creditable, satisfactory and profitable to Messrs. S. & W., and giving most honorable testimony to the value of the flocks of Mr. Patterson. It will be recollected that the lot alluded to were three Bucks and two Ewes. The progeny now of the full bloods are three Buck lambs and one Ewe, and the loss of two lambs.

The last year the Ewes gave each one lamb; the present year, the Ewes both gave twin lambs; thus showing the prolific character of our climate. In addition we should state that the Bucks have been placed with a large flock of American Ewes, and the result is "one hundred and eighty-six half breeds," of a very fine character. This cross is found to be very satisfactory, producing sheep of an extraordinary excellence by a single cross.

Such results are highly gratifying to all who look justly to this great interest, and this news must come to Mr. Patterson, from whom the original stock was purchased, with great satisfaction. We are pleased to know that Messrs. Searle & Wynn will offer at public auction a few of these fine sheep next autumn, of which ample notice will be given.

Beet Sugar.

WILL our farmers permit the coming season to pass without making an effort to establish the manufactory of Sugar from the Beet. There is no one vegetable that will produce so large a crop, or pay so well, as the Sugar Beet; either for feed for stock, or the manufacture of Sugar and Alcohol.

The increase of the crop of Beets in France is enormous, and the value of the product in sugar, sirup, and alcohol, has been estimated at nearly one thousand millions of francs annually. The efforts put forth by Mons. Eugene Delessert, the last year at the Mechanics' Fair, and at the State Fair, should awaken a better interest in this matter. We have one instance, where, from one-twentieth of an acre, five tuns were raised; equal to one hundred tuns per acre. Can any crop excel this?

Will not our Legislators look to this fact? Ought there not to be a generous State bounty awarded to the man who should manufacture the first five barrels of Beet sugar. Let the State give a bounty of $5000 to such an enterprise, and the increased value of taxable property brought into acquisition by such competition for the prize, would ten times pay the bounty.

SUGAR IMPORTED BY MANUFACTURERS. The House of Turner Brothers, now one of the largest and most influential of our State, import about 200,000 pounds of Beet Sugar annually, from France and Germany, and at a cost double what it could be made here for. Messrs. Turner Brothers employ large numbers of workmen in their extensive manufactures, and they would be very glad to purchase *California-made sugar* in preference. We wish our citizens would visit their manufactory, on Market street. Their sirup and wine factory is one of the most important in our State, giving employment to numerous workmen, thus scattering widely among the industrials hundreds of thousands of dollars. Turner Brothers have a large house in New York city, one in Rochester, N. Y., and in this business are the largest dealers in the United States.

THE NEXT STATE FAIR will be held at Marysville. An efficient Board of Managers, with J. C. Fall, Esq., as President, is a guarantee that all that can be done will be done to insure success to the enterprise.

NEW FOOD FOR BEES.—By the *Galignani Messenger*, we learn that two agriculturists recently found their Bees would eat the linseed, which has passed the press. By reason of this discovery experiments were made, and the result was a large increase of honey, by some ten times as great. These facts should be widely known.

ABOUT GRASSHOPPERS AND LOCUSTS
In California and the World.

BY ALEXR. S. TAYLOR, OF MONTEREY.

[CONTINUED.]

The following passages from the ancient annalists of the countries of the Bible, will show more graphically than anything else, the history, habits, and visitations of this consuming and devouring pestilence. The sacred writers, in the most lively and poetical colors, depict the ravages of Locusts and Grasshoppers, in Egypt, Arabia, and Asia Minor; and such as no modern author can begin to equal. And the visits of these animals are not by any means slackened in those very countries, even at the present day. Indeed they visit some part or other of the East, every year.

The complete history of the family of the *Locusta*, from the dawn of the annals of our race to the present time, with the scientific description of the different species, by the Savans of our day, would make one of the most useful and valuable works to which a man of learning and study could devote his time and attention. But it would be a most laborious task; we doubt much if it could be done by any other than a person of fortune, or an officer employed by Government. Probably no one out of the range of the philosophers of France, and Germany, would be able to undertake so immensely arduous a task. For every author of every country and time would have to be diligently searched and consulted. If the assistance of commercial consuls and government officers were added, it would be invaluable. If exact figures of the different species of the insect, of each country could be made, and *colored in wax or glass*, from the egg to the completion and end of its destructive life, and engravings made of these for distribution, what immense benefit would accrue to the cause of exact science, and of a cosmopolitan humanity.

Well, here is what the Bible says about these plagues of Apollyon:

"And the Lord said unto Pharaoh, else if thou refuse to let my people go, behold to-morrow will I bring the *Locusts* into thy coast. And they shall cover the face of the earth, that one cannot be able to see the earth: and they shall eat the residue of that which is escaped, which remaineth unto you from the hail, and shall eat every tree which groweth for you out of the field. And they shall fill thy house, and the houses of all thy servants, and the houses of all the Egyptians." And so Pharoah, being frightened, and consenting with fear and anger, Moses and Aaron were driven from his presence. "Then the Lord said unto Moses, stretch out thy hand over the land of Egypt for the *Locusts*, that they may come up upon the land of Egypt, and eat every herb of the land, even all that the hail hath left. And the Lord brought *an East wind upon the land* all that day and all that night; and when it was morning, the *East wind brought* the *Locusts*. And they went up over all the land of Egypt, and rested in all the coasts of Egypt: very grievous were they; before them there were no such Locusts as they, neither after them shall be such: for they covered the face of the whole earth, so that *the land was darkened*; and they did eat every herb of the land, and all the fruit of the trees which the hail had left; and there remained not any green thing in the trees, or in the herbs of the field, through all the land of Egypt. And the Lord turned *a mighty strong West wind*, which took away the Locusts, and cast *them into the Red Sea*; there remained not one Locust in all the coasts of Egypt."—Exodus, chapter 10, verses 5, 6, 13 and 14.

"Even those of them ye *may eat*: the *Locust* after his kind, and the *Bald Locust* after his kind, and the Beetle after his kind, and the *Grasshopper* after his kind."—Leviticus, chap. 11, v. 22.

And of the people who went up unto the land of Canaan, by order of Moses, and brought back a bad report of the country, which made the people murmur at the news.

"And there we saw the giants, the Sons of Anak, which come of the giants, and we were in our own sight as *Grasshoppers; and so we were in their sight*" [added the scared Hebrews].—Numbers, chap. 13, verses 32–33.

And in Moses' code of laws, blessings and curses, he says: "Thou shalt carry much seed out into the fields, and shalt gather but little in; for the *Locust* shall consume it."—Deuteronomy, chap. 28, v. 38.

Again, when the Midianites came up to conquer and enslave the land of Israel, it is said: "For they came up with their cattle and their tents, and they came as *Grasshoppers* for multitude, for they and their camels were without number, and they entered into the land to destroy it."—Judges, chap. 6, verse 5.

And then Israel was greatly impoverished, and Gideon, the Judge, was raised up by God to fight against "the Midianites, and Amalekites, and all the children of the East, whose hosts lay along in the valley like *Grasshoppers* for multitude; and their camels were without number, as the sand by the seaside for multitude."—Judges, chap. 7, v. 12.

But Gideon, with three hundred warriors, by an artful stratagem, at night, with trumpets, and pitchers, and flaming lights, put the Heathen hosts to flight. And then, after delivering the land of this curse of conquerors, *the people* forgot all his services, and would have a king Abimilech; for, after the death of Gideon, it is stated that "the children of Israel went a whoring after Baalim."

And at the dedication of Solomon's temple, the wise king says in his invocation: "If there be in the land famine; if there be pestilence, blasting, mildew, *Locust*, or if there be caterpillar; then hear Thou in Heaven, O, Lord, and forgive."—1st Kings, chap. 8, v. 37. And the same sentiment is repeated in another version of the history of the Temple, in 2d Chronicles, chap. 6 and 7, v. 28, 13: And at the conclusion of the wise king's prayer, the Lord appeared to him in a dream, and said, "If I shut up Heaven that there be no rain, or if I command the *Locusts to devour the land*."

And Job, the Ranchero Patriarch of the land of Uz, in the natural history description of those countries, comparing the powers of the horse: "Canst thou make him afraid as a *Grasshopper*."—Job, chap. 39, v. 20. And David says: "He gave also their increase unto the caterpillar, and their labor unto the *Locust*."—Psalm 78, v. 46. "I am gone like the shadow when it declineth: I am tossed up and down as the Locust."—Psalm 109, v. 23. And King Solomon, in the 30th chap. Proverbs, 27 v., says, "the *Locusts* have no king, yet go they forth all of them by bands." And in the splendid, solemn exhortation of Ecclesiastes, chap. 12, commencing with, "Remember thy Creator in the days of thy youth, for the time of old age will come 'when the *Grasshopper* shall be a burden, and desire shall fail.'"—Verse 5.

And the inspired prophet Isaiah, in his magnificent apostrophe on the attributes of the Universal Father, says: "To whom will ye liken God? It is He that sitteth upon the circle of the Earth, and the inhabitants thereof are as *Grasshoppers*; that stretcheth out the Heavens as a curtain, and spreadeth them out as a tent to dwell in."—Isaiah, chap. 40, verse 22. And Jeremiah the Lamentator, says of Egypt, 607 years before Christ: "They shall cut down her forest, saith the Lord, though it cannot be searched, because they are more than the *Grasshoppers*, and are innumerable."—Chapter 46, verse 23. And Joel, the son of Pethuel, a prophet also saith, "That which the palmer worm hath left, hath the *Locust* eaten: and that which the *Locust* hath left, hath the canker-worm eaten; and that which the canker-worm hath left, hath the caterpillar eaten."

"A fire devoureth before them, and behind them a flame burneth; the land is as the Garden of Eden before them, and behind them a desolate wilderness; yea, and nothing shall escape them. The appearance of them is as the appearance of horses; and as horsemen so shall they run. Like the noise of trumpets on the tops of mountains shall they leap, *like the noise of a flame of fire that devoureth the stubble*, and as a strong people set in battle array. Before their face, the people shall be much pained: all faces shall gather blackness. They shall run like mighty men: they shall climb the wall like men of war; and they shall march every one on his ways, and they shall not break their ranks. Neither shall one thrust another; they shall walk every one in his path, and when they fall upon the sword they shall not be wounded. They shall run to and fro in the city; they shall climb up upon the wall; they shall climb up upon the houses; they shall enter in at the windows like a thief. The earth shall quake before them; the heavens shall tremble; the sun and the moon shall be dark; and the stars shall withdraw their shining."

"Awake ye drunkards, and weep; and howl, all ye drinkers of wine, because of the new wine; for it is cut off from your mouth. For a nation is come up upon my land, strong and without number, whose teeth are as the teeth of a lion, and he hath the cheek teeth of a great lion. He laid my vine waste, and barked my fig-tree; he hath made it clean bare, and cast it away; the branches thereof are made white. Lament, like a virgin girded with sackcloth for the husband of her youth. The meat offering and the drink offering is cut off from the house of the Lord: the priests, the Lord's ministers mourn. The field is wasted, the land mourneth; for the corn is wasted; the new wine is dried up, the oil languisheth. Be ashamed, O ye husbandmen; howl, O ye wine dressers, for the wheat and for the barley, because the harvest of the field is perished. The vine is dried up, and the fig tree languisheth; the pomegranate tree, the palm tree also, and the apple tree, even all the trees of the field are withered. The seed is rotten under their clods, the garners are laid desolate, the barns are broken down; for the corn is withered. How do the beasts groan! the herds of cattle are perplexed, because they have no pasture; yea, the flocks of sheep are made desolate. For the fire hath devoured the pastures of the wilderness, and the flame hath burnt all the trees of the field. The beasts of the field cry also unto thee: for the rivers of waters are dried up, and the fire hath devoured the pastures of the wilderness." But, the prophet adds, if the people repent, "The Lord will restore to you the years that the *Locust* hath eaten, the canker-worm, the caterpillar, and the palmer-worm, which I sent among you."—Joel, chapters 1 and 2.

And by Amos, the prophet which "he saw among the herdsmen of Uzziah, king of Judah, *two years before the earthquake*," 787 years before Christ; to be found in the first verses of the 7th chapter of his prophesyings. "And behold the Lord formed *Grasshoppers* in the beginning of the shooting up of the *latter growth*; and lo, it was the latter growth after the king's mowings. And it came to pass, that when they had made an end of *eating the grass of the land*, then I said, O Lord, I beseech thee; by whom shall Jacob arise? for he is small."

And the fiery prophesyings of the burden of Nineveh, by Nahum, the Elkoshite. "There shall the fire devour thee; the sword shall cut thee off; it shall eat thee up like the canker-worm: make thyself many as the canker-worm, make thyself many as the *Locusts*. Thy crowned are as the *Locusts*, and thy captains as the great *Grasshoppers* which *camp in the hedges in the cold day; but when the sun ariseth they flee away*, and their place is not known where they are."—Chapter 3, verses 15–17.

And when the dispensation of the Gospel of Christ was preached, the Apostles Matthew and Mark tell us that the food of John the Baptist, forerunner of the Mediator between God and man, "was *Locusts* and wild honey, while preaching in the wilderness of Judea."

And, finally, to complete the Scriptural figurative description of this terrible scourge to humanity, the Divine, St. John, 96 years after Christ, in the inspired Revelations, when he was in the Isle of Patmos (overlooking the Syrian coasts), for the word of God, and for the testimony of Jesus Christ—where, in visions of the night, when deep sleep falleth on men, he saw what mortal eye hath not seen, nor even hath it ever entered into the mind of man to conceive, he says: "I saw a star fall from Heaven unto the earth. And the bottomless pit was opened, and there arose a smoke out of the pit, as the smoke of a great furnace: And there came out of the smoke *Locusts* upon the earth, and unto them was given power as the scorpions of the earth have power. And it was commanded them that they should not hurt the grass of the earth, neither any green thing, neither any tree: but only those men which have not the seal of God in their foreheads. And to them it was given that they should be tormented five months: and their torment was as the torment of a scorpion when he striketh a man. And in those days shall men seek death, and shall not find it; and shall desire to die, and death shall flee from them. And the shapes of the *Locusts* were like unto horses prepared unto battle; and on their heads were, as it were, crowns like gold, and their faces were as the faces of men. And they had hair, as the hair of women, and their teeth were as the teeth of lions. And they had breastplates, as it were breastplates of iron; and the sound of their wings *was as the sound of chariots of many horses running to battle*. And they had tails like unto scorpions, and there were strings in their tails: and their power was to hurt men five months. *And they had a king over them*, which is the angel of the bottomless pit, who hath his name in the Greek tongue, Apollyon."—Chapter 9, verses 1 to 12.

This concludes the biblical account of the appearance of the *Locusta*, which have scourged the old populations of the Californias, Palestine and Egypt, from the year 1571 before Christ to the year 96 after his birth, as narrated by twenty-two of the inspired men who indited the earliest chronicles of the human race. And be it remembered, that as was and is now the physical features, animated life and productions of the Holy Land of the Bible, so precisely is it but as the Pacific California of our days. It is in all leading things of nature, but an Asiatic California; the which the more we study, the more we wonder and admire; for the world, like its men and women, goes by duplicates and multiplications upon multiplications, from the times of the holy ancients to the speculative moderns. There be nothing new under the sun; they are all, but old things in a new dress. Let this teach the ignorance of presumptuous man, when he feels puffed up with the vanities of a little learning. For "all knowledge," as Alexander Humboldt, the man of wisdom and rare research, says, in 1844, "is but approximative." Hear that, ye little ones; moreover, there are very systems of universes not seen by eyes many thousands magnified, which are beyond the system of our own sphere, the last even but imperfectly known as yet, even among the diligently learned and studiously observing. The facts and observations they have conserved for six thousand years, are mere stepping stones to the fuller knowledge of their use and application to the various beings who animate with their life this infinitesimal speck in the system of our universe of stars and planets.

The following interesting account of the Pacific Grasshopper is from Clavijero's California:

"The insects of California most notable and extraordinary, are the *langostas* (Grasshoppers), which, from their immense multitudes, are a scourge and curse to the country. For the reason that this plague does not affect the countries where naturalists may carefully observe them with minuteness and exactness, we herein relate the account of one of our Missionaries, kept for thirty years, during his residence in the Missions of Old California. The internal and external delineations are omitted by us, as they may be found in the account of that diligent and curious observer M. Bomare, in the Dictionary of Natural History of V. Sauteulle.

"There are three species of California Grasshoppers, which are similar in form, but distinct in size, color and mode of living. The first species, which is well known and the best observed, is small; it flies short, but is constantly jumping. The second species is larger, and of a grey color. These two kinds are not found in such numbers as to make them of such note or anxiety as the third, which is the largest, and causes the most destruction in its flights over the lands of this peninsula.

"The Grasshoppers of this third species, famous for their ravages among the lands of the Missions, is of the size of a little finger; the wings double like the others, but larger and colored variably, according to their age and sex, which we shall hereafter note.

"These largest Grasshoppers are those we shall particularly account for in what we relate. They assimilate in their habits and modes of generation to those of the silk-worm. The two sexes come together in the hottest days of the summer season; the female, at the latter part of July or early in August, lays a number of fine small eggs, of a yellowish color, in a string, united with a glutinous matter, which, on being perceived, appears like a cord of fine silk. These are deposited together, and dropped into a small hole which they make in the ground with a small apparatus attached to their tails. Each female lays from seventy to eighty eggs, and sometimes more. Shortly after fulfilling the great law of nature, the Grasshoppers quickly degenerate and die, without taking care of their lives or of each other, but leaving in their eggs the seeds of a numerous posterity.

"The birth of these new Grasshoppers has no particular time, but is dependent on the early or late appearance of the rains; but they generally hatch during the latter part of September or early in October, when, from the scarce rains of California, the germs and buds of plants are left in the fields. Shortly after birth, while they are without wings, their lower legs are very large, but shaped like those of a musketo; the color of the insect is then a dark grey. Their first exercise is to jump on to the nearest green thing. If there is none near by, they keep jumping and moving to the nearest green plant, and generally in company with those of the same nest and mother. As soon as they have consumed the leaves of one plant, they pass to another, by little families begin to unite. When they arrive at half size, their color is a perfect green. At this time their legs have become strong, and they jump higher and quicker, and exercise and contrive the best fashion for seeking their food, while passing along the fields. A few days after assuming their green coat, they cast their skin or outer covering, and then display their four wings which are close shut to their bodies. The color then becomes green, mixed with dark grey. When they are three months old they are complete in size, form and features, and become of a reddish grey with blackish spots. Its appearance as thus seen is the only beauty of this pestilent plague of California. They maintain these features until the hot, dry weather, when they become yellowish until their death. Their life, from birth to death, lasts ten months, during which they cast their coats twice, and change their colors five times.

"When their wings have become of sufficient strength, and the body at its maturity, they then begin to ascend into the air and fly like birds, and commence their ravages in every direction, desolating the fields of every green thing. Their numbers become so extraordinary, that they soon form clouds in the atmosphere which impede the rays of the sun and cast a shadow as they fly. They unite in masses of ten and twelve thousand, always following their conductors and flying in a direct line, without falling behind, for they consume every growing thing before them. To whatever hight their guides conduct them to obtain a sight of their food, they follow; and as soon as growing crops or any verdure is sighted, instantly the swarm will alight, and speedily devour and devastate the fields around, to that extent, and with such promptitude, that when they are seen by a new swarm of their fellows, there is not anything more left to injure or consume. In the night they neither eat nor sleep, but are all the time mounting and jumping on each other in thick masses, and bending and cracking with their weight the branches of the shrubs and trees they may cover or rest on. [This last fact was noted by the Nurserymen of Sacramento, in 1855.—A. S. T.]

"This lamentable insect plague is bad enough in old and cultivated countries; but in the miserable peninsula of California, where they eat up the crops, green trees, fruits and pastures, they cause great mortality in the domestic animals of the Missions; and with the effects of their ravages on the cereal and other garden productions, causes great famines and sickness among the inhabitants and neophytes of the establishments. At one time immense multitudes of these voracious insects died, infecting the air dreadfully with the stench of their corruption and decay.

"The Grasshoppers do not generally attack such plants as watermelons and melons, for the reason that such plants have leaves covered with fine pricking hairs. The *pitahayos* are naturally defended with their spires and prickles, and with the other cactus family are not disturbed, except in their flowers and ripe fruit. In the mescal plant they only attack the extremities of the *pencas*, without touching the shoot or sprout which is a species of aliment used by the Indians.

"If California was a thickly settled country, the inhabitants would have to exterminate these insects either by destroying their eggs, or killing them before their wings permit them to fly; for which purpose, every year, hundreds of men might be employed in certain stations of the southern mountains, which is undoubtedly the native country of these terrible insect enemies. No noise, never mind how terrible or loud, impedes the march of these pestilent plagues. In the winter the cold torpifies the Grasshoppers, and they cannot fly in the morning until the sun is high; which state the Indians take advantage of, by sweeping them together in heaps on the ground with brooms or wisps made of branches, and kill immense numbers of them by trampling them down with their feet. A Missionary having offered a premium for a quantity of the *langostas*, some of his neophytes brought him, in a very short time, from seventy to eighty sacks of the creatures. But nothing serves to arrest the devastations caused by their infinite multitudes. Without doubt many could be destroyed by making trenches and sweeping them into them, but where there are such immense swarms, it would take an army of men to arrest or retard the progress of their flights or numbers.

"From the year 1697, when the Jesuits commenced the labor of Christianizing the heathens of California, the Grasshoppers had not made their appearance in the lands formed by the Missions, until the year 1722, when they made their appearance, and then ceased until 1746, and for three years immediately following, without intervention. After this they did not return until 1753 and 1754, and finally, again, before the expulsion of the Fathers, in 1765, 1766 and 1767. For many reasons has this unhappy peninsula, for several consecutive years, escaped the affliction of the plague of Locusts. Probably, in certain seasons, their eggs could not be hatched for the exceptions of the fall of ordinary rains, as sometimes here occurs, and also for the abundance of their eggs consumed by the birds. Also, it is stated, that in the spring of the year, incredible numbers of the Grasshoppers are *killed by a certain worm which is engendered in the stomach of the Locusts*, and which commits great havoc amongst them; for this reason, probably, and others mentioned, and some as yet unknown causes, they have not made their appearance in large numbers in the seasons elapsed between the years mentioned.

"Anciently, the Indians of the California Missions used the Grasshoppers as food, by first toasting them, and after extracting the entrails, pulverizing them before eating. But the good counsels of the Missionaries, after their appearance in 1722, when this species of food occasioned among them a great sickness, caused them to leave off using them, though some of the neophytes still would eat them in the years when food became scarce from their ravages in the sowings. To form an idea of the prodigious multiplication of the *langostas*, Bomare, the writer before referred to, says that in 1613, in the territories of Arles, Bocaria and Tarascon [countries of France, at the mouth of the river Rhone, near the Mediterranean coasts.—A. S. T.] when they made their appearance and committed immense destruction to all kinds of crops, the authorities, by the offering of rewards and premiums, caused the peasants to gather no less than three thousand quintals of the eggs of the Locust, and which were destroyed. And it was calculated that if these eggs had have hatched in the following year, the enormous number of five hundred and fifty thousand millions of Locusts would have been let loose, to commit their devastating ravages on the surrounding countries."—From the history of old California (in Italian), by the Abbe Francisco Javier Clavijero, published about 1790. Clavijero was a Mexican Jesuit, who retired to Italy, after the expulsion of his order from the Spanish colonies. He is considered a writer of good authority, and published a celebrated work on Mexican history, which is quoted largely by Prescott in his Conquest of Mexico.

ACHROMATIC MICROSCOPES.

J. & W. GRUNOW & CO., New Haven, Connecticut, invite attention to their superior

Achromatic Simple and Compound Microscopes.

These Instruments have obtained the commendation of the most eminent scientific men of America, and have received the premiums of the New-York World's Fair of 1853, and of the Connecticut State Agricultural Society of 1856.

These Microscopes vary from forms of the greatest possible simplicity to those combining the most elaborate of modern improvements.

They call the particular attention of STUDENTS and TEACHERS to their EDUCATIONAL and STUDENTS' Microscopes; which are provided with object-glasses sufficient for all ordinary investigations, and of a quality never before sold by any American or foreign maker at prices so low.

PRICED CATALOGUES will be sent GRATIS upon application. J. & W. GRUNOW & CO. have also now ready for distribution, an elaborate DESCRIPTIVE AND ILLUSTRATED CATALOGUE which will be sent post-free upon receipt of of 30c in postage stamps. *eoply

LINDSEY'S
Double Acting Rotary Force Pump.

THIS is a new Pump, patented in America and England in 1855; and for Cisterns, Wells, Mines, Engines, Railroads, &c., has no rival: in that it works easier at great depths, discharges water at different hights, can be used for a hose, is made entirely of wrought and cast iron, without suction or packing, simple in construction, easily put in, not likely to get out of order, will last for an age, and is cheaper than any other Pump. It has a wrought iron pipe, side gearing and balance wheels, with everything complete to raise water by hand, from one to one hundred feet; and costs, boxed and shipped, from $18 to $60.

It must stand in the water, and will not rust.

Drawings and a full description sent to all parts of the world, free of postage, by addressing the general agent.

JAMES M. EDNEY,
56 John street, New York City.

☞ Circulars to be had, and orders received at the Office of the CALIFORNIA FARMER.

Circulars mailed to any address, by sending to the Edtors of the FARMER v7-23 1y eop

The Collegiate Institute at Benicia, Cal.

THE School Year at this Institution, is divided into two terms of five months each. The Sessions will open on the 4th of January and the 5th of July; closing on the 4th of June and December.

To the Patrons of the Institute we would say, that the facilities for obtaining a good education have been much increased this year. The range of studies will be ample, embracing the Ancient and Modern Languages, and a thorough course in the Physical Sciences. Neither are the accomplishments overlooked: in Piano and Vocal Music, we have the best Teachers in the State Thoroughness in the Elementary Branches, before advancing into the higher studies, will be a primary requirement. We shall continue to follow, in our government, school arrangements and method of instruction, the Normal School or Prussian system, which has been adopted in the Eastern States with so much success.

Pupils will be fitted for the University, or will be trained with a view to the completion of their education in this School, as may be requested by the parents. Where no special directions are given, the course of the Institution will regard the Modern Languages, Natural Sciences and Practical Avocations of life, as the sine qua non of a good education, and the Ancient Languages as accomplishments.

A daily account of recitations and deportment will be kept and sent monthly to parents.

The location of the School is easy of access from all parts of the State; the buildings are excellent; and the quietness and healthfulness of the village are unsurpassed by any place on the Pacific.

TERMS, PAYABLE QUARTERLY IN ADVANCE:

	PER MONTH.
Tuition in the Higher English Studies (including Natural Philosophy, Chemistry, Algebra, Geometry, &c,-	$ 8 00
Theory of Surveying (including Linear and Linear Perspective Draughting)	5 00
Latin and Greek	5 00
French and Spanish	5 00
Music, with use of Piano	10 00
Drawing	2 50
Booking-Keeping	5 00
Common English Studies	6 00
Vocal Music, without charge	
Board (per week)	6 00
Washing (per session)	20 00
Entire expense of Board, Washing and tuition in the Common English Branches, per year	$350 00

No Lights, Bedding or other Furniture required to be furnished by the pupil. No extra charges of any kind are made above those specified.

For further information or references address the Principal

Selection of Breeds.

THE two great purposes for which sheep are reared, are their wool and mutton. Consequently, in the selection of breeds, it becomes necessary, not only to select a breed which is adapted to the soil and climate, but also with reference to the value of its wool and mutton where it is reared. If the locality be far from a market for mutton, the production of very fine wool or a great quantity of long coming wool may be most profitable, and mutton a secondary consideration. Under such circumstances the breed, whether fine or coarse wooled, should be particularly adapted to the soil and food. If the locality is near a good market for mutton, that may be the principal object, and wool the lesser. In such cases, the deficiency of the productions of the farm may be in some measure supplied by purchase, if necessary.

When two breeds of sheep are equally well formed, the expenditure of food will be nearly in exact proportion to their relative size. But as animals which are well formed, consume less in proportion to their size than those which are ill-formed, and are also the hardiest and healthiest, every breeder should carefully select a well-formed breed, whether it be coarse or fine wooled.

As a general rule, animals of moderate size, of any breed, with thriftiness of habit and hardiness of constitution, are best adapted to most parts of the United States, and produce the best wools. Animals of the largest size, of any breed, may be more pleasing to the eye, but, generally speaking, are less hardy, and less capable of enduring a scarcity of food, from drought, or other causes, or hard usage of any kind; and consequently, to most persons, are less profitable than those of medium size.

For the production of mutton, or mutton and long wool, on very rich grass lands, the various improved breeds of English sheep and their crosses with the Merinos, are best adapted; and with reference to these English breeds, the remarks of Mr. Spooner will fully illustrate the subject, as follows:

"The management and selection of any breed of sheep, must, after all, become a matter of pounds, shillings and pence. The question the farmer has to consider is, what sheep will, in the long run, return the most profit; and this question must be viewed in strict relation to the management he will be able to adopt, on the particular farm on which he may be located. It is not, therefore, a simple, but a compound question. It is not, merely, which breed will make most flesh and fat, but which will make it in the shortest time, and on the least food; which can bear the weather, or hard keeping, or traveling, or a particular mode of management, with the greatest impunity. All these considerations, must enter into the farmer's mind, before he can come to a sound conclusion. From the want of making these considerations, many fatal mistakes have been made, and a flock has been selected, altogether unsuitable to the soil, and incapable of bearing the severity of the weather.

"The two breeds which appear as rivals in their claims on public attention, are the New Leicesters and the Southdown. It cannot be doubted, that as far as propensity to fatten and early maturity are considered, the Leicester will not only rival, but eclipse all others; for these qualities the form may be justly considered a model, and all other breeds will possess these qualities in a greater or less degree, in proportion as they possess the similitude of the form and points of the Leicester sheep. The Southdown itself will not be an exception to this rule. For if the improved and neglected specimens be compared together, it will be found that the excellencies of the former, consist in those points which approximate most to the Leicesters. The wool, too, is also a consideration; for its fleece, from its greater length and weight, will bring in nearly double that of the Southdown. When, therefore, the pasture is very fertile, the Leicester may be justly regarded the most profitable of the pure breeds. Its drawbacks are, the incapability of the animal for bearing exposure, or traveling, or living hard; in fact its weaker constitution, and greater liability to inflammatory disorders.

"Then again, the mutton is not so good as the Southdown, which, however, is partly, not wholly owing to the early period (twenty months) at which they are fit for the butcher, and to the large proportion of tallow in proportion to the lean. Thus it is not a favorite in the London markets. Accordingly, of late years, the first cross between the Leicester and the Down has been produced, instead of the Leicester. And it is contended that this first cross is the most profitable sheep that can be fattened, making greater and more rapid progress than the Down, and better meat than the Leicester. But it is better to stop at the first cross, devoting the produce entirely to the butcher, and preserve the stock sheep pure.

"The Southdown, or rather the improved Southdown—for there is a great difference between the two—possesses most valuable qualities; with a propensity to fatten inferior only to the Leicester, but with later maturity (often thirty-two months, though considerably shorter than it once was), this breed are excellent travelers, well adapted for folding, hardy, compared with the Leicester, and capable of living on short pasture, and perhaps the best of all breeds for the Down farms of the South of England. The mutton, too, is more esteemed than any other, with the exception of the small mountain sheep.

"Perhaps there is no ancient pure blood of sheep that has undergone so much improvement as the Southdown; and it affords the owners of other breeds a proper example, showing what can be done by care and attention, and the application of correct principles.

"The Cheviot sheep possess many valuable qualities; decidedly inferior to the Southdowns in their fattening powers and their early maturity, they are superior in these points to all other mountain sheep, and in hardihood, even to the Southdown, and are thus adapted to their native hills, and all other pastures of a similar character.

"These three breeds, the Leicester, the Southdown, and the Cheviot, may be considered as the principal pure breeds which this country (England) possesses; they are essential to the variety of pastures, and without them this country could not be properly stocked. Other breeds, which it may be advantageous to adopt, either possess peculiar qualities, which render them valuable, or have been crossed extensively with more improved breeds.

"The Dorset and the Somerset, for instance, are valuable on account of the ewes taking the ram so much earlier than other breeds, so that the lambs come into the market when scarce, and thus command a higher price. These qualities have caused this breed to be diffused to a great extent within the circuit of a hundred miles of London. The qualities of this breed, in other respects, are inferior to the Down; the mutton is not quite so much esteemed, the sheep are not so hardy, and do not possess equal fattening powers.

"The Southdown and the Cheviot rams have been used extensively for the purpose of improving the mountain breed, both of Wales and Ireland, and when care is taken to retain a preponderance of the indigenous breed, the result has generally been successful.

"The Leicester have been extensively employed in improving the breed of other sheep, and so successful has this practice been in many instances, that the result of the cross has produced a breed more profitable than the Leicester itself—retaining the fattening qualities of the sire, with the greater hardihood of the soil possessed by the native breed. The Lincoln, the Romney Marsh, the Bampton, and the Cotswold sheep have been thus improved; the long frame and length of wool of the Cotswold have been retained, together with much of the fattening qualities of the Leicester sire."

The above is the opinion of Mr. Spooner, as to the cross of the Leicester and the Cotswold breeds. But, "There are many of the Cotswold breeders, who say they have not a drop of the Leicester blood, but have improved their symmetry by a close attention to the smaller male of the original, with a fat back and curly skin in view, still keeping their long faces and ears, rumps, and legs of mutton; thus producing earlier maturity, and a better mixture of the fat and lean, than the Leicester cross."—[Am. Agriculturist.

Instructions for Pre-emptions.

THE following very important letter is issued from the General Land Office at Washington, D. C., by Thos. A. Hendricks, Esq., Commissioner, to the Registry Office at Marysville; as everything relating to the settling of titles tends to the permanency of our State, we shall cheerfully give wings to all such matters readily:

GENERAL LAND OFFICE, Nov. 21, 1856.

Gentlemen: It has been represented to this Office, that a practice has obtained at some of the local land offices of making out, or preparing, pre-emption papers, and charging money for the service, and such charges have been made the subject of complaint.

It is therefore deemed proper to issue the following instructions:

1st. Any such charges are without authority of law, and against the orders of the department. It is proper, however, to add, that the duties of the local land officers which are prescribed by law and instructions do not enjoin upon the Register and Receiver the making out or preparation of papers for claimants, that being a matter to be attended to by the pre-emptors themselves, yet it is the desire of the Department that all reasonable facilities and information shall be given by the Register and Receiver to parties, to enable them properly to prepare and present their claims for your official action thereon. For such official action, however, you have a legal right to a fee in virtue of the 12th section of the pre-emption act of 4th September, 1841, which declares that each officer is entitled to receive fifty cents for his services in acting upon each case of pre-emption; but as, in many instances, the parties do nothing more than file the "notice" required by law, this Office has long since determined that there is no objection to the Register receiving his fee (fifty cents) at the time of filing such notice, making subsequently no further charge; but that, as the Receiver has no labor in the case until the proof is filed and submitted for his action, the latter officer has no right to the fee until he shall be called upon to perform the duty for which payment is provided.

2d. By the 2d section of the act of 22d March, 1852, chap. 19, Registers and Receivers are "authorized to charge and receive the same compensation or per centage for their services in locating all Military Bounty Land Warrants issued since the 11th February, 1847, as they are entitled to, by law, for the sales of the public lands for cash, at the rate of one dollar and twenty-five cents per acre."

General Land Office Bounty Land circular of 3d May, 1855, contains the tariff in each case allowed for locations of such warrants; which, of course, embraces the locations of pre-emptors.

The following fees are chargeable by the land officers, and the several amounts must be paid at the time of location:

40-acre warrant, 50 cents to reg'r and rec'r,		$1 00
60-acre warrant, 75 cents	do	1 50
80-acre warrant, $1	do	2 00
120-acre warrant, $1 50	do	3 00
160-acre warrant, $2	do	4 00

3d. By the act of 12th June, 1840, chap. 35, the district land officers are required to administer any oath, requisite under law, in connection with the entry or purchase of any tract of land; but it is thereby declared that they "shall not, directly or indirectly, charge or receive any compensation for administering such oaths.

You are requested to acknowledge the receipt of this communication, and enjoined strictly to observe its requisements. T. A. HENDRICKS,
To Register and Receiver. Commissioner.

Duty of a Post Master.

The following letter to a house in this city shows the opinion of the Post Master General in regard to an officer's refusing to deliver letters to parties to whose care they are addressed—a practice that has obtained to some extent in this city:

POST OFFICE DEPARTMENT,
Appointment Office, Sept. 30, 1857.

GENTLEMEN: In answer to your letter of the 29th ult., I have to inform you that the general regulations of the Department provides for the delivery of letters to persons "whose names are in the address, or to whose care they may be directed." A departure from this regulation would not be sanctioned, except under extraordinary circumstances.

The attention of the Post Master at San Francisco will be called to the case referred to in your letter, and an explanation requested.

I am, respectfully, your obedient servant,
HORATIO KING,
First Assistant Postmaster General.

PROFITABLE SHEEP.—Mr. Reeves, of Milan, Monroe county, had twenty-nine head of sheep this spring, of which ten were yearlings. From them he sheared two hundred and fifty pounds of wool, which he sold at fifty-two cents per pound at Toledo. These sheep are a cross of French and Spanish Merinos, his buck being one purchased from Mr. John Brewer, of Superior. These sheep have run on the road since shearing time, and are now very fat. Can any of your readers beat this?—[A. R. B. in Vermont Stock Journal.

HORTICULTURAL.

THOMPSON'S
SUSCOL NURSERIES.
Situated on the Napa River, at Suscol Ferry, NAPA COUNTY.

THE undersigned wishes to call the attention of the public and patrons of these well-known Nurseries to the present extensive stock of

FRUIT AND SHADE TREES,
GRAPE-VINES, etc;
Also a choice lot of *GARDEN and GREENHOUSE PLANTS, ROSES, SHRUBS, &c.,*
Comprising all of the Very Best Varieties of Cultivated Fruits, such as
APPLE, PEAR, PEACH, PLUM, NECTARINE, APRICOT, CHERRY, ALMOND, QUINCE, and FIG TREES, GOOSEBERRY, CURRANT, and RASPBERRY BUSHES, &c.,
Together with a large lot of
Nut-Bearing and Shade Trees,
Consisting in part of Black Walnut, English Walnut (or Madeira Nut), Shell-bark Hickory, Elm, Weeping Willow, Locust, Sugar and Silver Maples, &c.

Grape-vines of all the Best Foreign and Native Varieties.

The Fruit Trees offered for sale are all budded and grafted from the best, most approved and popular varieties now cultivated in the United States and Europe: all of which are growing, and a large majority of which have fruited in our own orchards and vineyards, under our own immediate inspection.

Our trees are of one and two year's growth from Bud and Graft, thrifty and of large size; all of which have been grown *without irrigation.*

We would call particular attention to our large stock of Apple Trees, which for vigor of growth and beauty of form, cannot be excelled in the State.

Our stock of Garden and Greenhouse Plants, Roses, Shrubs, &c., comprise all the leading varieties most desirable for beautifying private gardens and residences.

CATALOGUES containing a full list of all the varieties, with a brief description of each, together with their time of ripening *in this State*, will be forwarded either by mail or express, to all who are desirous of purchasing trees.

Orders from a distance will be promptly attended to, and carefully packed for shipment.

Our prices will be as low as *reliable Trees, Vines, &c.*, of like quality, can be bought for in any Nursery in the State.

Our terms are CASH on delivery of the trees at the Nursery or *approved* notes for a short time, bearing interest. Parties desiring to purchase can apply either in person or by mail, or by Wells, Fargo & Co's Express, to
S. THOMPSON, at the Nurseries.
Or to S. PERKINS & Co., corner of Second and M streets, Sacramento; DERBY & BALDWIN, Petaluma; GOODMAN & Co., Napa City,—*Agents who will show samples and receive orders.*

☞ The above-named gentleman are our sole agents, in whom the public can place implicit confidence, and all who may favor them with their patronage can be assured that they are not getting Trees from *Auction Houses* and *Peddler's Wagons.* 21-3m

FRUIT TREES! FRUIT TREES!!
50,000
FRUIT TREES!
—AT THE—
SAN LORENZO NURSERIES,
FOUR MILES FROM SAN LEANDRO,
On the Stage Road leading from Oakland to Mission of San Jose.

THE subscriber would respectfully invite the attention of all those wishing to plant ORCHARDS, the coming Winter and Spring, to his extensive stock of FRUIT TREES, containing all the choicest varieties of Fruits congenial to our climate: comprising
APPLE, PEAR, PEACH, PLUM, CHERRY, APRICOT, NECTARINE, FIG, AND ALMOND TREES.
ALSO,
GRAPE VINES
one and two years old.

Three varieties CURRANTS; GOOSEBERRIES, and RASPBERRIES;

A few varieties of the most choice DAILY and CLIMBING ROSES, strong plants of one year's growth.

His collection embraces over Two Hundred different varieties of Fruits, the most of which have been grafted from bearing trees, and will be warranted true to the label; and all those varieties that have not fruited have been selected with the greatest care.

All orders for Trees must be accompanied with the cash, and directed to J. LEWELLING, San Lorenzo Post Office, Alameda county, or to R. KING, 154 Clay street, San Francisco, and they will be promptly filled, and the Trees packed in good order and forwarded as directed.

All persons ordering Trees must state explicitly by what conveyance they are to be sent, as I will not be responsible for them after they are forwarded.

My Trees are grown entirely without irrigation, consequently will bear transplanting on any variety of soil.

Prices of Trees.

HORTICULTURAL.

COMMERCIAL NURSERY,
SAN JOSE.

THE Proprietors of this old established Nursery are now prepared to furnish to their friends and patrons the

Largest and Most Select Collection of
FRUIT, SHADE, AND ORNAMENTAL TREES, VINES, &c.,
ever offered in this State,
At Reduced Prices!

The FRUIT TREES offered by us are all grown and worked in the Nursery by us, from varieties obtained from the celebrated MOUNT HOPE NURSERIES, of Rochester, most of which we have fruited in our Orchards, and offer for sale only such varieties as we have found to be best adapted to this climate.

We have in Nursery:

25,000 APPLE TREES, of two years' growth, large size, thrifty, fine heads.
10,000 One year from graft.
1,000 Three years' growth, extra large, fine Trees, suitable for planting in yards and gardens, and such as cannot be obtained in any other Nursery in the State.
2,000 PEAR TREES on Pear stocks, one and two years' growth.
2,000 Pear, on Angiers' Quince, one year from bud.
3,000 CHERRY TREES, of twenty-five best varieties.
5,000 PEACH, of twenty varieties, one year from bud.
1,000 PLUM, of twenty best selected varieties.
APRICOTS, six varieties.
NECTARINE, SOFT-SHELLED ALMOND, &c. &c.
10,000 GRAPE VINES, Los Angeles, 1, 2 and 3 years' old.
3,000 Catawba, Isabella, Sweetwater, and foreign varieties.
GOOSEBERRY, STRAWBERRY, RASPBERRY, CURRANTS, &c., &c.

Catalogues can be obtained on application at the Nursery, by mail or otherwise.

All orders from a distance carefully attended to, securely packed and shipped to any part of the State, at the risk of the purchaser.

Our terms are cash, or short credit, on approved notes, on delivery of the Trees at the Nursery.

Explicit directions for marking and shipping should accompany each order, and when particular varieties are wanted, state whether and to what extent others may be substituted, in case the varieties cannot be furnished. Persons trusting to us to select varieties may rely upon being furnished with the leading sorts, and proper proportion for each season.

Ravenswood Fruit Garden
PLANTS.
WHOLESALE AND RETAIL.

Brinckle's Orange Raspberry, $70 ₱ thousand, $8 ₱ hundred.
Col. Wilder Raspberry, do do
Cushing Raspberry, do do
Thunderer Raspberry, do do
Linnæus Rhubarb, $50 ₱ thousand, $8 ₱ hundred.
ALSO,
Blackberries: New Rochelle or Lawton, Newman's or Thornless, $15 ₱ hundred.
Strawberries: Hovey's Seedling, Boston Pine, Large Early Scarlet, $6 ₱ thousand, $1 ₱ hundred.
Currants: Black Naples and Cherry, $10 and $12 ₱ hundred.

ALL the above plants of best quality; we cultivate most of them for market fruits.

THE BRINCKLE'S ORANGE RASPBERRY, for market or garden, is considered the best of all Raspberries; is unequaled in flavor and beauty; flavor is rich and vinous; and color beautiful bright orange: a very vigorous grower; hardy and exceedingly prolific.

The Cushing and Col Wilder are the best for making jams, preserves, syrups, &c.

THE LINNÆUS RHUBARB is a new variety originated by Myatt of England, who also originated the Victoria, on which this is a great improvement in both *flavor* and *productiveness.*

Its flavor is deliciously aromatic and spirited, and it is entirely free from the toughness and stringiness which characterize the Victoria, but when cooked becomes a fine uniform pulp, like the most tender apple. The plant is a very strong grower, more productive than the Victoria, and very hardy.

We cultivate most of the above Fruits for market, and selected them from our Fruit Gardens, as the choicest varieties known. Brinckle's Orange Raspberry and Linnæus Rhubarb especially are of exceeding excellence.

Orders will be promptly attended to in the order in which they are received, and Plants packed in careful manner.

Terms cash. Bills payable on delivery of Plants to the agents, or order of the purchaser.

Our plants will be ready to ship any time between the first of November and first of April. Circulars with full description of varieties and testimonials, can be had at the office of the California Farmer, San Francisco.

PARSONS & CO.,
FLUSHING, near NEW YORK,

OFFER FOR SALE an assortment of Trees and Plants which they have grown for the use of amateurs, and have prepared, by frequent transplanting and other modes, for success in moving.

They are of fine size and symmetrical form, and among them will be found
Standard Apples of fine quality.
Standard Pears, Plums, and **Cherries.**
Peaches, Apricots, and **Nectarines,** on Plum stocks, and their own roots.
Dwarf Pears, of fine form, and ready for bearing.
Gooseberries and **Currants,** strong plants of the best sorts.
Raspberries, Fastolf, Red Antwerp, Fillbasket, and other known sorts.
Strawberries, of all the best varieties.
Native Grapes—Isabella, Catawba, and other hardy varieties.
Foreign Grapes: all the well-known sorts, with some new varieties of great excellence. These plants are propagated from vines that have borne abundantly for some years, and are known to be correct.

Great care is taken in the cultivation of Fruit Trees, and none but those of the best quality are allowed to be sent out.

The Ornamental Department

Contains trees of all sizes for lawns and streets, including ELM, SILVER, NORWAY, and SYCAMORE MAPLES, CATALPAS, LINDENS, TULIP TREES, CYPRESS, LARCH, WILLOWS, ASH, ABELE, ORIENTAL PLANE, and all the best varieties of deciduous trees.

It also includes EVERGREENS of fine size for single planting, and of small sizes at low prices, from one foot upwards, for massing; among them are NORWAY SPRUCE, BALSAM FIR, AUSTRIAN PINE, HEMLOCK, WHITE PINE, SCOTCH FIR, and other varieties.

The best Shrubs include many fine varieties at low prices, for massing, of which the RHODODENDRON CATAWBIENSE can be particularly recommended for its fine evergreen foliage, showy bloom, and perfect hardiness.

The ROSES are cultivated in very large quantity, on their own roots, of all the most rare varieties, and to those who purchase in quantity, will be sold at greatly reduced rates.

The Exotic Department

Contains a fine assortment of CAMELLIAS, grown as bushy, rather than tall, slender plants; and also contains all the well-known varieties of exotic plants and many rare sorts, introduced from Europe, annually. These are all carefully grown for those who desire plants of symmetry and beauty.

CATALOGUES of all the departments will be furnished on application. Great care will be taken in packing, and trees will be delivered in New York, and thence shipped as directed. v8-16-tf

H. A. DREER,
SEEDSMAN AND FLORIST,

Those journals and periodicals with whom we exchange will much oblige us if they will be particular to note this, that we may be in receipt of their favors at earliest date.

State Agricultural Society.

A MEETING was held by the new Board, at Sacramento, the present week, and measures adopted to ask of the Legislature the usual aid of $5000 per annum, to enable the Society to carry forward the great and good work.

The gentlemen who stand at the head of the Society the present year are a guarantee that its welfare will be well guarded, and we hope the Legislature will promptly grant their request according to the recommendation of both Governors, as recorded below.

Gov. Johnson says:

"The constitution of our State enjoins upon the Legislature the duty of encouraging, by all suitable means, the promotion of Agricultural improvement; and with the object of carrying into effect this wise and beneficial provision, an act was passed in 1854, incorporating a State Agricultural Society, and the sum of five thousand dollars each succeeding year has been appropriated from the public treasury, to be expended in the distribution of premiums at the annual Fairs held by the Society. These appropriations have thus far been judiciously used, in accordance with the objects of the law, and have contributed much to the interest given to this laudable purpose, by inducing competition for the honors awarded at these exhibitions for the productions and skill of our people. I deem the designs of the Association as eminently worthy of the fostering aid of government, and request that the usual sum be appropriated at the present session, to be expended under the auspices of the Agricultural Society, for similar purposes."

Gov. Weller quotes the 9th article of the 2d section of the constitution, which says:

"The Legislature shall encourage by all suitable means the promotion of intellectual, scientific, moral and AGRICULTURAL improvements."

We believe there has never been a greater return for means bestowed by the State than that made by the State Agricultural Society.

Gov. Weller urges this measure as well as all other wise measures with earnestness which we trust will be carried out.

The Rise in Breadstuffs.

WE have refrained from speaking upon the speculative feeling in our market for two weeks, from the fact that we felt confident that the control of the great bulk of wheat yet on hand was in the hands of *producers*, and that all the excitement had by newspaper war and all the management of committees, combinations, Corn Exchanges, or any other circumstance, only tended to the benefit of the producers generally, although it might bear with some degree of hardship in some cases among the poorer classes. Yet here was a fact that we knew would offset this difficulty. If there was a real scarcity, which we do not believe, it would create a demand for or cause a greater number of acres to be planted the present year, and thus give to the laborer more employment, and thus offset the extra trifle in the rise to him of his breadstuffs.

And again, the poor are not *dependent*, as in former years, upon this one staple. We have now Cornmeal, Buckwheat, Rice, Potatoes, and an abundance of vegetables and fruits, and we can defy famine, though Flour should be $25 per barrel. If the poor are wise, they hold a power too over any speculation on the prices of Breadstuffs; they can cease buying Flour, and this will soon test the question whether it is *really scarce*. We have not lost sight of this question, though we have been silent. We can see the wars among the "bulls and bears," and can look on and see the farmers growing prosperous by good prices, and rejoice at their success. We can also see that they are able to employ the mechanic, build good houses and improve their "homesteads," and thus keep the mechanic at work, benefiting him as well as themselves. This is the result of good prices.

Does any one desire to know who receives the benefit? Let him go, as we do, down to the wharves, and see the wheat come in *in small parcels* from the different farmers. "That tells the story." True, there may be speculation, and speculators, but we do not believe the gentlemen of the "Corn Exchange" can or wish to control the market, for this cannot be done. The farmers have a word to say, and we are among those who believe a well organized Corn Exchange, composed of business men like those in Europe, would be beneficial, and we would not be so unjust as to lay at their doors the *blame* of a rise in Flour and Wheat just now. There are other causes for this. Oregon has a stock to aid us, if we are *too short*; the farmers have a "few bags left," and there is no fear of a famine. The arrival of the 2500 barrels of flour from Oregon gave those purchasers a handsome profit. The wheat that came in, over 2000 bags this week, brought 5½ to 5¾c, paying the farmer nobly; and the seed wheat brought 6 and 6¼c. This shows the demand for planting, even late.

We have always objected to the course pursued by some farmers, of becoming *speculators*, or their holding on to their wheat for *too high prices*; this will operate against them at the next harvest, as they will surely see. Their *gain* now, may be a heavier *loss* then, for from all we can gather by our advices abroad and here, some 5000 to 8000 barrels will be shipped from the other side; and had it not have been for the difficulty of negotiation at the time of the crisis, 25,000 barrels would have been shipped here. We hope, however, that no permanent evil will result from the late rise; but lessons of wisdom be learned by all, especially by the producer.

The Agriculture of Kentucky Encouraged by the State.

We have received from the Secretary of the Kentucky State Agricultural Society, a very neat pamphlet containing the awards of the late State Fair, held near Henderson, Ky.

In the same pamphlet we find the very able address of ex-Governor Powell, delivered before the Society. We make some extracts from this address, as it relates to the beneficial results of the aid which the Society has received from the State. It should be remembered that Governor Powell, while acting Governor, recommended the the Legislature to grant aid to the State Society. That measure was carried the following year, and now, at this Fair, the good results are manifest. The Governor, after the usual introduction, thus speaks:

"Every citizen of the Commonwealth, with whom I have conversed, seemed delighted that the State had taken direct interest in this subject; all classes of our people have united in their approval of the encouragement given by the State to this great interest of the people. We owe much to the enlightened gentlemen of the press of the State, who have, without an exception, given us their potent aid and influence. The farmers are by far the most numerous class of our people; they pay into the Treasury about two-thirds of the State revenue; and I have been amazed that something had not been before done to aid, encourage, and elevate mechanical and agricultural labor. Almost every State in the Union has, by direct Legislation, stimulated and fostered agricultural and mechanical industry, and thus increased the mechanical and agricultural wealth of the country, and added to the general prosperity. The labors of this Society, so far, have been crowned with eminent success. The most practical, eminent, and scientific farmers of Kentucky are engaged in its management; and our citizens, of every class and vocation, have exhibited their deep interest in the enterprise, by the liberality and zeal with which they have sustained it. We are encouraged and cheered by the presence of the ladies; who have witnessed, with unmixed pleasure, the beautiful creations of their handiwork, and their skill in the dairy and household arts; we cannot succeed without the influence of woman. The wise man says: "Lord help, for the godly man ceaseth;" but there is not a passage in the Bible which says the godly woman ever ceaseth or faileth!

The object of this society is to "promote, encourage, and stimulate the Agricultural and Mechanical interests of the Commonwealth." The subject is one vast in extent, embracing the most scientific application of labor to the many and varied Agricultural and Mechanical pursuits. The object of every well regulated government should be, to shape its policy so as to educate and encourage the people in the application of their labor, in such manner as to produce the greatest amount of products necessary for the subsistence and comfort of man, with the smallest amount of labor, and the least deterioration of the soil.

The agriculture of the world is by far its greatest and most important interest; all are dependent upon it for food and clothing—the necessaries, comforts, and luxuries of life. If the fields, for a single season, were to fail to give their fruits to the husbandman, all the industrial pursuits would languish and perish. The strong arm of the mechanic would be powerless; the soldier would be unable to wield his sword; ships would lie idle at their moorings; commerce would cease; the looms of the factories would be idle for want of material; gloom, misery and starvation would rest upon the earth. Let there be but a partial failure of the prominent crop for but a single season, on but a small portion of the earth's surface, and want, suffering and starvation, to a greater or less extent ensues, as was strikingly witnessed upon the failure of the potato crop in Ireland a few years since. Need I suggest another idea to prove, that of all pursuits it should be most fostered and cared for by all wise and patriotic men."

The value of scientific knowledge to the cultivator is thus introduced:

"In order for the agriculturist to apply his labor with scientific skill he must understand the nature and fertilizing qualities of the soil—that agricultural chemistry teaches. In that branch of science, I regret to say, our agriculturists are very defective. The system of education, in our schools and colleges, is greatly defective in not teaching a more practical application of science to labor. In order to attain the greatest degree of prosperity, science must be united with muscular labor. The man of science understands, by the analysis of his laboratory, the nature of the soils, economy of plants, and animal life; yet he may prove a very poor farmer; whilst the practical farmer, who rejects science, will fall far behind his neighbor, who blends practical skill with the discoveries and suggestions of science."

The influence of agriculture, as compared with other interests, is thus vividly introduced:

"Lord Erskine spoke beautifully and truly when he said, 'You might as well hope to see the human body in active motion, when palsy had reached the heart, or a tree flourish after its roots had decayed, as expect to see manufactures, or arts, or industry, of any description, progressive when agriculture has declined. Paralyze it and you weaken the pulse of enterprise, stiffen the fingers of machinery, and clip the wings of commerce; destroy it and you bury in one common grave national power and individual prosperity.' In endeavoring to set before you the importance of the Agricultural and Mechanical interests I by no means intend to depreciate other pursuits. I have told you that every interest was dependent upon Agriculture; other interests are intimately connected and interwoven with it. Without commerce and the mechanic arts, agriculture would languish; agriculture, the mechanic arts, the sciences, and commerce, are so intimately connected and dependent, the one upon the other, that you cannot injure the one without injuring the others; each and all are necessary for the full development of the others."

The following noble and patriotic sentiments are worthy being heralded world wide:

"In time of war the farmer and the mechanic chiefly fill the ranks of our armies, with a brave and hardy soldiery, that have carried our flag victoriously in every contest in which we have been engaged. The virtue and love of country that clusters about the farm-houses of this glorious country, is the strongest shield that can be thrown around the constitution and government of this free people. Whilst we have the rural districts filled with an educated, virtuous population, who love the homes made happy by their labor, the Union is in no danger. Demagogues, alarmists, and traitors, talk of the overthrow of this glorious Union. Whilst your farms are tilled by, and your workshops filled with, educated and virtuous laborers, the Union is in no danger. I verily believe the day never has been when the love the people bore the national constitution and this glorious Union was not strong enough to crush, in an instant, all the factions, were they combined, that harbored a feeling of hate, resistance, or treason to our glorious government.

Our position among the nations of the earth is one truly gratifying to every American. An hundred battle-fields attest the bravery and patriotism of our sons; our admirable constitutions, laws, and government, establish the fact that we are more deeply learned in the great practical principles of civil and religious liberty than any nation or people that has existed on earth. The tables of our industrial pursuits exhibit the most gratifying results—results becoming the dignity of a brave, enlightened, and free people."

The orator closes with a happy allusion to the farmers' *banks*, and to the glorious prospect before the farmer and mechanic, and all the industrial classes:

"In these times of commercial revulsions and bank suspensions you have nothing serious to apprehend. The commercial world is looking anxiously to the productions of your fields for the only means that will reinstate commercial confidence, and give the relief demanded by the exigencies of the times; and they will not be disappointed, for our whole land is blessed with most abundant crops. Your drafts are drawn upon the earth—a bank that never suspends—and the deeper you draw the more richly and abundantly will your drafts be honored.

We have a country and government admirably adapted to the rapid development of the great interests of labor. Our country is unsurpassed in fertility and vast in extent—covering an area of 2,400,000 square miles, extending 2,700 miles from ocean to ocean, and near 2,000 miles from north to south—embracing almost every variety of soil, climate and pursuit. We have a people possessed of boundless energy, industry, and inventive genius. Blessed with a free and enlightened government, that extends its protecting influence to all classes, and which proclaims the equality of the citizens, and guarantees political, civil, and religious liberty, and protects every class in the enjoyment of the fruits of their labor; with a system of universal education that opens the avenues of knowledge and industry to all—we are in a better condition than any people on earth to make rapid advancement in all the arts of peace. The God of the Universe has given us this great heritage, and we owe it to ourselves, and to the age in which we live, to improve it. Our fathers have nobly performed their share in the glorious work; they have conquered the soil from a savage foe, felled the forest, cleared the land, and laid deep, broad, and strong, the foundation of civil and religious liberty, and introduced all the arts of peace."

This most admirable address has been called forth by means of a State Agricultural Institution, risen into strength and beauty by the influence of a wise act of the Legislature of Kentucky. May we have her example nobly imitated in California the coming winter, by a like aid to the State Society. Such facts as we have recorded should have their influence.

Death of Branda.

THERE has been no case more melancholy to review, than the recent suicide; the unfortunate Branda. When we recall the position he occupied—one of honor and trust, possessing the unlimited confidence of his employers, and enjoying the esteem of a large circle of friends, and having as a reward of his position and ability an ample income—when we call these to mind, and then see the hight from whence he has fallen, the very heart weeps for the wreck of all that was once noble, honorable and hopeful. And when we recall to mind where the blow will soon strike with the most fearful power, we tremble; for we can almost hear the despairing shriek of that heart-broken mother, as the news shall reach her, and she reads the last agonized words of her wretched, tortured son.

Oh, if children could but reflect where the severest pangs are felt when they go astray, they could not err; for every erring step of a child stabs the heart of the true parent; and Branda knew, aye felt this, as he uttered the words that will prove prophetic: "I have killed my poor mother."

But the crime has been committed; Branda is no more; the earth has closed over him; the heavens were hung with clouds as he was borne to his grave; he has gone to Him who judgeth all things rightly, and the influence of his fall is yet to be known. God grant that this sad lesson may come up as a dreadful warning to the young men of our city and State, and stand as a "pillar of fire by night," and a "pillar of cloud by day," to warn them from so dreadful an end; for as certain as guilt brings a sure reward, so certain will those who walk in his footsteps perish like him. We would fain be silent upon so sad a theme, but as public journalists we would raise a warning voice, and then join his last prayer: God have mercy on his soul.

The Pacific Oil and Camphene Works.

THE extensive works of Stanford Brothers, known as the Pacific Oil Works, are now the largest, most complete and extensive works of the kind on the Pacific coast. In all the departments of purifying and clarifying oils, and in the manufacture of camphene, so as to be able to offer oil of every kind at wholesale and retail, to the trade, to hotels and to families, as well as the camphene, and to be able to give satisfaction, we believe the Messrs. Stanford Brothers have attained that end.

The Messrs. Stanford are known as old Californians; they are among the long established merchants, and extensively known. We can remember them back to '49, and their house at Sacramento and in this city can number as many patrons in years past, as any other now doing business. The oil and the camphene from these works have a high reputation, and all the recommendations and guarantees of this house have and will be duly appreciated, and we feel that it is a duty we owe the public to call attention to this manufactory as worthy of special notice. Messrs. S. are doing much in this enterprise to promote home industry and the best interest of our State, and are expending their means liberally for this object.

Upon Our Table

WE find the "Giant Judge, or the Story of Samson the Hebrew Hercules," by Rev. W. A. Scott, D. D. We have not yet had time to examine particularly this beautiful book, but any work from the pen of Dr. Scott comes with a recommendation strong enough to insure a large sale.

A file of "The Little Pilgrim," that most acceptable gem of a newspaper for children, came to us by the last steamer, with the new Prospectus of the noble Editress. In our next number we shall publish the Prospectus in full, with the Appeal to Mothers, from this gifted author. For this new volume we volunteer to receive and forward subscriptions to aid so good a work.

From T. C. Thompkins, Esq., of New York, an ear of the famous Wyandot Prolific Corn, said to produce 125 to 150 bushels to the acre. The specimen sent is remarkably beautiful. Also, an ear of the Excelsior Sweet Corn, said to be of rare excellence. Also, a few seed of the new Pumpkin which is said to make as good pies *without* eggs, as any other kind *with* eggs. We have a few circulars relating to this corn, which is said to be the wonder of the age.

We have the able Report on Asiatic Goats, prepared and published by the celebrated Naturalist, Rev. John Bacheman, for the Southern Agricultural Association. This report is one of great importance, as relating to a class of animals of the highest value, and such as can be introduced into California with great success. The wool of these animals is of a silken gloss, long, and very beautiful. Sometime since we published a cut of a group of the Cashmere Goats, from which such wool was taken. The wool can be seen at our office.

We have valuable letters from several Stock Breeders, giving us interesting facts relative to the important matter of bringing Stock here, and authorizing us to arrange for the importation, with all who desire to purchase stock.

We have the Prospectus of the "Vermont Stock Journal," a paper devoted to Stock articles. It is very handsomely got up. We wish it complete success, as it is worthy of it—price, only 50 cents a year.

Samples of splendid Wool taken from the full-blooded Merino Sheep of Messrs. Searle and Wynn have been received by us.

We have received the able and very interesting address of J. F. B. Marshall, Esq., before the Royal Hawaiian Agricultural Society, at Honolulu, from which we shall present extracts hereafter.

Mr. Mulford of San Leandro, presented us with a glass jar, containing a very curious animal of the polypus species, which was taken near the shore at that place. The creature came up through the aperture near the centre-board of a boat, and was taken alive. We have it now *spiritualized*; it is about the size of a monster frog, and with its many strange feelers looks like those seven-headed monsters we read about. It can be seen at our office.

Mr. Mulford has kindly presented us with a parcel of superior Tobacco Seed which he brought from Cuba. We have parcels for distribution to Societies, for experiment.

We have received from E. Hughes, Esq., Agent of the celebrated Phelan's Cushions, a work on "The Game of Billiards," by M. Phelan, Esq. This is a work of much interest, the game being one of great science, when properly understood. The work is a key to a correct understanding of the game. We have a chapter on the subject for the next issue.

A New Product for Starch.

WE see by the French journals, that the Horse Chestnut (*Æsculus*), is used for the manufacture of Starch, and the nuts command a price equal to potatoes. We would call the attention of our starch makers to the fact, and if it should prove of value, the "buckeye" of California is so abundant, we have another product now wasted that can be turned to good account. The Indians use these nuts as food, and we hope the trial will be made of their capability for starch.

THE LATE COLD WEATHER.—Although many complain of the cold, and we notice that severe weather and cold nights have been experienced over our whole State, and in those cities and places not usual, we must look upon it as favorable to vegetation and especially to our fruit trees, as it will have a tendency to retard the too early development of the fruit buds. We wish the fruit growers in the several sections of our State, would keep a weather table. It would be a public benefit.

PRODUCT OF CHINESE SUGAR-CANE—SAMPLE OF PAPER.—Those who wish to see a sample of the *Paper* made from the "waste of the stalk" of the Chinese Sugar-cane from which the juice has been expressed, are invited to call at our Office. Paper-board has also been made from this same substance. This was done at Newton Center, Massachusetts, by Mr. James F. C. Hyde.

We have also at our Office the Sirup of the Sagar-cane, made by Mr. L. E. Gould, of Santa Clara, in our State. Both articles are worthy the examination of all who value the interests of California as progressive.

Choice seed of the Sugar-cane for sale at office.

NEW TOMATOES.—We saw at the stall o Cummings & Swan, No. 1 Washington market, two clusters of very handsome new Tomatoes, being the *first* this season. They will be sold at $2 per pound. They were like ripe cherries, truly "cherry ripe." Messrs. C. & S. have a choice lot of "good things" for the culinary department.

MAKE YOUR PIES.—The big Squash, weighing over two hundred pounds, will be shown at Cumming & Swan's, No. 1 Washington market, on Monday next; and all who love good squash pie can have a chance to buy a few pounds, as it will be cut up and distributed.

Agricultural Warehouses.

THESE are the great sources where the Cultivator of the soil should find the Implements with which he changes the soil into gold, and such places deserve special notice from us.

TREADWELL & CO.—Messrs. Treadwell & Co. have large and well-stocked Warehouses at San Francisco and at Marysville, where can always be found a perfectly complete stock of Implements and seeds at all times. Messrs. T. & Co. are old-established business men, familiar with the wants of the Farmer and Grain-grower; it is unnecessary to speak in praise of this house; it has won a reputation for upright dealing, for reliable and valuable articles, that is world-wide. We know they are prepared the present year to do a large trade in machinery and agricultural implements, having some of the finest that will come to this port. Messrs. T. & Co. have many new goods not found at other places.

MESSRS. SOUTHWORTH & CO.—This house have been the largest Importers of Plows the present year upon the Pacific Coast. The same house have a large and valuable stock of Harvesting Implements, of the very highest character, to which we shall soon call attention, by special announcement. They have also, large stocks of Hardware, &c., worthy special attention.

MESSRS. MCNALLY & CO., IMPORTERS OF AGRICULTURAL TOOLS AND SEEDS.—The "State Agricultural Store."—This firm is ready at all times to furnish our farmers with valuable material in all departments of agriculture.

S. W. KELLOGG & CO.—This house have done a fine business since their new opening. They have imported a new, fresh stock of Seeds, with a fine collection of Bulbous Roots, worthy the special attention of all who love beautiful winter flowering bulbs.

S. W. MOORE.—The Seed Warehouse of the Messrs. Moore is now the largest and best stocked Seed Warehouse in San Francisco, where, at wholesale or retail, almost every article wanted can be found. Messrs. Moore have spared no pains or expense to import the best Seeds from the best houses in the Eastern States, and deserve a liberal patronage from the farmers and gardeners around.

J. R. RAY, SACRAMENTO.—Mr. Ray, Seedsman, of Sacramento, should always be remembered by all who look for Seeds and Trees in Sacramento county. Mr. Ray is long established, and truly deserving the attention of our friends in that city and county.

PULU! PULU! PULU!—No fleas, no bedbugs, nor other insects, say those who sleep on the Pulu mattress. Having heard much of them, we have tried them, and can vouch for a deal of comfort, an easy couch, quiet sleep, and pleasant dreams. It may astonish some to know that the sale of this article has increased of late to about 20,000 pounds per month, or more. Schreiber, of the Rochester Furniture Store, opposite the International Hotel, is the lucky man that has the sale of the article, at wholesale and retail, having the control of all that comes to this market.

THOMAS S. FISKE & CO., BANKERS.—The prompt and decisive action of Mr. Fiske, the resident partner of the house of Fiske, Sather & Church, at Sacramento, at the time of their embarrassment, has enabled the house to recommence business again; or rather enabled Mr. Fiske to commence again; and the energy and activity of that occasion will serve to enable him the better to make a successful banker. We passed the banking house several times the week past, while in Sacramento, and was gratified to notice the evidence of considerable business.

☞ We would call attention to list of Agricultural Books just received, and which we will forward to any part of California free of postage, on receipt of price. To those wishing to make up a private Agricultural Library, we will offer the best inducements. Orders and communications, addressed to our office, will receive attention.

To Our Readers and Correspondents.—We have a large amount of miscellaneous correspondence from the East and Europe, which we shall arrange and present to our readers at an early day....Aunt Bessie's Story, by her Namesake, will appear in our next....Gone Home, by Cornelia, is received and marked to appear....Poetry, by C.W.; accepted....Manuscript copy from H. E. S., very acceptable and appropriate just now; will appear....Letter to Edith Montressor, accepted and will soon be printed....Social Reform, by Edith Montressor, received and marked to appear....Criticisms on the Literature of the day, by C., on file for examination....The History of the Locusts and Grasshoppers, is worthy a careful reading. It will appear in our journal only, as copyright is secured....In our Ladies' Department, will be found some gems....Manuscript received from an "Old Settler," and on file, but we must urge upon all correspondents this important fact, that the *name of the author must come* with every communication. We would also recommend to those that write for a newspaper, that they should only write upon *one side* of the sheet only, if they would secure the favor of the typos.

The very interesting History of the Locusts and Grasshoppers, from the able pen of A. S. Taylor, Esq., we must commend to our readers. This history should be preserved by our subscribers, and is worth twice the cost of the Farmer for a year.

The constant acquisition we are receiving from our corresponding friends, will enable us to present an array of matter, various and interesting, such as cannot be surpassed by any journal in California, and we hope every family will feel a desire to have it.

Superior Peach Trees.—On our visit to Sacramento, we saw several lots of the most splendidly grown Peach trees we have yet seen in California for uniformity of size, for vigor of growth and elegantly formed branches. We knew a truly skillful man had grown them, and we learn that Mr. Bell was the grower. These trees are for sale at the Tree and Seed Store of J. R. Ray, 90 J street, Sacramento; where we can recommend our friends to call. Mr. R. has a large stock of trees, seeds, birds, etc.

"A Plan *to save the State the whole cost of Supporting the State Prisoners, and to Build Public Works.*" We have received a communication from a valuable correspondent and a personal friend, upon this important subject, and we regret that we are obliged to delay it till another week. When presented, we believe it will be much approved.

Apple-Pie Melon.—We have often spoken of this invaluable Melon, by some called "Squash;" this is erroneous, as it truly belongs to the Melon species. We have had experiments made with it and cooked as a sauce. We defy any one person in ten from telling the difference between green apple sauce and that made from this melon.

Extraordinary Fruit.—We have been shown an apple of extraordinary size and fine appearance, grown and sent hither from California. It is a yellow pippin, and weighs 26 ounces. It was grown by a Mr. Swift, of Green Valley, near Vacaville, and is of a variety known as the Gloria Mardee.—National Intelligencer.

Should read Gloria Mundi; but this specimen was small; the "Weston apple" weighed 33¼ ounces.

Corrected.—In an article in a late issue, speaking of the newly invented Windmill of Wm. Lin, it should have read Wm. Sim, Esq. Mr. S. resides *near* Centerville. His invention is a very ingenious one, and deserves attention.

Wild Damsons.—The Placerville Argus says that the wild damson plum, growing in El Dorado county, makes excellent preserves.

Never Too Late.—Many just within the grasp of Consumption are saved every year by the faithful use of Dr. Wistar's Balsam of Wild Cherry. Its success in allaying and curing severe protracted coughs is remarkable. None genuine unless signed I. Butts, on the wrapper.

The Great Bear.—Ben Franklin, his grizzly highness, the famed bear of Father Adams' museum; one that had often been his companion in his mountain excursions, and wars among the kings of the forest, has lately taken his departure from the group of grizzlies and his old companion in arms, and has gone to the great forest where he can roam free.

A very interesting obituary notice of this famous Bear recently appeared in the Bulletin, and we wonder that paper did not display its usual sagacity by announcing the singular fact that the death of the Bear occurred on the Birthday of Franklin, the 17th of January. Father Adams must remember this particular fact, and this Bear, stuffed, will alone be worth the price of admission.

Our Agents in Stockton.—Kierski & Brothers now invite the attention of their patrons and friends to the fact that they, as well as Rosenbaum & Van Allen, are Agents for the Farmer, and will be supplied with copies every week. Kierski & Brothers will receive subscriptions and advertisements for the Farmer, and we hope our friends in Stockton will give them a call, and look at our Volume IX. We believe it will be found, upon examination, worthy a place in every family. Messrs. Kierski & Brothers are well prepared with Books and Stationery to meet the wants of their patrons and friends, and we hope they will be liberally patronized.

Dues to the Farmer.—We send an extra number or two to all subscribers whose time has passed, and we send a bill. We trust they will feel we deserve the amount due the Farmer.

We believe every reader of the Farmer, will see that we are making great additions to the value of the Farmer, and we trust it will tend to keep all our readers for the current year, by a prompt remittance. Our terms are IN ADVANCE ALWAYS: Hereafter, when a subscription expires, notice will be given one number in advance, and as our rule will be strictly enforced, the payment should come to insure a continuance of their paper.

Lawton Blackberry.—A consignment of these valuable Plants were received by us by the last steamer, from Messrs. Seymour & Co. They came through in the most perfect order, and are for sale at our Office.

A SPECIAL GIFT TO SUBSCRIBERS.

Desirous to introduce and to encourage the growth of all new and valuable products we propose to send to each and every new subscriber to the Farmer, or old ones, who express their desire, the following valuable new seeds:

One packet Apple-pie Melon;
One packet Chinese Sugar-cane;
One packet new Corn;
One pure Cuba Tobacco seed;
Or, five packets choice Flower Seeds.

The seeds will be sent by mail, with the Farmer, immediately upon the reception of the name, subscription, and requests.

Hobbs, Gilmore & Co.—Removal.—We desire to call attention to the card of this extensive concern, they having removed from Drumm street to their new warehouses and workshops, on Market street, and are now prepared to receive orders for any kind of boxes wanted. Messrs. H. G. & Co. occupy an entire fifty-vara lot for their buildings; they open on the water where they receive the lumber in the rough, and with their different machinery, their sawing, slitting, tonguing and grooving, they fit and finish any lumber for finishing work for steamers or buildings; and from their lumber they can make boxes at the rate of one thousand per day.

H. G. & Co. made the first boxes for California champagne, the first for the California Sugar Refinery, and they make for and supply all the largest packers in the city. They use Puget Sound white pine, and have the best machinery that can be used. They employ about twenty men in making boxes, ten of which have families; thus this factory gives employment to the industry of our State.

The buildings are three stories, with strong trestle roof. Upon the whole, this concern we look to, as one of the great corner stones of prosperity. Messrs. H. G. & Co. pay out thousands per month for work done, thus giving support to many families. Such enterprise should have the confidence and support of the business men of our city and State, for men that use their capital for the benefit of the working interest of the State deserve the highest support.

San Francisco Machine Shop.—We are keeping gold this side, as can be seen by those who are interested in home manufactures. We examined with much pleasure a fine piece of heavy machinery, made and finished at these works, a "boiler punch," weighing about 2100 pounds, we think the first made in California. A person can imagine how powerful such a machine must be, to punch the holes through heavy plate iron for steamer boilers. This piece of work was made by Devoe & Co., and at less cost than one can be imported for—costing only about $450 to $500.

California Potteries.—California can now boast of as good Potteryware as any in the Union. Flower pots, churns, milk-pans, butter pots, jars, jugs, drain pipes, and all kinds of earthenware or stoneware, is now made at the Pottery at Sacramento, at very resonable rates, and the agency is on Clay street, below Davis. J. B. Galloup is agent for the Company, where fine samples of the ware can be seen.

STOCKTON-RANCH NURSERY.

Almaden Road, between San José and Santa Clara.

50,000 FRUIT TREES.

50,000 NURSERY TREES of the VERY CHOICEST Varieties, of the most important kinds of Fruit, raised under the personal care of the subscribers.

The Varieties consist of Apple, Pear, Plum, Cherry, Peach, Apricot, Nectarine, and all the needed kinds of fruit trees for the Orchard and Private Garden.

The undersigned having had the experience of years in England, and many years in the Nursery of Hovey & Co. of Massachusetts, need only say that they can warrant Trees to be what they are represented, and that they have taken pains to offer as choice a collection as can be be found in the State.

Purchasers are invited so visit the Nursery, as they may rest assured the quality of the Trees and the price will be sure to suit.

☞ C. W. Lecount, of San Francisco, is our only Agent. [23] B. S. FOX & CO.

☞ FOX & CO. have received from Messrs. Hovey, of Boston,

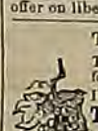
100 Concord Grape-vines,

said to be the finest Grape in growth for making Wine;

Also, the far-famed REBECCA, the finest White Grape ever raised.

300 *PEABODY'S SEEDLING STRAWBERRY*, the greatest Strawberry of the day; all of which we offer on liberal terms. 2

The Concord Grape.



The Originator of this New Grape offers for sale a fine stock, raised from the parent Vine. It has fully sustained its reputation as

The Best Grape for Out-door Culture

having survived the last two severe winters unharmed, where the Isabella, Catawba, and other vines were killed to the ground.

For Size, Beauty, Quality and Bearing,

it is unsurpassed. It is perfectly hardy, and has never been affected by rot or mildew, while it ripens from three to four weeks earlier than the Isabella, and two weeks earlier than the Diana, in the garden of the proprietor.

Fine, strong plants, at $1 50 each; $12 per dozen. Two years old, at $2 each. Three years old, extra, at $3 each. A liberal discount to clubs and the trade. Orders, with cash or good reference, promptly attended to. Address

2 3m E. W. BULL, Concord, Mass.

Fancy Fowls—all the best varieties.

All communications addressed to us will receive immediate attention, and we shall be happy to correspond with any and all upon the subject. Address

2 WARREN & CO., Cal. Farmer Office.

☞ **GOUPIL & CO.**, Publishers and Importers of Engravings, Manufacturers and Dealers in Artists' Materials of every description, 366 Broadway, New York, have constantly on hand a great variety of the above-named articles.

*** Catalogues sent per mail to all parts of the United States. v9-2

TO FARMERS.

☞ 10,000 pounds of ALFALFA or Chile Clover, just received and for sale at 20 cents per pound—by the bag only. This is gathered from the latest crop. Apply to S. BRANNAN,

v9-1 1m Corner Montgomery and California streets.

RARE SEEDS.

☞ We have just received from the East some of the choicest FLOWER and other rare SEEDS, ever received in California; among them a small invoice of Pure LAWTON BLACKBERRY—the only lot in the country, and warranted fresh and pure, crop of 1857.

The collection was made by Mr. J. Q. A. Warren, and brought out by him on last steamer.

Also, opening, a case of FOREST TREE SEEDS—the finest assortment ever imported.

Those desirous of finding choice Seeds will do well to call at once at our office, 130 Washington st (up stairs).

NEW BOOKS,

☞ Just received, from New York, several cases choice works; also, a complete assortment of Agricultural Books, to which we would invite the attention of our customers.

Frank Forester's Horse and Horsemanship of the United States, in two volumes; the finest work of the kind ever published in the country, can now be seen at our office, bound in different styles—Plain, and Turkey Antique. Having the sole agency of this valuable work, in California, we would invite lovers of the beautiful to call and examine the copies. Subscription books are now open, and those entering their names before the 20th inst., will receive this work at the earliest day. v9-1

☞ **Six Reasons why Everybody Uses LYON'S KATHAIRON.**—1st. It is the Cheapest preparation for the hair ever made. 2d. It is pronounced by all to be the Most Beneficial. 3d. It is the most Agreeable to use. 4th. It is the Cleanest and most Carefully Prepared. 5th. It is the most Highly Perfumed. 6th. It is the only article that never fails to give Entire Satisfaction.

The immense sale of the KATHAIRON—nearly 1,000,000 bottles per year—attest its excellence and universal popularity Sold by all dealers, everywhere, for 25 cents per bottle.

HEATH, WYNKOOP & CO., Proprietors and Perfumers, 63 Liberty street, New York.

PARK & WHITE, Wholesale Dealers, 1 1m *San Francisco, California.*

NOTICE TO NURSERYMEN.

☞ Parties who have ordered Nursery Stock from the Eastern States, to be forwarded by Express, should have made arrangements for the receipt of the same, or remitted charges, as all such freight must be prepaid without exception. Hitherto, a satisfactory guarantee from the shipper was considered sufficient—the charge to be paid at destination. Should any disappointment occur to our friends, this will be a sufficient explanation.

23 A. FROST & CO.

☞ **THORBURN'S Preliminary Wholesale** CATALOGUE OF VEGETABLE SEEDS, *of the present year's growth*, will be published on the 20TH JULY, and will be mailed to Dealers and others requiring Seeds in quantities, inclosing stamps for return postage.

J. M. THORBURN & CO., 19-4f 15 John street, New York.

☞ **Wigs! Wigs!! Wigs!!!** — BATCHELOR'S WIGS AND TOUPEES surpass all. They are elegant, light, easy and durable.

Fitting to a charm—No turning up behind—No shrinking off the Head. Indeed this is the only establishment where these articles are properly understood and made.

v8-13 1y 233 Broadway, New York.

☞ **HAIR DYE! HAIR DYE!! HAIR DYE!!!**

Batchelor's Hair Dye is the Best in the World!

GRAY, RED, OR RUSTY HAIR DYED INSTANTLY TO a beautiful Natural Brown or Black, without the least injury to Hair or Skin.

Fifteen Medals and Diplomas have been awarded to Wm. A. Batchelor since 1839, and over 80,000 applications have been made to the Hair of his patrons of his famous Dye. Prejudice against Dying the Hair and Whiskers is unjust, as it would be against covering a bald head with a wig.

WM. A. BATCHELOR'S HAIR DYE produces a color not to be distinguished from nature, and is warranted not to injure in the least, however long it may be continued.

Made, sold or applied (in 12 private rooms) at the Wig Factory, 233 Broadway, N. Y.

Sold in all cities and towns of the United States, by Druggists and Fancy Good Dealers.

☞ The Genuine has the name and address upon a steel plate engraving on four sides of each bottle, of

WILLIAM A. BATCHELOR, v8-13 1y 233 Broadway, New York.

☞ **A. W. FABER'S LEAD PENCILS.**—Lead Points, Propelling Pencils, Colored Pencils, White Crayons, Black Crayons, Slate Pencils, Red Chalk, etc.

These popular Pencils can be had of Stationers, Fancy Goods Dealers, and others in the various cities of California.

Extract of a letter from the eminent artist, Chevalier P. von Cornelius, Director of the Royal Academy in Berlin, 27th Oct., 1842: "It is scarcely necessary to say that I find Faber's Polygrades Lead Pencils in every respect most excellent. They are of all degrees of hardness and shade, and adapted as well for fine and firm outline as for finished drawing. The wood which incloses them has the necessary strength, but yields easily to the knife, and the lead never breaks away."

Extract from the Official Report of the Industrial Exhibition of the German Federal States, 1844, 3d Vol.: "Especially have the Pencils of Mr. A. W. Faber set at defiance all competition, and supplied every desideratum that the Artist can expect or desire in this particular."

Extract from the Report of the Great London Exhibition, 1851: On referring to the Report, page 450, it will be seen that the Jurors have considered A. W. Faber's Pencils deserving of a more extended notice than has been accorded to any other Pencil Manufacturer. The Report further states as follows: "A. W. Faber's Pencils are of the best description, and the prices extremely low. They are exported throughout the whole civilized world, the demand being created by their good quality and cheapness."

Beware of Counterfeits!

The reputation of A. W. Faber's Lead Pencils has not failed to attract the attention of certain individuals, who have either attempted an imitation of the same, or have undertaken the sale of a counterfeit article, which, though of a totally different manufacture and very inferior quality, are marked, some with the name of the genuine, some with the names, *W. A. Faber, A. W. Fabre, A. K. Faber, C. W. Faber*, etc., and are disposed of as genuine Faber's Polygrade Lead Pencils.

Every person will please to examine carefully the stamps on each Pencil—"A. W. FABER"—and observe that each dozen bears on the label a fac-simile of A. W. Faber's signature; and and further, that every genuine Pencil sold in the United States, has impressed in the wood itself, "E. FABER, 133 William street, New York."

E. FABER, Sole Agent, v9-1 6m 133 William street, New York.

WINES AND LIQUORS.

California Production.

THE FARMER'S GUIDE,
To Scientific and Practical Agriculture.

BY HENRY STEPHENS, F. R. S., of Edinburgh, and the late J. P. NORTON, Professor of Scientific Agriculture in Yale College, New Haven. 2 vols. Royal Octavo, 1600 pages and numerous Wood and Steel Engravings.

This is, confessedly,

The Most Complete Work on Agriculture ever published, and in order to give it a wider circulation the publishers have resolved to reduce the price to

Five Dollars for the Two Volumes,

When sent by mail (post-paid) to California and Oregon the price will be $7. To every other part of the Union and to Canada (post-paid) $6. ☞ This work is not the old "Book of the Farm."

"Science is made to go hand in hand with practice, throughout the book."—[New England Farmer.

"It is indeed a many chambered storehouse of Agricultural lore."—[Blackwood's Magazine.

"A more valuable work on Agriculture never was written." [Michigan Farmer.

"We recommend it without hesitation to all American Farmers."—[Albany Cultivator.

☞ Remittances for the above work should be addressed, post-paid, to the publishers,

Attention, Farmers!

Broadcast Grain Sowers.

THE subscribers have on hand a few of "SAGE'S PATENT BROADCAST SEED SOWERS," for sowing Wheat Barley, Oats, and all grain sown broadcast. These machines are unrivaled by any, and received complimentary notice at the Agricultural Exhibitions at San Jose and Stockton. They need no explanation, as their simplicity will enable any one to understand, at a glance, the manner in which they perform their work.

They have been introduced but one season, and *three* are now at work at Tehama, Sonora, and Petaluma, giving complete satisfaction, as per letters testimonial.

The undersigned will take pleasure in exhibiting them to Farmers or others, and no Farmer should be without one; the saving of *help* and *economy* of *seed* effected by their use, will pay for one in a season.

Price, from $100 to $125. T. H. & J. S. BACON, v8-23-2mis 61 California street (up stairs), San Francisco.

New Winged Triangular Harrow.

THE undersigned would invite the Farmers and Grain Growers of California to call and examine his newly invented Winged Triangular Harrow.

By the action of this Implement a space of 12 feet of ground is finely pulverized and harrowed, and the work most satisfactorily done. No farmer can look upon the Implement and not be satisfied of its value.

H. G. PRATT, Manufactory 46 Washington st., 16-1y3m between Davis and Drum streets.

MAGAZINES, ETC.

THE

"HORTICULTURIST"

AND

Journal of Rural Art and Rural Taste.

(Commenced by the late celebrated A. J. DOWNING.)

Conducted by J. JAY SMITH, Editor of the North American Sylva.

THE increasing love of Rural Life has brought this popular publication into extended notice. Its success has been amply proved by a large addition of readers, and it is now offered to public patronage with confidence. It embraces in its scope of subjects everything pertaining to the country and country-pursuits, and aims to instruct while it amuses: it is, in short, as now conducted, a popular RURAL MAGAZINE, designed to interest all lovers of the Garden, the Country-house, the Cottage, no less than the Botanist, the admirer of the Green-house, Conservatory, Grape-house, Fruit Cultivator and Planter. Its correspondents are those who have long devoted their energies to these pursuits, and it is believed the number of these, and the information they impart, is greater than any other periodical can boast of either in Europe or America. Indeed, the work has become indispensable to the well-informed country-dweller, who, by a perusal of its varied pages, may maintain an acquaintance with all that is passing in the fruit-garden and orchard, the nursery, the villa, and with the beautiful in nature, whether it is improved by art or adorned by taste. In its Rural Magazine character it is addressed to all who love information, and it has thus become a welcome guest both in town and country. Its circulation now embraces the entire Union and Canada, and endeavors are constantly used to increase its attractions by a liberal outlay in embellishing it with costly engravings of fruit, dwellings, trees, and those numberless rustic adornments which make the individual home attractive.

A NEW VOLUME (13th year) commences with the January number for 1858: and it will be the constant aim to render it still more worthy, by every practicable improvement, of the liberal patronage it is receiving.

The work is issued on the first of each month, in the best style, each number containg 48 pages, embellished with a frontispiece and several other original and well-executed engravings. The volumes, taken for a number of years, will make a valuable Encyclopedia of Horticultural Literature. As an advertising medium it has few superiors.

TERMS—Two Dollars a year; Four Copies for Six Dollars, payable in advance.

An edition is published with plates colored in the best style of the Art. Price, $5.

☞ All subscriptions must be addressed to the Agents, or to ROBERT PEARSALL SMITH, Nos. 17, 19, and 21 Minor street, Philadelphia.

WARREN & CO., Agents for the above work, for California. Subscriptions received at the office of the Farmer, 130 Washington street (up stairs). 9r2

PHILIPS, SAMPSON AND COMPANY

COMMENCED ON THE FIRST OF NOVEMBER

A NEW MAGAZINE, TO BE CALLED

THE ATLANTIC MONTHLY.

IT will be devoted to LITERATURE, ART, and POLITICS. *THE AIM OF THE PERIODICAL WILL BE,*

First: In Literature, to leave no province unrepresented, so that, while each number will contain articles of an abstract and permanent value, it will also be found that the healthy appetite of the mind for entertainment in its various forms of Narrative, Wit, and Humor, will not go uncared for. They wish to say, also, that while native writers will receive the most solid encouragement, and will be mainly relied on to fill the pages of the Atlantic, the publishers will not hesitate to draw from the foreign sources at their command, as occasion may require, relying rather on the competency of an author to treat a particular subject, than on any other claim whatever. In this way they hope to make their Periodical welcome wherever the English tongue is spoken or read.

Second: In the term Art, they intend to include the whole domain of esthetics, and hope gradually to make this critical department a true and fearless representative of Art, in all its various branches, without any regard to prejudice, whether personal or national, or to private considerations of what kind soever.

Third: In Politics the Atlantic will be the organ of no party or clique, but will honestly endeavor to be the exponent of what its conductors believe to be the American Idea. It will deal frankly with persons and with parties, endeavoring always to keep in view that moral element which transcends all persons and parties, and which alone makes the basis of a true and lasting national prosperity. It will not rank itself with any set of *antics*, but with that body of men which is in favor of Freedom, National Progress and Honor, whether public or private.

As an earnest of the material at their command, they subjoin the following list of literary persons interested in their enterprise; wishing it, however, to be distinctly understood, that they shall hope for support from every kind of ability which desires the avenue of their columns, and in the remuneration of which they shall be guided purely by their sense of intrinsic merit:

William H. Prescott,
Ralph Waldo Emerson,
Henry W. Longfellow,
Rev. F. H. Hedge, D. D.,
Nath'l Hawthorne,
John G. Whittier,
Oliver Wendell Holmes,
James R. Lowell,
J. Lothrop Motley,
Geo. Wm. Curtis,
Herman Melville,
Prof. C. C. Felton,
Prof. F. J. Child,
E. P. Whipple,
Edmund Quincy,
Author of "Wensley,"
J. T. Trowbridge, Author of "Neighbor Jackwood," etc.
C. W. Philleo, Author of "Twice Married."
Mrs. H. Beecher Stowe,
Mrs. Gaskell, Author of "Ruth," "Mary Barton," etc.
Mrs. L. Maria Child,
Mrs. C. M. Kirkland,
Mrs. Pike, Author of "Ida May," "Caste," etc.
Miss Rose Terry,
Wilkie Collins, Author of the "Dead Secret," ect.
G. Ruffini, Author of "Doctor Antonio," etc.
Shirley Brooks, Author of "Aspen Court," etc.
E. M. Whitty, Author of "Political Portraits," etc.
James Hannay, Author of "Singleton Fontenoy,"
Thomas W. Parsons.

[Terms.—Three dollars a year, or Twenty-Five Cents a Number, and may be obtained of Booksellers, Periodical Agents, or of the Publishers. For sale by all Booksellers and Newsmen in California. 19-3mis

Ladies' Department.

[For the California Farmer.]

LINES TO BROTHER ANSON.

[The following affectionate strain comes from one of the far off States, to a relative in our golden land :]

Far, far away, dear Brother, say, does thy heart ne'er sigh,
Once more to meet thy Mother; who watched thy infancy?

And does thy heart ne'er soften, at thoughts of Father's tones,
Who's counseled thee so often, and now is sad and lone?

Oh, heed thy Mother's warning! "all youthful lusts to flee,"
And ever, in "Life's Morning," "shun evil company."

Ah! dost thou still remember, a sis' with eyes of blue,
Who, in this bleak December, sighing, thinks of you?

Then one who's left the homestead, another home to fill,
Oh! does thy heart forget her? She is thy sister still.

And still there is another, who longs thy face to see:
Erastus, tiny Brother, who climbs on Father's knee.

Another, too, is claiming, from thee a wandering thought,
The eldest of the household, shall he e'er be forgot?

And I would be remembered, though not exactly kin,
But am as some would term it, only "a married in."

Then here 's *our* little prattlers, two little black-eyed boys,
Who, for a kiss from "Unca," would throw down all their toys.

Now, Brother, don't forget us, in that land of yellow ore;
But shun all sin's temptations, on California's shore!

Think oft of those who love thee, and *still* do not forget
A Friend who lives above thee, His claims are higher yet.

Woodland Cottage, Dec. 4, 1857. ROSA.

[For the California Farmer.]

LINES TO A FRIEND,

On receiving a Bouquet of Spring Flowers.

I would return you, for the buds of Spring,
A fragrant offering.
Alas! my garden walks do not disclose,
The eglantine and rose.

The bright carnation blooms not in my bower,
To load the sunny hour
With an aroma fitting for the Gods—
Alone the violet nods.

The simplest flowers of Poesy, my friend,
Are all I have to send.
Nor are they wholly worthless, for they bear
The perfume of a prayer.

S. M. CLARKE.

A Voice from the Green Mountains.

Most welcome are the Voices that come to us from every quarter, from the Sunny South, from Down-east, from the Granite State or the Green Mountains, the Empire State and her noble compeers, or any portion of our cherished Confederacy. We love the voices that come to us, all of them, for they are kindly and loving voices, and they strike upon the chords of our own heart most tenderly, as they chime of the beauties and glories of our own adopted California.

The annexed most interesting and gratifying letter comes from one of nature's warmest worshippers; "we ken the hand that maon write so bracly," and would we could place in that fair hand one of Flora's richest and most fragrant groups of gems just now, to show our friend our appreciation of her favor, and the contrast between the "Sunny Side" of our Bay City, and the Mountains of Vermont:

—

Maple Grove, Dec. 10.

Dear Editor: Your semi-monthly visits in the person of the California Farmer, are hailed with pleasure, and the kindly greetings, much like those extended an old familiar friend. We sit us down and converse together, of your homes on the broad Pacific Coast; or peer with you, into the dark mines, where are hid your golden treasures; out from these, we turn quickly away, to your *wealth* of *golden sunshine* and talk of your Agricultural and Horticultural products, while Flora ever crowns the whole with fragrance and beauty. We go with you "over mountain and glen," and there sacrifice to Nature, in her wildest haunts, or stand awe-struck before the world's wonder—your mighty forest-giants! We accompany you, to your Fairs, where we see displayed the genius of your sons, and the grace and taste of your daughters, while combined with these, are the rich and varied products of the farmer, in almost tropical profusion. We view with longing eyes and watery mouths, your luscious fruits, take the measure of your *big apples* and pears, and suddenly stop, in perfect amazement, before your mammoth *pumpkin*, wondering how many *pies* it would make for one of our New-England Thanksgiving dinners! Speaking of Thanksgiving, that crowning festival of autumn; it has with most of our States been duly proclaimed, and no doubt, religiously observed. In your fast, go-ahead State, where the *present* has more power than the *past*, where the *new*, would if possible, efface all recollection of *the old*, some reminder of the "olden time," and the "days long ago," in your far-off Eastern homes, is necessary, and I am glad to see that your Governor has not forgotten the time-honored Thanksgiving of the Pilgrims. I love these home-gatherings, this interchange of friendly greetings, when from places near and remote, children and grandchildren are assembled at the old homestead; perchance vacant seats may be there, and e'en your own golden land, may hold some of the absent ones; or yet, some may have crossed the bourne whence there is no return; and *they* come not to fill their accustomed places; for alas, "the world is wide, and the grave is deep;" but sad memories must be crushed back and all be made happy, while they surround the generous board set out in the good primitive fashion; the aspiring turkey in the center, supported on either hand by the constant but less pretending chicken-pies, the numberless savory dishes, arranged rank and file, along the table, and the rear brought up with cakes, puddings and tarts, and the faithful pumpkin-pies, standing sentinels at the outposts; all these, as a matter of course, and while they are discussed, each brings something from the storehouse of his experience which counts for amusement or profit, or the more serious give an abstract of the Thanksgiving sermon, which is expected to be, like their dinner, the best of the year. Such social intercourse helps to bind more strongly the ties of friendship and consanguinity, and should therefore be encouraged—but I did not intend to give you a homily on Thanksgiving, when I left you viewing the *big pumpkin* at the Fair—and so to return; you see I am not a stranger to yourself or your movements; and indeed, you will perhaps recognize me as an old acquaintance, *nous verrons*. You may chance prefer to hear from your New-England home, in the green spring-time, or in summer's radiant beauty, rather than in "the sear and yellow leaf" of late autumn, when the varied and beautiful tints of our forests have changed to a dead-leaf color, or their foliage disappeared entirely; when our mellow, gorgeous sunsets, have grown gray and dim; and when the harvest-moon looks into fields depleted of their golden grain, and the sun shines but coldly, on the faded, withered flowers; when for soft winds and sunny skies, we have December's fitful gusts and chill dark days:

E'en now the clouds are gath'ring
O'er the sky again,
And misty shades are deep'ning
Over mount and glen.
List, the winds are sighing,
In the distant wood,
And forest-kings are bending
That firm for years have stood.
And now the elect is slashing
Against the window-pane—
With gath'ring strength 'tis rushing
Darkly o'er the Plain.

But brighter blazes the fire on the hearth-stone, and closer are drawn the chairs at the evening family circle; and while wailing winds are chanting the dirge of the dying year, without; within, are whisperings of comfort and peace, and the unmistakeable intimations that Christmas holidays are near at hand; and in consideration of the fact, that ere this reaches you, Christmas will be past, I will wish you, and your numerous readers and correspondents, a merry Christmas.

Adieu. C. W.

Welcome Visitor from the Empire State.

Yes! we can insure a cordial welcome to our happy visitor from the Empire State. "Sallie" has many warm friends in our golden land, who will read her thoughts, as they are stamped upon the pages of the Farmer; and her very happy allusion to the "Time-honored Clock," will be read with much pleasure. For the kind wishes to our readers and for ourselves we are duly grateful. There were so many pleasing ideas, we were sorry to find so quickly a *word* we wished to strike from the letter; it was the word *Adieu:*

—

December 17th, 1857.

Were I possessed of Prince Houssain's wonderful carpet, which, as related in fairy tales, could transport him who sat thereon to any desired haven, I would turn my thoughts westward, and soon alight in some pleasant spot, within sight and sound of the broad Pacific. Or, could I reach the ear of old Boreas, I would mingle soft whisperings amid his rude blasts, and murmur sweet words of reminiscences and sympathy to be borne on the wings of the wind to loved ones far away.

But as my lamp possesses no magic power, and even my pen is not inspired, I must content myself with remaining quietly at this snug fireside, listening to the gentle teaching of a Time-honored Clock:

"And a friendly voice is that same old clock
As it stands in the corner smiling,
And blesses the time, with its merry chime
The wintery hours beguiling. * * * *
* * * * * * *
Still hourly the sound goes round and round,
With a tone that ceases never;
While tears are shed for the bright days fled,
And the old friends lost forever.
Its heart beats on, though hearts are gone
That warmer beat and younger;
Its hands still move, though hands we love
Are clasped on earth no longer."

It tells to-night of the old year passing away, and reminds me of the bright anticipations with which I greeted its advent; of hopes which were born but to perish, of resolutions framed for good; alas! too soon forgotten.

It speaks of bright eyes once lifted to mine, and rosy lips which parted with the New Year's salutation; of gentle hands, and loving hearts, which now lie cold and pulseless beneath the wintery snows. It answers to my blessings, and bids my heart swell with gratitude for the joys it has cast around me. For the ever dear home remaining, and the circle of home unbroken; for the shadow of its roof tree, and the shelter of its love. But the moments glide onward, and the old year must die; yet not until it shall have welcomed the merry Christmas tide, and have borne to the ears of the Great Jehovah loud anthems of praise to the Holy child Jesus. The New Year, too, is dawning, and long ere these lines reach you will have been ushered in with joy and revelry. We may not gaze behind the vail which hides the future from us, and each heart anticipates some sunny reality, some flowery pathway through which to traverse, and scarcely heeds the slight foreboding which will intrude even upon these festive hours. And before the New Year's greeting grows cold upon my lips, I would extend to all readers of the Farmer, and more especially to its editorial head, my heartiest wishes for future prosperity and long continued happiness.

Perhaps you may imagine us at this period, buried amid huge masses of snow, and so in times past we have frequently been; but although the frost king has threatened and stormed, and blowed, sunshine is still predominant, and the atmosphere seems filled with that delightful haze so favorable to day dreams and romance. Indeed so balmy is the air that we seem only to need the perfume of flowers and luxuriance of foliage, to convince us of the presence of the spring time of year.

Were we inclined to moralize, we might consider the quiet and beautiful exit of the dying year as illustrative of the Christian's death, and indeed we are now sitting where twice two twelve months ago we watched the slow withering of one of earth's lovliest blossoms; a being formed of excellence, whose words were ever gentle, whose smile was always sweet. Two little buds of promise were opening on her pathway, and her heart yearned over them with all a mother's tenderness and love, yet always she consigned them to His keeping, who watches over the lambs of His flock; and with a cheerful farewell to each loved one here, she joyously entered the "valley of darkness, the shadow of death." There were tears, anguishing tears, shed over her coffin, for the heart-sob could not be suppressed; yet we could but rejoice that she sunk to rest so gently, and we know that she has entered upon that day around which the shadow of evening shall never gather.

Good night, and Adieu. SALLIE.

WISHES,

Written for a Young Lady's Album,

BY J. B. M.

[The following easy flowing, generous, and truthful wishes from the writer to a Lady friend were most appropriately written in a New Year's Album. Nothing could be better, or more appropriate. The writer has occasionally written for us; we hope we shall hear more from him:]

Bright o'er thy life may Love's light gleam,
No'er may thy heart know sadness,
While Pleasures in continuous stream,
Shall fill thy Home with gladness.

Upon thy path may Friendship smile,
Hope be thine ever present guest,
New joys each fleeting hour beguile,
And Peace find Home within thy breast.

Around thy spirit be'a holier light
Than aught our earth can own,
The Star of Faith to cheer thy night,
And guide thee to that *fairer* Home.

San Francisco, Jan. 1st, 1858.

A. P. SMITH'S

POMOLOGICAL GARDEN AND NURSERY,

On the American River, 2½ miles from the Steamboat Levee,

SACRAMENTO.

The Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of the varieties—embracing as they do

All Kinds FRUIT TREES,
SHADE AND ORNAMENTAL TREES,
GREENHOUSE PLANTS,
SHRUBS, ROSES,

And also an unusually fine crop of

GENUINE GARDEN VEGETABLE SEEDS.

All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,

Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:

From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.

We call particular attention to our splendid stock of

CHERRY TREES,

The Finest and Largest in the State, embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from these. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase theirs, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most reliable sources in the East, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being

CORRECT AS TO NAMES AND VARIETIES,

are as Perfect as is Possible to Make them.

In the department of

Shade and Ornamental Trees,

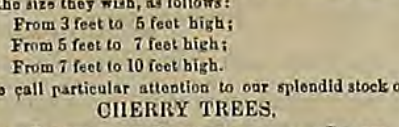
We have a very fine stock of all the leading varieties, some very fine extra large trees of the

ELMS, LABURNUMS AND LOCUST,

particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.

A very extensive collection of all that is rare and desirable.



The Greenhouse Department is quite full, and our really superb stock of

CAMELLIAS

is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,

Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, Warranted Pure and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish gratis to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.

FRUIT TREES.

Garden, Field and Flower Seeds.

J. R. RAY,

Importer and dealer in

Foreign and Domestic Seeds, Trees, &c.,

Has for sale at his Seed and Nursery warehouse,

No. 90 J street .....Sacramento,

THE CHOICEST STOCK IN THE STATE,

Comprising

Garden, Field, Flower and Tree Seeds,
Fruit and Ornamental Trees and Shrubs, &c.

☞ Orders, per Mail or Express, promptly attended to.

v9-2 3m J. R. RAY.

New and Rare Plants, Vines, &c.,

Just received:

New Rochelle, or Lawton Blackberry;
Brinckle's Orange Raspberry; } New.
Col. Wilder Do;
Cushing Do;
Thunderer Do;

Linnæus Rhubarb; a new variety, originated by Myatt of England, who also originated the Victoria, and on which the Linnæus is a great improvement both in flavor and productiveness.

Concord Grape, &c. &c.

Those desiring something new and choice will please forward orders soon, as the supply is limited, owing to advance orders.

The plants can be forwarded by Express to any part of California.

WARREN & CO.,
2 Cal. Farmer office, 130 Washington st (up stairs).

Great Collection of Strawberry Plants.

THE UNDERSIGNED WOULD INform all Cultivators of the Strawberry throughout the State and Oregon, that they are now prepared to offer them a collection of Strong and Healthy Strawberry Vines, that have proved to be well adapted to our climate, and also have been fully tested as to their bearing qualities, by the splendid exhibitions of Fruit which they have exhibited throughout the season, in the markets of San Francisco. They now offer them to the public, with the assurance that they will not only prove equal to any plants offered, but superior, as their constant bearing qualities have so proved them, they having received the first premiums at all the Exhibitions thus far the present year. The subscribers offer the following kinds the present season:

THE BRITISH QUEEN.

This magnificent perpetual bearer has won laurels from all good judges of fruit, both as to its excellence of flavor, its remarkable size—often measuring five to six inches—and the abundant crop it yields, it has been generally adopted as one of the very best marketable fruits grown.

THE HOVEY'S SEEDLING.

Whatever may be said of other varieties, this splendid fruit should be grown in every collection. It is large, beautiful and delicious, and always brings the highest prices in the market. With the Virginia Scarlet as an impregnator a crop can always be secured.

THE LONGWORTH PROLIFIC.

This famous Strawberry is fully up to the great name it bears, and is one of the best varieties known. The Longworth Strawberry often measures five and six inches, and none more beautiful can be found.

THE EARLY OR VIRGINIA SCARLET.

This is the earliest variety, a great bearer, and should be in every collection.

The subscribers, having a very large stock on hand, can furnish plants in large quantities for making plantations, and for market, and persons wishing orders of from 10,000 to 25,000 plants will be dealt with on very liberal terms.

As the undersigned are fully able to supply the market, purchasers will do well to call at the office of one of the partners, on the corner of Sacramento and Drum Streets, where specimens can be seen, and also at the Gardens at Oakland, where terms and prices can be known, which will always be the most liberal.

WOLF, LUSK & CO.,
Strawberry Plantations,
Oakland.

N. B. Samples of the Plants can be seen at the office of the Farmer, where orders can be left. v8-16-3m

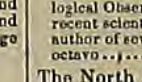
WARREN & CO., *Sole Agents for California.*

Subscription Book now open at the California Farmer Office, where sample copies can be seen. v9-1

New Treatise on Land Surveying.



JUST PUBLISHED BY
E. C. & J. BIDDLE,
PHILADELPHIA,

A Treatise on Surveying, by S. Alsop. In this work, the theory is plainly and comprehensively presented; directions for practice are given definitely and precisely; and everything which an extensive business in Land Surveying would be likely to require is embraced. Price per copy, mailed to California, $2, postage included. Price of the KEY to the work, mailed to California, 75 cents.

E. C. & J. B. also publish the following popular educational works, and many others extensively used in the Schools and Colleges of our country; and they would respectfully invite School Directors and Teachers to send for a copy of the descriptive catalogue of their publications:

Crittenden's Treatise on Book-keeping. The series comprises the four volumes below named, and for each of them a KEY, and a set of miniature BLANK BOOKS for the exercises:
1. Treatise on Single Entry Book-keeping.
2. On Single and Double Entry, for Common Schools.
3. do do do for High Schools.
4. do do do for the Counting House.
The volumes are severally the text-books in Commercial Colleges in Boston, New York, Philadelphia, Cincinnati, Chicago, St. Louis, Louisville, etc.; in most of the Normal Schools, and a great number of the High Schools of our country in the Public Grammar and Evening Schools of Philadelphia, etc.; while as a book of reference for practical accountants the Counting House edition is, undoubtedly, the most popular work on the Science of Accounts, published in the United States.

Cleveland's English Literature. *Twenty-fifth Thousand just published.* 1. CLEVELAND'S COMPENDIUM OF ENGLISH LITERATURE, from the 14th to close of 18th century; chronologically arranged; consisting of Biographical Sketches of the Authors, and selections from their works, together with Notes explanatory, etc. 2. CLEVELAND'S ENGLISH LITERATURE OF THE NINETEENTH CENTURY. A sequel to the "Compendium"; arranged on the same plan as it. The above two volumes are text-books in many of the Colleges, in the principal Normal Schools, and in a large number of other first-class Seminaries of our country; and they may with confidence be recommended as an admirable guide or chart for private students of English literature.

Cleveland's American Literature. *Cleveland's Compendium of American Literature*, on the same plan as the author's "Compendium of English Literature," will be published early next year.

Harrison on the Rise, Progress, and Present Structure of the English Language.

The Works of Thomas Dick, LL. D. 10 vols. 12mo. Few books are better adapted for the School or the Family Library, than the works of Dr. Dick.

8v-24 3m

CHARLES DICKENS' WORKS.

TWENTY-NINE DIFFERENT EDITIONS.

No Library can be Complete without a Set of These Works.

CHEAP EDITION—PAPER COVER.

Complete in Fourteen volumes.

"PETERSON'S" are the only complete and uniform editions of Charles Dickens' works ever published in the world; they are printed from the original London Editions, and are the only editions published in this country. No library, either public or private, can be complete without having in it a complete set of the works of this, the greatest of all living authors. Every family should possess a set of one of the editions. The cheap edition is complete in Fourteen Volumes, paper covers; either or all of which can be had separately, price 50 cents each, as follows:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist
Nicholas Nickleby.	Two Apprentices. 25

A complete set of the above fourteen books, will be sold, or sent to any one, to any place, *free of postage*, for Five Dollars.

LIBRARY OCTAVO EDITION.

Published in Seven Different Styles.

This Edition is complete in SIX very large octavo volumes, with a Portrait on steel of Charles Dickens, containing the whole of the above works, handsomely printed, and bound in various styles.

Vol. 1 contains **Pickwick Papers** and **Curiosity Shop.**
" 2 do **Oliver Twist, Sketches by "Boz,"** and **Barnaby Rudge.**
Vol. 3 contains **Nicholas Nickleby,** and **Martin Chuzzlewit.**
" 4 do **David Copperfield, Dombey and Son,** and **Christmas Stories.**
" 5 do **Bleak House,** and **Dickens' New Stories.**
" 6 do **Little Dorrit.** In two books—Poverty and Riches.

Price of a set, bound in Black cloth.....$9 00
" " Scarlet cloth, extra.....10 00

" " Half calf, real ancient antique...18 00
" " Half calf, full gilt backs, etc.....18 00

ILLUSTRATED OCTAVO EDITION.

THIS EDITION IS IN THIRTEEN VOLUMES, and is printed on very thick and fine white paper, and is profusely illustrated, with all the original illustrations by Cruikshank, Alfred Crowquill, Phiz, etc., from the original London editions, on copper, steel, and wood. Each volume contains a novel complete, and may be had in complete sets, beautifully bound in cloth, for Nineteen Dollars a set; or any volume will be sold separately at One Dollar and Fifty cents each. The following are their respective names:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist.
Nicholas Nickleby.

DUODECIMO ILLUSTRATED EDITION.

Complete in Twenty-five Volumes.

The Editions in Duodecimo form are beautifully illustrated with over *Five Hundred Steel and Wood Illustrations*, from designs by Cruikshank, Phiz, Leech, Browne, Maclise, etc., illustrative of the best scenes in each work, making it the most beautiful and perfect edition in the world, and each work is also reprinted from the first original London editions that were issued by subscription in monthly numbers, and the volumes will be found on examination, to be published on the finest and best of white paper.

This edition of Dickens' Works is now published complete, entire, and unabridged, in Twenty five beautiful volumes, and supplies what has long been wanted, an edition that shall combine the advantages of portable size, large and readable type, and uniformity with other standard English authors.

The Duodecimo edition alone has been gotten up at an expense of *over forty-five thousand dollars*, but the publishers trust that an appreciative public will repay them for the outlay, by a generous purchase of the volumes. All they ask is for the public to examine them, and they are confident they will exclaim, with one voice, that they are the handsomest and cheapest, and best illustrated Set of Works ever published. This edition is sold in sets, in various styles of binding, or any work can be had separately, price Two Dollars and Fifty cents each, and each work but one being in two volumes, handsomely bound in cloth, as follows:

Pickwick Papers.	Sketches by "Boz"
Nicholas Nickleby.	Barnaby Rudge.
David Copperfield.	Martin Chuzzlewit.
Oliver Twist.	Old Curiosity Shop.
Bleak House.	Christmas Stories
Little Dorrit.	Dickens' New Stories.
Dombey and Son.	*One volume, cloth*..$1 25

PEOPLE'S DUODECIMO EDITION.

Published in Six Different Styles.

This Duodecimo edition is complete in Thirteen volumes, of near One Thousand pages each, with two illustrations to each volume, but is not printed on as thick or as fine paper as the Illustrated Edition, but contains all the *reading* matter that is in the Illustrated Edition, printed from large type, leaded. The volumes are sold separately or together, price One Dollar and Fifty cents each, neatly bound in cloth; or a complete set in this style will be sold for $19. The following are their names:

Little Dorrit.	Nicholas Nickleby.
Pickwick Papers.	Christmas Stories
Dickens' New Stories.	Martin Chuzzlewit.
Bleak House.	Barnaby Rudge.
David Copperfield.	Old Curiosity Shop.
Dombey and Son.	Sketches by "Boz."

IS ACKNOWLEDGED to be, by all who have tried it, the BEST TONIC and ANTI-DYSPEPTIC ever presented to the California public.

In New York City, and Buffalo, N. Y., where the Turner Brothers first introduced it to the world, it has secured an unprecedented degree of popularity, owing solely to its sanitary and extraordinary medicinal properties.

Medical Men and Men of Science

All pronounce it to be most healthful and invigorating; and whether it is used by adults or infants, its effects are alike beneficial.

It is purely Vegetable, and is composed of

The juice of berries, herbs, wild plants and roots;
The Spring's first buds, the mellow Autumn's fruits;
The bright wild flowers, whose fragrance charm the bee;
The op'ning leaves, the bark of the forest tree;
The bulbous root, on mountain's slope that's found;
The spreading vine, that grows in marshy ground.

TURNER'S GINGER WINE

Being so well known to this community, as well as to all the inhabitants of the Pacific Coast and its Islands, it is only necessary here to state that it is manufactured in all its purity, as well as the

CONCENTRATED ESSENCE OF PURE JAMAICA GINGER,

And all the Syrups, Cordials and Extracts now in use in this State, by TURNER BROTHERS,

PEORIA PREMIUM PLOWS!!

JUST RECEIVED,

GENUINE PEORIA PREMIUM STEEL PLOWS,

Of Nos. 5, 5½ and 6.

THE Plows are from the justly celebrated manufactory of Messrs. TOBEY & ANDERSON, Peoria, Illinois—(the makers named are the ones who have given the reputation to what is known as the "Peoria Plow") Several hundred were sold by us last season, and they have given very general satisfaction when imitations have failed.

These Plows are so completely packed at the place of manufacture, that they can be shipped to Agricultural districts of California and Oregon, at a very small per centage on their costs.

Merchants doing business in Agricultural districts would do well to call upon us before making their purchases of this important article.

SOUTHWORTH & CO.,

44 Battery street, near California.

San Francisco, October 1, 1857.

PEORIA PREMIUM STEEL PLOWS. NOTICE.

We, the undersigned, Inventors and First Manufacturers of the "Peoria Premium Plow," say, to all whom it may concern, that Messrs. SOUTHWORTH & CO., of San Francisco, California, are the only parties whom we have ever supplied with our Plows, or who have received them for sale in California, and are the only parties to whom we are shipping the present season. TOBEY & ANDERSON.

OFFICIAL NOTICE!

POLHEMUS' DRUG STORE,

No. 100 J street, corner of Seventh.

SACRAMENTO, CAL

FELLOW CITIZENS: I have lived among you since the ever glorious FORTY-NINE, have suffered with you in three fires and three floods, and intend to live among you with my family during the term of my natural life, if not longer. I return you my most sincere thanks for your unfaltering patronage and support, which has enabled me to pay One Hundred Cents on the Dollar through all my adverse fortune. I would also give you a few reasons for your continued patronage, and inducements to new patrons likewise.

FIRSTLY.

I claim to be the Oldest Established Legitimate Druggist in this City.

Persons in this connection will please observe that there is as much difference between a DOCTOR and a DRUGGIST as there is between a Druggist and a Doctor, and rather more so between those who have picked up the Drug Business and those who have devoted their whole lives to it. To this latter class I have the honor to belong, having learned my business in the Atlantic States, and been engaged in said business for the last eighteen years.

SECONDLY.

Believing that life is sweet to all, and that the people wish to know where they can get their prescriptions filled with safety, I will hereafter fill them for

Half the Price Usually Charged

By other Druggists, legitimate or illegitimate, and of **The Purest Drugs and Chemicals.**

THIRDLY.

I intend my store shall be ONE of the best, if not THE BEST place in California to obtain everything, NEW, ODD and STRANGE in the Drug line, and especially to make it the most extensive depot for every valuable Patent Medicine, Drug and Chemical. We invite proprietors of valuable and reliable Patent Medicines to send them along. We have a large and thoroughly fire-proof Drug Warehouse to hold them, and patrons to buy them.

FOURTHLY.

We Keep Open all Night!

And charge no more for medicines than in the day time.

FIFTHLY.

We will furnish those in indigent circumstances with MEDICINES AT COST! the same being attested by two or three good citizens.

SIXTHLY.

Hereafter we will do a business on a CASH BASIS ONLY. The amounts we have lost heretofore by crediting we intend to distribute equally among our patrons, in the future, in the decreased price of our goods.

SEVENTHLY.

We have received the agencies for the following valuable articles:

Dr. Carl Warburg's Tincture. This article is particularly recommended for Ague and Fever, when every other article fails to cure.

Budds' Nerve and Bone Liniment, warranted the best in California.

Flower of the West, for Fever and Ague.

Delight's Spanish Lustral, for the Hair.

HUDSON'S CALIFORNIA GROWN MUSTARD.

Also, agencies for all the other popular medicines too numerous to mention.

EIGHTHLY AND LASTLY.

We import nearly all of our goods. We think we know how to import them, and how to sell them to satisfy the public as to price and quality. At all events, give us a call, and WE WILL TRY.

v6-12 J. L. POLHEMUS.

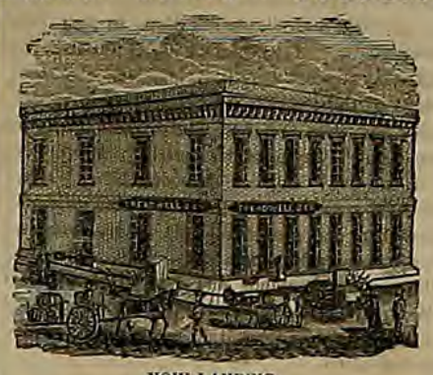
PLOWS! PLOWS!! PLOWS!!!



NOW LANDING,

The Celebrated "Boston Steel Clipper,"

AND

"PEORIA STEEL PLOWS,"

Got up by the subscribers to meet the wants of California, and which, for adaptability, material, finish and cheapness, surpass any plows ever brought to the notice of the public.

These Plows are made by the best manufacturers in the United States, and defy competition in price, and comparison in material and workmanship.

Being made at tide water, and no expense of transportation from the Western States, we are enabled to offer Merchants and Farmers a better Steel Plow for less money than any other in market.

CAST PLOWS (Eagle Pattern),

OF ALL SIZES AND DESCRIPTIONS.

We shall be in constant receipt of the above styles of Plows, and offer better inducements to the trade than can be found elsewhere.

These Plows are packed in cases, very compactly, and can be sent to any part of the country at very small expense, and can be set up easily.

Extra points and parts to all our Plows constantly on hand.

Machines and Agricultural Implements,

And goods of all descriptions, constantly on hand and replenished.

TREADWELL & CO.,

v8-10 3m N. E. cor. California and Battery streets.

FIRST PREMIUM IMPLEMENTS.

TO THE FARMER

AND

Dealer in Agricultural Implements.

PLEASE READ.

HAVING erected a good shop, with facilities not heretofore possessed by any house in this State for manufacturing Agricultural Implements, I beg leave to announce that I am now prepared to receive orders to any extent in this line of business. I employ none but the best and most experienced mechanics, and use only the very best materials. In this way I hope to promote the interest of the good mechanic, the interest of the farmer, the interest of our young and growing Agricultural State; and at the same time that interest which is foremost with all mankind—self. I have had twenty years experience in the manufacturing business;

I ESTABLISHED THE FIRST SHOP,

AND

MADE THE FIRST STEEL PLOW

in the State of Wisconsin, in the dawn of her great agricultural improvement. I also

MADE THE FIRST REAPING AND MOWING MACHINE

AND

THE FIRST STEEL PLOW

Ever Made in this State;

Therefore, with my experience, and a knowledge of the wants of the country (which are different from most others), I feel confident that I can and will do much for the interests of the agriculturists of this county; and in my efforts I trust I shall meet with a good share of patronage from the farmer and all interested in this matter, and in the interest and development of the agricultural improvement of our State.

I design, and have under way, the manufacturing of

1,500 Cast Steel California Plows;

THE DEEP TILLER;

OR,

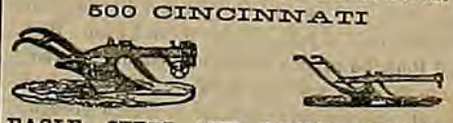
"QUEEN OF THE WEST;"

Of stock entirely superior to any ever worked before in this country. Also,

GANG PLOWS,
HARROWS,
CULTIVATORS,
FANN MILLS,
&c., &c., &c.

In addition to what I manufacture, I shall constantly be receiving implements from the best makers of the Eastern and Western States, amongst which are now due

500 CINCINNATI



EAGLE, STEEL AND ROVER PLOWS,

which stand, in point of true merit and worth, altogether higher than any others in the great agricultural State of Ohio.

☞ Please favor me with a call, and see for yourself, and be convinced that I am publishing no humbug, but simply facts as they are; and that your young State can, within itself, already provide the farmer with implements inferior to none now in use. All kinds of agricultural implements and machines repaired on short notice, and in the best manner, and on reasonable terms.

Who Will Come?

A Voice from Michigan.

While ten thousand merchants and business citizens are crying out for a greater immigration from the "Old States" we ask them to read the following letter. It speaks for itself; it comes in plain matter-of-fact language, and tells the true feelings of the people; it expresses their hopes, doubts, and fears, and if we really want them to come, then "a way must be opened." Read this letter, and act! All can do something. Write, talk, make speeches, move the people, send information abroad, and show California as she truly is, and open a way for people to get here, and they will come by thousands and tens of thousands.

We truly thank our friend for his valuable letter. All that we can do we will do, and we hope to hear from him often.

—

Tallmadge, Michigan, Dec. 10, 1857.

Editors Farmer: I am still in Michigan, and will be for a short time at least, because I can't get away, under the present panic. But I get a Farmer, now and then, to cheer me up, and make me glad. The boys don't get them *all* to "make kites of," because they *"fly higher."* Not a day passes, but I wish I was in California; no, scarcely an hour. Have just received a letter from my brother. Very glad to hear of his safe arrival in California—the land of Fruits and Flowers. He writes me that he saw some *tall* oats, a large beet, and some splendid wheat heads at your office. He said he looked for some of your nice fruits, but did not find it at your office, but plenty in the markets, and nice too. Brother will create a sensation among the "unbelievers" in this vicinity. They won't believe the papers. They doubt the statements of committees, and say they exaggerate; but read to them a murder, robbery, or massacre, and they will say, "that is truth." So you can see the influence that deters emigration to the *favored* land of California. I, for one, have too much respect for editors, and committees chosen on Agricultural and Mechanical productions, to believe they would have any interest in exaggeration, or misstatements to induce an immigation there. You want contentment with the people—so, give my facts, gentlemen. Sow them broadcast through the land. They will find a few, "the chosen few," such as you need to bring out the resources of California. Any reasonable man knows that the climate of California *will* produce Fruits, Vegetables, and Grain, in *greater* perfection than the frost-bound regions of the Northern and Western States.

I have conversed with several Returned Californians, of late. *Some* of them don't advise anybody to go to California to live. I ask them if they don't raise good grain, vegetables, and fruits there? "Oh yes, and a fine *climate*, too." Well, I tell them, "that is the land for me." So I get just what I desire from the most homesick ones. I was conversing with one a few days ago, and he endeavored to make me believe that *good* apples would *never* grow in California. I told him I had *good* evidence otherwise. He said, "perhaps *you* know *more* about it than I do. I have been there *five* years, and have *never* seen a *good* apple; they were tough and tasteless." I asked him if he had attended any of the Agricultural Fairs there. He said, "no;" "Well," says I, "I don't give it up so. I believe the *are good* apples grown in California. If not, will have some when I get there, for I am bound to raise first-rate apples *even* in California, if I am permitted to go there." He said also, that "the potatoes were not good; they were full of strings." He don't agree with others I have conversed with about them.

We have been overrun with a great panic, since my last, of Sept. 11. Banks broke, merchants broke, and farmers almost broke; money awful "tight," and hard times generally. But prospects are a little brighter. But many a poor man would work for his board and clothes this winter. How does it contrast with California?

To illustrate, I will give you the markets as I can. Wheat sells for 75 to 80 cents per bushel, and hard at that for cash. Corn, 30 to 50 cents. Oats, 25 to 30 cents. Barley, 50 cents. Potatoes, 20 to 30 cents. Beets, Carrots, and Parsnips, 25 to 37½ cents. Apples, 50 cents to $1 50. Beef and Pork, $3 to $6 per hundred weight. Butter, 20 to 25 cents, and Cheese 10 to 12½ cents per pound. So you see everything is *cheap* enough, but almost out of the reach of the poor, because they can't get the means to buy with. I like to forgotten Hay, which is worth from $6 to $8 per ton. The weather—we have *some* of that here—the frost held off well. The first hard frost was the 29th of September. So the Corn matured well. The autumn has been decidedly "cool," and winter found us illy prepared for it. Began to snow November 18th, and continued until the snow was sixteen inches deep. Some said two feet, but I thought sixteen inches was deep *enough* this time of the year. Nov. 25th, at 7 o'clock, A. M., the mercury was 10° below 0, and at daylight was lower; but, in brushing the frost off the thermometer the mercury rose some two or three degrees, but stood full 10° below 0, at 7 A. M—cold enough for November or January, or any other month in the year. The weather has been quite moderate the week past, and most of the snow disappeared; temperature ranging from 20° to 40° above 0, with some rain. But last night we caught a change. It snowed old fashion this morning, and to-day, at 12 o'clock, M., the mercury marks 28° above 0, the snow about four inches deep, and Boreas whistling away, with a fair prospect of sleighing soon.

How soon will you have a full Report of the State Fair, and what will be the price? I will send you a notice of our County Fair, in our county paper. It is a small *affair*, and has the greater chance to improve. It is the second attempt, but much better than the first. I hope there will be some way opened to California, free from ocean perils and Indian and Mormon depredations, within the coming year. If so, you will see many of the good, hardy farmers seeking a home in your favored State. [The ocean cost is an item now.] I hope the Government will find the necessity of such route to California, if for no other purpose than to convey troops to Utah.

Respectfully, O. N. Cadwell.

Messrs. Main & Winchester are now opening a large assortment of new and splendid goods in the Saddlery line, and as they are large manufacturers and large importers, their stock is always kept complete.

FARM STOCK, ETC.

French Merino Sheep.

HAVING been engaged in importing and breeding FRENCH MERINO SHEEP for several years past, I can now furnish Rams and Ewes, either imported, or raised by myself from imported stock, equal to any that can be found in this country or Europe.

I was awarded all the prizes on French Merino Sheep at our last State Fair; and all the premiums awarded to this class of Sheep at our last National Fair, and the most of those at the State Fairs of California, Michigan, Indiana, Missouri, Wisconsin, and also at the Provincial Show of Upper Canada, for the present year, were awarded either to Sheep raised by myself, or to stock from Sheep raised by me, and sold to others.

Circulars, giving a full description of my flock, sent by mail to all applicants. Information can also be obtained of the Editors of the California Farmer.

Prices as low as the *same quality* can be purchased of any other person, and Sheep delivered in New York, free of charge. JOHN D. PATTERSON,

WESTFIELD, Chautauque County, NEW YORK.

v8 24 1y *6m

MERINO SHEEP	$15 to $30 "
SOUTHDOWN do	$20 to $50 "
COTSWOLD do	$20 to $50 "
SUFFOLK PIGS, ₱ pair	$25 to $40
CHESTER WHITE PIGS, ₱ pair	$30 to $50

☞ All Orders promptly attended to, and Hogs and Sheep securely boxed. Cattle, all appendages provided, and delivered in Cincinnati *free of freight and charges.*

Address, H. T. WOLLARD,
v8-21-1y Castine, Darke Co., Ohio.

WEBB, SOUTHDOWN SHEEP.

HAVING RAISED MY FLOCK OF PURE WEBB SHEEP (by importations, and purchase of Col. L. G. Morris), to as large a number, as my land will accommodate, I now offer a few EWES, and several BUCKS, for sale, at from $40, to $100 each.

I believe mine to be the only flock of pure Webb Sheep in America, and am confident, that no other person can sell as fine quality, at as reasonable prices.

Also for sale BERKSHIRE and ESSEX PIGS, of the best blood, from Col. Morris' importations.

For further information—address,
J. C. TAYLOR,
Holmdel, Monmouth Co., N. J.

Or Warren & Co., Editors Cal. Farmer, San Francisco.

N. B.—Col. L. G. Morris, of Mt. Fordham, N. Y., has very kindly given me the privilege of referring parties to him, as he is well acquainted with my flock at the present time. [24-3mis

Fancy Fowls for Sale.

SEED, PLANTS, ETC.

Cranberry Plants.

THE BELL OR EGG SHAPED VARIETY

IS the kind best adapted for cultivation on damp, loamy soil, also on wet bogs or poor land, where nothing else will grow. When cultivated, after two years, they often bear from

200 to 300 Bushels per Acre.

Price 50 cents per 100, or $4 per 1000 for Bearing Plants.

New Rochelle (or Lawton) *Blackberry Plants,* of the genuine variety, at reduced prices.

$2 per dozen.....$12 per hundred.....$50 per 500.

Brinckle's Orange Raspberry,

$8 per hundred.....$1 25 per dozen.

Fine Red Antwerp, Franconia, Knevatts Giant, and Fastolf Raspberries,

$4 per hundred.....62½ cents per dozen.

NEW HOP TREE.

(See cut and description in the Farmer.)

Price 50 to 75 cents each.

This Hop is much stronger than the common one, for family use, and highly ornamental. Circulars relating to culture, soil, etc., can be found at the office of the Farmer, or by letter to the subscriber, by inclosing a stamp.

Orders will be received for the above plants, at the office of the Farmer, or by mail to my address, by inclosing the amount. I would also suggest, in addition, the amount of freight to be prepaid here, to secure their safe and speedy transmission.

SEEDS

OF FRUIT and ORNAMENTAL TREES

THOMAS MEEHAN,

Proprietor of the Germantown Nurseries,

Germantown, Philadelphia, Pa.

Includes in his business the collection and importation of

Every Kind of Tree Seeds

That can be obtained in this country or Europe. A Price Current of over Two Hundred Species which can generally be obtained with certainty, is issued every May, in advance of the season of ripening, so as to afford purchasers an opportunity to forward their orders early enough to get them in prime season; fresh, and in the best order for growing.

Most of this year's crops of seeds are now on hand, and they will be sold at the lowest rates at which they can be collected. The supply of PEAR SEED is large this season, and can be supplied at $5 per pound, or $4 50 per pound when 5 pounds are ordered.

23tf November 18, 1857.

Alfalfa Seed.

THOSE who desire pure and clean ALFALFA SEED, are now invited to a new lot, just received fresh from Chile. It is remarkably clean and more than a third better than any Alfalfa heretofore offered in this market.

Interesting Letter from Mrs. E. W. Farnham.

Dash at Politics—A Word for the General News Gossip—Kansas—Douglas—Criticism on Women, Men, and Manners and Customs now prevailing—Books, Bryant's Poems—Christmas Holidays—The Suffering of the Poor, and especially Women—Satire upon dress—Good Results of the Panic, by calling attention to humanity.

[THE annexed spirited letter from the pen of Mrs. Farnham will afford pleasure and interest. We should certainly exclude all political subjects, or even allusion to them, from our own sex; but to a lady! and one who wields so ready a pen, if poets are allowed license, we suppose we must allow full scope to truth, especially when it comes so innocently and piquantly as in the present case. Whatever subject Mrs. F. may be pleased to touch upon, we believe good will result from her remarks, and therefore we have faith to think all our readers will peruse her letter with pleasure and profit.]

EDITORS FARMER: I suppose you do not crave political gossip from your feminine correspondents, but really, in these days, one can hardly resist the currents which draw one on to speech, in that direction. You will hear no end of common-places, on stale and constantly recurring Meteorological, Commercial, Social, and Theologic phenomena. Everybody can discourse on the clouds, winds, storms, feasts and their suspension; banks and their suspension; Society and its suspension (vide Custom House Receipts, and Stewart & Hearn's new Ledgers); churches and their dissolution, and recombination, because that multifarious personage understands them all. He has felt the pulse of each of these old chronic patients, and given diagnosis of their case so often that it is no longer necessary to go through the solemn mockery of looking wise or swinging the head with ponderous horizontal movement on approaching their couch of prostration.

Kansas too was passing from the acute into the chronic stage, at least among us anti-politicians. We shallow women, as we took up the Tribune day after day, sighed or fretted over the many columns which were filled with details, long letters, one after another, which I solemly assure you I never saw read by man or woman, and that too if we did not say, why do they fill the paper with these accounts? Kansas really is not the whole world. Only one of its battles is being fought there; and we should like to hear less of that and more of some others, in which Border-Ruffianism is a little mitigated from the middle-age mendacity and meanness of that type. Thus, I say, we were beginning to feel about Kansas, when Mr. Douglas kindly rejuvenated the four-year-old—quite a methusalemic age for any unsettled question in this day—and set it up before the country as good as new.

I hope Mr. Douglas enjoys the consciousness of being thoroughly honest, manly and sincere in this. I hope he has this consciousness safely sealed up in his heart. If he has, the fact would account for its universal absence from every other. There may be a spice of wickedness in it, but I will confess to you, Mr. FARMER, my honest conviction that women are rather pleased than otherwise that Mr. D's own sex do not testify their confidence in him. When one considers how steadily women are charged with injustice and uncharitableness toward each other, with persistent and bitter skepticism in regard to motives which admit of question, one feels more hopeful of men, seing them approach "the same sad condition." I am not a partisan of Mr. Douglas. I never was, when the democratic moiety of this august Republic seemed anxious to become a huge tin kettle in his—hands, wherewithal the ears of the small nations of this great globe might have been conquered; but I do not see why he should be so universally doubted in his new position. If with prophetic eye he sees that the Administration is running counter to the living and growing sentiment of the country, wherefore should he not rebuke and dissent from the Administration in time to save himself? He has labored faithfully to secure to Kansas the inestimable blessings of slavery. But if Kansas, stupid and perverse, resolutely rejects him and them, what then? Shall he foolishly maintain the antagonistic position, when no good can come of it? Clearly not. One likes to see a stalwart arm stem the current; but when the current becomes too strong, the stalwart arm must fall; and wise is he who turns with the resistless tide, and makes it bear him to some port of safety. My opinion, and I speak it with a feeling akin to reverence, is that Mr. Douglas, if he should haply be drowned some day, will never be found floating *up the stream*; and further, that his present position is one of the surest omens that the cause which he has heretofore opposed is destined to enjoy an early triumph.

In my last I said a word about pictures; at present I would speak of books, if there were any worthy of mention; but that, you will readily understand, cannot be the case, when neither I nor my friends are in the field. The holy days have brought to the gift-bestowing and gift-receiving public much less than the usual amount of elegant muslin and gilt trash, along with several magnificently made books, the outward promise of which is not a lie. There is an edition of our beloved Bryant, more costly and splendid than any preceding one; but the publishers, in sending out their gift copies, have forgotten your correspondent, and therefore her memory is not at this present enriched by their names. Perhaps Santa Claus, who enjoys a monopoly of this branch of the press business, could tell you if it was the Appletons. It is like some of their old tricks.

It is a pleasing feature of our holiday festivities, that they bear the poor in mind, though God knows the feasters and merry-makers could not well forget what crouches before and beside them at every corner and alley-way as they pass. This winter will be a memorable one in the annals of the poor, and the rich as well. After all, humanity vindicates itself in time of trial. There are men and women at work, giving of their time and money to relieve the indigent and suffering, who never before proved their earnestness in practical efforts, and of whom one could not have predicated any such effort. Only that thousands of poor are the helpless victims of such convulsions as have shaken society out of its old footprints this winter, one could bear the rough handling patiently, for the experience it brings, and the real insight it affords into the hearts that surround us. I find my frivolous, fashionable, folly-chasing neighbor, whom I hope to be forgiven for having considered it one of my greatest virtues thoroughly and consistently to despise, talking with moistened eyes to a poor, shivering sister, who stands in the wintry blast, clothed in thin summer garments. No beggar is she; but her gauze bonnet, fluttering dress and cotton dust-cloak beg for her; and Mrs. Flaunt, meeting these on a January day, is led to consider if there is a sensitive human form inside them. Finding that the watery eyes, the pinched face and the purple lips furnished strong presumptive testimony that there is, she requests it to convey those frightfully thin habiliments to her comfortable home, and there she finds that the waste garments of her wardrobe, warm both heart and frame, and is herself in turn warmed by a new emotion. Mrs. Flaunt sits down to dinner more than half believing that life has satisfactions derivable from other sources than fashionable triumphs, and the next week we have her among our charities; brocades, velvets and all, to be sure, are there; but what of that. They are not much in the way; and then she is getting eyes to see them with—to see them clearly I mean. Hitherto they have been half concealed from her vision in a golden and purple mist of splendor. It will at least be a whole twelvemonth from this January, 1858, before they will be again invested with that. So let us be thankful that the lessons of this dreadful suffering are not altogether lost; and for the present, *Adios*. E. W. F.

NEW YORK, January 3, 1858.

[For the California Farmer.]

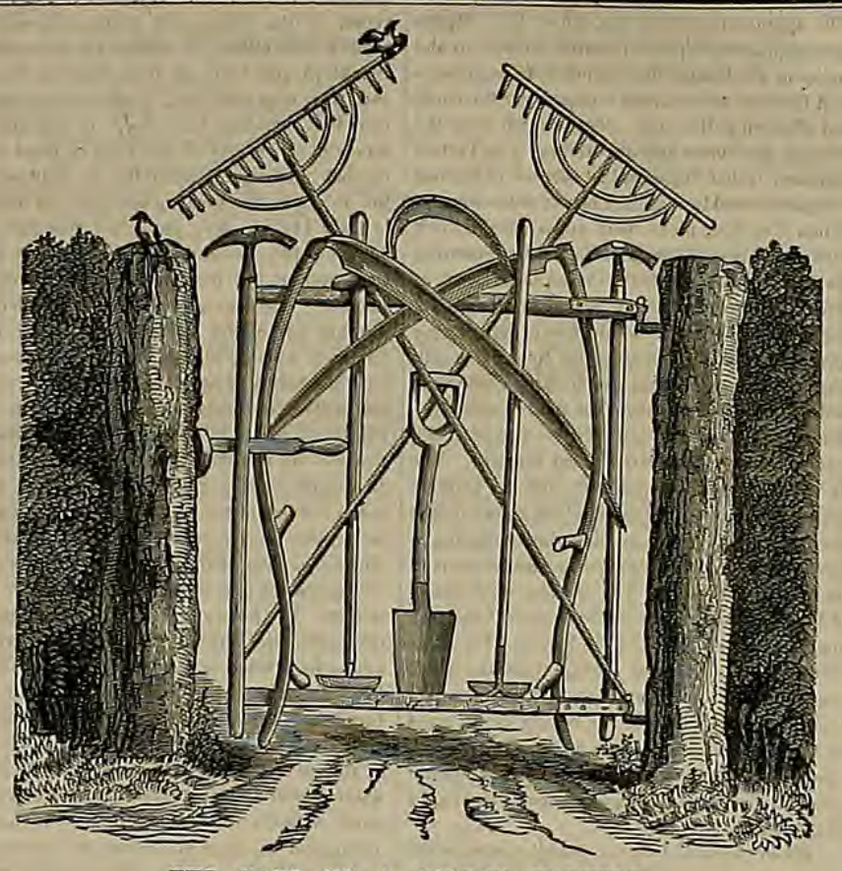
Cultivation of the Sweet Potato.

MESSRS. EDITORS: Knowing by reading of your valuable paper, that you wish to disseminate a true knowledge of agriculture, and publish for the benefit of the farmer, all practical information concerning the cultivation of the different crops, I just concluded to request that you, or some of your correspondents, would give us an article, in an early number of your journal, on the cultivation of the Sweet Potato, as followed in Sacramento Valley or other parts of the State: how they keep their seed; how prepare the soil; how far apart the sets are planted, and at what time; also the time of harvesting, yield per acre, &c. Any information concerning that best of all potatoes would be very acceptable to a few, if not all, of your readers. A SUBSCRIBER.

Will those of whom this inquiry is made please respond, and thus perform a public good?

PATENT OFFICE AGRICULTURAL REPORTS FOR 1856. We received by last steamer, a large lot of these valuable Reports, and shall be happy to forward to all who may not yet have been supplied. Mechanical Reports have also been received, three volumes in a set. These we shall be happy also to forward to Mechanics, when desired. All persons interested in these valuable Reports are invited to call at our Office, where we have much to offer them in distributions, free.

CALIFORNIA WINE.—Why should we import costly Champagne Wine, when we have so good Wines as our own California produces, and particularly the Sparkling Champagne of the Sainsevain Brothers. From all sources, at home and abroad, we hear the highest praise given to it.



THE GATE TO A GOLDEN HARVEST.

"At eve the plowman leaves the task of day,
And trudging homeward, whistles on his way;
And the big uddered cow with patience stands
And waits the stroking of the damsel's hands."

WE present to the cultivators of the soil in California the above Cut, as emblematical of their profession. These are the weapons with which the virgin soil can be made to yield up its golden treasures, and fill your granaries and barns and your homes with luxuries, from its own rich storehouse. The spade, mattock and hoe, have all been spoken in song, and recently we published the "Song of the Spade." Its truth echoes still:

"It was not the sword, that won our best battle,
Created our commerce, extended our trade;
Gave food to our wives, our children, our cattle,
But the queen of all weapons—the spade boys, the spade."

And thus we might sing of all the various implements which the cultivator of the soil should feel are his weapons, and he should feel an honest pride in using them; feel that his employment was full of honor and dignity, and he should pursue his calling, not for the mere purpose of making money, but for the advancement of the great interests connected with the industrial relations of society, the building up of our noble institutions, among them the homestead; his own homestead should be made the scene of his chief desire, for there he must look for his highest incentive to action, and there find the best reward for his labors.

To this end we would present objects of ornament, as well as utility. The above Cut can be easily imitated in California, and the implements of the cultivator be made in the various curiously formed branches of trees that abound in our forests. We hope ere long to see some of our farmers with these Gateways, thus fashioned in tasteful, rural style. When we see homes ornamented and beautified, we have the best proof that such a home is permanent, and that happiness is found within. 'Tis then the cultivator feels that there's a richer reward than *money* can give for labor; for he has found the aim of life, happiness—and he beholds,

"Yellow sheaves from rich Ceres the cottage had crowned,
Green rushes were strewed on the floor;
The casement's sweet woodbine crept wantonly round,
And decked the sod seats at the door."

The original of the design presented above, forms one of the entrance gates to the beautiful grounds at Wodenethe, the residence of H. W. Sargent, Esq., opposite Newburgh, on the Hudson river New York—near the late residence of the lamented Downing. The whole arrangement of this unique place is picturesque and beautiful, and we hope ere long to find such built on our Pacific shores.

While our journals are filled with antidotes for the cure of the misery and wretchedness which has filled them with records of suicides, and murders, we would say, let young men and old men quit one species of *gambling* and *dissipation*, and business men quit *another* species of gambling, *speculation*, and give their wealth and leisure to the adorning of "homes;" then the record of suicides would cease; the record of prosperity be increased, while the name, fame and glory of our land be heralded far and wide.

THE STATE AGRICULTURAL SOCIETY'S REPORTS. The Reports of the State Agricultural Society for their last Fair, we are happy to know, will appear, though late. We understand they will be out in a week or ten days. We regret it was not in our power to publish them, as we had intended to have embellished them with beautiful cuts, illustrative of the science and scenes connected therewith.

Letter from San Joaquin Valley.

WE earnestly commend the annexed valuable letter of our correspondent from the region of the San Joaquin Valley. It shows some of the "hopes of the future," and corroborates strongly the position we have always assumed, of the "plenteous crops" of the present year, and the extended area that will be planted the coming year. This Valley and others of more or less magnitude, are the great resources for the future, and to them all eyes will turn for the permanency of our State:

SAN JOAQUIN VALLEY (15 miles from Stockton, San Jose Road), Jan. 16, 1858.

EDITORS FARMER: Since my letter of December 14th, everything has progressed beautifully in the way of farming; peace and quiet pervades our settlement, and happiness reigns supreme around our firesides. The happy result brought about by the enterprise of Messrs. Chamberlain & Gage, by boring an Artesian well, has lent new hope to our citizens, strength to their limbs, and vigor to their constitutions; each man's face wears a cheerful smile, and the right hand of fellowship is extended everywhere. The fact is, we *are* near water. Like a band of brothers, all are pretty much engaged in the same pursuits, and each individual's interest is common to all.

I stated in my last letter that we were all sowing together, or adjoining each other, to save expense in herding our crops this summer. We still continue to plow in the same way, and have lost but two days (owing to the ground being too wet), since my last. At this date we have 1250 acres of land turned up, all adjoining, but part belonging to each of us; and I doubt if all California can boast of so great a wheat field.

Our first sowing looks flourishing, and gives promise of a golden harvest. We shall continue to plow until the 1st of February; by that time we will add 400 acres more to our now extended field, and next fall may add "several" bushels of wheat and barley to the Agricultural statistics of San Joaquin county.

The Artesian well referred to, is an object of great interest; not only to ourselves, but to all California. Not undeservedly so, either, for should the laborer meet his reward throughout the extent of San Joaquin Valley, as he has in this (which I have not the slightest reason to doubt, nor does any one else with whom I have conversed), it will furnish homes for thousands of American citizens; and, I was going to say, more agricultural land than all the balance of the State. A man who has never traveled the length and breadth of this Valley, would scarcely contemplate the vast extent of country lying between this and the head of the Stanislaus river, 250 miles long and averaging six miles in breadth; nearly all of which is adapted to cultivation.

I repeat my assertion, a Railroad is bound to be put through, and that before any of us suppose; all it lacks is a few more energetic men in our Valleys, who will *pitch in* and take the bull by the horns.

Mr. West Van Benscoten, who lives twelve miles above here, on the river, is making preparations to bore another Artesian well. I tell you, this Valley will be literally filled up with wells, houses, etc., by next fall—that is, this portion of it.

We have a town laid out already, Messrs. Gimmerman and McLaughlin are now engaged in surveying a town, six miles below here, at a point on *old river*, known as Burns' Landing. The town is called Patterson, in honor to one of the pioneer settlers of San Joaquin, of that name.

The river is navigable for large vessels to that point; seven feet of water can be found in the shallowest place, at low tide. The coal from the Coast Range mines will be shipped from Patterson to San Francisco, and other cities. Mr. Coleman has undertaken the contract of transporting the coal from the mines to the landing, but I have not learned upon what terms.

Yours, etc., PETER M. GARDNER.

Condition of Agriculture.

From our numerous correspondents we select the following reports:

FROM RED BLUFFS.

"Crops look well in our county. Farmers have got their crops in, in better time this season than usual; but they have not plowed deep enough yet, though they have improved considerable."

FROM THE MERCED.

"The farmers in this county are up and doing; they are replacing the old brush and ditch fence with good board fences and redwood posts, and at the same time are extending the limits of their fields; they build good dwellings and barns, plant orchards and vineyards, cut ditches from the river for irrigation, &c., and thus improve the homestead."

THE EVILS OF UNSETTLED TITLES.

Although we have very much to encourage, there are some shades that flit across the otherwise happy scenes of our agricultural correspondents. We here give a letter from one of our subscribers who has been driven by force of peculiar circumstances to leave our shores. We give his letter, omitting some passages of a private nature. We deeply regret the loss of our friend, but there is enough in the tone of the letter to show that his love of California will bring him back again to us soon. We sincerely thank him for his kind interest in our journal, and for his complimentary notices. We wish him a pleasant trip and a speedy return, and a better result in his next settlement. Our land-owners must look to the *future* in their plans; the *present* gain is not always best:

EDITORS FARMER: "Old Settler" indited his former communication to you under the feeling excited by a refusal of the claimant of the land now occupied by me to agree to any arrangement, guaranteeing to sell a portion of the claim at some stipulated price, provided his survey should include my improvements, which is very doubtful. He told me he "was in no want of money, and intended to let the land lie till it became more valuable." The result is I have "sold out," and intend leaving the State on the next steamer, probably forever. * * * * I shall continue to cherish an interest in the progress of California, and the progressive development of its material resources, as well as its social improvement; but with apprehensions not unlike those that hurried away the rescued from the doomed "City of the Plains"—relieved, however, with the belief that the FARMER remains an efficient and vigilant sentinel over the true interests of the Pacific coast. Inclosed is $5 for the FARMER, to be sent for the present to me, ——, Wayne county, New York.

Yours, &c. OLD SETTLER.

The Turkey.

THIS noble American bird has now become common to every civilized country, says the Vermont Stock Journal, and the more widely known the more highly he is appreciated. It would be disgraceful to us as American Agriculturists, and breeders, to suffer this splendid bird to deteriorate. That he has already lost something of his size, beauty and strength, it is evident. The wild turkey when full grown, weighs from ten to thirty pounds. He is a strong flyer, though he does not readily take wing. His color is not black, though it approaches very nearly to it. It is a dark iron color, sprinkled with dark bronze spots, which in the sunshine are exceedingly rich. The comb and wattles are intensely red.

We are breeding birds of less size than the original, and consequently of less strength. But the evidence of deterioration is most striking in color. Some persons have had the lack of taste to breed white turkeys and speckled, and a faded dirty brown are common. Such turkeys have a miserable pitiful look as compared with a really fine bird, which has not had the *turkey* bred out of him by lack of skill and taste.

Nature breeds on true principles, and the bold gobbler of the forest freely hazards his life for the favor of the hen. Strength and courage are rewarded here as elsewhere in nature's economy. We have bred turkeys without care, and we are reaping the reward. We must retrace our steps. We must select males that have size, strength and courage. We must have none who have not the true turkey color deeply and strongly marked, with the rich, changeable gloss that gives so much beauty to them in sunshine. Reject all white-quilled, brown and light copper colors. When you have a fine gobbler, keep him for years; and select your hens on the principles laid down, and you will see a rapid improvement in your flock.

Everything that is worth doing at all is worth doing well. Let no one think it too small a matter to require the master's eye. Domestic Fowls under good management are not only beautiful, and a great convenience to a farmer, but they are highly profitable. Besides, if a farmer would really live well, he must produce his eggs, chickens and turkeys.

California Notes.

ABOUT GRASSHOPPERS AND LOCUSTS
In California and the World.

BY ALEXR. S. TAYLOR, OF MONTEREY.

[CONTINUED.]

At the time of the visit of Darwin to Chile and the adjacent countries of South America, he relates of the Grasshoppers as follows, at the date of March 25th, 1835, where he is crossing the dry country which lies between the city of Mendoza, in Buenos Ayres, and the opposite side of Chile. This country assimilates in every essential physical characteristic, to that of the territories within the boundaries of upper and lower California, prior to the American occupation:

"Shortly before arriving at the village and river of Luxan, we observed, to the south, a ragged cloud of a dark reddish brown color. At first we thought it was caused by some great fire on the neighboring plains, but we soon found that it was a swarm of locusts. They were flying northward, and with the aid of a light breeze, they overtook us at the rate of ten or fifteen miles an hour. The main body filled the air from a bight of twenty feet, to that, as it appeared, of two or three thousand feet above the ground. 'The sound of their wings was as the sound of chariots of many horses running to battle;' or rather, as I should say, like a strong breeze passing through a ship's rigging. The sky, seen through the advanced guard, appeared like a mezzotinto engraving, but the main body was impervious to sight. They were not, however, so thick together, but that they could escape a stick waved backward and forward. When they alighted, they were *more numerous than the leaves in the field*, and the surface became reddish instead of green. The swarm having once alighted, the individuals flew from side to side in all directions. Locusts are not an uncommon pest in this country. Already, during this season, several smaller swarms had come up from the south, where, apparently, as in all other parts of the world, they are bred in the deserts. The poor cottagers in vain attempted, by lighting fires, by shouts and by waving branches, to arrest the attack. This species of Locust closely resembles, and perhaps is identical with the *Gryllus migratorius* of Syria and Palestine."—pp. 81 and 82, vol. 2d, Harper's N. Y. edition of 1846.

The account of the Grasshopper and Locust given in Oliver Goldsmith's natural history, written about the time Clavijero and his authorities describe the Langostas of Lower California, differs very little from that of the Jesuit observers and writers. The Grasshoppers which visited England in 1748 (Goldsmith), appear to be nearly the same species (only larger), as those which appeared in Lower California in 1746; the kind described by the English author being three inches long. "There is no animal in creation," says Oliver, "which multiplies so fast as *Locusts and Grasshoppers*, if the sun be warm, and the soil in which their eggs are deposited be dry.

"When the Grasshopper is examined internally, besides the gullet, we discover a small stomach, and behind that a very large one, wrinkled and furrowed within side; lower down there is still a third, so that it is not without reason that the *Locusta* are said to *chew the cud*, as they so much resemble *ruminants* in their internal conformation. [This assumption, by later inquirers, is proved to be incorrect.—T.]

"In the year 1690, a cloud of Locusts was seen to enter Russia, in three different places, and from thence to spread themselves over Poland and Lithudnia in such astonishing multitudes, that the air was darkened and the earth covered with their numbers. In some places they were seen lying dead, heaped upon each other four feet deep; in others they covered the surface like a black cloth; the trees bent beneath their weight; and the damage which the country sustained exceeded computation. In Barbary their numbers are formidable, and their visits are frequent. In the year 1724, Dr. Shaw was a witness in that country of their devastations. In the beginning of April, their numbers were so vastly increased, that in the heat of the day they formed themselves into large swarms, which appeared like clouds, and darkened the sun.

"In the middle of May they began to disappear, retiring into the plains to deposit their eggs. In the next month, being June, the young brood began to make their appearance, forming many compact bodies, of several hundred yards square; these afterwards, marching forward, climbed the trees and walls, entered into our very bed chambers and houses, like thieves, and eating everything that was green in their way. Fire or water could not stop them. A day or two after one of these swarms was in motion, others that were just hatched came to glean after them, gnawing off the young branches and the very bark of the trees. Having lived near a month in this manner, they arrived at their full growth, and threw off their worm-like state by casting their skins. To prepare themselves for this change, they fixed their hinder feet to some bush or twig, or corner of a stone, when immediately, by an undulating motion used on this occasion, their heads would appear, and soon after the rest of their bodies. This transforming process lasted only eight minutes, after which they languished for awhile, but as soon as the sun and air had hardened their wings and dried their bodies, they returned again to their former greediness with an addition both of strength and agility. [This is the description of the Barbary Grasshopper or Locust, which agrees also with the Californian Jesuit account. Of the Barbary locust, Shaw says, 'that they deposit their eggs in a hole in the ground four feet deep; they are about eighty in number, of the size of caraway comfits, and bundled together in clusters.'—A. S. T.]

"In the year A. D. 591, immense swarms of Locusts ravaged the coasts of Italy; and being cast at last into the sea (as seems for the most part to be their fate), a pestilence arose from their stench, which caused the death of half a million of men and beasts. In the Venetian territory likewise, in 1478, more than 30,000 persons are said to have perished in a famine, chiefly caused by the depredations of Locusts.

"Locusts are eaten in all the eastern countries. They are parched over the fire in an earthen pan, and when their wings and legs are fallen off they turn reddish, of the color of boiled shrimps."

Dr. Clark, in his travels in the Crimea, says: "On approaching Cuffa we found the steppes (grassy prairies or plains) entirely covered by the bodies of the Locust, their numbers falling resembled flakes of snow carried obliquely by the wind, and obscuring the sun. Myriads fell over the carriage, the horses and the drivers. The Tartars informed us that instances had occured, of persons being suffocated by a fall of Locusts in the steppes. When they first make their appearance, a thick dark cloud is seen very high in the air, obscuring the sun. We found their swarms so immense in the steppes over which we passed in this part of our journey, that the whole face of nature may have been described as concealed by a living veil. They were of two kinds, the *Grillus Taitaricus* and the *G. Migratorius*. The first is called the herald or messenger, and always precedes the last, of which it is nearly twice the size. The *G. Migratorius* has *red legs*, and its *inferior wings* have a lively red color, which gives a bright fiery appearance to the animal when fluttering in the sun's rays. The strength possessed by it in its limbs is amazing. The *Gryllus viridissimus* of Linnæus (and which is also found in England), abounds near the Don and the Kuban. On whatever spot this dreadful scourge falls, the whole vegetable produce disappears, nothing escaping them, from the leaves of the forests to the herbs of the plain. Fields, gardens, vineyards, pastures, everything is laid waste. Sometimes their putrefying bodies produce stench enough to breed a pestilence.

"When Captains Irby and Mangles were traveling on the southern shores of the Dead Sea, in the end of May, near Shobek, they relate: 'We passed a swarm of Locusts who were resting themselves in a gully; they were in sufficient numbers to alter the color of the rocks on which they alighted, making a sort of crackling noise while eating, which we heard before reaching them. Volney compares them to the foraging of an army.'

"Captain Keppel, in his travels around the Caspian Sea, says: 'We traversed the grand steppe of Astrakan for two days. On the first of August, near a Russian village, surrounded by cultivated land, I witnessed what was to me a very curious sight; a vast flight of Locusts, extending fifteen miles, suddenly made their appearance from the east in a huge phalanx to attack the crops. My informant told me, that in the colony of Karass, when the Locusts came in sight, not only all the inhabitants but the military turn out and endeavor to drive them off by drums and fifes, and a perpetual discharge of musketry.'" Vide Whitelaw's Goldsmith, 1849, pp. 480 and 481.

The Grasshopper is preyed upon by the insect family of the *Ichneumonidæ*, of which, according to Dr. W. B. Carpenter (1844), there are not less than 3000 species which are known to modern naturalists. "The Ichneumon fly is provided with a long, sharp, film-like *ovipositor*, with which it pierces the body of the *Locusta* (and its anologies), and lays its eggs beneath the skin where they live until hatched. The Grasshopper may continue to exist, but as soon as the fly undergoes its last metamorphosis, they either escape through the animal's skin, or else kill their victim and perform their changes within its body. One of this species of fly, the *Pimpla Manifestator*, is furnished with an ovipositor three and four inches long."

There is a bird in India, termed the Grakle, which is a great consumer of the *Locusta* and its eggs. This Grakle, we judge, is similar to our California Chenate or Blackbird, which all know is found in the valleys of the Sacramento, San Joaquin and the coast, as also the Rocky Mountain countries, in such immense flocks that their swarms often obscure the sun; they are incredibly abundant some seasons in the lower part of the Sacramento valley. The inhabitants of India have often killed the Grakle to almost extermination, from their injury to young crops; but when this has been effected, a great multiplication occurs of destructive insects, and particularly of the Locusta, as the following from Buffon will show: "Some of the eggs of the Locusta being accidentally introduced from Madagascar into the French island of Bourbon, they multiplied so prodigiously as to threaten devastation to the country. But the Governor, a man of superior intelligence, learning the great services of the Grakle in India, had a number of pairs introduced and distributed over the islands under his charge, which included Mauritius, etc. They bred very fast, and in a few years the Locusts seemed exterminated. The Grakles then began to dig and examine the newly sown fields; on which the colonists, concluding that they were devouring the seed, when they were in reality seeking the Locusts' eggs, took the alarm and got them exterminated by Government. In a few years they perceived their error, for the Locusts soon commenced their ravages again. Upon this the Government procured a new supply of Grakles, which were given in charge this time to their officers; the physicians being instructed to declare their meat unwholesome food. This extraordinary care, however, proved injurious, as after the birds had cleared the islands of the Locusts and their eggs, which infested the coffee plants, the birds began to injure the grain crops and orchards, and even to kill young pigeons and other domestic birds; on which, means were taken by the Government to keep down their numbers by a measured destruction."—Vide Carpenter's Zoology, 1844.

It appears, according to Whitelaw in Goldsmith (1849), that a species of Blackbird, similar to the one of California, is found in immense numbers in Southern Russia, in the Crimean and Caspian countries; also, in Poland, the Holy Land, Arabia, Lower Egypt and the shores of the Mediterranean Sea. It is held in great veneration by the Turks and Arabs, who will not suffer it to be killed. It is called the Rose-colored Blackbird, and feeds on *Grasshoppers, Locusts* and their eggs and larva, of which it can devour incredible numbers in a day. It was also observed in the colony of the Cape of Good Hope, by that indefatigable naturalist, Le Vaillant. In the works of the great Aldrovandi, of Bologna in Italy (1599), they are called Sea Starlings. No doubt they are intended in California to act as a check on the increase of Grasshoppers and Locusts. The description which Alexander Wilson has left of the red-winged Starling of the Southern Atlantic States (1810), agrees precisely with the habits of our Blackbird proper, and its companion, the dun-colored Thrush; as they combine together in immense swarms in the summer and fall months. The male of the California Blackbird is of a glossy black, flashed with a green burnish in the sun's rays; its eye is pearly white, the inner part of wings colored, at times white, and then change to rose red; it is about ten inches long, and weighs from two to three ounces. The female is all black in plumage. Its companion, the Thrush, is of a grayish, sprinkled and striped black in the male, and in the female blackish on its upper parts, and dun color on its breast and belly. It is about one-sixth smaller than the Blackbird.

Wilson estimates that two millions of the Starling will consume the enormous amount, in three weeks, of sixteen thousand two hundred millions of the eggs and larvæ of Grasshoppers and other kindred insects. The combined ravages of such a hideous host of insect vermin, as Wilson remarks, is enough to spread famine and desolation over a wide extent of cultivated country.

It will thus be seen that in the order of Providence the enormous number of these birds found in California and the Rocky Mountain country, is intended as a positive blessing, for all time to come, to the people who may make it their home. When these regions come to be filled up, in the course of two centuries, with a numerous population of herdsmen, miners and cultivators of grains and fruits, the value of this bird will be keenly appreciated, and no doubt suitable laws made for its protection. An old settler informs us, that this bird sometimes becomes a great ravager of the grain crops. In the valley of the Pajaro they have appeared in some years in flocks of millions, and done great injury to the wheat and barley, when the grain was ripening. "This also is an evil," but a much milder one than Grasshoppers.

To form an idea of the difficulty and time it takes to thoroughly study and describe any species of insect or animal, we will mention that it took the celebrated French Entomologist, Peter Lyonnet, *seven years* to analyse the anatomy of a *single insect*, a species of *Cossus* which inhabits or affects the willow trees of France. His work is entitled the *Traite Anatomique del a Chenille de Saule*, and published in 1762, in quarto, with eighteen plates, which were all engraved by his own hand, with a minuteness, fidelity and elegance that have seldom or ever been equaled, and which has been pronounced by the Elder Cuvier a *chef-d'œuvre* both of anatomy and engraving. Vide Whitelaw's edition of Goldsmith. We may here mention that the willows of California are affected with a similar species of insect, which may often be seen on the leaves of the tree in the shape of a brilliant scarlet excrescence, of the size of a grape.

OCTOBER 28.—*Addenda.*—After writing the foregoing, we were not surprised to meet with the following curious notes by the author of Insect Miscellanies and Transformations—London: 2 vols., 1831. We have added some hunted-up facts and authorities of our own to these. They are entirely confirmatory of the Jesuit accounts of Lower California, and the few notes we have gathered pertaining to the *Locusta* of our own State.

The English Consul Jackson, who is so honorably known in the annals of the American government, by assisting our shipwrecked and enslaved countrymen in Barbary in the early part of this century, wrote a work on the last named country, which is quoted in the above Miscellanies. "*Before* the plague of 1799," says this excellent man, "the face of the country from Mogadore to Tangier was covered with the Locusts, who ravaged the whole region from the confines of the Great Sahara; but on the other side of the river El Kos not one was to be seen, though there appeared nothing to prevent them from flying over. The water of the river appeared to be a barrier to their progress, for they were proceeding northward until they arrived at its banks, when they immediately turned to the East; and in consequence all the country North of El Araiche remained unravaged and abundant in grain, pulse and fruits; exhibiting a very striking contrast to the desolation of the adjacent district. The *usual* fate awaited this desolating swarm: a violent hurricane drove them in a cloud into the Atlantic Ocean, and the shore was rendered so noxious by their carcasses, that it is believed to have been the *cause of the pestilence which followed.*"

Frederick Husselquist, a pupil of the great Linnæus, who undertook a journey to Palestine in 1749, for the express purpose of studying the natural history of the *Locusta* of those countries, says, "The *Locust* is not formed for traveling over the sea; it cannot fly far, but must alight as soon as it rises; for one of them that came on board of us, a hundred certainly were drowned. We observed, in the months of May and June, a number of these insects coming from the South, and directing their course to the northern shore; they darken the air like a thick cloud; but scarcely have they quitted the shore when they who, a moment before, had ravaged and ruined the country, covered the surface of the sea with their dead bodies. Is not this a provision of the wise Creator to destroy a dreadful plague to these countries? For they seldom or never deviate from their course towards the sea." The above learned Swedish traveler and savan journeyed three years in Egypt and the Holy Land, where he died, to effect the purpose of describing its botany, natural history, and physical features; his works were afterwards edited by Linnæus, and published under the patronage of the government of his country.

Sir John Barrow, a learned and observing traveler, and who accompanied the English Embassy of Lord Maccartney to China in 1792, and was afterwards Governor General of India, resided for some time in the Colony of the Cape of Good Hope, on which country he wrote a book indited in the spirit of a careful observer, and which is well known to literary men. Speaking of the *Locusts* of South Africa, he says: "It is difficult to form an adequate conception of the swarms of these insects which in 1797 invaded the interior of the country. In certain parts the whole surface of the ground for an *area of nearly two thousand square miles* might literally be said to be covered with them. The water of a very wide river was scarcely visible on account of the dead carcasses of *Locusts* that floated on the surface, drowned in the attempt to come at the reeds growing in it. They had devoured every green blade of grass, and every green herb except the reeds. But they are not precisely without a choice in their food. When they attack a field of corn just come into ear, they first mount the summit, and pick out every grain before they touch the leaves and stem, keeping the while constantly in motion, with the same intent of destruction always in view. When the larvæ, which are more voracious than the perfect insects, are on a march during the day, it is utterly impossible to turn the direction of the troop, and this seems *usually to correspond with that of the wind.* Towards the setting of the sun the march is discontinued, when the troop divides into companies, that surround the small shrubs or tufts of grass, or ant-hills, in such thick patches that they appear like so many swarms of bees; and in this manner they rest till daylight. To effect their destruction, the farmers, at this time, drive large flocks of sheep among them which trample them to death. The year 1797 was *the third year of their continuance at Sneuwberg, and their increase had been more than a million-fold from year to year;* but the district had been entirely free from them for ten years prior to 1794. Their former exit was singular; all the *full-grown* insects were *driven into the sea by a northwest storm*, and were afterwards cast up on to the beach, where they formed a bank three and four feet high, and extending to nearly fifty miles. When this mass became putrid, and the wind was at southeast, the stench was sensibly felt in Sneuwberg, although distant a hundred and fifty miles."

Sir John Davis, late Governor of Hong Kong, in his work on China (1843), states that "*Locusts* are particularly dreaded in North China after severe droughts. Father Bouvet, in 1693, relates that in Shantung (between Pekin and Canton) the country was laid waste by a frightful multitude of Grasshoppers, called, from their color, the yellow insect. The air was full of them, and the earth covered in such a manner, even in the great roads, that our horses could not move without raising clouds of them at every step. They had entirely destroyed the harvest in this part of the country; but for a league off from our line of travel, all was perfectly free." The ravages of the Locust have been noted many times in the annals of China; as Davis adds, "they are said to occur when *great floods have been followed by a long drought.*"—Vide, vol. 2, page 368.

That great philosopher, professor and traveler of Russia, under Catharine, Pierre, Simon Pallas, in his work on the Crimea (1793) appears to have carefully noted the *Locusta*, the known-of-old ravagers of those countries which are at the present time the theater of sanguinary strifes for the very same objects that stimulated the bloody wars of a thousand years of Christians and Turks—and even was one of the primal objects of the discovery of America by Columbus, viz: the rescue of the Tomb of Jesus Christ from the hands of Infidels.

Well, old Pallas speaking in his Russian travels of the *Locusta* of Italy, indites as follows: "In serene weather the *Locusts* are in full motion in the morning, immediately after the evaporation of the dew; and if no dew has fallen they appear as soon as the sun imparts his genial warmth. At first, some are seen running about like messengers among the reposing swarms, which are lying partly compressed upon the ground at the side of small eminences, and partly attached to tall plants and shrubs. Shortly after the whole body begin to move forward in one direction, and with little deviation. They resemble a swarm of ants all taking the same course, at small distances but without touching each other; they uniformly travel towards a certain region as fast as a fly can run, and without leaping, unless pursued; in which case, indeed, they disperse, but soon collect again and follow their former route. In this manner they advance from morning to evening without halting, frequently at the rate of a hundred fathoms and upwards, in the course of a day. Although they prefer marching along high-roads, footpaths, or open tracts, yet when their progress is opposed by bushes, hedges, and ditches, they penetrate through them: their way can only be impeded by the waters of brooks or canals, as they are apparently terrified at every kind of moisture. Often, however, they endeavor to gain the opposite bank with the aid of overhanging boughs, and if the stalks of plants or shrubs be laid across the water, they pass in close columns over these temporary bridges, on which they even seem to rest and enjoy the refreshing coolness. Towards sunset the whole swarm gradually collect in parties, and creep up the plants, or encamp on slight eminences. On cold, cloudy, or rainy days, they do not travel. As soon as they acquire wings, they progressively disperse, but still fly about in large swarms."

FARM STOCK, ETC.

French Merino Sheep.

HAVING been engaged in importing and breeding FRENCH MERINO SHEEP for several years past, I can now furnish RAMS and EWES, either imported, or raised by myself from imported stock, equal to any that can be found in this country or Europe.

I was awarded all the prizes on French Merino Sheep at our last State Fair; and all the premiums awarded to this class of Sheep at our last National Fair, and the most of those at the State Fairs of CALIFORNIA, Michigan, Indiana, Missouri, Wisconsin, and also at the Provincial Show of Upper Canada, for the present year, were awarded either to Sheep raised by myself, or to stock from Sheep raised by me, and sold to others.

CIRCULARS, giving a full description of my flock, sent by mail to all applicants. Information can also be obtained of the Editors of the CALIFORNIA FARMER.

Prices as low as the *same quality* can be purchased of any other person, and Sheep delivered in New York, free of charge. JOHN D. PATTERSON,

WESTFIELD, Chautauque County, NEW YORK.

An American Reaper in Sweden.

We take great pleasure in placing before our readers the following letter from Sweden, upon the subject of Agriculture. This letter was addressed to Dr. C. F. Winslow at New York, from a friend to whose order he had shipped one of the famous American Reapers. The *first* introduced into that section of the world, its advent and use, it will be seen, excited as much interest almost as the starting of Fulton's first steamer.

To Dr. Winslow belongs the credit and honor of recommending and shipping an American Reaper to Sweden, and we surely rejoice to accord to him all honor. Our readers have often been favored with the deeply interesting letters of Dr. Winslow, and we are now under deep obligations to him for his great kindness in favoring us with this letter for publication; we know all our readers will be pleased also, for this letter is of great importance to all the working interests of our country. We received a very cordial private letter from the same source, and are most happy to know that the California Farmer is so highly prized in Europe; we are doubly glad for California's sake.

It is proper to state that A. W. Lindgren, Esq., the writer, cultivates 800 acres of land, and his example in now introducing Reapers and other implements, will do great good to American Industry. Wishing great success to our brethren the Swedes, we should be glad to hear from them often, as well as our good friend the Doctor.

Ystad Kopingsberg (Sweden), Aug. 18, 1857.

My Dear Doctor: To your favor of the 9th last month I don't think I have given any answer. I have been so busy during the absence of my brother and the harvest season coming on, that I have had no time for anything but the work on hand; besides which, the arrival of the famous Reaper gave the cream on the top of all. That machine is indeed worth both having and seeing. The wheat and rye harvest was over when it arrived, but we tried it on oats and barley. It works well, but the field must be clear of stones and sods, otherwise it does not go so well, but stops on being filled below the cutters or knives. The first time we tried it was in an oat field, in which the straw at the outside was a little short, so it just cut the tops off, and a peasant neighbor coming along the road asked if we were thrashing the seed on the field? I told him yes, if we only could succeed. He stood gaping there while we were fixing it to cut closer to the ground, then I told him if he wanted to look on he had to pay a dollar for the amusement; at which he stared and drove to his own dominion, seating himself on the top of a wall dividing our land. We started again and the Reaper worked well; then you should have seen him sitting on his wall as we passed close by, just like a Kanaka, mouth wide open, and the eyes staring as if ready to fall out and down in his lap. I took hold of the team and set the horses trotting; then he could stand it no longer, started for his house, and out he came again with his whole household, wife and children, and sent to his neighbors, and in less than no time the field was covered—each and all in their own particular, comical way, expressing their astonishment. My brother and I were very much amused at them. Yesterday and the day before we had visits from all quarters round here; farmers, overseers, baronets and dukes; and we gave them a splendid dinner. They were all delighted, and I expect many will next season have such a one. But the thing is they must have their soil fit for the use of it; that is, have all stones, if not bigger than a fist, taken off the fields, and sods also. We are, to-day, having two carts and six men out picking stones off the fields which we, this fall, intend for wheat and rye; then we, next year, can, without hesitation of getting the reaper broken, start in on a small trot, and it will indeed do the work of fifteen men. I have remarked that the thicker the grain and the more resistance the cutters have to overcome, the better it goes; but this year, on account of the want of rain, the grain crops, and particularly the barley, are thin, and it don't cut so well. It also cuts better by driving in a circle, as it keeps the cutters in a more even motion, as the horses by turning always slacken off in their trot.

I found in a box attached to the inside of the reaper, a price note of several other agricultural implements, of which I wish you would ask Mr. Burrall to send me, one shell-wheel plow and one horse-hoe, fit to take away the weeds of turnip and carrot fields. We have latterly started, on an extensive scale, the cultivation of root fruits, as being an excellent food for cattle and sheep. We have this summer increased our flock of the latter to a couple of hundred.

Among other things that I have been thinking of is a thrashing machine. We have one, but I guess you have some that are more suitable. I have read in the Farmers' Magazine, from London, that they have some much better than ours; but they are so costly that I don't want to purchase any of them. How much would one cost in the States, carried by two or three yoke of oxen, thrashing 200 bushels wheat a day (ten working hours), clean it from the straw, and winnow it, fit for the market?

I expect it may not be too late this fall to find a vessel for any part of this country or Denmark; should it, however, opportunity may occur early in the spring. Also, if you come across any well made ox yokes, I wish you would send me one, with bows, ironed and neatly painted. I think those that came from the States for the Islands were more adapted for working the oxen than these we use. It is indeed singular in all old countries, the people in general have the greatest aversion for any new things, and prejudge them as good for nothing, without having as much as seen it. So it was with the reaper; many told me I was throwing away my money. I asked why? Because those things are not fit for use in this country. I told them your nation were too practical and wide-awake to use a thing that they did not find useful. They are now shut up forever on that score.

This year in old Sweden has been very unhealthy, and particularly so this summer, on account of a real tropical heat; the thermometer has been up as high as 80 and 90 degrees of Fahrenheit; and, if I mistake not, most of the time it was not warmer at the Islands. For my part, I can safely say that I never suffered more from the heat at Lahaina than I have done here this summer. The cholera has now, in a few places, taken a start, but I hope we will soon get a change. September will soon set in. We have had a few showers of rain and a great deal of thunder lately, which in some measure has purified the atmosphere.

My dear friend, I wish you all the happiness you and yours can enjoy in this world; and will always remain yours sincerely.

A. W. Lindgren.

The Great Want of the State.

To the Editors of the California Farmer:

The intelligent and thinking men of our State have long felt that a glorious climate, an inexhaustible supply of gold, and the richest and most varied productions of the soil, do not constitute a prosperous and vigorous State. Other elements must be woven into the texture, and other combinations formed to develop its resources, and insure its vigorous and healthy growth. Gold and silver are desirable, a rich soil and healthy climate, indispensable, it is true; but what are all of these, without the farmer? A State may exist, but without the latter, never.

To secure this population to the State has long been the study of many of our best citizens. Nothing efficient has as yet been done. The capabilities of California are very generally understood. The superior inducements held out to all classes of our intelligent and industrious citizens, are well known. For years past thousands have been anxious to go and dwell with us, but, the high rate of fare has been, and is now, the great barrier rising in their way. They cannot pay the enormous charges demanded by the Companies, thus far.

Now, more than ever before, are the eyes and thoughts of thousands upon thousands, turned to California, and five thousand per month would now go there if they could, for a reasonable fare, on safe ships. If the old Companies should put the fare down at a low figure, the people would be afraid to venture on their rickety old steamers. However low the fare, however great the inducements to go, most men value life too highly, to trust it in those gaudy sepulchers of so many many hopes and bright expectations. Years ago I have heard miners, and others far in the interior, say that the Steamship Companies were driving thousands from the State, by their suicidal policy. Many have said to me, if we could get our families here, for any reasonable price, we should never think of returning to the East. Here we should be glad to spend our days; but it would take years of toil to earn enough to get them here. So we must reluctantly forego all the real advantages of a home here, and return to our loved ones.

Every intelligent citizen of California has long deplored this state of things, and hoped for better and brighter days. More than one year since, it was proposed to start a new line of steamships, that would obviate all the objections urged against the other lines. To the surprise of many this enterprise was met at the very outset with puerile objections, urged by some, otherwise intelligent and good men. They declared that there was more population there now than was really needed; that there were many unable to get any employ there, and that there was no need of any more people. Can any one suppose for a moment that if San Francisco had fifty thousand intelligent industrious citizens added to her present population, she would not be more thrifty and prosperous than she now is? So if half a million could be added to your population in the State, would not the country be more wealthy and prosperous?

Farmers, Mechanics and Merchants would thrive, new sources of wealth would be discovered, wide and before unexplored channels of industrial pursuits would be thrown open. All this is well known; yet men are willing to say that no more are needed. Opposing interests impeded the progress of the new line, until the startling news of the loss of the Central America aroused the dormant minds of the whole country. It is to be hoped, now that the subject is again before the community, all its plans, provisions and arrangements will be fully examined, its claims investigated and its great advantages fully appreciated, and the golden opportunity California now enjoys will be improved to its fullest extent in every particular.

Here in New York its vast importance is felt, and the enviable position occupied by your citizens is perceived fully, and the wonder among all classes, is, that you cannot see there as fully what would confer a far greater honor upon the State, as well as lasting benefits upon the whole population.

The most experienced steamship men in the whole Union, and in Europe, pronounce it one of the grandest enterprises ever presented to the consideration of any community. Every feature of the enterprise is regarded as perfect in itself. These same men also consider that greater speed, safety and convenience, will be secured by Capt. Randall's plan, by far, than has ever been thought of by any other man or set of men since the days of Fulton. Capt. Randall now stands forth acknowledged by the most scientific men in the country, as the greatest steamship man in the world. Thousands here will be glad to follow when he may lead. He is a citizen of your State, and has waited patiently here one year, for his fellow citizens to lead the way in this great work. Will you go hand in hand with him, and thus lead the world in this labor of love, that will confer more benefits upon our country and race, than all the gold ever dug from our mines.

By the next mail, I will send you my reasons why I believe that the successful prosecution of this work will be an immediate and permanent benefit to the State of California and the world.

Yours, etc., B.

COMMERCIAL NURSERY,
SAN JOSE.

THE Proprietors of this old-established Nursery are now prepared to furnish to their friends and patrons the

Largest and Most Select Collection of
FRUIT, SHADE, AND ORNAMENTAL TREES, VINES, &c.,
ever offered in this State,
At Reduced Prices!

The FRUIT TREES offered by us are all grown and worked in the Nursery by us, from varieties obtained from the celebrated MOUNT HOPE NURSERIES, of Rochester, most of which we have fruited in our Orchards, and offer for sale only such varieties as we have found to be best adapted to this climate.

We have in Nursery:
25,000 APPLE TREES, of two years' growth, large size, thrifty, fine heads.
10,000 One year from graft.
1,000 Three years' growth, extra large, fine Trees, suitable for planting in yards and gardens, and such as cannot be obtained in any other Nursery in the State.
2,000 PEAR TREES on Pear stocks, one and two years' growth.
2,000 Pear, on Angiers' Quince, one year from bud.
3,000 CHERRY TREES, of twenty-five best varieties.
5,000 PEACH, of twenty varieties, one year from bud.
1,000 PLUM, of twenty best selected varieties.
APRICOTS, six varieties.
NECTARINE, SOFT-SHELLED ALMOND, &c. &c,
10,000 GRAPE VINES, Los Angeles, 1, 2 and 3 years' old.
3,000 Catawba, Isabella, Sweetwater, and foreign varieties.
GOOSEBERRY, STRAWBERRY, RASPBERRY, CURRANTS, &c., &c.

Catalogues can be obtained on application at the Nursery, by mail or otherwise.

All orders from a distance carefully attended to, securely packed and shipped to any part of the State, at the risk of the purchaser.

Our terms are cash, or short credit, on approved notes, on delivery of the Trees at the Nursery.

Explicit directions for marking and shipping should accompany each order, and when particular varieties are wanted, state whether and to what extent others may be substituted, in case the varieties cannot be furnished. Persons trusting to us to select varieties may rely upon being furnished with the leading sorts, and proper proportion for each season.

HOPE NURSERY.

THE Nursery is located second block northeast of the new Steam Flour Mill, on Seventh street, San Jose.

The stock consists of over seventy varieties, carefully selected. No pains or expense has been spared to obtain the best sorts, and to render these Trees what they are, THE BEST APPLE TREES, OF THEIR AGE, In California.

D. T. ADAMS.
v8-23-3m

THOMPSON'S

SUSCOL NURSERIES.

Situated on the Napa River, at Suscol Ferry,
NAPA COUNTY.

THE undersigned wishes to call the attention of the public and patrons of these well-known Nurseries to the present extensive stock of

FRUIT AND SHADE TREES,

GRAPE-VINES, etc;

Also a choice lot of *GARDEN and GREENHOUSE PLANTS, ROSES, SHRUBS, &c.,*
Comprising all of the Very Best Varieties of Cultivated Fruits, such as
APPLE, PEAR, PEACH, PLUM, NECTARINE, APRICOT, CHERRY, ALMOND, QUINCE, and FIG TREES, GOOSEBERRY, CURRANT, and RASPBERRY BUSHES, &c.,
Together with a large lot of
Nut-Bearing and Shade Trees,
Consisting in part of Black Walnut, English Walnut (or Madeira Nut), Shell-bark Hickory, Elm, Weeping Willow, Locust, Sugar and Silver Maples, &c.

Grape-vines of all the Best Foreign and Native Varieties.

The Fruit Trees offered for sale are all budded and grafted from the best, most approved and popular varieties now cultivated in the United States and Europe: all of which are growing, and a large majority of which have fruited in our own orchards and vineyards, under our own immediate inspection.

Our trees are of one and two year's growth from Bud and Graft, thrifty and of large size; all of which have been grown *without irrigation.*

We would call particular attention to our large stock of Apple Trees, which for vigor of growth and beauty of form, cannot be excelled in the State.

Our stock of Garden and Greenhouse Plants, Roses, Shrubs, &c., comprise all the leading varieties most desirable for beautifying private gardens and residences.

CATALOGUES containing a full list of all the varieties, with a brief description of each, together with their time of ripening *in the State,* will be forwarded either by mail or express, to all who are desirous of purchasing trees.

Orders from a distance will be promptly attended to, and carefully packed for shipment.

Our prices will be as low as *reliable Trees, Vines, &c.,* of like quality, can be bought for in any Nursery in the State.

Our terms are CASH on delivery of the trees at the Nursery or *approved* notes for a short time, bearing interest. Parties desiring to purchase can apply either in person or by mail, or by Wells, Fargo & Co's Express, to

S. THOMPSON, at the Nurseries.

Or to B. Perkins & Co., corner of Second and M streets, Sacramento; Derby & Baldwin, Petaluma; Goodman & Co., Napa City.—*Agents who will show samples and receive orders.*

☞ The above-named gentleman are our sole agents, in whom the public can place implicit confidence, and all who may favor them with their patronage can be assured that they are not getting Trees from *Auction Houses* and *Peddler's Wagons.* 21-3m

SEED, PLANTS, ETC.

New and Rare Plants, Vines, &c.,

JUST received:
New Rochelle, or Lawton Blackberry;
Brinckle's Orange Raspberry; Col. Wilder Do; Cushing Do; Thunderer Do; } New.
Linnæus Rhubarb; a new variety, originated by Myatt of England, who also originated the Victoria, and on which the Linnæus is a great improvement both in flavor and productiveness.
Concord Grape, &c. &c.

Those desiring something new and choice will please forward orders soon; as the supply is limited, owing to advance orders.

The plants can be forwarded by Express to any part of California.

WARREN & CO.,
2 Cal. Farmer office, 130 Washington st (up stairs).

Great Collection of Strawberry Plants.

THE UNDERSIGNED WOULD INform all Cultivators of the Strawberry throughout the State and Oregon, that they are now prepared to offer them a collection of Strong and Healthy Strawberry Vines, that have proved to be well adapted to our climate, and also have been fully tested as to their bearing qualities, by the splendid exhibitions of Fruit which they have exhibited throughout the season, in the markets of San Francisco. They now offer them to the public, with the assurance that they will not only prove equal to any plants offered, but superior, as their constant bearing qualities have so proved them, they having received the first premiums at all the Exhibitions thus far the present year. The subscribers offer the following kinds the present season:

THE BRITISH QUEEN.
This magnificent perpetual bearer has won laurels from all good judges of fruit, both as to its excellence of flavor, its remarkable size—often measuring five to six inches—and the abundant crop it yields. It has been generally adopted as one of the very best marketable fruits grown.

THE HOVEY'S SEEDLING.
Whatever may be said of other varieties, this splendid fruit should be grown in every collection. It is large, beautiful and delicious, and always brings the highest prices in the market. With the Virginia Scarlet as an impregnator a crop can always be secured.

THE LONGWORTH PROLIFIC.
This famous Strawberry is fully up to the great name it bears, and is one of the best varieties known. The Longworth Strawberry often measures five and six inches, and none more beautiful can be found.

THE EARLY OR VIRGINIA SCARLET.
This is the earliest variety, a great bearer, and should be in every collection.

The subscribers, having a very large stock on hand, can furnish plants in large quantities for making plantations, and for market, and persons wishing orders of from 10,000 to 25,000 plants will be dealt with on very liberal terms.

As the undersigned are fully able to supply the market, purchasers will do well to call at the office of one of the partners, on the corner of Sacramento and Drum Streets, where specimens can be seen, and also at the Gardens at Oakland, where terms and prices can be known, which will always be the most liberal.

WOLF, LUSK & CO.,
Strawberry Plantations,
Oakland.

N. B. Samples of the Plants can be seen at the office of the Farmer, where orders can be left. v8-16-3m

Seeds! Seeds! Seeds!

JUST received by Express, a large assortment of Fresh FIELD and GARDEN SEEDS, and will constantly receive by every express for the season, from the best growers in the Atlantic States, so that purchasers may rely with confidence on any seeds they may purchase from our store.

All orders from the country, accompanied with the cash, will be promptly attended to, and faithfully executed.

Liberal discount made to Dealers. Catalogues forwarded to parties desiring same.

Onion seeds—Red, White, and Yellow.
Cabbage, of sorts. Carrot, of sorts.
Beet—Large White Silesian. Red Mangelwurzel.
Cauliflower, of sorts. Broccoli, of sorts.
Melons, of sorts. Cucumbers, of sorts. Etc., etc., etc.
Peas—extra Early, of different kinds.
Extra Beans of different kinds
Fruit seeds, of all kinds.
Tree seeds, of different sorts—Osage Orange, Black Locust, Honey Locust.
Grass seeds—Timothy, Ky. Bluegrass, Red-Top, Lawn and Rye-grass, Clover (Red and White), Winter and Spring Vetches.
Bird seed—Canary, Millet, and Hemp. Together with a regular assortment of all kinds of seeds.

—ALSO—

50,000 Fruit Trees, of the choicest kinds.

☞ All orders forwarded to J. P. Sweeney & Co., Seedmen and Florists, will meet with immediate attention.

J. P. SWEENEY & CO

17 San Francisco.

SEED WAREHOUSE.
No. 110 California street,
(Established in 1850.)

THE undersigned, successor to the late firm of J. M. Moore & Co, has constantly on hand, and receives by every Express and clipper ship from the Atlantic States and Europe, additions to his already large assortment of choice

Field and Garden seeds, Flower do., Fruits do., Tree seeds, Canary, Hemp, Millet, Rape and Maw seeds, Herb seeds, French Sugar-Beet seed, Chinese Sugar-Cane seed,

DUTCH BULBOUS ROOTS, and other FLOWERING ROOTS, BULB GLASSES, GARDEN TOOLS, &c. &c.,

which he offers to the Farmers and to the trade throughout the State on liberal terms. The old and wide-spread reputation of this House, of furnishing the best Seeds that can be procured in the Eastern States and Europe, is a sure guarantee that every article sold will prove true to the label, and will grow, if properly planted. Most of the Garden Seeds are raised and put up by the Shakers, at New Lebanon, New York.

N. B.—Parties wishing small papers of Seeds for samples, can have the same forwarded by mail (postage paid), by forwarding the cash, at the rate of 25 cents per paper; also, packages of Flower Seeds forwarded through the mail at the same rates.

Catalogues furnished, on application, with prices attached.

For sale, wholesale and retail, by
S. W. MOORE,
Importer and Dealer in Seeds, &c.,
v8-2-3m No. 110 California st., San Francisco.

To Seedsmen, Planters, &c.

THORBURN'S Preliminary Wholesale Priced List of **Vegetable and Agricultural Seeds, Dutch Bulbous Roots, Double Dahlias, &c.,** for the Fall of 1857, is just published, and will be mailed to dealers and others requiring seeds in quantities, inclosing a stamp for return postage.

This year's Seeds, so far as harvested, are of prime quality, generally abundant, and prices correspondingly moderate.

J. M. THORBURN & CO., Seedsmen, &c.,
v8-17 3m 15 John street, New York

New Seeds.

FINE LAWTON BLACKBERRY, very choice; the *only* lot imported.

New Melons, comprising, Hybrid Persian, Green Flesh, Bromham Hall, Trentham Hall, Hammond's Green Flesh, Honfleur Persian, Hybrid Persian, Yellow Flesh Hybrid, Webber's Golden Beechwood.

Cucumbers—Walker's Rambler, Manchester Prize, etc.

Flower Seeds—New Balsams, German Asters, Pansies, Picotees, Verbenas, and other choice Seeds, fresh and pure.

One case Fruit and Ornamental Tree Seeds, containing all the choicest Tree Seeds that can be obtained in this country or Europe: Pear, Quince, Apple, and other Fruit Tree Seeds.

Orders will be filled in rotation. WARREN & CO.,
2 California Farmer office 130 Washington st.

FRUIT TREES.

J. R. RAY,
Importer and dealer in
Foreign and Domestic Seeds, Trees, &c.,
Has for sale at his Seed and Nursery warehouse,
No. 90 J street .....Sacramento
THE CHOICEST STOCK IN THE STATE,
Comprising
Garden, Field, Flower and Tree Seeds,
Fruit and Ornamental Trees and Shrubs, &c.

☞ Orders, per Mail or Express, promptly attended to.
v9-2 3m J. R. RAY.

The California Farmer.

SAN FRANCISCO, FRIDAY, FEBRUARY 5, 1858.

STEAMER EDITION.

A Plan to Save the State

The whole cost of supporting the Prisoners, by building our Public Works, and thus advance the prosperity of our State.

We desire to call public attention to the subject of the State Prison, and the disposition of our convicts, without repeating anything which has been written or published on the subject heretofore; nor would we consume time and space in quoting what has been so ably and justly said, both by Governor Johnson, in his Message, and also by Governor Weller, in his Inaugural, to both of which we would refer.

In the first place we would suggest that the present Legislature abolish the present Penitentiary at San Quentin. Secondly, let the Legislature now in session charter the California Pacific and Atlantic Railroad, from San Francisco, via Santa Clara, San Jose, Monterey, Los Angeles and San Bernardino, to the eastern boundary of the State, to intersect the great National Pacific and Atlantic Railroad, which Congress will, at its present session, charter, and which *will be built!* Thirdly, let the Legislature pass such laws as will enable the State to put the prisoners (convicts) to work on said road, under such regulations and restrictions as may be found necessary and expedient.

To give some idea of the plan in which we should accomplish this great work, we will here state, in as brief a manner as possible, the way in which we should work the *five hundred* convicts on said road. First, have the road surveyed and located; then build five convict stations—one at San Francisco, one at Santa Clara, one at San Juan, and two others below these, at the most suitable points. These stations are to be temporary, and only to serve until the road is completed to them, when they should be moved forward, and again used in the same way.

When you have thus prepared your main stations (the labor all being done by convicts), let the superintendent (we would have no contractors), lay down a skeleton track on said road. On this track we would build iron cages, or calabooses, moveable, to serve as guard-houses for passing the prisoners from point to point, and from their work in the day time to their main station, where they may be subsisted, and guarded during the night by such guard as the State may find necessary. In this way the men can be dispatched to their work on the road in a very short time, by which means they can be worked all of ten hours per day, which will give sufficient time to attend to provisions, camp duty, &c. In this arrangement you *systematise* the labor of the convict, working him in the open and pure air ten hours in the day, which will give him ample time to attend to his private matters, such as washing, cooking, reading, or such other exercises as may be found necessary for his amelioration; for, disguise the fact as we may, this should be the main object of a Christian people, to wit, to improve and reclaim the vicious. We are firmly impressed with the belief that if this system should be adopted, that you would not only save the State from the loss of millions of dollars, but in the end it would be found that the convict, after he shall have worked out his time for which he was sentenced, he would have acquired such habits of industry and close application to business, that, should he survive his term, he will not be ashamed or afraid of work, but could and would go forth able and ready to earn an honest living. Besides, you remove the facilities for their congregating together in idleness, for the purpose of concocting mischief or planning escapes.

With five hundred able-bodied convicts you would be astonished to see what amount of work could be done and road built in the course of twelve months. The road would run through, for the most part, agricultural districts, where all kinds of vegetables and meats could be had in great abundance and cheap. We are satisfied that in a very few years we could not only have completed the great national road from San Francisco to the eastern boundary of the State—say San Bernardino, or Fort Yuma; but eventually we should be able, with the same labor, to have constructed a railroad from San Francisco to Sacramento City, thence to the Utah line north, to intersect another road which will be built to St. Louis. Not only this, but we shall want a road to the Oregon line.

We do not say that all this can be done at once, nor in a short time; but let us begin aright—let us abandon the present erroneous system, and adopt, as we believe, a wiser and better system; for, as society is now organized, we fear that the time is far distant when we shall have a less number of convicts at the charge of the State.

We are glad to find that both Gov. Johnson and Gov. Weller recommend the abolishing of the present State Prison system. We have read their views and statements on the subject. We trust that we have stated our views in such a way as to awaken due attention to the subject, and hope the present Legislature may be enabled to digest some plan by which we may get clear of the present ruinous system, and adopt this or some other, which will be more in accordance with the times and age in which we live.

Our Subscribers East.—Those patrons of the Farmer who have ordered it sent to their friends East, should bear in mind that when the time of their subscription is out we stop forwarding until the new subscription is paid. Such persons as have been receiving the Farmer from their friends, and who do not continue it for them, should remit to us if they wish the paper continued, as our terms are always *in advance*.

The Flour and Grain Market

We present such facts in this issue as we believe to be reliable, and as we have no other interest than the public good—having no party clique to serve, and no dollars and cents to gain or loose, we shall begin with the assertion that there is no fear of famine. We have never doubted but that there was a sufficient crop to carry us safely through till next harvest, and leave a balance on hand. We could publish a column of facts were they necessary to prove our position, but we shall only name a few.

The reports from Napa county, from the Assessor, and the real harvested crop—as reliance can be placed upon the warehouse reports, as reported in the Napa Reporter—make a difference of more than two-thirds, there being nearly *three times* the crop harvested in that county that was reported; and it is so in many other counties, it being impossible, from the manner in which many reports are gathered, to give the whole crop of the State.

Since the recent rise in Wheat, from which is based the speculation in Flour, it needs no wiseacre to see that the *exorbitant* price now quoted and the price at which Flour is now *held*, that it is not a legitimate rise; it is much above its real value, and we are greatly mistaken if the 2½ and 3 per cent interest money paid, does not affect the price the wrong way for the holders, by the sailing of the steamer the present week, the 5th—and we hazard but little in guessing, that Flour can be easily purchased by March 1st, at $16, if not less.

We make no boast of complete knowledge of every lot and parcel in the market, nor would we attempt to give, like some of our journals, the precise number of barrels on hand, and the amount required for consumption; but there are *signs* not to be mistaken that indicate a want of confidence in the holder at the present moment, and our only or chief care is, that the *producers*, the growers, may not have been led astray by false hopes, and thus suffer loss. We advise them *to sell now*. There is a cloud in the East "no bigger than a man's hand," yet it will soon show its power, and we pity those who feel its grasp. We can give the names of parties in several cases, where the use of Flour has nearly ceased; and several instances, where even the sellers have cautioned their custom to purchase in small quantities for a little time. We do believe there is amply sufficient in California for our own use, and we know Oregon can spare a generous quantity in case of need; and as we have before said, our people can live well on corn meal, barley meal, rice, hominy, oat meal, potatoes, fruit, game and fish. Can our people suffer famine with such a market as we have?

We repeat these things, to show the *impossibility* of any suffering arising from any fictitious price that may be demanded for Flour, for none are *compelled* to buy at such prices as to cause their suffering. We will give a few facts, that have come to our knowledge within the past week. A dealer, well skilled in trade, remarks to parties that Mr. ——— is buying up all the Wheat he can lay his hands on at 5¾ a 6 cents; and this report goes from mouth to mouth; the warehouseman, wishing to retain storage as long as possible, reports to his man these facts and urges him to "hold for higher prices," thereby receiving more income; he may honestly believe it—and the grower may be induced to believe it, and "holds to his loss."

In the instance above alluded to, it was widely quoted, and as the party named was using considerable for milling, it was believed; but what was the result? Another party, wishing to sell, calls upon the party supposed to be a good buyer at *high prices*, and lo! *he, himself*, is in the market a *seller*—and the second party was glad to find a market at 5¾ cents.

Another instance: A party came to the city, believing he could realize 6 cents, but we were informed by him last week that he sold at 5¾ to 5¾c. Another seller came with a very large amount, some 10,000 bags (we give it as reported to us), and expected 6c, but we could not learn of sales or offer over 5¾c. We give as reported to us, and we do not really believe sales to any amount, real, *bona fide* sales, could be effected for *cash*, and that is the test of value for over 5¾ to 5¾c, best, at this time. Neither can we learn of any large sales of Flour for cash at anything like the quoted prices.

Now we believe the cause of the present rise results from the fact that most of the Wheat has been sent forward. Yet there is much behind, and speculators believing *all* has come forward, desire to "make a penny," but it will be "building castles in the air," for the very manner in which the parcels come in, shows that it has been held, and more is still held, by the farmers. By reference to our notes we find that in the last six days there has come forward, all in small parcels, about 6000 bags Wheat, and there has also arrived about 4000 bags Corn, Barley and Oats, 4000 bags Potatoes, and about 3500 bbls Flour. Thus provision poor in, enough to defy *famine*, for these last-named articles can be made almost as useful, at least can and will take the place of Flour, until the price returns to its real value.

While we would deprecate speculation in breadstuffs, we at present see a redeeming fact—the producers reap the largest gain thus far. If they will now show their hand, bring forward the balance of their stock and relieve the market, the news of the *fall of Flour* will go forward, and we shall have little or no competition next season; and the people will suspend the use of Flour in many cases till this is done.

We quote Flour this day at prices nominal; Wheat ditto; although the prices quoted are—Flour (domestic) $15 to $20; Gallego and Haxall, $20 per bbl; Wheat, for milling, 5¾ to 5¾c; for seed, 6¼ to 7c per lb. But we do not believe *cash* could be realized for any quantity at even less than quotations. Prices of Flour and Wheat will soon experience a decline—the very condition of things will force it. The speculation is over!

Plant Now.

We hear there is a great furor in Sacramento county among the Horticulturists, and that more trees will be planted this season, than all that have been planted in former years. This is well. We rejoice to hear it. But, say those who sell trees, this is owing to the great competition among the Nurserymen. Everybody goes to Sacramento to sell trees, and they have *ruined* the trade. No! not ruined the trade, but perhaps *themselves*. The true legitimate *Nurseryman*, one who enters not into this strife, one who pursues his true calling, goes on quietly; plants, buds, grafts, raises his trees, will find no difficulty in selling well grown trees at fair prices. And if in any strife or competition, hucksters and peddlers scatter their picked up commodities, and these are planted, it does but little harm; such stuff soon dies off, and then the true Nurseryman is appreciated, and his *stock* will be duly appreciated.

The present furor arises from the fact of forcing large quantities of trees at auction, and otherwise, the half of which are not reliable; but this low price stimulates the purchaser, and he thus acquires a taste and interest in planting at the present; and hereafter he will learn by his experience that *cheap trees don't pay*—he has to plant over again—the next time, he buys good trees of the regular Nurseryman.

Among those who have done a regular and prosperous business thus far, we are happy to learn none stand higher than A. P. Smith, Esq., of the Pomological Gardens, Sacramento, and his trees are indeed worth planting. Trees also from the Nursery of Mr. Bell, and of Reed Brothers, on the Washington side, have given great credit to these gentlemen, and we rejoice at their success.

Plant trees! Plant trees!! all—but plant good trees; however great the furor, or however great may be the error of those who unadvisedly purchase cheap trees, because they *are cheap*. Our glorious State is progressing, and this is a source of unalloyed pleasure to us.

Splendid Soiree at the Rassette.—One of the most elegant and fashionable assemblies that have been held the present season, took place at the "Rassette," on Monday of last week. The large dining hall of this hotel was literally crowded with beauty and fashion, and with the intellectually gifted. We have never witnessed at any ball or party in our city, so truly elegant, tasteful and chaste attire; nothing *outré* or unbecoming. The music was most excellent, and dancing was continued to a late hour. Beaming smiles, happy voices, merry hearts, with abundance of the "good things," gave a zest to enjoyment. To the Ladies of the Rassette great credit is due for the success of this happy affair, and Mr. French must have witnessed the result with just pride and pleasure.

Our Agent in Sacramento.—E. B. Davidson, bookseller, on Fourth street, near the post-office, is agent for the California Farmer in Sacramento, and will be supplied with papers every week. We invite our friends and patrons to his store, which is largely supplied with all the periodicals of the day, where they can be liberally and well supplied at moderate rates. The Farmer will always be found there. Subscriptions by the year and advertisements will be received by Mr. D., who will promptly forward all orders.

Strawberry Planting.—The present is a good time to plant Strawberry vines, and if now planted correctly upon good soil will produce a liberal crop the present year. Among the large and prosperous growers of our State, none stand higher than Messrs. Wolf, Lusk & Co., of Oakland. They have a stock of the very best vines, and we can cheerfully commend them to our readers. See their advertisement in another column.

The Artists' Gallery.—We do not believe that our citizens are fully aware of the extent and beauty of the Gallery of splendid artistical Pictures that can be seen in our midst, although it it is weekly and daily visited by hundreds. Vance's Gallery, on Montgomery street, is truly the Artists' Gallery. There are no *common* pictures hung up for display. As a true artist, Mr. Vance knows the points and lines, the shades and light necessary to draw out the features and produce a likeness that is at once recognized.

To Our Readers and Correspondents.

Our first thought is to express to our kind patrons our full sense of gratitude for the many evidences we have of their approval of our Journal. This number is the best evidence of our efforts to make return to them. Hereafter, we shall aim to mail our papers to them on Thursday, so as to reach the extremes of the State, by land, before Sunday, and thus overcome the irregularity of the mail. We ask a continuance of the kindness heretofore shown.

"Agricola" will appear in our next issue.

"Approbation," by "Edith Montressor," will appear.

"Bessie"—the length of the very interesting manuscript from "Bessie" compelled us to delay it till next number.

"To a Departed Mother," by "C. W.," was accidentally mislaid; will appear in No. 5.

We believe we can claim for our present number the particular notice of our friends.

Hutchings' Magazine for February comes to us replete with excellent articles and handsome illustrations. Among the choice contributions we recognize one from our valued correspondent "Agricola," in his usual admirable taste. "Alice" also graces the pages of this number, with her eloquent pen. We have not space for further notice, but would suggest that this number would make a very acceptable "Valentine" for your girl here, or the one you left behind you.

Holloway's Pills.—Thousands of involuntary suicides are committed by persons who take the metallic poisons misnamed "specifics." These pills soothe, cleanse, regulate, and invigorate the diseased and enfeebled internal organs instead of irritating and inflaming them like mercury, iron, and other mineral medicines.

Sold at the manufactories, No. 80 Maiden Lane, New York, and No. 244 Strand, London; and by all druggists, at 25c., 62½c., and $1 per box.

Hotel International.

San Francisco, as a city, can boast of a goodly number of hotels; we have them of all grades and in abundance, and we have many most excellent hotels, of which we have often spoken, and to which we have repeatedly called the attention of the traveling public. But our purpose now is to call the attention and inspire a true and correct opinion in the minds of all, far and near—those who visit the city often, or those who come but seldom—to a hotel that we feel approximates to the true standard of a first-class hotel. We have traveled *some*, and we can judge to a pretty good degree what *is* and what is *not* satisfactory to the traveling public, and having visited the various hotels of our own city and the other cities of our State, we do not hesitate to say the Hotel International stands pre-eminent as among the best, if not *the* best, in our city. The proprietors, Mr. and Mrs. Haley, are so well known that to name them is a guarantee of that attention, courtesy and kindness so acceptable and gratifying to all to wish to be "at home" at a public hotel. This Hotel is marked in its various departments by that air of elegance, cleanliness, order and quiet that give to the visitor a peculiar pleasure. The parlor, as a reception room, is not surpassed in the State; the dining-hall is large, airy and, what is of primary importance, elegantly abundant in good things at *eating* time; and no hotel in the State can surpass this one in the excellence of the table. It is only needed, however, in support of what we have felt it but just to say in regard to this hotel, to refer to its list of visitors and patrons, which can be found in another part of our paper.

We can also refer with much pleasure to the "New Year's Festival" which was had at the International. Mrs. Haley and the lady boarders received their friends in the parlors, as was the custom; and on that day over *five hundred visitors* feasted from the most sumptuous tables that were spread before them. We believe all who saw those tables will do this house the justice to say they were incomparable. We therefore say to those who visit the city, and to new comers to our bright shores, the International is truly worthy your attention, and Mr. and Mrs. Haley will welcome you, and the other co-actors, associates and co-workers, Messrs. Robinson and Nicholson, will do all in their powes to offer you a cheerful, contented and "happy home" at the Hotel International.

Treadwell & Co.'s Agricultural Warehouse.

"In making books there is no end."

We feel that in the duties of an editor there is no end—for it is work! work!! write! write!! Now we sat down at our desk to say a few words about the Agricultural Establishment of Messrs. Treadwell & Co., which is announced as "opening the ball" for the present season.

Now, what can we say? Treadwell & Co. have taken away our means of writing. There's not an implement, tool, or piece of machinery in all the agricultural code, but what he has talked about; verily, he has "stolen the march upon us," and left us nothing to say. His "machines" have gone over the whole ground; he has "reaped" the harvest before us; "winnowed" the good, and "blowed" the chaff from the field of his competitors. He has "dug" over the whole ground, "hoed" every lot and planted good seed, and now stands waiting the "harvest" of his customers.

The house of Treadwell & Co. we can refer to as the most extensive and complete in the Agricultural line, upon all the Pacific Coast; with a long established business; with ample means, and enjoying the full confidence of the public, all can rest assured that the advertisement which appears in our columns, is not only a reality, but large as this stock is represented, the half is not told them; for any observer of the large shipments of treasure made by this house through all the hard times, must know, such a capital will produce results. "Money makes the mare go."

We say then to all farmers and cultivators, to all mechanics and miners, read the advertisement of Treadwell & Co. Visit their warehouses at San Francisco and at Marysville, and the whole story is told; for "where there is a will there is a way," especially where there is *capital* to back it.

Education.

With an earnest desire to aid the glorious cause of Education, we shall offer to all Institutions our columns for Reports and Letters to advance their interests; and we will also be happy to give room for a brief card, of all Colleges and Seminaries of Learning, *free of charge*, as we intend to make a Directory in our columns for the general good.

The Beauty of Children.

A Word to Mothers.—There is no object in the world more pleasant to look upon than a beautiful child. Even the crustiest of old bachelors must acknowledge this in his heart, however disappointment may have soured his temper. Unfortunately, however, the freshness and natural bloom of childhood are often marred by disfiguring disorders. Sometimes we see youthful faces blemished with firy circles, and looking as if disease had been at work upon them with a pair of compasses dipped in red ochre. Of course every mother recognises this description of Ringworm, to which the still more disgusting cutaneous affection known as Scald Head is next of kin. Probably nine-tenths of us have had a touch of these unpleasant eruptive complaints at one time or other, and most of us know that they are not only disfiguring but excessively annoying and painful. We are aware too that most of the nostrums recommended for them merely spread and aggravate inflammation, and that it frequently leads to confirmed diseases of the skin. Under these circumstances it is to be presumed that all parents who are not conversant with the wonderful properties of Holloway's Ointment, will be glad to learn, on good authority, that it is a quick and thorough remedy for Ringworm and Scald Head as well as for other external diseases. The testimony which goes to establish the fact is incontrovertible, and every mother who wishes to see the faces of her darlings unclouded by eruptions, and their heads encrusted with excrescent matter, is entitled to know it.

Professor Holloway has obtained such a reputation throughout the world for his external and internal remedies, that his name must of course be familiar to all our readers; but after all there is no harm in giving point and force to general commendation by specifying certain diseases in which one knows that they have worked wonders. The effect of the Ointment in cases of Ringworm and Scald Head, is but a specimen of its marvelous operation in all skin diseases; yet we dare say there are many who have used it for boils, bruises, blotches, &c., &c., who have scarcely thought of it with reference to these two scourges of childhood. If any mother should try it on our recommendation, we have little doubt she will give it a permanent place in her nursery closet for the time to come. Much may be done to prevent the ordinary cutaneous diseases of children by proper diet, strict cleanliness and regular exercise in the open air, but after the disorder has actually developed itself, there is no curative so reliable as Holloway's Ointment.—[N. Y. Sunday Mercury.

Good.—It is seldom that a medicine meets with such general favor among all classes, and especially among the educated, as the Oxygenated Bitters. These Bitters are free from alcohol, and are a never-failing cure for dyspepsia.

Bryant & Co.—New Seeds.—We take pleasure in calling the attention of our readers to the advertisement of Messrs. Bryant & Co., in this issue. This house is among the oldest and largest established, and deserves the especial notice of purchasers. See their card.

PRIZES FOR SUBSCRIBERS.

We desire to offer, to all who feel an interes in the cause of agriculture, the following Premiums to those friends that wish to aid in the circulation of the California Farmer:

1. To every friend that will send us Three Names and Fifteen Dollars, a colored Plate of Fruits of California, as shown at Smith's Gardens. Valued at $3.
2. For Six Names and Thirty Dollars, the same Plate handsomely framed, or the Subscription for One Year of the Farmer.
3. For Twelve Names and Sixty Dollars, a copy of Fruits framed, and One Year's Subscription of the Farmer; or Volumes I. and II. of the Farmer, handsomely bound.
4. For Twenty-Five Names and One Hundred and Twenty-Five Dollars, we will give a rich framed Plate of Fruits, Volumes I. and II. of the Farmer, handsomely bound, Subscription for 1858 of the Farmer, and a Silver Medal.
5. For Fifty Names and Two Hundred and Fifty Dollars, we will give a full set of the Farmer (eight volumes) richly bound, a handsomely framed Plate of California Fruits, and the Farmer for Two Years.
6. For One Hundred Names and Five Hundred Dollars, we will give a full set of the Farmer, richly bound, Three Years' Subscription of the Farmer, Downing's Rural Essays, and a Silver Medal.

We make this offer, and hope to be able to present to a host of friends many rewards before the opening of the new year.

A Special Gift to Subscribers.

Desirous to introduce and to encourage the growth of all new and valuable products we propose to send to each and every new subscriber to the Farmer, or old ones, who express their desire, the following valuable new seeds:

One packet Apple-pie Melon;
One packet Chinese Sugar-cane;
One packet new Corn;
One pure Cuba Tobacco seed;
Or, five packets choice Flower Seeds.

The seeds will be sent by mail, with the Farmer, immediately upon the reception of the name, subscription, and requests.

Dues to the Farmer.—We send an extra number or two to all subscribers whose time has passed, and we send a bill. We trust they will feel we deserve the amount due the Farmer.

We believe every reader of the Farmer, will see that we are making great additions to the value of the Farmer, and we trust it will tend to keep all our readers for the current year, by a prompt remittance. Our terms are in advance always. Hereafter, when a subscription expires, notice will be given one number in advance, and as our rule will be strictly enforced, the payment should come to insure a continuance of their paper.

Laying Out Gardens.

☞ Those who wish their Grounds Laid Out in the best style, and those who wish them remodeled, can have them done in the most scientific manner, by sending to our Office their orders; or they will be waited upon, and designs made and Gardens completed from the rough sod. We have those under eye on whom we can rely to complete any plan of work of public or private Ground however extensive, and furnish all the required article of Trees, Vines, Shrubs, Plants, or Seeds.

Dec. 25th. WARREN & CO.

Lawton Blackberry.—A consignment of these valuable Plants were received by us by the last steamer, from Messrs. Seymour & Co. They came through in the most perfect order, and are for sale at our Office.

Booksellers', Publishers' and Manufacturers' Catalogues.—All Publishers, Booksellers, Manufacturers, Nurserymen, and Seedsmen, who issue Catalogues or trade lists, will have them noticed by forwarding them to us.

Our Subscribers can send money by mail safely. Register at the Post-office, and the money will come direct and sure.

SMITH'S NEW SEED STORE AND GARDEN ON J STREET, SACRAMENTO.—A. P. Smith, Esq., of the well-known Pomological Gardens of Sacramento, has taken the store No. 44 J street, having a large space near by for a garden for the display of his nursery trees, where he is enabled to show his patrons the product of his Nursery and Gardens. All the choicest trees from his place and seeds of his own raising, he will be happy to offer his customers. Mr. Smith has also built a very handsome Greenhouse on the rear of the lot, where he now has a splendid collection of his Camillias and Roses, and other plants worthy special attention.

Visitors to Sacramento, and all purchasers of trees, seeds, plants, &c., should not fail to call at Smith's and examine his collections; they are highly creditable, and always pleasant to see.

THE GREAT OYSTER.—BARRY & PATTEN'S MUSEUM.—Among the very large and handsome collection of fine paintings and very curious articles on exhibition at this famous resort, we noticed the great oyster, now a *petrifaction*, yet perfect in form, measuring twelve inches long, eight broad and three thick, and weighing *eleven pounds*. It was found near Monterey. We wonder if New Yorkers can beat that? Barry & Patten have the most splendid billiard room in all California; it is the very *ne plus ultra* of a billiard room. Although it is not our custom to speak of drinking saloons, however genteel, yet the Museum is worth seeing; there is no compulsion—a person is not *obliged* to drink; yet if he *will* drink, it is better to take *good* liquors than the vile and poisonous, drugged liquors so common in the saloons here. If a person *must* have it, better drink the pure, and it is known that Barry & Patten keep none but the pure.

NEW BOOKS,

☞ JUST received, from New York, several cases choice works; also, a complete assortment of Agricultural Books, to which we would invite the attention of our customers.

Frank Forester's Horse and Horsemanship of the United States, in two volumes; the finest work of the kind ever published in the country, can now be seen at our office, bound in different styles—Plain, and Turkey Antique. Having the sole agency of this valuable work, in California, we would invite lovers of the beautiful to call and examine the copies. Subscription books are now open, and those entering their names before the 20th inst., will receive this work at the earliest day. v9-1

☞ **Farm Stock.**—Having completed our arrangements for the importation of choice stock, we are now prepared to receive orders for any of the following breeds, and would call the attention of those in want, to our unsurpassed facilities for the importation and improvement of the choicest stock:

Thorough-bred Devon Cattle,	French Merino	do
Shorthorns	do	Spanish	do	do
Thorough-bred Ayrshire	do	Cotswold	do	do
Suffolk and Essex Pigs.		Chester White Hogs.	

Fancy Fowls—all the best varieties.

All communications addressed to us will receive immediate attention, and we shall be happy to correspond with any and all upon the subject. Address

2 WARREN & CO., Cal. Farmer Office.

☞ **GOUPIL & CO.**, Publishers and Importers of ENGRAVINGS, Manufacturers and Dealers in ARTISTS' MATERIALS of every description, 366 Broadway, New York, have constantly on hand a great variety of the above-named articles.

*** Catalogues sent per mail to all parts of the United States. v9-2

TO FARMERS.

☞ 10,000 pounds of ALFALFA or Chile Clover, just received and for sale at 20 cents per pound—by the bag only. This is gathered from the latest crop. Apply to S. BRANNAN,

v9-1 1m Corner Montgomery and California streets.

10 KEGS, 1000 lbs. NEW NUTMEGS; 100 mats Whole Cassia, in grain. Selling low.

v8-15 BRADSHAW & CO.

GRANTS TO LAND COMPANIES BY OUR LEGISLATURE.—In the Senate the Committee on Swamp and Overflowed Lands reported a bill repealing the act concerning Swamp and Overflowed Lands, granting certain privileges and tracts of land to the Tulare Canal Company. The Committee report charges of fraud and peculation. Another bill is before the Legislature, asking charters for companies in Los Angeles and other places, for the purpose of planting vineyards, &c. We hope our Legislature will grant every facility possible for advancing the cause of Agriculture, and grant bounties whenever possible. But we trust the severest penalties will be inflicted upon all parties that peculate or commit fraud under the cover of public grants. Our State has suffered enough already by grants of every kind, and has been retarded ten years in its prosperity for want of wise legislation. The present Legislature give tokens of greater wisdom in this respect.

SPECIAL NOTICES.

RARE SEEDS.

☞ WE have just received from the East some of the choicest FLOWER and other rare SEEDS, ever received in California; among them a small invoice of Pure LAWTON BLACKBERRY—the only lot in the country, and warranted fresh and pure, crop of 1857.

The collection was made by Mr. J. Q. A. Warren, and brought out by him on last steamer.

Also, opening, a case of FOREST TREE SEEDS—the finest assortment ever imported.

Those desirous of finding choice Seeds will do well to call at once at our office, 130 Washington st (up stairs).

☞ **A. W. FABER'S LEAD PENCILS.**—Lead Points, Propelling Pencils, Colored Pencils, White Crayons, Black Crayons, Slate Pencils, Red Chalk, etc.

These popular Pencils can be had of Stationers, Fancy Goods Dealers, and others in the various cities of California.

Extract of a letter from the eminent artist, Chevalier P. von Cornelius, Director of the Royal Academy in Berlin, 27th Oct., 1842: "It is scarcely necessary to say that I find Faber's Polygrades Lead Pencils in every respect most excellent. They are of all degrees of hardness and shade, and adapted as well for fine and firm outline as for finished drawing. The wood which incloses them has the necessary strength, but yields easily to the knife, and the lead never breaks away."

Extract from the Official Report of the Industrial Exhibition of the German Federal States, 1844, 3d Vol.: "Especially have the Pencils of Mr. A. W. Faber set at defiance all competition, and supplied every desideratum that the Artist can expect or desire in this particular."

Extract from the Report of the Great London Exhibition, 1851:

On referring to the Report, page 450, it will be seen that the Jurors have considered A. W. Faber's Pencils deserving of a more extended notice than has been accorded to any other Pencil Manufacturer. The Report further states as follows: "A. W. Faber's Pencils are of the best description, and the prices extremely low. They are exported throughout the whole civilized world, the demand being created by their good quality and cheapness."

Beware of Counterfeits!

The reputation of A. W. Faber's Lead Pencils has not failed to attract the attention of certain individuals, who have either attempted an imitation of the same, or have undertaken the sale of a counterfeit article, which, though of a totally different manufacture and very inferior quality, are marked, some with the name of the genuine, some with the names, *W. A. Faber, A. W. Fabre, A. K. Faber, C. W. Faber*, etc., and are disposed of as genuine Faber's Polygrade Lead Pencils.

Every person will please to examine carefully the stamps on each Pencil—"A. W. FABER"—and observe that each dozen bears on the label a fac-simile of A. W. Faber's signature; and and further, that every genuine Pencil sold in the United States, has impressed in the wood itself, "E. FABER, 133 William street, New York." E. FABER, Sole Agent.

v9-1 6m 133 William street, New York.

NOTICE TO NURSERYMEN.

☞ PARTIES who have ordered Nursery Stock from the Eastern States, to be forwarded by Express, should have made arrangements for the receipt of the same, or remitted charges, as all such freight must be prepaid without exception. Hitherto, a satisfactory guarantee from the shipper was considered sufficient—the charge to be paid at destination. Should any disappointment occur to our friends, this will be a sufficient explanation.

23 A. FROST & CO.

☞ **THORBURN'S Preliminary Wholesale** CATALOGUE OF VEGETABLE SEEDS, *of the present year's growth*, will be published on the 20TH JULY, and will be mailed to Dealers and others requiring Seeds in quantities, inclosing stamps for return postage.

J. M. THORBURN & CO.,

19-tf 15 John street, New York.

☞ **Wigs! Wigs!! Wigs!!!** — BATCHELOR'S WIGS AND TOUPEES surpass all. They are elegant, light, easy and durable.

Fitting to a charm—No turning up behind—No shrinking off the Head. Indeed this is the only establishment where these articles are properly understood and made.

v8-13 1y 233 Broadway, New York.

☞ **Counterfeit Wistar's Balsam.**—We would caution the purchasers of the *Balsam of Wild Cherry* against an imitation article which has made its appearance in many places, and which might deceive the unwary by its resemblance to the genuine bottle. Of the mixture we need not speak. Unprincipled scoundrels can always be found ready to counterfeit anything by which they can put money in their pockets, and they are sure to choose the most popular and well-known article on which to practice their villanies. It is a lamentable fact that there are also *dealers in medicines* who are willing to lend themselves to carry out this imposition, by selling such *trash* as genuine, because they can buy it for less than half the cost of the real article. Avoid such a man as you would a dealer in counterfeit money, for he is the greater scamp of the two.

They have never dared to forge the written signature of I. Butts, having a wholesome fear of the State Prison before their eyes. *Be sure that you find on the outside wrapper the written signature of I. BUTTS*, and you may rely upon its being genuine. Buy none other.

Seth W. Fowle & Co., 138 Washington street, Boston, Proprietors. Sold by their agents everywhere.

Agents—C. MORRILL, cor. Third and K, sts., Sacramento; H. JOHNSON & Co., Washington st., San Francisco. 4-1m

☞ **HAIR DYE! HAIR DYE!! HAIR DYE!!!**

Batchelor's Hair Dye is the Best in the World!

GRAY, RED, OR RUSTY HAIR DYED INSTANTLY TO a beautiful Natural Brown or Black, without the least injury to Hair or Skin.

Fifteen Medals and Diplomas have been awarded to Wm. A. Batchelor since 1839, and over 80,000 applications have been made to the Hair of his patrons of his famous Dye. Prejudice against Dying the Hair and Whiskers is unjust, as it would be against covering a bald head with a wig.

WM. A. BATCHELOR'S HAIR DYE produces a color not to be distinguished from nature, and is warranted not to injure in the least, however long it may be continued.

Made, sold or applied (in 12 private rooms) at the Wig Factory, 233 Broadway, N. Y.

Sold in all cities and towns of the United States, by Druggists and Fancy Good Dealers.

☞ The Genuine has the name and address upon a steel plate engraving on four sides of each bottle, of

WILLIAM A. BATCHELOR,

v8-13 1y 233 Broadway, New York.

☞ **Six Reasons why Everybody Uses LYON'S KATHAIRON.**—1st. It is the Cheapest preparation for the hair ever made. 2d. It is pronounced by all to be the Most Beneficial. 3d. It is the most Agreeable to use. 4th. It is the Cleanest and most Carefully Prepared. 5th. It is the most Highly Perfumed. 6th. It is the only article that never fails to give Entire Satisfaction.

The immense sale of the KATHAIRON—nearly 1,000,000 bottles per year—attest its excellence and universal popularity. Sold by all dealers, everywhere, for 25 cents per bottle.

OIL!

FOR QUARTZ MILLS.

STANFORD BROTHERS,

PACIFIC OIL AND CAMPHENE WORKS,

INVITE attention to the following Certificates from GRASS VALLEY:

NEW-ENGLAND QUARTZ LEAD, Dec. 23, 1857.

W. LOUTZENHEISER, Agent of Stanford Brothers, Pacific Oil and Camphene Works:

Dear Sir: I have now given those Oils from Stanford Brothers, which I purchased from you, a fair trial, and find them the VERY BEST I have ever used.

Z. WHEELER, Superintendent.

ALISON RANCH, Dec. 25, 1857.

This is to certify, that we have been using the Oils from Stanford Brothers Pacific Oil and Camphene works, for a long time, and find them of a superior quality.

JOHN ANDERSON, First Engineer.

ALTA HILL, Jan. 12, 1858.

I hereby certify, that we are now using on our Machinery, Oils manufactured by Stanford Brothers' Pacific Oil and Camphene works, purchased at their Agency in Grass Valley, and have no hesitation in saying I believe them to be superior to any other manufactured in the State.

L. CARLSSEN, Sup't Alta Mining Co. No. 2.

The SPERM OIL furnished to these Mills is worthy the particular attention of ALL who use OIL for lubricating purposes.

Proprietors of Sawmills, Gristmills, Steamboats, and other Machinery, throughout the State, supplied in quantities to suit, and quality guaranteed in all cases.

STANFORD BROTHERS,

PACIFIC OIL AND CAMPHENE WORKS

PHELAN'S MODEL BILLIARD TABLES

AND PATENT

COMBINATION CUSHIONS,

ACKNOWLEDGED BY THE BEST

PROFESSIONAL AND AMATEUR PLAYERS

TO BE THE ONLY

CORRECT CUSHIONS NOW IN USE.

THESE TABLES AND CUSHIONS ARE NOW SOLD as low as the *"OLD FOGIE"* Tables of the day. And as a proof of their superior merit, it is only necessary to call attention to the

Miserable Imitations

got up in this city, made from *Pasteboard* and old *Horse Blankets*, and palmed off on the unsuspecting as

PHELAN'S PATENT.

One of these miserable Imposters has been caught in the act. His name, and the name of the gentleman he deceed, will be the subject of another communication.

☞ Parties sending their old rails to the subscriber (who is now making these Cushions under Phelan's Patent), can have them covered with sets of the genuine article, and returned in twenty-four hours afterwards.

Just received, some splendid Model Tables, Oak, Rosewood and Mahogany, with Slate and Marble Beds. Also; Billiard Trimmings of every description.

Address M. E. HUGHES, SOLE AGENT, 180 Jackson street, San Francisco.

N. B. Phelan's "Game of Billiards," a work especially illustrative of the science of this Game (as "Hoyle" is to other Games), is for sale at the FARMER office. 9v-4 tf

HARVEST, 1858!

MACHINES AND IMPLEMENTS.

TREADWELL & CO.,

IMPORTERS,

N. E. corner California and Battery streets,

SAN FRANCISCO,

have now landing, and will receive by every packet from New York and Boston, the most extensive assortment of

FARMING MACHINERY and Implements,

ever brought to this market, embracing all the

Latest Styles and Improvements,

which will be sold at lowest rates.....consisting in part of:

REAPERS:

MANNY'S COMBINED REAPER AND MOWER, WITH WOOD'S IMPROVEMENT.—These justly celebrated Machines have become too well known in California to require more than a simple announcement where they can be had. We are sole agents for the Pacific coast, and none genuine elsewhere.

McCORMICK'S REAPER....This universally approved Reaper we keep constantly on hand, and are Agents of the Maker.

KETCHUM'S COMBINED REAPER AND MOWER....This Machine is now very popular—having been greatly improved the last two years.

BURRALL'S IMPROVED GRAIN REAPER. This Reaper cuts six feet, and is one of the strongest and most durable Machines in use.

SEYMOUR AND MORGAN'S REAPER; without the Raker attachment and all late improvements.

HUSSEY'S REAPER....Baltimore make.

PALMER & WILLIAMS' SELF-RAKING REAPER.

THRESHERS:

"HALL'S" 8 and 10 horse THRESHER AND SEPARATOR....This Machine we have had made for this season, with great improvements, and it will be the best *THRESHER* in market this year—34, 36 and 38-inch cylinders, and cannot fail to give entire satisfaction.

"SPENCER'S" 8 and 10 horse THRESHER AND SEPARATOR....This is one of the largest and most durable Machines that comes to California, and has been well tried, and found "good."

STEPHENSON & BIRDSALL'S 8 and 10 horse THRESHER AND SEPARATOR....A large, splendid Thresher, with late improvements.

WHITMAN'S 4 horse THRESHER AND SEPTRATOR....This is a very desirable Thresher for small Farmers. It is got up with great care, and will give good satisfaction.

EMERY'S 2 horse THRESHER AND CLEANER....Greatly improved over last year.

EMERY'S 1 and 2 horse THRESHER, WITH FAN MILL.

The above Threshers will be sold with or without Horse Powers.

"Haynes'" Heading Machines or Harvesters.

These Machines are in general use in the Western States, and are pre-eminently adapted to California.

HORSE POWERS:

SMITH'S 8 and 10 horse PLANET POWERS, WITH HALL'S IMPROVEMENT.

PERRAGO'S 8 and 10 horse PLANET POWERS....This is one of the most successful Powers in use; has taken a greater number of premiums in the Atlantic States than any other Power; is simple, strong, and durable.

WHITMAN'S 4 and 6 horse ROTARY POWERS.
BOGARDUS' 2, 4, and 6 horse do do.
FIELDS' 2, 4, and 6 do do do.
EMERY'S 1 and 2 horse TREAD POWERS.

This Machinery comes in compact cases, can be sent to any part of the State or Coast at small expense, and marked so that it can be easily set up.

Extra Castings, for all the above, constantly on hand.

The Celebrated Boston Steel Clipper Plow.

We have these Plows exclusively, and keep a stock on hand at all times. Extra points and parts can always be had.

This Plow can be run with half the power it takes for the "Peoria" Plow of same size, and must commend itself to all who wish to save "horse-flesh."

The Peoria Steel Plow

Constantly on hand.

These styles of Plows come 10 in a case, and the expense is very small in sending them to the remotest parts of the coast or interior.

HAY PRESSES—Several sizes; best makers.
Do. CUTTERS—Several sizes and kinds; hand and power.
HORSE RAKES—wood and steel teeth; 8, 10, and 12 feet.
GRANT'S GRAIN CRADLES—In cases of one dozen each.
Do. FAN MILLS. Also, the Boston Mill.
CORN SHELLERS—Hand and power.
Scythes and Snaiths—best steel Scythes and Lamson's Snaiths.
Hay and Barley Forks—2, 3, and 4 tine; of best makers.
Carpenter's Patent Wire spring-Tooth Horse Rakes, 10 to 15 feet long, with wheels, and seat for driver.
Ox Yokes and Bows—all sizes.
Churns—Thermometer, Dash, and Cylinder; also, Dog Powers for do.
Garden Barrows. Cauldrons and Furnaces. Cultivators.
Horse Hoes. Seed Sowers. Harrows.

Field and Garden Seeds

Of every description, *via* the Isthmus—this year's growth (1857).

Steam-Engines, 4 to 15 Horse Power.

Suitable for Ranches or Mining purposes.

Portable Flour Mills and Mill Stones—Noyes' make. All sizes, 16 inch to 4 feet.

Belting, Bolting Cloth and Packing—All kinds and sizes of the above.

HARDWARE—The best stock in the State.

MINING GOODS—All kinds in use.

COOPERS' AND TANNERS' TOOLS—Full assortment.

Baling Wire—Annealed.

Hay Rope—Best Manila.

Grindstones—Best dressed Nova Scotia; from 6 inches to 4 feet diameter, packed in casks in sawdust.

Wire Fencing—A neat article for inclosing Gardens, Heneries, &c. Also, for Ornamental Garden work, Grape and Rose Trellises.

Wooden Ware—In great variety: Tubs, Pails, Buckets, Measures, Baby Cabs and Wagons, Peach and Strawberry Baskets, &c, &c. 9v-4

MAGAZINES, ETC.

PHILIPS, SAMPSON AND COMPANY

COMMENCED ON THE FIRST OF NOVEMBER

A NEW MAGAZINE, TO BE CALLED

THE ATLANTIC MONTHLY.

IT will be devoted to LITERATURE, ART, and POLITICS.

THE AIM OF THE PERIODICAL WILL BE.

FIRST: In Literature, to leave no province unrepresented, so that, while each number will contain articles of an abstract and permanent value, it will also be found that the healthy appetite of the mind for entertainment in its various forms of Narrative, Wit, and Humor, will not go uncared for. They wish to say, also, that while native writers will receive the most solid encouragement, and will be mainly relied on to fill the pages of the ATLANTIC, the publishers will not hesitate to draw from the foreign sources at their command, as occasion may require, relying rather on the competency of an author to treat a particular subject, than on any other claim whatever. In this way they hope to make their Periodical welcome wherever the English tongue is spoken or read.

SECOND: In the term ART, they intend to include the whole domain of æsthetics, and hope gradually to make this critical department a true and fearless representative of Art, in all its various branches, without any regard to prejudice, whether personal or national, or to private considerations of what kind soever.

THIRD: In Politics the ATLANTIC will be the organ of no party or clique, but will honestly endeavor to be the exponent of what its conductors believe to be the American Idea. It will deal frankly with persons and with parties, endeavoring always to keep in view that moral element which transcends all persons and parties, and which alone makes the basis of a true and lasting national prosperity. It will not rank itself with any set of *antics*, but with that body of men which is in favor of Freedom, National Progress and Honor, whether public or private.

As an earnest of the material at their command, they subjoin the following list of literary persons interested in their enterprise, wishing it, however, to be distinctly understood, that they shall hope for support from every kind of ability which desires the avenue of their columns, and in the remuneration of which they shall be guided purely by their sense of intrinsic merit:

William H. Prescott,	Mrs. H. Beecher Stowe,
Ralph Waldo Emerson,	Mrs. Gaskell, Author of
Henry W. Longfellow,	"Ruth," "Mary Barton," etc.
Rev. F. H. Hedge, D. D.,	Mrs. L. Maria Child,
Nath'l Hawthorne,	Mrs. C. M. Kirkland,
John G. Whittier,	Mrs. Pike, Author of
Oliver Wendell Holmes,	"Ida May," "Caste," etc.
James R. Lowell,	Miss Rose Terry,
J. Lothrop Motley,	Wilkie Collins, Author of the
Geo. Wm. Curtis,	"Dead Secret," ect.
Herman Melville,	G. Ruffini, Author of "Doctor
Prof. C. C. Felton,	Antonio," etc.
Prof. F. J. Child,	Shirley Brooks, Author of
E. P. Whipple,	"Aspen Court," etc.
Edmund Quincy,	E. M. Whitty, Author of
Author of "Wensley,"	"Political Portraits," etc.
J. T. Trowbridge, Author of	James Hannay, Author of
"Neighbor Jackwood," etc.	"Singleton Fontenoy,"
C. W. Philleo, Author of	Thomas W. Parsons.
"Twice Married."	

TERMS.—Three dollars a year, or Twenty-Five Cents a Number, and may be obtained of Booksellers, Periodical Agents, or of the Publishers. For sale by all Booksellers and Newsmen in California. 19-3mis

Ladies' Department.

A VALENTINE FOR THE CAL: FARMER.

[We bespeak the good will and kind wishes of our fair friends for our good friend "Andreas," for his "Valentine for the Farmer." The beautiful ideals so vividly and sweetly portrayed, must of course belong to a heavenly group, as described. They may visit earth about the 14th of the coming month, to scatter "sunbeams," "dewdrops," and "fragrance," in the pathway of us poor mortals.]

MY LOVE.—By Andreas.

I.

My Love, she is bright as a sunbeam,
Asleep on a murmuring stream;
So soft is her exquisite beauty,
That she seems but the thought of a dream.

II.

My Love, she is bright as a dew-drop,
That sparkles at morn on the grass,
And her breath is as sweet as a zephyr,
That o'er the bright dew-drop doth pass.

III.

My Love, she is sweet as a rose-bud,
That blooms mid the fragrance of June;
But I'm pained when I see a bud wither,
To think that Death cometh too soon.

IV.

Yet My Love, she is good as an Angel,
She's as spotless, as lovely, as pure,
And e'en if she goeth to Heaven,
My Love, it will ever endure.

KITING.

BY SOLTERO.

"*A Word for the Ear of Single Men.*—It strikes us that there is a 'world of wisdom' in the following quotation—brief as it is: 'Every schoolboy knows that a kite would not fly unless it had a string tying it down. It is just so in life. The man who is tied down by half a dozen blooming responsibilities, and their mother, will make a higher and stronger flight than the bachelor, who, having nothing to keep him steady, is always floundering in the mud. If you want to rise in the world, tie your self to somebody.'"—[Exchange.

A Lady is indeed a kite, that sweeps our streets along,
And oft in fashion's giddy flight, she'll go it, "fast" and strong.

A necessary evil's man, "Creation's lord" at first;
Now only fit for shawl and fan, or act a part that's worse.

When many ladies in a room their airs and hoops display,
They'll hop (together with a groom) and call it *recherche*.

While fancy's breezes gently blow, and folly's chord is strong,
Old Dad at home may need the dough,—they'll sail with *friends* along.

Of course their flight will lofty be; ye batchelors dont quail!
Methinks that now you all can see, Man represents the *tail*.

Sing hey! sing ho! for bygone days of primitive style and dress,
When *women* won their husband's praise, as the meed of their loveliness.

San Francisco, Jan. 28, 1858.

Poetry.

"He touched his harp and nations heard, entranced;
As some vast river of unfailing source,
Rapid, exhaustless, deep, his numbers flowed,
And oped new feelings in the human heart."

[The accompanying letter is full of beauty, for it breathes poetry in every line, and we feel confident our readers will find pleasure in the perusal of a letter so truly beautiful, useful, and true:]

What is it? A word, that by language is almost indefinable; a name, which in its usual acceptation, is applied to all verse, or rythmetical composition. It is that which some writer has not inappropriately defined "beautiful thoughts in musical language," and rhetoricians "the embodiment of æsthetic ideas in language, simply for the sake of æsthetic expression." This last expresses, in the fullest extent of which words are capable, our *ideal* of written poetry. True poetry is itself beauty, and whether written or unwritten, is but the creation of taste and sublimity. Like a disembodied spirit, it is an essence, not an actual reality; a something perceived and felt, but without form or substance; a something which charms us, and can be truly estimated (I do not say critically as a work of art), only by the emotion which it produces. For poetry which produces no emotion, that by which neither the imagination, nor the other finer faculties of the mind receive a quickening impulse, is, either verse and no poetry, or we fail to appreciate the merits of the work. How unmeaning the word when applied to verse, however its numbers may flow, or musical the language employed, if it lacks the true element and spirit of poetry; while, on the other hand, many prose writings are highly poetical, and might far more justly be ranked such, than half the verse which bears the name. "By poetry," says a distinguished Essayist, "we mean the art of employing words in such a manner as to produce an illusion on the imagination; the art of doing by the means of words, what the painter does by means of colors:

"As imagination bodies forth
The forms of things unknown, the poet's pen
Turns them to shapes, and gives to airy nothings
A local habitation and a name!"

Where is its habitation? Rather might we ask where is it not? for,

"Poetry is not confined to books,
The creative spirit which thou seekest
Is in thee, and about thee; yea it hath
God's everywhereness."

Yes, it is everywhere, if the mental eye is open, and the heart awake to discern its presence. There is poetry in nature, in its various phases and aspects. It is in storms as well as sunshine, in the lightning's flash and thunder's roar; and, too, in nature's sweeter, softer music. It can be drawn from the faded flowers, the leafless trees and snowy landscape, as well as from Summer's blooming garlands, its waving branches, and soft carpeted fields of green. There is poetry above and beneath us, aye, everywhere around us. Each glittering star that gems the arch of heaven, each growing leaf from the earth beneath, has in it the elements of poetry. It has its dwelling in the lowest vale, and also, upon the mountain's summit; in the humble cottage, as well as within the most splendid palace. Its home is with the tiny stream and rushing river, the mighty cataract, and upon the broad, blue sea. It takes its abode with whatever is true and beautiful, either in the inner or outer life. There is poetry in refined and elevated thought, in eloquent words, and in noble deeds. There is poetry in love and friendship, in benevolence and charity, in philanthropy and patriotism, and in a life however humble which serves life's great end. Its hallowed influence is felt in the domestic circle, while it throws an endearing charm around every true and virtuous affection of the soul. There is poetry in mirth, and what is joy but poetry? There is poetry in the tear of sorrow, the silence of grief, and in the sigh of a broken heart and contrite spirit, breathing a penitential prayer to its oft-forgotten but forgiving God. There is poetry in youth, and age is not necessarily deprived of its pleasures—in life, aye, and in death—on earth, and will there not be poetry in heaven?

Sweet and holy is the mission to us on earth, of this heaven-born guest. For, if we but seek and cherish its refining and exalting influence, it throws a charm over life's varied pathway, beauty around our common blessings, and pleasure with our daily toil; while it takes from rugged steeps one-half their roughness, and sheds a softening influence over many things, otherwise difficult to be endured. It assists us to see beauty in life, even though it be through the tear-dimmed eye, and from midst the soul's deep sufferings. For pure intellectual pleasure, and also for the culture and refinement of the finer faculties of the mind, there is no study more beneficial than poetry, and the cultivation within ourselves of the spirit of poetry—that spirit, which draws poetical inspiration from everything that is true and beautiful, in physical, intellectual and moral life.

But take *this* from life, let imagination lose its wings, or had they never been given, and then what would it be, however smooth, but a *prosy existence*, deprived of that, which now, is one of its sweetest, loveliest charms.

Cornelia.

Love, Harmony and Progression.

From the evidence before us, in all our commingling with the most intelligent minds, we are confident that there is a deep and fervent desire upon the public mind to advance Female Education; not only among those of early youth, but among those of riper years. There is a yearning after true knowledge; that knowledge that shall elevate Woman, and give her her proper influence and station in society. To this end the true hearted turn with hope, and the minds of the most gifted are at work to bring about this most wished for result. We cannot but see these evidences, for they come to us from all portions of the earth, and any observant reader cannot but see the same spirit pervading the minds of many authors. Many of our correspondents, although wholly unknown to each other, are drawn together by a kindly and sympathetic alliance upon this mighty theme, and we look for great good to result from this source. The writer of the following deeply interesting and beautiful letter, is thus drawn to our gifted "Edith Montressor," and although strangers, the same mind dwells in both. and this has made them friends forever:

To Edith Montressor.

Bear River, January 6, 1858.

Dear Friend: For such I address you. We are unknown personally, but I am sure we can soon become as dear friends. For a long time I have felt a strong desire to write to you; at the time you wrote that excellent article called Individuality, my mind was strongly impressed to write to you, and then when the subject of Woman's Social and Moral Sphere attracted my attention, in those ideas of yours I read my own thoughts and sentiments, truthfully expressed. I believe in mind answering to mind, and that there may be a strong affinity existing in one mind towards another, even when there has been no personal acquaintance; thus I have for the last six months felt many times holding communion with you while reading your views on different subjects.

Like you, I have long known that woman may exert a more wide-spread influence of good, especially as regards her own sex; and as regards the social sphere of woman's action, how much more useful we might become. I know many of us have much to do, and some objections are raised regarding woman; that she has plenty to attend to at home, and that she is disposed to disturb the harmony of society by petty contentions and interference with social and national subjects; that she is an uncontrollable creature. In some cases, this may be true; but in most cases there has been a cause for this, and a discerning mind may easily understand why it is.

I regret to say that from the very beginning, we have been wrongly educated. Woman has either been looked upon as a servant to man, or she has been petted, flattered, and treated as one which has a weak and self-willed and obstinate mind, determined to have her own way. I must acknowledge that this is sometimes true, but I am happy in the thought that the time is close at hand when Woman shall claim her just rights, and will become that which Deity designed her to be, and, too, perform her mission, which is a holy and universal one. She will then know that love and firmness are indispensable to the faithful discharge of her duties.

I often think with you as regards our Social Sphere, that if we would only follow the inclinations of our better nature, how much love and warmth we might shed abroad upon the world of mind; and oh how often we might soothe and encourage and develop the better nature of the poor strayed wanderer; how many *Effies* we might save from flattery, deception, and ruin, if Women would but make the effort to become acquainted with each other, to join, with one mind, to accomplish the law of spiritual and mutual culture. We should then acquire knowledge, and develop wisdom; the spirit of God would be in our midst. I know it is not always possible to converse personally together, that is why I have adopted this plan of becoming acquainted with you. I read in the Farmer your desire to become more acquainted with its correspondents. You named my initials. I accept the invitation, and hope to hear from you soon. I say with you, that I have been married a long time, and have a very kind and good husband like yours; he allows me to do what I wish, and it is all right, because I wish only to do what pleases him best.

I hope you will excuse me taking this liberty in addressing you, but I do not know your direction, or I should have written to you before; but I shall be very happy to hear from you often, that our spirits may become harmonized with and purified by the elements of love and wisdom which bind soul to soul. What a beautiful attribute is Harmony; it is the most perfect manifestation of wisdom; it is the ultimate form of the soul, the Image of the Creator.

I must leave off for the present. Let me hear from you on this subject. I know you are far more capable to write on this delightful theme than I am. Accept my kind regards, and believe me to be, ever yours, in the bond of Love, Harmony and Progression. H. E. S.

A Grateful Letter.

"To the generous mind
The heaviest debt is that of gratitude,
When 'tis not in our power to pay it."

The annexed most acceptable and truly cheering letter came to us like a genial ray, to cheer us upon the opening of our New Volume. We have not words to respond to tell our kind correspondent how truly grateful we feel, and how much encouragement such a letter gives us. It serves as an antidote for "the thousand ills that flesh is heir to." This letter was as the letter of a true friend, and every sentiment of it lies impressed upon a grateful spirit. The inclosure for three new subscribers, was thankfully received. We have enrolled the donor's nume in "red ink," to keep us constantly reminded as we turn to our list of subscribers, of the acts of a true friend. God bless such—this letter and the one accompanying, are glorious:

Bear River, January 12, 1858.

To the Editor of the California Farmer:

We have just received the last number of the Farmer, which will close the present year. I hope I am not too late in writing for three numbers of the next volume. I am aware it is but a drop in the bucket; but it was once said by a great writer, "despise not the day of small things." Perhaps before long, I may be fortunate in adding more subscribers to your valuable paper. I must say that I am so well pleased with the Farmer that I recommend the reading of it to all my friends, and I am happy in telling you that this is the result; and I am confident in saying, that at least one of your new subscribers will add still more readers to the Farmer. I am sure that my friend with his excellent lady, will not only read and recommend this excellent paper, but I hope ere long we shall be edified by reading the thoughts and production of a good and well stored mind. I am glad to hear and see the advancement and progress of the cause of Agriculture, with every other good institution which is for the good of the human family.

I hope you will be able to keep your promise in supplying us weekly with rich and intellectual reading. I am sure if your correspondents of the past year, do as well the present year as they have the past, and with the addition of new ones, the Farmer will be a thrice welcome guest in every home, and by every fireside wherever it is read.

I must conclude for the present. Excuse the liberty I have taken in taxing your time with reading my short scrawl, and believe me to be a true friend and advocate in the cause of Truth, Progression, and Happiness.

Yours, respectfully, H. E. S.

P. S. You will find inclosed, fifteen dollars, for three subscriptions to the Farmer.

[For the California Farmer.]

"GONE HOME."

DIED—Oct. 20th, at Eastmanville, Mich., James B., only son of W. N. and Ann M. Angel, aged 9 months.

How simple the expression, yet how it thrilled my soul,
The words seemed so appropriate and gave the import full;
Ah yes, that Little Angel*—it truly had "gone home."
Methinks it heard its brother, calling, "saying come;"
Awhile ago I saw him, 'twas at the county fair,
His eyes were blue, and heavenly, and sunny was his hair;
His father tossed him in his arms, he seemed his pride and joy,
Indeed he did look lovely—that chubby little boy.

How could that dark death-angel enshroud that home with grief!
To hearts already wounded, this child had brought relief;
He came to soothe their anguish, their bleeding hearts to heal.
Again that wound is opened—How must that mother feel?
Her first-born son was taken, and now, she bowed in prayer,
That God who's rich in mercy, her *only one* might spare.
But no, he had a purpose—for calling, "Saying come,"
Why will ye mourn, fond parents, your child has but "gone home."

He had an *Angel nature* and wore an *Angel* name;
A few short months he blessed you, it was for this he came;
His mission here is ended, the glorious one of love;
You'll find your little jewel, among the blest above:
He'll clasp his little brother, the one who went before,
They'll meet in sweet communion, where tears are shed no more.
And now they both are waiting, entreating you to come;
O cease your bitter mourning! your children have "gone home."

Rosa.

*Suggested by hearing my husband remark that That Little Angel had gone home.

A little explained, a little endured, a little tolerated as a foible; and lo! the jagged atoms fit like smooth mosaic.

HORTICULTURAL.

Ravenswood Fruit Garden
PLANTS.
WHOLESALE AND RETAIL.

Brinckle's Orange Raspberry, $70 ₱ thousand, $8 ₱ hundred.
Col. Wilder Raspberry, do do
Cushing Raspberry, do do
Thunderer Raspberry, do do

Linnæus Rhubarb, $50 ₱ thousand, $8 ₱ hundred.

ALSO,

Blackberries: New Rochelle or Lawton, Newman's or Thornless, $15 ₱ hundred.
Strawberries: Hovey's Seedling, Boston Pine, Large Early Scarlet, $6 ₱ thousand, $1 ₱ hundred.
Currants: Black Naples and Cherry, $10 and $12 ₱ hundred.

ALL the above plants of best quality; we cultivate most of them for market fruits.

THE BRINCKLE'S ORANGE RASPBERRY, for market or garden, is considered the best of all Raspberries; is unequaled in flavor and beauty; flavor is rich and vinous; and color beautiful bright orange: a very vigorous grower; hardy and exceedingly prolific.

The Cushing and Col Wilder are the best for making jams, preserves, sirups, &c.

THE LINNÆUS RHUBARB is a new variety originated by Myatt of England, who also originated the Victoria, on which this is a great improvement in both *flavor* and *productiveness*.

Its flavor is deliciously aromatic and spirited, and it is entirely free from the toughness and stringiness which characterize the Victoria, but when cooked becomes a fine uniform pulp, like the most tender apple. The plant is a very strong grower, more productive than the Victoria, and very hardy.

We cultivate most of the above Fruits for market, and selected them from our Fruit Gardens, as the choicest varieties known. Brinckle's Orange Raspberry and Linnæus Rhubarb especially are of exceeding excellence.

Orders will be promptly attended to in the order in which they are received, and Plants packed in careful manner.

Terms cash. Bills payable on delivery of Plants to the agents, or order of the purchaser.

Our plants will be ready to ship any time between the first of November and first of April. Circulars with full description of varieties and testimonials, can be had at the office of the California Farmer, San Francisco.

FREEMAN & KENDALL,
Ravenswood, L. I. near New York,
54 William street, New York City.

"We have visited Messrs. Freeman & Kendall's Fruit Gardens, from which they are now offering to sell Plants; and we can say their Plants are of very superior varieties and well grown, the Orange Raspberry and Linnæus Rhubarb particularly; we take pleasure in recommending them to the public."

PARSONS & CO.,
FLUSHING, near NEW YORK,

OFFER FOR SALE an assortment of Trees and Plants which they have grown for the use of amateurs, and have prepared, by frequent transplanting and other modes, for success in moving.

They are of fine size and symmetrical form, and among them will be found

Standard Apples of fine quality.
Standard Pears, Plums, and Cherries.
Peaches, Apricots, and Nectarines, on Plum stocks, and their own roots.
Dwarf Pears, of fine form, and ready for bearing.
Gooseberries and Currants, strong plants of the best sorts.
Raspberries, Fastolf, Red Antwerp, Fillbasket, and other known sorts.
Strawberries, of all the best varieties.
Native Grapes—Isabella, Catawba, and other hardy varieties.
Foreign Grapes: all the well-known sorts, with some new varieties of great excellence. These plants are propagated from vines that have borne abundantly for some years, and are known to be correct.

Great care is taken in the cultivation of Fruit Trees, and none but those of the best quality are allowed to be sent out.

The Ornamental Department

Contains trees of all sizes for lawns and streets, including Elm, Silver, Norway, and Sycamore Maples, Catalpas, Lindens, Tulip Trees, Cypress, Larch, Willows, Ash, Abele, Oriental Plane, and all the best varieties of deciduous trees.

It also includes Evergreens of fine size for single planting, and of small sizes at low prices, from one foot upwards, for massing; among them are Norway Spruce, Balsam Fir, Austrian Pine, Hemlock, White Pine, Scotch Fir, and other varieties.

The best Shrubs include many fine varieties at low prices, for massing, of which the Rhododendron Catawbiense can be particularly recommended for its fine evergreen foliage, showy bloom, and perfect hardiness.

The ROSES are cultivated in very large quantity, on their own roots, of all the most rare varieties, and to those who purchase in quantity, will be sold at greatly reduced rates.

The Exotic Department

Contains a fine assortment of Camellias, grown as bushy, rather than tall, slender plants; and also contains all the well-known varieties of exotic plants and many rare sorts, introduced from Europe, annually. These are all carefully grown for those who desire plants of symmetry and beauty.

CATALOGUES of all the departments will be furnished on application. Great care will be taken in packing, and trees will be delivered in New York, and thence shipped as directed. v8-16-tf

LAWTON OR NEW-ROCHELLE
BLACKBERRY PLANTS!!
PRICES REDUCED!

THE subscribers announce to their friends and customers that they have now
OVER SIX ACRES
OF THE
GENUINE LAWTON (or New-Rochelle)
BLACKBERRY PLANTS,
under cultivation, and in good condition.

They are therefore prepared to fill large orders the coming FALL and the next SPRING, at the following reduced prices:

One Thousand Plants	$125 00
One Hundred Plants	15 00
Fifty Plants	8 00
Two Dozen Plants	4 50
One Dozen Plants	2 50
One Half Dozen Plants	1 50

☞ Good Plants for setting, of a second size, will be sold for $100 per 1000 Plants, or $12 per 100 Plants.

N. B.—All Plants ordered of us will be taken up and packed with the greatest care, and under our own personal supervision.

Of the many thousands sent out by us last year, we have heard very few instances of failure, notwithstanding that they have been forwarded to *every part of the country, and to California, with perfect success*, and the setting out has often been entrusted to unskillful hands.

Printed directions for setting and cultivating are sent with every package. GEORGE SEYMOUR & CO.,

Every article appertaining to the business furnished at reasonable rates, and warranted as represented. The Seeds are grown to order by experienced cultivators, and fully tested before being offered.

For sale by the quantity, or in packages for retail trade.

** Goods packed securely to go any distance. Orders by mail (with remittances) will be attended to with exactness and promptitude.

Catalogues furnished on application. v8-23 3m

BOOKS, &c.

New Treatise on Land Surveying.
JUST PUBLISHED BY
E. C. & J. BIDDLE,
PHILADELPHIA,

A Treatise on Surveying, by S. Alsop. In this work, the theory is plainly and comprehensively presented; directions for practice are given definitely and precisely; and everything which an extensive business in Land Surveying would be likely to require is embraced. Price per copy, mailed to California, $2, postage included. Price of the KEY to the work, mailed to California, 75 cents.

E. C. & J. B. also publish the following popular educational works, and many others extensively used in the Schools and Colleges of our country; and they would respectfully invite School Directors and Teachers to send for a copy of the descriptive catalogue of their publications:

Crittenden's Treatise on Book-keeping. The series comprises the four volumes below named, and for each of them a KEY, and a set of miniature BLANK BOOKS for the exercises:
1. Treatise on Single Entry Book-keeping.
2. On Single and Double Entry, for Common Schools.
3. do do do for High Schools.
4. do do do for the Counting House.
The volumes are severally the text-books in Commercial Colleges in Boston, New York, Philadelphia, Cincinnati, Chicago, St. Louis, Louisville, etc.; in most of the Normal Schools, and a great number of the High Schools of our country. In the Public Grammar and Evening Schools of Philadelphia, etc.; while as a book of reference for practical accountants the Counting House edition is, undoubtedly, the most popular work on the Science of Accounts, published in the United States.

Cleveland's English Literature. *Twenty-fifth Thousand just published.* 1. CLEVELAND'S COMPENDIUM OF ENGLISH LITERATURE, from the 14th to close of 18th century; chronologically arranged; consisting of Biographical Sketches of the Authors, and selections from their works, together with Notes explanatory, etc. 2. CLEVELAND'S ENGLISH LITERATURE OF THE NINETEENTH CENTURY. A sequel to the "Compendium"; arranged on the same plan as it. The above two volumes are text-books in many of the Colleges, in the principal Normal Schools, and in a large number of other first-class Seminaries of our country; and they may with confidence be recommended as an admirable guide or chart for private students of English literature.

Cleveland's American Literature. *Cleveland's Compendium of American Literature*, on the same plan as the author's "Compendium of English Literature," will be published early next year.

Harrison on the Rise, Progress, and Present Structure of the English Language.

The Works of Thomas Dick, LL. D. 10 vols. 12mo. Few books are better adapted for the School or the Family Library, than the works of Dr. Dick.

CHARLES DICKENS' WORKS.

TWENTY-NINE DIFFERENT EDITIONS.

NO LIBRARY CAN BE COMPLETE WITHOUT A SET OF THESE WORKS.

CHEAP EDITION—PAPER COVER.

Complete in Fourteen volumes.

"PETERSON'S" are the only complete and uniform editions of Charles Dickens' works ever published in the world; they are printed from the original London Editions, and are the only editions published in this country. No library, either public or private, can be complete without having in it a complete set of the works of this, the greatest of all living authors. Every family should possess a set of one of the editions. The cheap edition is complete in Fourteen Volumes, paper covers; either or all of which can be had separately, price 50 cents each, as follows:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist
Nicholas Nickleby.	Two Apprentices. 25

A complete set of the above fourteen books, will be sold, or sent to any one, to any place, *free of postage*, for Five Dollars.

LIBRARY OCTAVO EDITION.

Published in Seven Different Styles.

This Edition is complete in SIX very large octavo volumes, with a Portrait on steel of Charles Dickens, containing the whole of the above works, handsomely printed, and bound in various styles.

Vol. 1 contains Pickwick Papers and Curiosity Shop.
" 2 do Oliver Twist, Sketches by "Boz," and Barnaby Rudge.
Vol. 3 contains Nicholas Nickleby, and Martin Chuzzlewit.
" 4 do David Copperfield, Dombey and Son, and Christmas Stories.
" 5 do Bleak House, and Dickens' New Stories.
" 6 do Little Dorrit. In two books—Poverty and Riches.

Price of a set, bound in Black cloth	$9 00
" " Scarlet cloth, extra	10 00
" " Law Library style	11 00
" " Half Turkey, or Half Calf	13 00
" " Half calf, marbled edges, French	14 50
" " Half calf, real ancient antique	18 00
" " Half calf, full gilt backs, etc.	18 00

ILLUSTRATED OCTAVO EDITION.

THIS EDITION IS IN THIRTEEN VOLUMES, and is printed on very thick and fine white paper, and is profusely illustrated, with all the original illustrations by Cruikshank, Alfred Crowquill, Phiz, etc., from the original London editions, on copper, steel, and wood. Each volume contains a novel complete, and may be had in complete sets, beautifully bound in cloth, for Nineteen Dollars a set; or any volume will be sold separately at One Dollar and Fifty cents each. The following are their respective names:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist.
Nicholas Nickleby.	

Price of a set, bound in Black cloth, in Thirteen volumes	$19 00
" " Full Law Library style	26 00
" " Half calf, or half Turkey	29 00
" " Half calf, marbled edges, French	32 50
" " Half calf, ancient antique	29 00
" " Half calf, full gilt backs	39 00

DUODECIMO ILLUSTRATED EDITION.

Complete in Twenty-five Volumes.

The Editions in Duodecimo form are beautifully illustrated with over *Five Hundred Steel and Wood Illustrations*, from designs by Cruikshank, Phiz, Leech, Browne, Maclise, etc., illustrative of the best scenes in each work, making it the most beautiful and perfect edition in the world, and each work is also reprinted from the first original London editions that were issued by subscription in monthly numbers, and the volumes will be found on examination, to be published on the finest and best of white paper.

This edition of Dickens' Works is now published complete, entire, and unabridged, in Twenty five beautiful volumes, and supplies what has long been wanted, an edition that shall combine the advantages of portable size, large and readable type, and uniformity with other standard English authors.

The Duodecimo edition alone has been gotten up at an expense of *over forty-five thousand dollars*, but the publishers trust that an appreciative public will repay them for the outlay, by a generous purchase of the volumes. All they ask is for the public to examine them, and they are confident they will exclaim, with one voice, that they are the handsomest and cheapest, and best illustrated Set of Works ever published. This edition is sold in sets, in various styles of binding, or any work can be had separately, price Two Dollars and Fifty cents each, and each work but one being in two volumes, handsomely bound in cloth, as follows:

Pickwick Papers.	Sketches by "Boz."
Nicholas Nickleby.	Barnaby Rudge.
David Copperfield.	Martin Chuzzlewit.
Oliver Twist.	Old Curiosity Shop.
Bleak House.	Christmas Stories.
Little Dorrit.	Dickens' New Stories.
Dombey and Son.	*One volume, cloth*..$1 25

Price of a complete set in Twenty-five volumes, bound in	
Black cloth, gilt backs	$30 00
" " " Full Law Library style	40 00
" " " Scarlet, full gilt, sides, edges, etc.	45 00
" " " Half calf, ancient antique	60 00
" " " Half calf, full gilt back	60 00
" " " Full calf, ancient antique	75 00
" " " Full calf, gilt edges, backs, etc.	75 00

PEOPLE'S DUODECIMO EDITION.

Published in Six Different Styles.

This Duodecimo edition is complete in Thirteen volumes, of near One Thousand pages each, with two illustrations to each volume, but is not printed on as thick or as fine paper as the Illustrated Edition, but contains all the *reading* matter that is in the Illustrated Edition, printed from large type, leaded. The volumes are sold separately or together, price One Dollar and Fifty cents each, neatly bound in cloth; or a complete set in this style will be sold for $13. The following are their names:

Little Dorrit.	Nicholas Nickleby.
Pickwick Papers.	Christmas Stories
Dickens' New Stories.	Martin Chuzzlewit.
Bleak House.	Barnaby Rudge.
David Copperfield.	Old Curiosity Shop.
Dombey and Son.	Sketches by "Boz."
	Oliver Twist.

Price of a set, bound in Black cloth	$19 00
" " " Full Law Library style	24 00
" " " Half calf, or half Turkey	26 00
" " " Half calf, marbled edges, French	28 00
" " " Half calf, ancient antique	32 00
" " " Half calf, full gilt backs	32 00
" " " Full calf, ancient antique	40 00
" " " Full calf, gilt edges, backs, etc.	40 00

Copies of any one work, in cloth, or any set, of either of the twenty-nine editions, in any of the various styles of bindings, of Charles Dickens' works, will be sent to any person, to any part of the United States, *free of postage or any other expense*, on their remitting the price of the edition they may wish, to the publisher, in a letter.

DOCTOR HOOFLAND'S

CELEBRATED

GERMAN BITTERS,

PREPARED BY

Dr. C. M. JACKSON, Philadelphia, Pa.,

WILL EFFECTUALLY CURE

LIVER COMPAINT, DYSPEPSIA, JAUNDICE,

Chronic or Nervous Debility, Diseases of the Kidneys, and all diseases arising from a disordered Liver or Stomach.

Such as Constipation, Inward Piles, Fullness or Blood to the Head, Acidity on the Stomach, Nausea, Heartburn, Disgust for Food, Fullness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried and difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, Dimness of Vision, Dots of Webs before the Sight, Fever and Dull pain in the Head, Deficiency of Perspiration, Yellowness of the Skin, and Eyes, Pain in the Side, Back, Chest, Limbs, &c., Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of Evil and great Depression of Spirits.

The proprietor, in calling the attention of the public to this preparation, does so with a feeling of the utmost confidence in its virtues and adaptation to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American people, and its reputation and sale is unrivalled by any similar preparations extant. The testimony in its favor given by the most prominent and well-known Physicians and individuals in all parts of the country is immense, and a careful perusal of the Almanac, published annually by the proprietor, and to be had grats of any of his Agents, cannot but satisfy the most skeptical that this remedy is really deserving the great celebrity it has obtained.

J.L. POLHEMUS

DRUGGIST

J. St.

OFFICIAL NOTICE!

POLHEMUS' DRUG STORE,

No. 190 J street, corner of Seventh.

SACRAMENTO, CAL.

FELLOW CITIZENS: I have lived among you since the ever glorious FORTY-NINE, have suffered with you in three fires and three floods, and intend to live among you with my family during the term of my natural life, if not longer. I return you my most sincere thanks for your unfaltering patronage and support, which has enabled me to pay One Hundred Cents on the Dollar through all my adverse fortune. I would also give you a few reasons for your continued patronage, and inducements to new patrons likewise.

FIRSTLY.

I claim to be the Oldest Established Legitimate Druggist in this City.

Persons in this connection will please observe that there is as much difference between a DOCTOR and a DRUGGIST as there is between a Druggist and a Doctor, and rather more so between those who have picked up the Drug Business and those who have devoted their whole lives to it. To this latter class I have the honor to belong, having learned my business in the Atlantic States, and been engaged in said business for the last eighteen years.

SECONDLY.

Believing that life is sweet to all, and that the people wish to know where they can get their prescriptions filled with safety, I will hereafter fill them for

Half the Price Usually Charged

By other Druggists, legitimate or illegitimate, and of **The Purest Drugs and Chemicals.**

THIRDLY.

I intend my store shall be ONE of the best, if not THE BEST place in California to obtain everything, NEW, ODD and STRANGE in the Drug line, and especially to make it the most extensive depot for every valuable Patent Medicine, Drug and Chemical. We invite proprietors of valuable and reliable Patent Medicines to send them along. We have a large and thoroughly fire-proof Drug Warehouse to hold them, and patrons to buy them.

FOURTHLY.

We Keep Open all Night!

And charge no more for medicines than in the day time.

FIFTHLY.

We will furnish those in indigent circumstances with MEDICINES AT COST! the same being attested by two or three good citizens.

SIXTHLY.

Hereafter we will do a business on a CASH BASIS ONLY. The amounts we have lost heretofore by crediting we intend to distribute equally among our patrons, in the future, in the decreased price of our goods.

SEVENTHLY.

We have received the agencies for the following valuable articles:

Dr. Carl Warburg's Tincture. This article is particularly recommended for Ague and Fever, when every other article fails to cure.

Budds' Nerve and Bone Liniment, warranted the best in California.

Flower of the West, for Fever and Ague.

Delight's Spanish Lustral, for the Hair.

HUDSON'S CALIFORNIA GROWN MUSTARD.

Also, agencies for all the other popular medicines too numerous to mention.

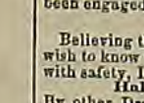
EIGHTHLY AND LASTLY.

We import nearly all of our goods. We think we know how to import them, and how to sell them to satisfy the public as to price and quality. At all events, give us a call, and WE WILL TRY.

v6-12 J. L. POLHEMUS.

PACIFIC MUSEUM,

Corner of Clay and Kearny streets.



AT this popular place of amusement there is the LARGEST COLLECTION OF LIVING WILD ANIMALS ever exhibited on this Coast.

Among them may be seen the Grizzly Bear called 'Sampson,' weighing over 1,500 pounds; one Russian Brown Bear, weighing about 1,100 pounds; another Grizzly, weighing 1,000; a Black Hyena Bear; two Rocky Mountain White Bears; the Red Bear of California; three Black Cubs; two Cinnamon Cubs; one Mammoth Pig. Also, a great variety of other Wild Animals, together with the California Lion and Tiger, Elk, Deer, Sea Leopard, Catamount, Ant Eater, Prairie Wolf, Eagles, and other large Birds. Besides a collection of Stuffed Birds, such as cannot be found on this or any other coast.

A full Brass Band is in attendance every evening.

☞ Open every Day and Evening (Sunday excepted.) Admission, 50 cents. v8-13

A. P. SMITH'S

POMOLOGICAL GARDEN

AND

NURSERY,

On the American River, 2½ miles from the Steamboat Levee,

SACRAMENTO.

THE Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of THE VARIETIES—embracing as they do

All Kinds FRUIT TREES,

SHADE AND ORNAMENTAL TREES,

GREENHOUSE PLANTS,

SHRUBS, ROSES,

And also an unusually fine crop of

GENUINE GARDEN VEGETABLE

SEEDS.

All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,

Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:

From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.

We call particular attention to our splendid stock of

CHERRY TREES,

THE FINEST AND LARGEST IN THE STATE,

embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from these. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase theirs, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most RELIABLE SOURCES IN THE EAST, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being CORRECT AS TO NAMES AND VARIETIES, are as PERFECT AS IS POSSIBLE TO MAKE THEM.

In the department of

Shade and Ornamental Trees,

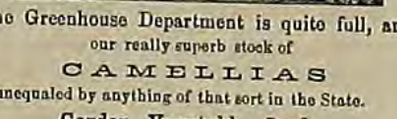
We have a very fine stock of all the leading varieties, some very fine extra large trees of the

ELMS, LABURNUMS AND LOCUST,

particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.

A very extensive collection of all that is rare and desirable.



The Greenhouse Department is quite full, and our really superb stock of

CAMELLIAS

is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,

Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, WARRANTED PURE and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish GRATIS to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.

v8-18-6m A. P. SMITH.

Who Wants a Cheap Piano?

THE subscriber has for years been engaged in the purchase and sale of PIANOS, HARPS, MELODEONS, GUITARS, ORGANS, MUSIC, &c., and, being a *practical musician*, has given entire satisfaction. He buys *directly from the manufacturers*, and is thereby relieved from heavy rents and other expenses. Every instrument sold by him receives his personal attention, is *guaranteed* not only as to *quality*, but as being *cheaper* than it can be procured at any wholesale house in America. A printed list of prices, accompanied by the most unquestionable references, will be sent free to all parts of the world, on application to JAMES M. EDNEY,

56 John street, New York City.

Broom-Corn Wanted.

A LARGE LOT OF BROOM-CORN will be purchased by the undersigned. Samples of the same can be forwarded by Express, to JOHN A. WOLF,

16 Corner of Drum and Sacramento streets.

AGRICULTURAL.

FIRST PREMIUM IMPLEMENTS.

TO THE FARMER

AND

Dealer in Agricultural Implements.

PLEASE READ.

HAVING erected a good shop, with facilities not heretofore possessed by any house in this State for manufacturing Agricultural Implements, I beg leave to announce that I am now prepared to receive orders to any extent in this line of business. I employ none but the best and most experienced mechanics, and use only the very best materials. In this way I hope to promote the interest of the good mechanic, the interest of the farmer, the interest of our young and growing Agricultural State; and at the same time that interest which is foremost with all mankind—self. I have had twenty years experience in the manufacturing business;

I ESTABLISHED THE FIRST SHOP,

AND

MADE THE FIRST STEEL PLOW

in the State of Wisconsin, in the dawn of her great agricultural improvement. I also

MADE THE FIRST REAPING AND MOWING MACHINE

AND

THE FIRST STEEL PLOW

Ever Made in this State;

Therefore, with my experience, and a knowledge of the wants of the country (which are different from most others), I feel confident that I can and will do much for the interests of the agriculturists of this county; and in my efforts I trust I shall meet with a good share of patronage from the farmer and all interested in this matter, and in the interest and development of the agricultural improvement of our State.

I design, and have under way, the manufacturing of

1,500 Cast Steel California Plows;

THE DEEP TILLER;

OR,

"QUEEN OF THE WEST;"

Of stock entirely superior to any ever worked before in this country. Also,

GANG PLOWS,
HARROWS,
CULTIVATORS,
FANN MILLS,
&c., &c., &e.

In addition to what I manufacture, I shall constantly be receiving implements from the best makers of the Eastern and Western States, amongst which are now due

500 CINCINNATI

EAGLE, STEEL AND ROVER PLOWS,

which stand, in point of true merit and worth, altogether higher than any others in the great agricultural State of Ohio.

☞ Please favor me with a call, and see for yourself, and be convinced that I am publishing no humbug, but simply facts as they are; and that your young State can, within itself, already provide the farmer with implements inferior to none now in use. All kinds of agricultural implements and machines repaired on short notice, and in the best manner, and on reasonable terms.

NEW CALIFORNIA MACKEREL—25 bbls. New California Mackerel, which are selling cheaper than States'.

v8-15 BRADSHAW & CO.

Letter from New York.

[From our Special Correspondent.]

New Year's Greeting—The Old World—Chinese War—Royal Marriage—Kansas and Utah—General Walker—California Winter.

NEW YORK, January 5, 1857.

HAPPY New Year to you, Messrs. Editors and Printers of the CALIFORNIA FARMER, and may you have many returns of Christmas, New Years, Fourth of July, and many, many blessings be added to you all.

Here among ourselves we have extended and accepted the compliments of the season, and many a hearty greeting would have been sent over the waves to numerous friends in the golden land, if the *steamers* had had half the anxiety that *we* all feel to greet our friends.

From the Old World, we learn that financial thunder bolts have fallen thickly and heavily upon the business interests of the masses. The Indian war drags heavily along, though England's gallant troops are adding fresh laurels to the many already waving in every breeze.

The Chinese are making preparations to open a new and vigorous campaign against England, in the spring. It will turn out like the *rat* gnawing the file. But John Chinaman must be rasped into decency, or the Yankees or John Bull will not drink their teas, which will of course bring them to immediate terms.

On the European Continent there are constant successions of shades and glimpses of sunshine, alternations of hope and fear; but *lovers* heed not the upheaving storm, and so the Princess Royal of England is to be married on the 25th inst.; even if the Sepoys thrash her soldiers all out of India, and Prussia should not renew her diplomatic relations with Switzerland; or if Napoleon should fraternize with Austria and Russia, to quench the fires of patriotism that are bursting forth from many hearts among the down-trodden nations of the Old World. May the married life of the young Princess be as exemplary and happy as that of her royal mother.

The Holidays have shut out all the startling incidents in relation to the interminable Kansas question. The battle will be renewed in Congress this week, and continued on the bloody fields of that unhappy territory. Brigham Young's rebellion will be put down at all hazards.

General Walker has been taken, and brought to Washington as a prisoner, but dismissed by Gen. Cass. He claims that the U. S. Government had no right to take him on foreign soil; that he had landed, and no one had any right to interfere with him. I can see no difference whether he is taken on foreign soil *after landing*, or on *foreign waters before* landing. The man of destiny may be reserved for a still greater defeat than he has yet known.

We have a perfect California winter thus far, to the great relief of the many thousands of poor and needy in the whole Union.

Severe indisposition has long prevented me from writing to you. I am now well again and most cheerfully resume my pen, thus holding converse with you and our friends in California.

B.

An Appeal for Destitute Women at the East.

A few weeks since, we made mention of a plan then in progress in New York, to relieve the distress among working women, caused by the panic, which threw out of employment so many thousands.

We now present the result of these plans, the formation of a society of ladies, called the "Woman's Protective Emigration Society." Their pupose is to aid the emigration of all who wish to go west. We present their appeal for aid, sympathy and cooperation in this great work of humanity; and we trust an appeal so urgent will not fail to be responded to liberally, even by Californians. And we trust that California may be one of the places where many shall find happy homes:

TO THE FRIENDS OF THE HELPLESS.—A cry even at this moment, goes up to Heaven from the agonized hearts of hundreds of young, and, hitherto, pure women; who, until recently honest and honored laborers in workshops and stores, have suddenly been cast upon the world—homeless, friendless, penniless—and who now, in the madness of desolation and want, are trembling on the verge of the dark stream of vice which pollutes our streets.

Fathers! mothers! think of this—look upon your children—and place them but for an instant, if you can endure the picture, in the position of these suffering ones; with the terrible alternatives of starvation or dishonor! Think of the pure lips that have opened but to the language of modesty and to the laugh of innocent joy, becoming the hot portals of blasphemy and obscenity, and of the wild merriment of reckless inebriety! Think of the bright hopes clustering around the future, as stricken down and withered; of the lives of honor and usefulness as cast away. Follow the lost ones in thought, through the agony of the last death of hope and the triumph of despair, and through the loathsome history which succeeds; and trace them thus, step by step in their downward progress, to the last scene of all, when the defaced image of desecrated womanhood lies lifeless on its wretched pallet—at once a reproach and a warning; and say, as Christian men and women, shall these things be so, while you, stewards of God's bounty in the various measure of your power, have the means to mitigate, if not to arrest, the march of ruin?

This is no exaggerated language—no inconsiderate appeal. According to the Rev. Mr. Pease, than whom no better authority could be cited, the number of women who have been driven from honest industry, since the present financial troubles commenced, to swell the ranks of the outcasts of the street, is at least *fifteen hundred*! How far this appalling statement is likely soon to be surpassed in fact, may be inferred from what follows: Very recently nearly one thousand applicants gave in their names, within a few days, to some benevolent ladies who had desired to test the extent of destitution amongst skilled and unskilled workwomen, with a view to devise and apply the necessary relief. Some few of these applicants possessed one or two dollars each, but the majority were wholly destitute, and some had not tasted food for twenty-four hours. And these, be it well noted, were of the industrious and respectable working young women of New York; shrinking from the dole of charity, and asking only leave to live by their labor. A sight full of pity to see; or horror to reflect upon, when all the possibilities of their future rise up before the mind.

But there is a way to help these people; a way at once humane, economical and effectual; a way to benefit them, and others also by their means. It is this:

The labor of these young women, which finds no market here, is much needed in the thriving West; and it requires but the methodical application of sufficient means to promote their emigration to places where homes and employment surely await them, to achieve their safety. The machinery, indeed, of existing Societies is altogether inadequate to a task which urgently demands exclusive attention, and a prompt and liberal, though careful expenditure. But to meet this difficulty, a Society has been formed under the name of the Woman's Protective Emigration Society, which awaits only the donations of the humane to commence the great and responsible work to which its founders have devoted themselves.

It is on behalf of this society that the undersigned appeal to the public for the liberal assistance so urgently needed; not in reliance on the force of the words they speak, though these come from the heart. The terror, the shame, the magnitude of the suffering they plead for, cannot find expression in language. But the philanthropist will feel it: the Christian, looking forward to the coming Christmas, the birthday of one who came "to seek and to save that which was lost," will surely feel that the cheering thought of having generously aided to rescue hundreds of his poor sisters from shame and ruin, will shine brighter on his mind on the day of rejoicing than will the fire on his hearth.

Friends of all creeds, but sharers in a common hope! children of one Father! come to our aid.

On behalf of the Woman's Protective Emigration Society,

ELIZABETH B. PHELPS, President.
ELIZA W. FARNHAM, Secretary.

Subscriptions willgr be atefully received by Dr. L T. Warner, 49 Lafayette Place; George H. Jones, 134 William street; O. R. Potter, corner Courtlandt Place, Broadway; Thos. Truesdell, 141 Pearl street; R. W. Heurtly, 2 Bowling Green.

SEEDS

OF FRUIT and ORNAMENTAL TREES

THOMAS MEEHAN,

PROPRIETOR OF THE GERMANTOWN NURSERIES,

Germantown, Philadelphia, Pa.

☞ Includes in his business the collection and importation of

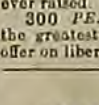
Every Kind of Tree Seeds

That can be obtained in this country or Europe. A Price Current of over Two Hundred Species which can generally be obtained with certainty, is issued every May, in advance of the season of ripening, so as to afford purchasers an opportunity to forward their orders early enough to get them in prime season; fresh, and in the best order for growing.

Most of this year's crops of seeds are now on hand, and they will be sold at the lowest rates at which they can be collected. The supply of PEAR SEED is large this season, and can be supplied at $5 per pound, or $4 50 per pound when 5 pounds are ordered.

23tf November 18, 1857.

The Concord Grape.



THE ORIGINATOR OF THIS NEW GRAPE offers for sale a fine stock, raised from the parent Vine. It has fully sustained its reputation as

The Best Grape for Out-door Culture

having survived the last two severe winters unharmed, where the Isabella, Catawba, and other vines were killed to the ground.

For Size, Beauty, Quality and Bearing,

it is unsurpassed. It is perfectly hardy, and has never been affected by rot or mildew, while it ripens from three to four weeks earlier than the Isabella, and two weeks earlier than the Diana, in the garden of the proprietor.

Fine, strong plants, at $1 50 each; $12 per dozen. Two years old, at $2 each. Three years old, extra, at $3 each. A liberal discount to clubs and the trade. Orders, with cash or good reference, promptly attended to. Address

2 3m E. W. BULL, Concord, Mass.

STOCKTON-RANCH NURSERY.

Almaden Road, between San José and Santa Clara.

50,000 FRUIT TREES.

50,000 NURSERY TREES of the VERY CHOICEST Varieties, of the most important kinds of Fruit, raised under the personal care of the subscribers.

The Varieties consist of Apple, Pear, Plum, Cherry, Peach, Apricot, Nectarine, and all the needed kinds of fruit trees for the Orchard and Private Garden.

The undersigned having had the experience of years in England, and many years in the Nursery of Hovey & Co. of Massachusetts, need only say that they can warrant Trees to be what they are represented, and that they have taken pains to offer as choice a collection as can be be found in the State.

Purchasers are invited so visit the Nursery, as they may rest assured the quality of the Trees and the price will be sure to suit.

☞ C. W. LECOUNT, of San Francisco, is our only Agent. [23] B. S. FOX & CO.

☞ FOX & CO. have received from Messrs. HOVEY, of Boston,

ROCHESTER
BEDDING AND FURNITURE STORE,
No. 179 Jackson street (Third Door below Kearny),
By JACOB SCHREIBER,

Manufacturer and Dealer in Beds, Bedsteads, Cots, Mattresses, Sheets, Comforters, and everything in the above line.

UPHOLSTERING DONE.
The above deals largely in

FULU,

and Having made arrangements to receive it from abroad by the cargo, is now enabled to offer it at Wholesale or Retail, at the best rates in the city.

ALSO—Constantly on hand, Hair, Moss, Wool, and Feathers. For sale at the lowest prices, wholesale and retail.

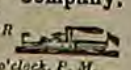
No. 179 Jackson street (3d door below Kearny),
Nearly opposite the International Hotel.

N.B.—All orders promptly attended to, and executed with neatness and dispatch. v9-1

TRAVELING.

California Steam Navigation Company.

ARRANGEMENT FOR MARCH 1st, 1857.



Departure from Jackson street wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL.

Steamer NEW WORLD, Capt. Samuel Seymour;
" ANTELOPE, Capt. E. A. Poole;
" CONFIDENCE,
" WILSON G. HUNT,
" HELEN HENSLEY Capt. E. C. M. Chadwick;
" J. BRAGDON, Capt. Thos. Seeley;
" URILDA, Capt. E. Z. Clark;
" CORNELIA, Capt. E. Conklin.

One of the above steamers will leave Jackson street Wharf every day at 4 o'clock P. M., (Sundays excepted,) for

Sacramento and Stockton,

Connecting with the light draft steamers for

Marysville, Colusa, and Red Bluffs,

For further particulars inquire at the Office of the Company, corner of Jackson and Front streets.

v9-1 J. WHITNEY, Jr., President.

Contra Costa Ferry Notice.

From Corner of Broadway and Davis streets.

THE new and splendid Steamer CONTRA COSTA, Capt. JOHN FOURATT—built expressly for this route, with every accommodation for the convenience of passengers, and so arranged that horses and carriages can drive on and off—is now placed upon the route, and will run regularly as follows—leaving

*** Subscribers can always form Clubs and transmit either of the Expresses, or with perfect safety by Mail.

THE LAW OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription
2. If subscribers order their papers discontinued, Publishers may continue to send them till all charges are paid.
3. If subscribers neglect or refuse to take their papers from the office or place to which they are sent, they are held responsible until they settle their bill and give notice to discontinue them.
4. If subscribers remove to other places without informing the Publisher, and the paper is sent to the former direction they are held responsible.
5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is prima facia evidence of intentional fraud.

☞ Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify Publishers, once in three months, of papers not taken from their office by subscribers.

Postage of the Farmer.—The Postage of the FARMER to any part of the State is only 6½ *cents per quarter, or 26 cents per year.* This is the lawful postage established by Congress and when more is exacted it is a violation of law

Manures and Manuring—No. 3.

[It will be noticed the following article is one of a series commenced in Number 21 of Volume VIII., and should properly have been published previous to the articles on "Gophers, Squirrels and Rabbits," by the same author, as he gives his reasons for leaving the present subject, and taking up others. For some reason this article did not come to hand at the proper time, and we have published two later ones on another subject; but we trust the reader will place the following where it belongs, and that the author's well-earned reputation will not suffer by the delay:]

EDITORS FARMER: The physician at the bedside of his patient who has ascertained the nature and cause of his complaint, and is aware of the kind of medicines to be used to effect a cure, would still be unqualified to discharge his important duty, if he did not also know the manner in which those medicines affect the human system. So with the skilled farmer. It is not enough to have discovered that a field is unproductive from the want of lime or sulphuric acid, he must also know the manner in which those necessary components of fertile soils are to be added to it, to effect the greatest amount of good.

To arrive at truths of this kind, there are two principal ways known to philosophers—by *a priori*, and *a posteriori*, arguments. In the first, we draw conclusions as to what must be the effect of a certain cause, or combination of causes, from the nature and qualities of that cause, or causes, now brought into operation; and in the second, we trace the result of experience, and thereby discover effects without perhaps being able to account satisfactorily for the manner in which certain causes operate. In Agriculture it is of great consequence to be able to apply both modes of reasoning, so that the one may prevent us from being misled by hasty conclusions drawn from the other. Let me endeavor to exemplify this.

In regard to lime: The scientific man knows that it possesses two distinct qualities; it is a necessary component of plants, and it acts as a corrective of crude and imperfectly-formed soils. As a simple hydrate, that is when newly slacked after being burned, it is alkaline, and highly efficient in promoting the decomposition of any inert matter in the soil. When exposed in this state to the atmosphere it gradually regains the carbon of which it was deprived by burning, and consequently loses its alkaline qualities. He knows also that it is much more soluble in water in the first than in the second state, and that before it can be assimilated by plants, it must be presented to their rootlets, either in that condition, or in the form of a gas resulting from such solution. The mere practical farmer knows a portion of this without exactly comprehending how much. But he believes he knows all that is necessary. The man of science, on the other hand, probably supposes that he knows so much that any further inquiry would be superfluous; and consequently maintains a learned dignity which he thinks he is fully entitled to assume. The common farmer in his eyes is a poor Hodge—a mere implement of labor. The common farmer thinks him a pompous ass. My feelings are on the side of farmers, but they must not leave themselves open to censure, nor to ridicule.

The truth is—now in the nineteenth century, when education in all civilized countries is placed within the reach of the many, when books of the most valuable kind are sold for a mere pittance, and periodicals, conducted by men who are fully versed in these matters, published weekly in the plainest language, and containing truths which two hundred years ago would have been cherished as secrets only to be given as pass-words among the initiated—every farmer ought to be well versed in Vegetable Physiology, and Agricultural Chemistry. It has been my endeavor hitherto, as your readers I hope will admit, to revive the memories of practical farmers on these subjects. To another portion of your readers, who evidently stand more in want of information, I have scarcely said anything—I mean amateur farmers, men with more capital than practical skill, and who would feel humbled by asking their poorer neighbors many things about farming which they are really anxious to learn. It strikes me, therefore, that I would do well to change my tactics, and write for the next year on Practical Agriculture.

Besides capitalists with a strong attachment for the enviable occupation of the farmer, and the domestic pleasures of rural life, there is many a young man, just returned from school, where his mind has got freed from the narrow prejudices of national preference, who would like to know something of the way in which people farm in other countries; as well as have stated to him, before he set seriously to work on his own account, the manner in which a man of experience would farm under the peculiar circumstances of soil and climate in California. With this object in view, I deem it unnecessary on the present occasion, to advert to the subject of manures in their practical application, as they will naturally fall into their proper place as I proceed.

There is one thing however which I wish to do beforehand. I observed about six weeks ago a good deal of complaint manifested by the correspondents of the FARMER in regard to Squirrels and Gophers. The subject is one of importance to farmers, many of whom suffer severely from their destructive habits and rapid multiplication. I was glad to perceive that the Agricultural Society took the view of it they did, and certainly supposed that some one would write an essay on the subject, which they would deem of sufficient value to lay before the public. I have written to the Corresponding Secretary for the purpose of ascertaining whether they have any such essay or not, and if they have not, I shall present my views to your readers before I commence to write on Practical Agriculture. If they have, I shall defer any remarks I may have to make, till we see what the Prize Essayist has got to say on the subject.

I do not, however, absolutely promise to write on Practical Agriculture, or on anything connected with Agriculture of any kind, for reasons which I shall briefly lay before your readers, so soon as I have procured proper information.

AGRICOLA.

MILLERTON, Dec. 22d, 1857.

A Way to Grow Good Radishes.

WE have been requested to publish again our plan of growing Radishes, Turnips, &c. We know by experience it is the best way in this country, and those who try will find it so. The annexed is the plan we proposed in our issue of 6th November last:

Celery is one of the luxuries of the table, Salsify, Parsnips, Carrots, Turnips, Beets and Radishes are always wanted, and these can always be grown in perfection by the following plan:

The soil selected should be a rich, light and deep sandy loam. After selecting the right spot, prepare trenches two and a half feet wide and two to two and a half deep, marking out the trenches so as to have them three and a half feet apart. In digging these trenches, care should be taken to dig the soil from the trenches and lay it up on the spaces in ridges in fine well pulverized condition, covering it in a smooth finished condition. By this plan the soil from the trenches will be completely transposed, and the virgin subsoil brought to the surface.

When this work is done take every other ridge and use them for vegetables in the following manner: As the trenches are to be reserved for Celery, Peppers, Egg Plants, &c., the soil of every other ridge will be wanted for blanching the Celery and hilling the other plants as they grow; while upon the other ridges, other articles are to be grown.

We now recommend that in the center of each ridge a row or two of Carrot, Beet, Parsnip, or Salsify be planted. The balance, eight inches from these lines, can be used for planting Radish, of sorts, Turnips, of sorts, Lettuce, Endive, etc. By this plan, the soil is rich, porous, and so prepared that the roots will penetrate to a great depth, and never suffer from the dry weather; and it will be found that all the tap-rooted plants will grow long and slender, and be sweet and nutritious, and more healthy than grown in any other way. One thing should be borne in mind—Turnips and Radishes should be sown for family use, in small quantities, and as often as every fortnight. By this means fresh vegetables will always be at hand.

Whoever will try this plan will thereby learn the value of subsoiling the land, for this is the very best way. Let it also be remembered, no manure is wanted in this rich virgin soil, for two years, then another class of vegetables can be grown that feeds on manures, and another spot selected and used for this class the same way.

Interesting to Farmers.

THE following result of feeding a milch cow partially upon Chinese sugar-cane, says a New Hampshire paper, will be read with interest by farmers: Lady Tempest, half Durham cow, was in pasture on the 22d of September, and yielded 41 pounds of milk. On the evening of that day, gave her ten short stalks of suckers of Sorgho, which, if cut up, would fill half a bushel. After this, until the 28th gave her same amount of sorghum, night and morning, and kept her in same pasture. Yield of milk: On 23d, 42½ pounds; 24th, 47 pounds; 25th, 47¼ pounds; 26th, 49 pounds; 27th, 51½ pounds; 28th, 50½ pounds. The pasture was affected by no circumstance that would tend to increase the feed from it during this time. The weather uniformly pleasant, except the 23d, which was rainy, and without frost affecting the feed.

THE MAURITIA PALM.

WE present a beautiful group of Palms—the prominent tree in the group being the one named as above. We give from authentic historical works the following sketch:

The family of Palms form one of the most magnificent in the vegetable kingdom. Intermediate in their structure, between herbaceous plants and trees, they possess the towering hight and the umbrageous shade of these latter glories of the vegetable tribes, with an elegance of form and beauty of proportion not inferior to any of the denizens of the woods or forests. They are all natives of tropical regions, and bring to us associations of bright and sunny skies, and a temperature in which their leafy shade and the cooling products which they yield must be peculiarly grateful and appropriate.

The species of palms hitherto discovered, exceed 130 in number. Not only do they excel every other family of plants in beauty and stateliness, but in the luxuriance of their fructification. Amidst the solitudes of the South American forests, in places far remote from human habitation, Humboldt found the ground covered with the fruit of these trees in places to the depth of three inches. More than 12,000 flowers have been counted in a single sheath of the date palm. The wax palm, which bears on its trunk a varnish of wax, is a native of the Andes. The cocoa nut grows abundantly in the South-Sea islands; and the plantain or banana, is dispersed over large tracts of the tropics. The sugar-cane, supposed to be a native of China, now grows over all the West India Islands, as do also the coffee plant, and indigo. The pine apple is conjectured to be a native of New-Spain; but it appears to grow wild in Africa and other parts of the Old World.

The Mauritia Palm, figured above, also yielding sago, grows in great abundance on the banks of the Orinoco river, in South America. This whole country is subject to inundations; and the fan-like branches of these trees, look like a forest rising out of the expanse of waters. The navigator who passes along the delta of the Orinoco, is surprised to see the tops of these trees lighted with fires. They are kindled by the Gaunchos, a people who have remained for ages in these marshes, secured from the floods by living in the palm trees. In the branches they suspend mats, which they fill with clay; and on this damp earth kindle the fires which are necessary for their comfort. Sir Walter Raleigh saw and described these people. The palm offers to this rude race, as well as to other tribes who inhabit the Gulf of Darien, and the watery lands between the Guarapitha and the mouths of the Amazon, a safe habitation amidst the inundations to which these countries are subject. But it affords them also in its fruit, its farinaceous bark, its sap abounding with sugar, and its fibrous stalks, pleasant food to eat, wine to drink, and thread to make cordage and hammocks. "It is curious to behold," says Humboldt, "in the lowest stage of civilization, the existence of a whole race depending upon a single species of palm, in a similar degree with those insects which subsist upon one species of flower."

Hop Growing in New York State.

THE Editor of the Homestead, in a letter from Richmond Springs, N. Y., for his own journal, furnishes the following information on the subject of Hops.

Hops are the universal crop in this region, there being few farmers who have not a yard, and some of them cultivating a dozen or more acres. It is the main crop relied upon for ready money, and is cultivated by most farmers to the neglect of everything else. Probably more hops are grown in the two counties of Otsego and Madison, than in all the rest of the State, and probably one-third of all the hops grown in the country are raised in this vicinity. It is estimated that there are 2500 acres devoted to this crop, and the yield is from 500 to 2000 pounds to the acre. The whole crop cannot be less than a million of pounds, and some put it a third higher. The soil is well adapted to this crop, and farmers who understand the management, curing and sale of hops make it profitable. It requires a considerable capital to carry it on, a good deal of skill in curing, and the market price depending upon the European crops fluctuates a good deal. It is an article in which speculators deal largely, and fortunes are made and lost very suddenly.

The poles used by the best growers come from Canada, and are mainly spruce and cedar. They cost about fourteen dollars a hundred, and it takes two hundred dollars to furnish an acre with poles; then every farmer has to build a kiln for the drying of hops, and a room for storing them, and a press for packing them in bales before they can be sent to market. They require manure, and the general objection urged against their cultivation is, that they take all the manure of the farm.

The best land is selected for the hop-yard, and it is made the pet of the cultivator. Everything else must be neglected for this. The hops are set out in hills about seven feet apart, and it takes about five bushels of roots to supply an acre. These roots cost from 75 cents to $3 per bushel, according to the price of hops. They are cheap now, as some are disgusted with the fluctuations of the market, and are plowing up their yards.

The rule is to set two poles to each hill, inclining from each other, and to allow two vines to each pole. The whole strength of the root is thrown into these four runners, and all the side shoots on the first half of the pole are plucked off early in the season. The crop is plowed and cultivated between the rows like corn. The plow runs pretty deep in the middle of the seven feet space, and very shallow near the hills. The crop is very light with young vines. A plantation lasts six or eight years.

The picking of hops is mainly done by girls brought from the neighboring villages for the purpose. The season only lasts about three weeks, and the wages are about $2 50 a week. This need of extra help in harvest time is one of the objections to this crop.

The hops are carried in sacks from picking boxes in the field to the kiln, where they are dried by artificial heat. Some of the kilns will dry a thousand pounds at one heat, and it takes about twenty-four hours to dry them. It is the practice to dry at night all that are picked during the day. After drying they are removed to the store-room to air, where they remain two or three weeks, and are then packed in bales with the press.

The profits of hop-growing were large, when the market price was forty cents a pound, and many went into the business. Two thousand pounds to the acre is not an uncommon crop, and eight hundred dollars from a single acre is not easily made by any other crop. But there are a few farmers who eschew hops on moral grounds, and there are others who doubt their economy in the long run. The temperance men say the crop goes mainly to the brewers, and tends directly to the increase of alcoholic drinks and so to intemperance.

Seed Wheat.

DURING the excitement relative to the high prices of Grain and Flour, our farmers should not forget to reserve some of their best Wheat to lay over for Seed another year, that they may carefully test the benefit of *old seed*. Those who may now be in want of *choice* Seed Wheat, can purchase some of the very best of J. T. Little & Co., on Clay street wharf. It is the best we have seen this season.

BEAUTIFUL NEW HOLLAND PLANT.—We received, by the hand of J. P. H. Wentworth, Esq., from the Garden of Sonntag, at the Mission, a beautiful plant of the "Erica" tribe, and we are happy to say we saw a beautiful collection of their Roses and splendid Plants, at this Garden, recently. We can announce that this is the first "Erica" in bloom on this coast. While at the Garden we were permitted to make a bouquet of the choicest gems of Flora—Camellias, Azaleas, Ericas, etc., all rare flowers. We only speak the words of the friend who received the bouquet, who pronounced it beautiful. Those who wish choice plants should improve the present time to visit Sonntag. His collection of 6000 Roses are now showing splendidly.

THE GREAT SQUASH.—Messrs. Cummings & Swan, of No. 1 Washington Market, cut up the great squash, weighing 204 pounds, on Tuesday last, and sent it to their customers in parcels of ten pounds each, at ten cents per pound. It was A No. 1. Can our friends in the East beat this.

A Few Words from Our German Friends.

WE have always labored on in faith, believing we should live to know that our efforts in the cause of Agriculture would be duly appreciated. Letters are coming to us, from all quarters, telling us of the prosperity of this great interest, for which we devoutly send forth rejoicing. God bless the Farmers say we.

We have, among our good Farmers, many of the able and industrious from the "old country," among them many Germans, and their prudent, persevering labor we trust will be richly rewarded.

The following kind words came to us in a private letter, and we feel it a duty to take the liberty of publishing them, and thus show our appreciation of the good will of our patrons. We trust our friend and all others, now suffering from the troubles of the unsettled titles, will soon be released. We hope to hear again from our friend.

—

"The cheering words you give to the farmer don't fall on sand with me, and myself being a farmer of new date I derive much benefit out of your paper. As you well know, there are very many like myself in California, not knowing anything about farming and stock-raising, except the dim remembrances of what they have heard and read about in gone-bye years, and I therefore consider you are the more friendly guide, as most other papers give up most of their time to political and other struggles. A farmer, with small means, on disputed land (on Stuart's grant, where the disputing about God knows when will end), has a thousand obstacles in his way, and is uncertain when the greatest of them will cease, or can be made to cease bothering him; but a kind word will never fail to cheer one on and on."

BREAKFAST RADISH.—A good Radish for breakfast is a rarity. Half the Radishes brought to market, and two-thirds that are put upon the tables, now-a-days, are not fit to eat. The French are very careful to have those that are palatable. They grow them to perfection; they cultivate for all tastes, and very appropriately—the black Radish for its stringency, the white and straw for their own peculiar flavor, and the oval-shape turnip, long and demi-long, each and all for their several uses. The greatest luxury among them all is the *Dejeune* Radish, the breakfast Radish, a small, bright scarlet turnip-Radish, of hard, solid growing quality, yet firm and sweet, very delicious, and worthy the especial care and notice of the Gardeners of San Francisco. Having often eaten them in France, we know their excellence, and speak of their good qualities from experience.

Those who wish to try them are reminded that we have the only lot of seed in the country; having received it direct from France, to introduce it into the country.

HEMP AND FLAX.—These two immensely valuable products could be grown in California with complete success. Many specimens, both of flax and hemp, have been exhibited at our State Fairs. One specimen, raised by Mr. B. Hoffman, on Dupont street, in this city, was shown at the Mechanics' Fair, measuring seventeen feet in hight. To this a Special Premium was awarded.

If the Legislature would but offer a bounty upon hemp, we could raise enough the present year to keep the manufacturers of cordage supplied without sending to *Russia* for it. Cannot something be done to start the cultivation of these valuable articles of manufacture and commerce?

A WEEKLY CATHOLIC JOURNAL.—We have received the prospectus of a new paper, about to be started in this city, by Messrs. Marks, Thomas & Co., who are the publishers and proprietors. This new paper will be called The Monitor. It will be commenced on Saturday the 6th March, and will issue regularly once a week. The price of the Monitor will be $5 per year, $3 for six months, by mail, in advance; 12½ cents single copies. The following paragraph from the prospectus bespeaks the character and principles of the paper:

"Although we acknowledge with pride and gratitude that the Press of California is in no appreciable measure Anti-Catholic, and that it is the most liberal in the whole world, yet we think a Catholic journal, free from the rancor of polemics, and devoted to the cultivation of Catholic literature, neither superfluous nor uncalled for. Such it is the design of the projectors of The Monitor to furnish."

Independent in spirit ourselves, and generously tolerant; free from all sectarian or political bias, we can cheerfully extend our kind wishes to Messrs. Marks, Thomas & Co. for success to their new journal, believing as we do that there is a large class of our best citizens who will give it a generous support. We the more cheerfully accord our wishes to this journal from a remembrance of the pleasure we enjoyed in the friendship and correspondence of the good Father Mathew and many of such truly catholic spirits. Messrs. Marks, Thomas & Co. being good practical printers, will also give them another assurance of success, which we sincerely trust they will win.

WHO HAS LARGE POTATOES?—We should be very thankful if our farmers would be so kind as to forward to us specimens of "big 'taters," or other vegetables. We can do good with them.

California Notes.

[Copyright Secured.]

ABOUT GRASSHOPPERS AND LOCUSTS In California and the World.

BY ALEXR. S. TAYLOR, OF MONTEREY.

[CONTINUED.]

In connection with this subject, as pertains to California, ought to be mentioned the praiseworthy efforts of Colonel Warren, editor of the CALIFORNIA FARMER, to stimulate inquiries founded on original observation of the *Locusta* of our State. This gentleman forwarded a short circular note to several of our periodicals; dated July 2, 1855, in which he states: "For the last three days, the very air has been full of them, over this city (Sacramento), resembling a dense snow-storm; the myriads, as they fly, shining in the sun like snow flakes. So numerous are they, that it is believed that were all which are floating in the heavens above, to drop upon this city for even twenty-four hours, everything, animal and vegetable, would cease to exist, unless sheltered in close rooms. Large fields of oats and wheat have suffered in Ione and other upper (Sierra Nevada) valleys."—Vide San Francisco Daily Herald, 3d July ult.

"*The Scourge.*—The most remarkable circumstance that we have ever been called on to notice in this locality, was the flight of the Grasshoppers on Saturday and yesterday. For about three hours in the vicinity of noon of these days, the air, at an elevation of about two hundred feet, was literally thick with them, winging in the direction of Yolo. They could be the more readily perceived by looking in the direction of the sun. Great numbers of them fell upon the streets on Saturday—absolutely took the city by storm—and on yesterday they commenced the wholesale destruction of everything green in the gardens in the neighborhood. Their flight yesterday, *en masse*, resembled a thick snow-storm, and their depredations the sweep of a scythe. The prevalence of the scourge is explained by Dr. T. M. Logan as being attributable to the great warmth and dryness of the present season—circumstances favorable to an early development of the eggs of the insect, which is deemed the most fruitful in the animal kingdom."—Sac. Union, 2d July, 1855.

But Col. Warren's desires were but very slightly complied with, on the part either of our scientific or amateur naturalists. As a friend of ours writes: "California, as yet, is but an arid region in which to cultivate literature and the sciences." Our life is so material in the Pacific Palestine, and every mother's son of us so anxious that he will be outstripped by more active competitors in the race for money and place, that the very excess of the stimulating and wranglesome excitement, fills the brain with such an unhappy quantity of blood, that our Insane Asylum has contained very many unfortunate cases growing out of the evil.

The celebrated Dutch Naturalist, John Swammerdam (1673), says of the *Locusta:* "It is remarkable that the males of these insects only produce music, or a chirping, crackling noise; for the females emit no such sounds."

The Swedish Naturalist, Baron de Geer (1752), says of the sounding apparatus of these animals: "On each side of the first segment of the abdomen immediately above the origin of the hind thighs, there is a large, deep opening, somewhat oval in form, and partly closed by an irregular plate or lid, of a hard substance, but covered by a flexible, wrinkled membrane. The opening left by the lid is in the form of a half-moon, and at the bottom of the cavity is a white membrane, shining like a mirror, and tensely stretched. On the side of the opening, towards the head, there is a small oval hole into which the point of a pin may easily pass, and when the membrane is removed, a large cavity is brought into view. The whole of this apparatus seems to contribute much, both to produce and to increase the sound caused by the insects." "We have remarked," says the Rev. John Rennie, in the Insect Miscellanies (1831), "this point, in a number of Grasshoppers, and have been struck by its resemblance to the hole in a military drum, as well as in violins and guitars. We found, indeed, in stopping up this hole with a bit of wafer, that it could no longer produce its peculiar sound, but only a sort of muffled scraping. As Swammerdam observes, the insect has two peculiar, small drums, like the drum of our ear, which being struck by two lunulated cartilages, vibrate the air in such a manner as to produce the sound. Of the foot of the *Locusta*," says Rennie, "the terminal end is not only furnished with a movable claw, but with two soft, round palms, to so say, which must greatly assist them in feeling the nature of the surface over which it walks. The animal produces its noisy chirp by applying the hind shank to the thigh; rubbing it smartly against the wing case, and alternating the right and left legs."

The *Locusta* are very vindictive and savage, as well as voracious. The Chinese make small paper boxes to confine them in, so as to pit them against each other in drawn battles, and they will then fight each other like gambling bullies, until one of them dies. This is very common sport among Chinamen, as we can testify from sight in this country. "Having put some English grasshoppers alive into a vial," says Rennie, "we were not a little surprised to see them immediately fall one upon another with the most cannibal voracity. On a male and female being put into another vial, the female forthwith munched a large piece out of the male's back; and upon rescuing him from her fangs, the male immediately made reprisals by eating a hole into her side. An eminent entomologist having put a Grasshopper with one of its broken-off legs into a vial, the animal devoured in a short time its dismembered limb. Yet we had for several weeks kept in a room a great number of them, male and female, without one of them attempting to prey upon the other; though they manifested not a little fear on near approach to each other—in such cases the male always uttered two or three notes of alarm and started away."

From the valuable notice of the visits of the *Locusta* in 1855, made by the periodicals of California, Utah, Washington and Oregon, it would appear that the Grasshoppers are most abundant from the fifteenth of July to the twentieth of September, or a period of sixty-seven days. They would seem also to be at the maturity of their destructive capacity, from the first to the thirty-first August, which is the hottest and dryest month of the year in all these regions.

From the accounts of historians and naturalists it is fully proved, we conceive, that the *Locusta* affect one-third of the superficial surface of the earth, in a manner and form which makes them one of the most dangerous enemies and destroyers of the labors of mankind—an actual bar to his progressive increase and well-being. And though they have been noted by every eminent writer of antiquity or history, geography and natural history, the information we have of them is yet exceedingly meager and defective. In all the works of Natural History we have consulted, we can find no trace of mention of a special monograph, or separate historical and scientific description of this highly important piece of animated destruction, known for six thousand recorded years.

It is very likely that they could be made useful in fattening hogs, for which purpose they might be gathered, in some years, in numbers to feed thousands of swine. They must contain also a considerable amount of animal oil, which may some day be found of use to soap and candle makers. Providence must have designed them for some use to the human family, or they would not, it seems to us, come so often and so thick.

It is stated in the Encyclopedia Americana (article Locusta) that the seventeen-year Locust has been used in New Jersey, when they have appeared in great numbers, for the purpose of making soap. This fact is highly suggestive to Californians, as if each Grasshopper contains but fifteen grains of free animal oil, a million of them could be made to squeeze out twenty-six hundred pounds (or over a ton and a quarter) of very useful soap fat, or possibly oil good enough to burn in lamps. We trust that this fact, fretting in the brain of some speculative Yankee, may in time emerge a full blown maggot of wriggling prosperity—particularly as whales are becoming scarce.

The *Locusta* belongs, in the animal system of Cuvier, to the sixth order of Insects termed *Orthoptera*, and, of its second class, *the Saltatoria* or Jumpers. The *Gryllidae* and *Locusta* are united by Geoffrey St. Hillaire into one *genus*, containing very numerous species found in all dry countries of the world, and called in his Entomological nomenclature, *Acrydium*. This genus was divided into species by the great Entomologist of France, Pierre Andre Latreille, as follows:

Pneumora of Thunberg: has the hind legs shorter than the body, and scarcely fitted for leaping: the abdomen is bladder-shaped in one of the sexes. Found in South Africa.

Proscopia of Klug: Wingless; the body is long and cylindrical; the head without ocelli is prolonged in front into a point or cone, bearing two very short seven-jointed antennæ, pointed at the tip, and the hind legs are large and long. Found in South America, and monographed by Klug.

Truxalis of Fabricius: Antennæ compressed, and of a prismatic form; the head elevated into a pyramid, as *Gryllus Nasutus* of Lamarck, and many other exotic species.

Xyphicera of Latreille, or *Pamphagus* of Thunberg; characteristics intermediate to the *Truxalis* and *Gryllus Locusta* of Linnæus; or *Acrydium* proper of Fabricius: which has the hind feet longer than the body; the abdomen solid, and not bladder-like; the head ovoid, and the antennæ filiform and terminated by a knot.

Many species have on each side of the body, and near the base of the abdomen, a large cavity closed on the inside by a very thin pellicle; which has some influence in the production of the chirping, or in flight, and comparable to a tambour: they fly high in the air and often in troops; their hind legs are often agreeably colored, especially with red and blue. Amongst the exotic species (to France) the thorax is often crested, warty, or otherwise singularly formed. Certain species have been termed migratory, from their uniting in troops of incalculable numbers, and migrating through the air in thick clouds, and in an astonishingly short time transform the places where they alight into an arid waste. Their death even becomes a scourge, the air being infected by their dead bodies in immense masses. They are consumed in different countries of Africa in great quantities, after being deprived of their legs and wings, and form an article of commerce there.

The Gryllus migratorius, which is two inches and a half long, with brown wing covers spotted black, and a slightly elevated crest on the thorax, and is common in Poland.

The south of Europe, Barbary and Egypt suffer similar devastations from other species, some of which are of a larger size, as *Gryllus Egypticus* and *Gryllus Tartaricus* of Lamaick, and from *Gryllus Iincola* of Fabricius, which last is found in the south of France, and used in Barbary for food. The natives of Senegal dry another species of which the body is yellow, spotted with black, and which Shaw and Dennon have figured in the accounts of their voyages in Africa: they reduce them to powder, which they use as flour, as I am informed by M. Savigny. These two last species have a conical prominence upon the prosternum, and compose with some others the genus *Acrydium*. In some of the species differing, they have the wiry covers and wings perfect in the two sexes, and belong to the genus I have named *Oedipoda*, in which are numbered the *Gryllus Oedipoda*, in which are numbered the *Gryllus Stridulus; G. flavipes;* and *G. Coerulescens*, and a number of other species found in England.

Other *Acrydia*, similarly winged and with filiform antennæ, have the upper part of the prothorax strongly elevated, very compressed, forming a sharp crest, rounded and prolonged into a point behind. Foreign countries possess numerous species, one only of which, and of smaller size, is found in the south of France, viz: the *Acrydium armatum* of Fischer.

In the others, one of the sexes, at least, has the wing covers and wings very short, and in no wise fitted for flight. I have formed for these a new generic group *Podisma*.

The *Acrydia*, which have the antennæ thickened at the tips, either in both sexes, or only in one of them, are formed also into a peculiar genus, *Gomphocerus* of Thunberg—as the *Gryllus sibiricus* of England.

In the second division of the genus *Acrydium* the prosternum receives in a cavity a part of the under side of the head; the tonguelet is quadrifid, and the tarsi have no pulvillus between the ungues; the antennæ have only thirteen or fourteen joints; the thorax is prolonged behind like a large scutellum, which is longer than the entire body, and the wing covers are very small.

Then *Orthoptera* form the genus *Tetrix* of Latreille, being the *Acrydium* of Fabricus and part of *Gryllus bulla* of Linnæus.

The scientific characteristics of the *Saltatoria* family are as follows: "Has the two hind feet remarkable for the size of their thighs, and for the very spined tibiæ thus formed for leaping. The males call their females by making a chirping noise, which is sometimes produced by rubbing an inner part of the wing covers, like a talc-like mirror, against each other with a rapidity, and sometimes by a similar alternate motion of the hind thighs against the wings and wing-covers, the thighs acting the part of the bow of a violin. The majority of the females lay their eggs in the ground. The *Locusta* genus of this family have the wings disposed over the body like a roof, and the tarsi have four joints. The antennæ are very long and filiform. The females have the ovipositor always exerted, compressed and saber or cutlass shaped, and are herbivorous; but many species of the genus have only small wing-covers, and some are even destitute of wings. The tonguelet in the majority has only two divisions; the ocelli, are three in number, and constantly distinct; the mandibles much toothed; the abdomen conical and compressed at the sides. They leap with great energy and agility, and can, in many species, maintain a sustained flight, and feed upon vegetables with voracity."—Vide Carpenters edition of Cuvier's Regne Animal, London, 1849, pp. 560, 61 and 62.

Dr. Dwight mentions that the Grasshoppers have several times been extremely injurious to the growing crops of New England, prior to 1800.

In the United States expedition to the Dead Sea, in 1848, the only mention made of the *Locusta* by Lieut. Lynch, in all his travels in that region (we judge by reading the chapters of contents), was on 25th April, 1848, when his party saw immense numbers of dead Locusts on the southern shore of that internal salt lake. The features of the Dead-Sea country assimilate remarkably to that of the territory of Utah.

Michel Adanson, in his Natural History of Senegal (Paris 1757), gives it as his opinion, that the *Locusta* of that country do not form wholesome and nutritious food.

While the hosts of the allies and the Russians have been slaughtering each other to kill in the old battle fields of the Huns and Scythians, that country, very singularly, we learn from the periodical press, has been, as from time immemorial, again the scene of the ravages of the *Locusta*. Such immense swarms appeared during the summer of 1855, near the city of Odessa, that they darkened the sun. Throughout southern Russia they committed the most destructive ravages on the growing crops. *This is the first time, we believe, in history, that they have been chronicled as appearing simultaneously in both the eastern and western hemispheres.*

The species of Grasshopper described in Capt. Stansbury's Journey of the Salt Lake Country, in 1850, and figured and described by Prof. S. S. Haldeman in Stansbury's work, published in 1852, by order of Congress, is a species of the *Locusta* different in size, colors and particular features, from that found near Monterey. Haldeman calls this Salt-Lake Grasshopper the *Oedipoda Corallipes*, and says that it is congeneric with the *Oedipoda migratoria* of the English naturalists, and which is found so destructive in the countries of Asia Minor and the Crimea. The *Corallipes* is nearly as large as the *Migratoria*, being two and a half inches long. The California Grasshopper, or rather the species found near Monterey, I have seldom seen over one and a half inches long, and it is not in any manner colored "bright vermillion" in any part of its body; as is mentioned, by Haldeman, of the Salt Lake species. There is only one species of the *Locusta* described in the above work. It has either no *antennæ*, or it is faintly delineated. The date of preservation or capture of this *Oedipoda* of Utah is not stated by Haldeman. In the chapters of contents of his work, no mention is made by Stansbury of the *Locusta* on the line of his travels. It ought to be remembered, however, that in 1849 and 1850 (as he remarks in his book), investigations into the zoology of these countries formed no part of the official duties of himself or of his assistants. His time and opportunities, the materials for preservation at hand, and the scarcity and difficulty of procuring necessaries for his party, prevented this able and meritorious officer from paying that particular attention to the Entomology of Utah, which the extraordinary appearance of the *Locusta* to that country, in 1855, would seem to make necessary in a work of the character. As Stansbury's is a standard work on Utah, being the first scientific work published of those particular regions, this apparent omission of facts in natural history, which may in the future assume an immense economical and even political importance, ought to be borne in mind by his readers.

The late Mr. J. B. Wall, Collector, of Monterey, informed me, that in a journey from Oregon to Missouri, in 1846, his party encountered, in July, on the plains near the North Fork of the River Platte, myriads of the Grasshoppers, which all appeared to be traveling northward, and proved extremely annoying to the train for many days.

In Bryants "What I saw in California" (Philadelphia, 1849), he relates, that on his passage to California, under dates of July, 1846, their company of emigrants also encountered immense swarms of Grasshoppers on the prairies near the Platte. Near the Salt Lake he found the Indians gathering the Grasshoppers, by surrounding them with fire, and then driving them into the middle and killing them. They were afterwards roasted before the fire, powdered between smooth stones, and used by them as food. They also used them by mixing with service berries, forming thereby, as Bryant says, a palatable article of human provender. The Indians of California everywhere pursue the same plan of capturing Grasshoppers and using them as food.

[TO BE CONTINUED.]

Chinese Prolific Pea.

I was greatly surprised, some time ago, by learning the assertion of a distinguished contributor to one of our Agricultural Periodicals, that "*we never have had anything worth having from China.*" True, the list of agricultural plants from that country is not very long, still, Cotton, Rice and Sugar, all of which have been cultivated in China before the Christian Era, may by a good many persons not be considered worthless to the South. The Chinese Sugar Millet is just now undergoing a fair trial, and will, undoubtedly, become a staple crop in the South; not only on account of the sirup and other articles manufactured from it, but also as an invaluable forage plant.

Recently, another new forage plant, the Chinese Prolific Pea, so called, has come into notice, and as this is the first year that it has been fairly tried, it may perhaps, be acceptable to your readers, to see a short and *important* account of this crop.

In the autumn of 1856, Mr. Douglass of Arkansas, for the first time, published his success in the cultivation of this plant. Like many other new things, it was by many persons pronounced a humbug. I did not plant it myself, but from close observations of this crop which is now raised by several planters in this vicinity, I rejoice to say, that it fully comes up to all that Mr. Douglass said in favor of it.

The Pea, when ripe, is small oblong, of a greenish yellow color. It may be planted at any time in the spring, after all danger of frost has passed, but it is most profitable to sow it in June, immediately after a crop of grain has been harvested. It should be sowed in hills, three feet (not more) apart each way, dropping three or four seeds to the hill. At this rate it requires only three pints of seed to plant an acre. Cultivate like corn. Sandy soil is most suitable, and I have not yet seen it flourish on strong clay land.

About the first of September it commences showing numerous heads of yellow flowers, and those planted in April, were only a few days ahead of those planted in June. The vines were at that time so rampant, as to interlock and form a close mass of verdure, laying from two to two and a half feet thick over the whole field.

It is a well known fact, that every crop intended for hay, should be cut and cured while in bloom. The Chinese Prolific Pea does not make any exception from this rule, and when cut while in that state, it will yield, on poor sandy land, from two to three tons of excellent hay to the acre. On such land I have often seen vines twelve feet long, and single plants weighing as much as fourteen pounds. The stubble having a very strong root (often four to five feet long), will soon sprout again luxuriantly after being cut down, and yield an excellent crop of green forage, either to be pastured off, or which will be the best way, turned under before frost as a green manure, which would leave the land in a fine condition for the next crop.

Like all other plants, which, by the law of nature, blooming late in the season, this pea will ripen its seed very quickly, say in sixteen to twenty days after it commenced blooming.

All animals are exceedingly fond of this plant, either green or cured for hay.

It is also a fact worth noticing, that this pea is not liable to be attacked by bugs. Seeds of the crop of 1856 are at this very day as sound as ever.—[Robert Nelson, in the Cotton Planter.

WHOLE POTATOES VS. EYES, FOR SEED. An English paper gives the result of an experiment lately made to ascertain what would be the difference in yield where whole potatoes were used for seed or the eyes alone, and reports thus: A trial has been made in the vicarage garden, Coggeshall, of potato eyes against whole potatoes, on perfectly equal terms, a row of each side by side—a certain number of whole potatoes were sown a yard apart, the eyes of the same sort were sown at the usual distance; equal care was taken in all respects that the trial might be fair. The result, as shown a few weeks back, was, that the whole potatoes produced in weight more potatoes, but the excess of weight was but equal to the weight of potatoes from which the eyes had been taken, and which potatoes had gone into the kitchen for dressing; so that, as far as this experiment goes, nothing is gained by sowing whole potatoes.

WHERE do weeds come from? That crop you permitted to ripen last year, unharvested, scattered its thousand seeds all over your land. They mingled with your grain, and found a lodgment in your barn with your hay. The seeds were carried upon the soil in the manure, all swollen and ready to germinate. Better use the hoe in haying time, and make vegetable bonfires in harvest-season, than suffer from the maturing of weeds on your land.

Canadian Horses.

THE extract given below is from the Montreal Herald. When at the Provincial Exhibition of Lower Canada, last season, we saw some admirable specimens of the Canadian breed.

"Our valuable breed of horses is suffering every year by the exportations across the lines of our choicest specimens, and already the scarcity of the better class of Canadian horses has been apparent, owing to the continual activity of our neighbors, who have ever an eye upon anything good, in picking up the best of our horses. Not many days ago, Captain Daniel Hickok, of the Lake House, New Orleans, took with him to the "Sunny South" a Cœur de Lion colt—one of the first in the country, and which is certainly a loss to Canada. He had a heavy tail four feet long, and an immense mane, and was very appropriately named by the gentleman who bred him, "The Pride of Canada." Captain Hickok's string also embraced several other choice animals. Some of our agricultural societies have gone to the expense of importing costly stock horses from England. This is very questionable policy. Our own unrivaled breed of horses are as good as, or superior to, anything we can import."

Canada is the place to make purchases. [Working Farmer.

A Physiological Fact Interesting to Sheep Breeders.

MR. Malingie Noule, President of the Agricultural Society of Loire et Cher, reports as follows:

"In putting my small mixed-blood ewes, that weighed not above fifty-six pounds, to heavy New-Kent rams which weighed often two hundred and twenty-five pounds, one apprehension alarmed me—the fear, I mean, of losing ewes which had cost so much trouble, when the time came for their giving birth to the large offspring one naturally expected. But no such danger arose; and the reason seems to me clear. Whatever be the size of the ram, the germ develops itself only in proportion to the nourishment it receives. Now, while it remains in the womb of the female ewe, it obtains but little support; consequently the lambs remained small, and the births took place without difficulty. In two thousand labors we had but one death that was occasioned by the immoderate size of the lamb. It was curious to see such small offspring engendered by such huge sires. But these little creatures, if well fed, soon began to grow rapidly, and it was not uncommon to see ewes sucked by lambs larger than themselves."

Horn Ail—Hollow Horn.

THERE is no such thing. This is our settled belief; or, at most, it is merely an incorrect name for some ailment which has no more to do with the horns than with some other parts of the body not particularly diseased. The horns are at the base exceedingly thin, as we all know; they are very good conductors of heat, and they cover a bone, the pith, which with its integumen, is exceedingly vascular, as is evinced when a horn is broken and the blood-vessels ruptured, the flow of blood is vastly greater than when any other bone is broken or bruised. Hence it is that by feeling of the horns it is easy to ascertain the general temperature of the animal—if it is feverish and heated the horns are hot; if debilitated, and its energies in a measure prostrated, the horns will not be warm as usual. Standard writers, writers on veterinary practice either deny the existence of the disease, or say not a word about it. The symptoms are those of general debility, or this as connected with some prostrating distemper.—[Homestead.

FARMERS' CLUBS.—THE RIGHT WAY.—The Kennebec (Maine) Journal, in reporting upon the advance of agriculture in that State, says "there is a general desire in this region for the formation of farmers' clubs in all our towns," and, in urging their value to every community, says:

"In all the agricultural towns the people ought to take a pleasure and a pride in sustaining a course of public meetings, where they can be entertained with readings of original articles on the resources of the town—the means of progress—facts in farming, orcharding and gardening, and such like matters.

The rust needs to be rubbed off in every community, and the sharp corners smoothed, and prejudices and isolation overcome. In order for any community to increase its enjoyments, the best to exercise individual freedom in society, the people need to meet occasionally face to face and chat a little and call out each other's best points, and learn to help each other's mental and moral and social enterprises. There is home talent in Maine sufficient to sustain with ability any and all of these undertakings, if the people will only become acquainted with each other sufficiently to venture to think freely when on their legs."

FERMENTED OR NON-FERMENTED MANURE. Professor Voelcker states, that in dung heaps under a state of fermentation, however excessive, that free ammonia is not generated except in the center of the heap, where the heat is greatest, and where it has risen from 120 to 150 degrees fahrenheit; and that it even then rarely escapes, except in very small quantity, as the external layers of the dung heap, where but little heat is generated, arrest and fix it in its course and endeavor to escape; that the strong smell emanating from its dung heaps in a state of fermentation does not arise from the ammonia escaping, but is rather to be attributed to peculiar volatile organic combinations—to some sulphureted and phosphorated hydrogen and a variety of other gaseous matters, amongst which ammonia as a gas is only found in very minute quantities.

Upon the other hand, the learned professor attributes the greatest injury sustained by farm-yard manure, to arise from its being exposed to the action of the rain-water, especially in open yards, or after removal to the field in heaps; and to obviate this, he recommends that the manure be carted immediately to the field, and incorporated with the soil—at all times a difficult task, and at the same time frequently a slovenly mode of application.—[Mark Lane Express.

TROUT FISHING EXTRAORDINARY.—The Inverness (Scot.) Advertiser, says: Two young gentlemen, viz: Gordon Macpherson, Esq., Cluny, page to her Majesty the Queen, and Robert Macpherson, of Glentruim, went last week to fish upon the world-famed Lochlaggan, upon the bosom of which her Majesty ten years ago enjoyed herself so much, along with the Prince Consort and family. In three days the young gentlemen hooked and caught with the fly the unprecedented number of twenty-seven dozen, or 324 fish, averaging from one pound to four and a half pounds weight each; they consequently caught upwards of 700 pounds weight of fish.

Smut in Barley and Wheat.

We copy the following from the London Magnet:

"I have frequently noticed, and occasionally suffered from, this disease. Now, suppose the black ears amount to 2 per cent., it strikes me that if it were possible to separate them from the bulk of the crop, the deficiency so separated must be 2 per cent., neither more nor less. But there is another way of looking at the matter. Suppose we could by some hocus pocus transmute these black or blind ears into sound, healthy grain, what is to prevent the 2 per cent. deficiency from becoming an increase to a similar amount? If, therefore, a clean, untainted crop be desirable, as in my humble opinion it undoubtedly is, the next point is to ascertain how this is to be accomplished? In the case of wheat, we know that smut powder mixed with sound grain, will produce a smutty crop. It is highly infectious, but we also know that this infectious property may be counteracted, and a perfectly clean crop obtained by the use of blue vitriol, sulphate of copper. All my experiments, and I have made many in my time, led to but one conclusion, viz., that no man need grow smutty wheat except he has set his mind on so doing. What I have here said applies to the smut or bladder brand. The black ears, or, as the disease is sometimes called, powder-brand, are a different affair altogether. Whether in barley or wheat, and they are occasionally seen in both, the powder does not appear to be infectious; I have tried to produce it in different ways, and have rung the changes on almost every variety of crop, barley upon wheat, wheat upon barley, wheat upon wheat, barley upon barley, but never have succeeded as with the bladder-brand or broken smut balls. The black ears, or powder-brand in barley, Mr. Lawrence seems to think, prevails in some years more than in others, and that it especially abounded in 1856. Now, I should like to know if it made any change of seed in that particular year, because some people have anidea—and I confess myself of the number—that certain varieties are more liable to the disease than others. Whether well or ill-founded, the American barley got an ill name in Norfolk on this account, and it is now comparatively but little grown—I was so pestered at last with it, that I made up my mind to give it up, though not until, like Mr. Lawrence, I had at least made trial of some kind of remedy. This was washing and steeping in fair water. As large a vessel as the farm could furnish was partially filled with rain, or clean pit-water, into which the seed barley was gently poured or riddled with a sieve. By this process, all light grain, seeds of weeds, and dust of every description, floated on the surface, and when skimmed off the mass below was well stirred up, and, in fact, underwent a thorough good washing; a second skimming then removed what the first had left, and the barley remained under water for 12 hours or so. The water was then drawn off, and the seed corn [barley] laid in a heap on the floor, and a little lime dust sifted over and well mixed with it, to fit it for the drill. A few hours sufficed for this purpose, when it was drilled alongside the dry unsteeped barley. It came up rather sooner, and certainly more regularly than the other, and was besides a better, cleaner, and more creditable crop at harvest time. On the whole I do not hesitate to give my vote in favor of washing and steeping seed barley (if in more than one water so much the better), were it only to diminish the number of weeds in the crop; but considering the supposed innocuous property of the powder which constitutes the black ears, it appears to me unnecessary to use any steep stronger than water, except, perhaps, a dash of salt to increase the buoyancy of the water, the better to skim the weeds which rise to the surface.

SAMUEL TAYLOR.

QUEEN'S SOUP.—Boil a fowl till quite tender; then cut off all the white meat; put it in a mortar with half a pound of blanched sweet almonds, and a cup of cream. When quite smooth put in a clean block-tin saucepan, and boil it one hour with some white gravy or water. Strain it upon toasted slices of bread, in a tureen, and then season.

LIQUID PUDDING SAUCE.—Thicken a pint of boiling water with a little flour. Put in a pint of brown sugar, and let it boil. Then add a small piece of butter, and flavor with wine and nutmeg, or peach water.

TO KEEP STOVES FROM RUSTING.—Melt fresh mutton suet, rub the stove carefully with it while warm. Then dust well with pulverized unslacked lime tied up in a muslin rag. Stoves thus prepared should stand in a very dry place, covered with straw matting, and will keep free from rust for several months.

TO RESTORE VELVET.—Let one person hold the velvet tight, while another passes a warm flat-iron over it on the wrong side, after which a very light, soft brush may be used. The good effect of this on old velvets will scarcely be credited.

WE err by omitting cheap acts of beneficence in our daily walks, and among our hourly companionships. The web of a merciful life is made up of these slender threads.

TO ROAST GEESE.—Boil them a half-hour to extract the strong, oily flavor. Then prepare them the same as chicken. One hour's roasting will be sufficient, if tender.

SAGO SOUP.—Make a clear, rich soup, in any way you desire, and thicken with sago. This is much esteemed, and is an excellent invention.

LOVE AT SIGHT.—A servant girl, of no strong intellect, who lived with a lady in the neighborhood of Paisley, one day surprised her mistress by giving up her place. The lady inquired the cause, and found it was that fertile source of dissension between mistress and maid servant—a lad. "And who is this lad?" inquired her mistress. "Ou, he's a nice lad—a lad that sits in the kirk just forenent me." "And when does he intand that you and he should be married?" "I dinna ken." "Are you sure he intends to marry you at all?" "I daur say he does, mem." "Have you had much of each other's company?" "Not yet." When did you last converse with him?" "Deed we hae na conversed ava yet." "Then how should you suppose that he is going to marry you?" "Ou," replied the simple girl, "he's been lang lookin' at me, and I think he'll soon be speakin."

MR. Joseph E. Holmes of Ohio, Superintendent of the recent trial of Agricultural Machinery at Syracuse, N. Y., has received and accepted an invitation from the Russian Government, through and as the Agent of one of the American Engineers, engaged at Sebastopol—to select and ship a cargo of our farming implements for exportation to Russia. They will be accompanied by a number of mechanics, and sent in time to be of use during the next harvest. How many who neglect to avail themselves of the best tools and machinery made almost at their own doors, might learn a lesson from the enterprise and sagacity of the Muscovites!

Charges of Scientific Piracy.

IT will be recollected that Dr. C. F. Winslow, named in the following article, has been for a long time one of the contributors to our columns of very able and interesting sketches and scientific subjects, and, in justice to him, we publish the annexed from the Springfield (Mass.) Republican:

It will be recollected some time since Dr. C. F. Winslow brought against Prof Pierce of Cambridge the serious charge of appropriating his theory of solar causation in the formation of continents, publishing it as his own. For a long time Prof. Pierce refused to notice this charge, and when he did so at the recent meeting of the American Scientific Association at Montreal, it was in a manner so equivocal that the public mind remained in doubt as to how much he admitted and how much he denied. The explanations volunteered by the friends of Prof. Pierce were unsatisfactory, because evidently nothing better than attempts to evade and gloss over the real point at issue. At least, this is the way in which the matter was left in the public mind, unfortunately for the reputation of the professor. But recently another charge of the same kind, and of a more serious character, has been brought against Prof. Pierce by John Warner of Pennsylvania—a man of some repute for original scientific research, and the author of a pamphlet entitled "Studies in Organic Morphology." He asserts that before he had published upon this subject, he entrusted a manuscript containing the result of his researches to a friend, to be handed to Prof. Pierce for examination; that the professor made no reply to his repeated applications for the manuscript, but subsequently read before the scientific association at Providence a paper on the same subject, in which he appropriated the labors of Mr. Warner, and promulgated them as his own. Mr. Warner made these charges distinctly over his own signature, in September, in a letter to the Boston Journal, and neither Prof. Pierce nor the papers in Boston that assume to speak for the Harvard professors, have taken any notice whatever of them.

Now, as we understand, Mr. Warner is a man of character and reputation, and silence is not a fitting reply to charges of this kind from such a source. Dignity is no doubt a great accomplishment, but it does not answer the purpose of a general rebutter in cases like this. Prof. Pierce's reputation is involved in a prompt denial and refutation of these charges; but the matter involves also, in some degree, the reputation of the college, and of the State, of which the college is the literary representative. Scientific freebooting is not a trifling offence, and when scientific men all over the country begin to whisper that these things are of a piece with the established policy of the scientific coterie that has its centre at Cambridge, the public have an interest to know the truth in the case. We should be sorry to believe that Prof. Pierce cannot be fully exenorated from the charges made against him by Messrs. Winslow and Warner, but we are very sure that dignified silence will neither place him nor his friends in a desirable position before the public. If the charges are false, let them be frankly and squarely denied and disproved. As it now stands, a *prima facie* case is made out against the distinguished Cambridge professor, and public opinion, outside of the Chinese wall that incloses Cambridge and Boston, is decidedly with those who allege that their scientific stores have been pillaged and made to contribute to another's reputation.

An Artic Winter in a Mother's Heart.

WE look around, but can see no appearance of sinful propensity, no floating physical evidence of a depraved tendency. Men appear manly, women seem to be womanly; over the earth comes and goes a pure and purifying breath; there are fine mansions and tasteful cottages where childhood blooms within and flowers bloom without. The sunlight is soft and the sky is clear; towns grow and cities improve and society looks as though it wore a spotless garb. When we see all these apparently positive proofs of excellence, we are amazed at the possibility of occurrences such as are daily reported; we wonder at the conduct of men and women; they do that which is inexplicable to themselves and yet they hasten on in the mysterious infatuation, to what end they know not nor do they care. Men may trifle with many, or all, of the proprieties which should govern society and business, and put some little justification in their excuse; women may play with modesty, and even chastity, and still be worthy of forgiveness and admiration. But when a mother leaves her young to follow an allurement, though it be of the holiest nature, there is asked an unanswerable question; there is exhibited a state of being less than animal instinct, there is a soul-night impenetrably dark.

A few days back, a husband and wife with two sweet children, came to this city from Nevada, intending to remain. The wife, intelligent, lovely and lovable, was invited to a ball, which she attended unaccompanied by her husband. He advised her not to go, but she would listen to no persuasion, left her house, went to the ball and refused to return to her home. He discovered where she was stopping and implored her to go home; he took the little children with him and they looked up into her face and said: "Mother, come, go home!" Tears and entreaties were powerless, deep snow had fallen and icicles had formed around the mother's heart, and she bade her dearest kindred leave her and take care of themselves. The husband told us his story, and grief lingered on every word; the children reached out their soft hands and their eyes beaming with the beauty of innocence and health, sparkled with tear-pearls. Disconsolate, and clouded by the mystery which deprived him of a companion who had been the recipient of his kindness and love, he went back to Nevada. The wife who lost her affection and violated her duty, the mother who spurned and deserted her offspring, is here in her perverseness, and perhaps going away down into the unnaturalness of error and the insanity of vice. Oh! what a winter there is in that mother's heart! How fearful that arctic frost which has frozen the tenderest sympathies and made solid ice of the warm flow of love toward the little child so innocent and beautiful!—[Sac. Age.

GALLANTRY FROM HEAD TO FOOT.—Excelsior, the correspondent of a New York paper, was walking along a path a foot wide, half way up the wall at Trenton Falls, when he met four young crinolines sailing towards him. He could not turn back nor get round them, so he says: I put my wits to work for an expedient. By Jove! there is inspiration in a pretty foot—a thought had struck me, and no sooner thought than done; down went Excelsior, flat as a groundling, lengthwise in the path; and one by one the fair damsels walked over dry shod. Don't ask me to describe my feelings while undergoing the process. I held my breath and went it blind—but I'll bet my head that one pair of those feet has left impressions that it will take something besides the washerwoman to eradicate.

HORTICULTURAL.

20,000

APPLE TREES,

FOR SALE

AT REDUCED PRICES, AT THE

HOPE NURSERY.

THE Nursery is located second block northeast of the new Steam Flour Mill, on Seventh street, San Jose.

v8-23-3m

THOMPSON'S

SUSCOL NURSERIES.

Situated on the Napa River, at Suscol Ferry, NAPA COUNTY.

THE undersigned wishes to call the attention of the public and patrons of these well-known Nurseries to the present extensive stock of

FRUIT AND SHADE TREES,

GRAPE-VINES, etc;

Also a choice lot of *GARDEN and GREENHOUSE PLANTS, ROSES, SHRUBS, &c.,* Comprising all of the Very Best Varieties of Cultivated Fruits, such as

APPLE, PEAR, PEACH, PLUM, NECTARINE, APRICOT, CHERRY, ALMOND, QUINCE, and FIG TREES, GOOSEBERRY, CURRANT, and RASPBERRY BUSHES, &c.,

Together with a large lot of

Nut-Bearing and Shade Trees,

Consisting in part of Black Walnut, English Walnut (or Madeira Nut), Shell-bark Hickory, Elm, Weeping Willow, Locust, Sugar and Silver Maples, &c.

Grape-vines of all the Best Foreign and Native Varieties.

The Fruit Trees offered for sale are all budded and grafted from the best, most approved and popular varieties now cultivated in the United States and Europe: all of which are growing, and a large majority of which have fruited in our own orchards and vineyards, under our own immediate inspection.

Our trees are of one and two year's growth from Bud and Graft, thrifty and of large size; all of which have been grown *without irrigation.*

We would call particular attention to our large stock of Apple Trees, which for vigor of growth and beauty of form, cannot be excelled in the State.

Our stock of Garden and Greenhouse Plants, Roses, Shrubs, &c., comprise all the leading varieties most desirable for beautifying private gardens and residences.

CATALOGUES containing a full list of all the varieties, with a brief description of each, together with their time of ripening *in this State,* will be forwarded either by mail or express, to all who are desirous of purchasing trees.

Orders from a distance will be promptly attended to, and carefully packed for shipment.

Our prices will be as low as *reliable Trees, Vines, &c.,* of like quality, can be bought for in any Nursery in the State.

Our terms are CASH on delivery of the trees at the Nursery or *approved* notes for a short time, bearing interest. Parties desiring to purchase can apply either in person or by mail, or by Wells, Fargo & Co's Express, to

S. THOMPSON, at the Nurseries.

Or to S. PERKINS & Co., corner of Second and M streets, Sacramento; DERBY & BALDWIN, Petaluma; GOODMAN & Co., Napa City,—*Agents who will show samples and receive orders.*

☞ The above-named gentlemen are our sole agents, in whom the public can place implicit confidence, and all who may favor them with their patronage can be assured that they are not getting Trees from *Auction Houses* and *Peddler's Wagons.* 21-3m

FRUIT TREES! FRUIT TREES!!

50,000

FRUIT TREES!

The Collegiate Institute at Benicia, Cal.

THE School Year at this Institution, is divided into two terms of five months each. The Sessions will open on the 4th of January and the 5th of July; closing on the 4th of June and December.

To the Patrons of the Institute we would say, that the facilities for obtaining a good education have been much increased this year. The range of studies will be ample, embracing the Ancient and Modern Languages, and a thorough course in the Physical Sciences. Neither are the accomplishments overlooked: in Piano and Vocal Music, we have the best Teachers in the State Thoroughness in the Elementary Branches, before advancing into the higher studies, will be a primary requirement. We shall continue to follow, in our government, school arrangements and method of instruction, the Normal School or Prussian system, which has been adopted in the Eastern States with so much success.

Pupils will be fitted for the University, or will be trained with a view to the completion of their education in this School, as may be requested by the parents. Where no special directions are given, the course of the Institution will regard the Modern Languages, Natural Sciences and Practical Avocations of life, as the sina qua non of a good education, and the Ancient Languages as accomplishments.

A daily account of recitations and deportment will be kept and sent monthly to parents.

The location of the School is easy of access from all parts of the State; the buildings are excellent; and the quietness and healthfulness of the village are unsurpassed by any place on the Pacific.

The California Farmer.

SAN FRANCISCO, FRIDAY, FEBRUARY 12, 1858.

The Flour and Grain Market.

"OUR REMARKS IN MAY LAST."

THE 8th day of February, 1857, we think will be somewhat a memorable day with those who in that year commenced the cry of "short crops the coming year." It will be easily called to remembrance the innumerable paragraphs which appeared about February last, upon the ever fertile subject of Breadstuffs. We presume there was more anxiety about the crops with those who were *holders*, than those who were planters. We visited the best portions of the State, and were satisfied of an abundant harvest.

On the 29th of May we penned the following, in the FARMER:

"We believe that California will raise an ample quantity for home consumption, the present year; and we believe she will have over *fifty thousand barrels of flour* of the old crop on the 1st of July, to begin the year with."

At the same date, we said:

"Although we hear the cry of *short crops*, and crops drying up, no harvest, ruin, etc., we can trace the majority of these stories *in the newspapers*, to those who *speculate in that which will be their ruin*."

We can easily recall the past, and we presume *some persons* who were then engaged in speculating, can recall the past also, although it is a sad past; yet we know every position we assumed in the past year was clearly proved by results, in our estimation of the crop of 1857.

The present week of February is the anniversary of the great speculations of the past year; but now it is but the return of a similar loss, which must inevitably accrue to those who have been striving to bolster up fictitious prices.

We have endeavored to keep ourselves free from all possible controversy with our cotemporaries, and from all connection with any party by which we could possibly be biased in our judgment; and thus far we have accomplished our wishes; and we stand now as we did last year, with a full conviction of a crop on hand sufficient for all our home use and some to spare.

We have looked over the columns of our several journals from time to time, and have been pleased with the general remarks of such journals as the Herald, Chronicle, and Call; and although they may have criticised or saterized some of the foolish and absurd statements of other journals, yet they have been based upon correct data, and so it will prove.

In the report we gave of the Flour and Grain market, in our steamer edition of Feb. 5th, the San Francisco Times was pleased to be quite facetious, and quoting from our journal the prices we gave, made quite a flourish with its small potatoes. We shall repeat our remarks: "We hazard but little in guessing that flour can be easily purchased, by the first of March, at $16;" to which the Times responds: "At the very hour when this sage paragraph was penned, superfine flour was selling in this market at $14¼ up to $16, in lots of 100 barrels and upward." Now every intelligent mind could easily understand that we intended to be understood that $16 was to be the maximum. But let the Times have all the benefit of its own position and where does it find itself. In a paragraph above this same important announcement, the Times says, in the second paragraph of its market report: "About 1800 barrels flour changed hands to-day, at prices ruling from $14 to $18 per barrel, cash." Pretty wide margin for one grade of flour. It further says, in the same paragraph: "Jobbing sales at $18 a $20 for extra; Haxall $18 and $20 per barrel."

Now we ask any candid mind, what reliance can be placed upon a journal, that in criticising another report, will so far vary a correct standard of prices to carry a point. Why quote flour at $14 to $18 in one paragraph, if the true price is $14¼ to $16? But it is not our purpose to criticise or find fault with our good neighbors, and we should not have noticed them, were it not that the "Times are out of joint," and it will soon learn that the "sage remarks" of the FARMER and the prophetic Colonel will prove that he may sometimes understand the full meaning of those who quote market prices, and use the terms "changed hands," "private terms," etc., as well as those that use them.

We are satisfied that the present rise in Barley is but the change of loose capital withdrawn from the tottering fortunes of the Flour market; and so we *sagely* guess again—and as our *farmers* have nearly sold their entire stock of Wheat, and hold a goodly quantity of *Barley*, we rejoice at the rise in Barley, for this will benefit them, and through them the whole State. We would be glad to see it reach $1 75 a $2 00; it would help the farmers; and as it is for malting purposes, or sending out of the country, the State will be the gainers at all events.

SHUT THE DOOR.—Yes, shut the door! What a sign for a public office! Yet, such has been the severity of the cold in San Francisco for the last few days, that these words are necessary upon *our doors*. Shut the door! This can be made a fruitful theme for some pen—sing it in prose and verse—for although in this case it was merely meant to "keep the cold out," yet there are many ways wherein profitable essays could be written to keep *some other unwelcome intruders* out—especially idlers, gossipers, indolence, etc. We hope some able pen will take up the subject, for at the present time idlers are as great an injury to the industry of a people, as hard frosts to vegetables.

SPARS FOR SHIPPING—ANOTHER SOURCE OF REVENUE.—Spars are sent from Washington Territory to England. We hope we shall not have a war with England if there is a little *sparing* between us.

General Sutter Belongs to California.

THERE are great questions that interest and affect whole States, and our nation, and there are public men, great and good men, who interest and affect the public weal.

George Washington, the Father of his Country, in all that he did and said, affected our nation. He belonged to the People; they honored and loved him. He was the *Pater Patriæ*.

Lafayette was the firm friend of America, through all, from the time his heart first beat responsive to the call of American Liberty. He was the firm and devoted friend of our country, in her dark days; and we claimed him afterwards as a Nation's Benefactor, and a Nation's Guest.

And so do we esteem Gen. John A. Sutter—the Early Pioneer of the land of gold—a noble, generous, spirited, brave, and good man. We claim him as belonging to California; as the People's friend.

General Sutter belongs to the People. His name and fame should be in charge of the People. His likeness beams upon us in the Halls of Legislation, and we trust our Legislators will not let the noble Pioneer longer be the sport of a changeable fortune, or the prey of heartless Shylocks, and soulless knaves.

England has showered honors and riches upon one who, by the merest chance, discovered the gold of Australia; but up to the present moment the United States, or California, have never lifted a voice or raised a hand to aid or defend him, who has been instrumental in changing the whole current of trade for the world; one, through whose labors directly, SEVEN HUNDRED AND FIFTY MILLIONS OF DOLLARS have been revealed, by which means, "A nation has been born in a day;" navies have been built; mighty cities have sprung into being; floating palaces, on the deep, richly laden with the productions of this new world, have gone from nation to nation, adding wealth to each, and all aiding the advancement, greatness, and happiness of our own prosperous nation.

And yet, he who has been thus instrumental of all this vast and countless good to others, stands to-day before us, the People of California, *the victim of the despoiler!* In the name of justice and humanity, we would call upon the people of California to read the documents now spread upon the journals of the day; and, we ask, where is there a heart that will not beat with true and heartfelt sympathy for the noble Pioneer, as they read there his words:

"While, for the last nine years, the agents I have employed have become rich, I have become poor to an extent of which but few are aware."

Shall such an appeal go forth to the people of California, and not arouse their noblest humanity, and awake them to some measure of redress and protection to one who, in the earliest days of California History, fed the hungry, clothed the naked, sheltered the homeless, and protected the friendless? We publish these documents. They should go forth to every home in this land. Every man, woman, and child should read them. There is something in that appeal and statement of the brave pioneer that will carry conviction of its truth and honesty, and we pray it may find a quick, responsive feeling. Let all these documents be read! Let the past history of this wronged old veteran come up before the People of California, and let memorials pour into the Legislature, urging that this Early Friend and Guardian of the first comers to California be now received as *the Protege of our State!* and that some suitable demonstration be made by the guardians of our State, to throw around him that generous protection which he so well deserves. We would, with all due deference to the Honorable the Senate and Assembly suggest that a Committee be raised who shall take this matter into their hands, and investigate and report. And what better, nobler, or more fitting time to have this done than on the 22d of February, the birthday of Washington? a fitting day for noble deeds!

Sutter's Fort lies in ruins! Sacramento and the vast plains beyond, once his own fair domain, have all been wrested from him, and now we behold him surrounded by worse than wolves, and in his declining years, with a family dependent upon him. If men will look on and see him suffer unavenged, God will be his avenger. But we trust a better and brighter day dawns on him. Samson-like, he has risen in his yet remaining strength, and burst the shackles that bound him, and he stands forth a free man. He calls for aid to sustain him in the weakness brought upon him by reason of his long suffering and bondage. Shall his cry be in vain? We have faith to believe a saving hand is being raised, and we hope that California, for the sake of her own honor and fame, will now set an example that shall at least equal that which England set when she recognized the immeasurable good that she secured by the discovery of gold in Australia.

There is a debt of gratitude which our State owes to this veteran Pioneer, which must be paid before Heaven will permit us to prosper fully as a State; and should we, as a State, fail to acquit ourselves of it, the time is not far distant when a cry will echo, saying,

"If there be a curse
Of deeper dye than all the guilty train
Of human vices, 'tis Ingratitude."

But we have done our humble part. We have spoken as our own heart prompted, and we now make the record of the celebrated documents which appear appended to the truthful one of General Sutter, and leave the cause to men and Heaven.

Special Notice.

KNOW ALL MEN BY THESE PRESENTS, That I, JOHN A. SUTTER, of Hock Farm, did on the 24th day of February, A. D., 1854, enter into a certain contract with L. Sanders, Jun., Esq., Sacramento City, which is recorded in said city, in book "C," Powers of Attorney, pages 213, 214, 215 and 216, in which instrument I constituted the said Sanders my Trustee and acknowledged a Power of Attorney in him, for the purposes and with the powers set forth in the said instrument, and that on the 13th day of July, 1855, the said Sanders made and executed an instrument of writing acknowledging under his hand and seal my right to dismiss him from the above trusteeship and agency, whenever I should think proper.

Now, therefore, having, in common with every member of my family, for a long time been dissatisfied with the manner in which the said Sanders has discharged the said trusteeship and agency, I hereby notify him and the public, that the said trusteeship and agency shall cease, and I hereby declare them at an end.

While for the last nine years the agents I have employed have become rich, I have become poor, to an extent of which but few are aware. I therefore deem it expedient that I should take my business into my own hands.

All persons, therefore, having business with me, will hereafter apply to me personally, and I will endeavor to honorably arrange all my obligations as soon as I possibly can. J. A. SUTTER.

HOCK FARM, January 25th, 1858.

STATE OF CALIFORNIA, City and County of San Francisco, ss. On this twenty-ninth day of January, A. D., 1858, before me, Samuel Hermann, a Notary Public in and for said city and county, duly commissioned and sworn, personally appeared the within named J. A. Sutter, whose name is subscribed to the annexed instrument as a party thereto, personally known to me to be the individual described in and who executed the said annexed instrument, and he duly acknowledged to me that he executed the same freely and voluntarily, and for the uses and purposes therein mentioned.

In witness whereof, I have hereunto set my hand and affixed my official seal, the day and year in this Certificate first above written. SAMUEL HERMANN, Notary Public.
[L. S.]

—o—

[ADVERTISEMENT.]

To the Public.

I have seen the notice of John A. Sutter, in the Daily Bee of this day. When I learn that General Sutter avows the authorship of it, I will give a satisfactory answer and show that he has never complained to me—nor has his family, in regard to the discharge of my duties—but has approved the same, and that I, not they, have suffered; that, in violation of his written agreement, he has signed papers which have greatly injured the business in my hands. All the trusts which are invested in me are beyond his control, and he and all his family, save his daughter, against whom I make no charge, are my debtors—for services rendered and money and supplies loaned and advanced; and that he has no interest whatever in any land in either of his grants, that is the subject of sale. I do not desire to make any publication beyond this, until I learn the nature and character of the instruments he has executed and sent on to Washington; of these he promised to furnish me copies before witness, but has thus far falsified his word. I know that he has of late been surrounded by a parcel of men, whom he has uniformly represented to me as the "Robbers" of his fortune. If they have succeeded in changing his mind, it must have been done with *dollars*, not by the development of new facts, or the suggestion of truths. I regret this notice, not on my own, but his account—for "truth is omnipotent and public justice certain." L. SANDERS, JR.

SACRAMENTO, January 30, 1858.

EDITH MONTRESSOR.—We have been called out! Edith Montressor would fain take us to do for neglecting Ben Bolt, and being partial to our fair contributors. If Edith will but refer to the letters alluded to, and re-read them, she will soon be convinced that the Colonel was just. Ben Bolt needed no aid from us; he was a star of the first magnitude in the hemisphere in which he reigned; and if he was dimmed by the brilliancy of the bright galaxy around him, why blame the Colonel? If Edith thinks Ben Bolt slighted by being placed among the fruit trees and garden seeds, we can only say that we felt it was a proper place, for Ben is a fair and goodly tree, bears good fruit, and the garden he cultivates is a proof of it; for if Edith will only visit his pretty homestead, there will be found, no doubt, lots of little Bolts, with golden heads and bright points; or at least there ought to be. But when Edith becomes so personal as to intimate about the Queen of flowers, she forgets that the great book says "the truth is not to be spoken at all times," especially quite publicly. We will forgive Edith, however, if she will only tell us where this Queen resides. We would * * * * * be very grateful to Edith for the information; she should surely have our approbation. Our readers will find her "Approbation" worthy a careful reading. Katie King and Old Block will answer Edith, we feel sure.

MRS. E. P. LESDERNIER.—This estimable and highly talented lady left our bright shores by the last steamer, called hence by the strongest tie that binds the human heart, that of a mother to the care of the sick and suffering who bear her own name. Madame Lesdernier has been a resident of California for more than a year, and won many friends. She possessed rare talent, a treasure house of mind, as evinced by her eloquent language and the glowing thought that has flowed from her pen. She read, spoke, wrote and breathed poetry; and we give in our columns this week, her "Voices of the Sea," published the morning of her departure.

The best wishes and prayers of a host of friends go with her, and with a trust that no darker shade of sorrow may ever more visit her spirit; but brighter days, brighter hopes and brighter prospects herald her and greet her among her kindred, and be with her and her family.

THE SACRAMENTO AGE.—This enterprising and spirited paper having changed proprietors and editors, W. Wright, Esq., who has presided over its columns with credit and ability, utters the following truths on taking leave of his post as editor:

"To him who engages in the editorial profession, and applies himself thoughtfully, day and night, alternating between article and paragraph, on every description of subject, as I have done, there is no prospect but a broader view of interminable labor, and a seclusion as perpetual as it is wearisome."

The Age will hereafter be under the control of Mr. Thomas P. Ford, and we hope its future success will be as brilliant as its past has been. I has been under (W)right *head*way, and surely it can af-*Ford* to continue so.

REAL SPERMACETI.—We found cakes of the real spermaceti tallow at the house of Standford Brothers, which is equal to the very best ever produced at the works at the East; and we learn that this firm have sufficient on hand to make 10,000 pounds of spermaceti candles. We hope soon to see this pioneer light.

J. P. SWEENEY & CO.—Messrs. Sweeney & Co. have on hand and are constantly receiving, all the varieties of field, garden and flower seeds, usually kept by seedsmen. Messrs. S. have trees, plants and shrubs, in great variety, and purchasers can judge their ability by calling.

THE ALTA EXPRESS COMPANY will accept our thanks for their prompt supply of up-river exchanges and for several favors. If we are to judge by appearances we should think their business is rapidly increasing. Whatever they undertake is done promptly.

Quick Work.

THAT we have some of the best workmen and mechanics in California the world can boast of is daily evidenced in all departments of industry; and we copy with pride and pleasure, from the Alta of Tuesday, the annexed notice of the dispatch with which the injuries suffered by the clipper ship Atmosphere were repaired:

The clipper ship Atmosphere, Capt. W. H. Lunt, sails this morning for China, taking out about $250,000 on freight, and over 300 Chinese passengers for Hongkong. The Atmosphere arrived at this port a short time since from New York, consigned to Messrs. W. T. Coleman & Co., bringing nearly 3,000 tuns of assorted goods. After discharging, she started, on the 20th of January, on a voyage to Hongkong, and when one hundred miles from port, having been out some thirteen hours, she was struck by a squall, which carried away the foremast close to the deck. The mast fell across the decks of the ship, crushing a large boat to atoms, splintering the house and a portion of the starboard rail, and doing other damage. After clearing the wreck, Capt. Lunt bore up for the Heads, and arrived in port on the 23d. The following Monday (the 25th) the repairs were commenced, and finished yesterday, making *thirteen working days*. During this time an immense amount of work has been performed to get the ship to sea. In addition to a large amount of new rigging, made by Mr. George W. Martin, a number of new sails, made by Harding & Linekin, Messrs. Ringot & Bigley have made a new foremast, jib-boom, fore, main and mizzen top gallant masts, three topsail yards, one top-gallant yard, two royal yards, two skysail yards, and other spars. The iron work was made by Messrs. W. S. Phelps & Co. The dispatch with which this work, throughout, has been done, is worthy of much praise, and is a striking illustration of the skill and perseverance of our mechanics. Messrs. W. T. Coleman & Co., the consignees of the Atmosphere, were assured by old hands at estimating, that the time necessary to repair the damages in the East would be at least thirty days. Fifteen days were agreed upon as the outside time to put the ship in order for sea; and the repairs were at once commenced, each mechanic doing his best to forward the work, which, as has been stated, was done in thirteen working days. It affords us pleasure to mention the names of the mechanics engaged in this job.

MANSFIELD & WOOD.—This justly celebrated and highly fashionable clothing establishment may now be esteemed the head quarters of this department of trade. We believe this is the only establishment where a complete outfit to a gentleman's wardrobe can be found in our city. From head to foot (excepting the hat), every article of the most superior make, and of quality the best and most reliable, will be found at this establishment. Every article is of the most select kind, having reference to a set of customers that shall be permanent. Their warehouse is the most completely elegant on this coast. Most cordially do we invite all, and particularly strangers visiting our city, to visit Messrs. Mansfield & Wood's warehouse, on Montgomery street, opposite Montgomery block. And as our farmers have been receiving good prices, and are now prosperous, we think that if anybody deserves good things they do, and they should wear as good cloth as anybody else.

THE GREAT BILLIARD MATCH BETWEEN PHELAN AND BENJAMIN.—The Philadelphia Press gives a long and full account of the great game of billiards played between these famous players, for two thousand dollars. The result was nine games by Phelan to two by his antagonist. This has been announced as the most remarkable match yet played and the greatest victory, and giving to Phelan the title of king of billiard players. A great celebration was had among the friends of Phelan on that occasion; it was a grand affair. On the reception of the news here, M. E. Hughs, Esq., agent of the Phelan Cushions for this city, manifested his gratification of the event by a sumptuous entertainment of his friends at his rooms, 180 Jackson street. We thank him for his courtesy to us. We refer to his card.

CALIFORNIA ALE VERSUS ENGLISH ALE.—Everybody is *ale*-ing—Californians, Englishmen and Scotchmen; and the great strife seems to be, which country can offer the best *medicine*. One thing is very certain, "truth is stranger than fiction," and when the contest comes, and the *people* are called upon to decide, we believe the prize will be awarded to California; but there were two *Lions* in the field, both claiming to be victors. One says Li-on, and the other says Ly-on; now, when they appeal to the *people*, who in fact are the *jury* in this case, they say *we* Ly-on the orders to the Empire Brewery, Jessie street, San Francisco—which, report says, has increased its trade and reputation for the best Ale within one year fifty per cent, and we suppose that settles the case, that they can make superior Ale and have checked the importation from abroad, as proved from their "increased" trade, and the "decrease" of the imported article.

A NEW BROOM SWEEPS CLEAN.—Shall we *import* brooms from abroad and send our *money away*, when we can make them better and cheaper here, and keep our gold for home use. We spent a little time in the broom factory of Messrs. C. W. & G. W. Arms, on Market street, San Francisco, last week, and were pleased at the progress we are making in our home industry. Messrs. Arms commenced their business in 1854, and then grew two acres of broom corn. They plant the present year, by contract, *five hundred acres*, and now keep six men busily employed in making brooms.

They make from 300 to 400 dozen monthly, and find ready sale for all they can make, and can sell them cheaper than they can be imported. Now we can say to our eastern manufacturers, keep your brooms at home, unless you are prepared to make a *heavy loss* by sending them to California.

A WELLERISM.—Gov. Weller made a most happy hit in his brief message to the Legislature, recently, upon the subject of "a change of names." While rather rebuking the *men* for asking the Legislature to change their names, upon frivolous causes, he earnestly hopes the *females* of California will act a wiser part, and adopt an easier plan. The fair sex will undoubtedly listen to his Excellency's counsel, and however well off they may be *single*, they would be *Well-er*, if they change their names as advised.

FAMILY STORES FOR OUR FARMERS AND RANCHEROS.—The good demand for grain and other produce, must necessarily bring many of our wealthy farmers and rancheros to our city to transact their business connected with the sale of their produce. They also are large purchasers of agricultural implements, seeds, trees, &c. While in the city they must also be the purchasers, to a large amount, of family stores; and wishing to do them a double good, we would wish to direct their attention to the house of

FORDHAM, JENNINGS & CO.,

Wholesale Grocers on Front street, who from their very extensive stock will be sure to please them, and are enabled to give them the very best articles at the very lowest rates. Messrs. Fordham, Jennings & Co. are desirous of securing the best trade of the State, and we believe and know the farmers to be the best purchasers now, having the cash to buy with, and to this house we take pleasure in calling the attention of farmers and all others who visit the city and want family stores in large quantities. Their advertisement in our columns will announce their place of business.

TO OUR READERS AND CORRESPONDENTS. We have No. 3 on Gophers, Rabbits and Squirrels, from Agricola, which will appear in our next.

We acknowledge valuable manuscript from Andreas, which shall have early attention. It is always with regret we defer valuable articles, but the length of the interesting history of the "Grasshoppers and Locusts," compels us for a brief time to defer much that we have ready. Among our deferred articles, we have manuscript from Bessie, Alice, C. W., Poetry from several contributors for consideration, and many interesting letters for review.

The author of the *note* addressed to the "Associate Editor," signed "A Friend," will please forward address, and oblige. Also, the "Poem," signed "Cara."

We must again remind our correspondents that it is *imperative* with us to *know* the writer. We must have the *real signatures*, to insure the appearance of their letters or communications.

We would call attention to the article on Scientific Piracy, as worthy of notice.

The notice of the Chinese Prolific Pea should catch the eye of farmers.

Farmers, business men, and families, are each and all particularly invited to look to our advertising columns. There is much of interest for them.

VALUABLE LEGISLATION.—We notice with much pleasure several bills of importance, framed for the best interest of the industrial classes, up before the Legislature. It is a glorious sign when Representatives are awake to the true interest of the working class. A very important bill, touching mechanic's lien, is before the Assembly, framed by our able working Representative Banks. These are the Banks that will preserve the earnings of the mechanic

Lady Reporters in Congress.

A new era dawns upon us, and we must say we rejoice. We see it announced in the Washington papers, that two ladies, Miss Harriet Fanny Read for the Charleston Courier (S. C.), and Miss Windie for the Boston Post (Mass.), will take their seats as reporters, in the Representative Chambers of the United States.

We look upon this event as an indication that hereafter no occasion will occur wherein ought shall be said or done to offend that delicate sense of propriety which adds so much to the character of woman; and it is also admitting that woman is fully qualified to engage in those high intellectual pursuits which should be an honor to all.

We hope soon to have the pleasure to *Read* correct reports, and if they are *Windie* by reason of the current of debate, we know they will be wafted by a *fair* wind under all circumstances.

A Valuable Tomato Vine.—A fine Tomato Vine has been in bearing in the garden of J. C. Harvey, Esq., corner of Clay and Powell streets, since August last, and the product has been some 200 pounds. It is trained upon a trellis, and occupies a space 18 feet by 9. Besides furnishing enough for family use, there have been sold some $20 to $30 worth this present winter. These Tomatoes can now be seen at stall No. 1 Washington Market, and are the same to which we referred two weeks since. They were grown in a conservatory, upon one single vine.

Broomcorn Seed for Horses.—We have been informed by those who have raised large quantities of Broomcorn, that they feed the seed to their horses, and that it is eaten as readily as barley and also that it gives the horse more solid flesh and muscle. Will those who have tried it, please forward information.

☞ **Farm Stock.**—Having completed our arrangements for the importation of choice stock, we are now prepared to receive orders for any of the following breeds, and would call the attention of those in want, to our unsurpassed facilities for the importation and improvement of the choicest stock:

Thorough-bred Devon Cattle,	French Merino	do
Shorthorns do	Spanish do	do
Thorough-bred Ayrshire do	Cotswold do	do
Suffolk and Essex Pigs.	Chester White Hogs.	

Fancy Fowls—all the best varieties.

All communications addressed to us will receive immediate attention, and we shall be happy to correspond with any and all upon the subject. Address

2 WARREN & CO., Cal. Farmer Office.

☞ **REGISTRY OF STOCK.**—All who are interested in the purchase and sale of Stock, of every description, will find a Register kept at our Office, for the entry of all Stock for sale, and their full and correct pedigrees; so that persons who have Stock for sale, or wish to purchase, can gain important information. Those in want of choice Stock will find this opportunity a valuable one, as we are in correspondence with the principal Stock Breeders in the States, and are fully prepared at all times to make sales of Stock of any quality.

☞ J. Q. A. Warren, just from the East, will be happy to see all interested in the subject, at the Farmer Office. January 8, '58.

NEW BOOKS,

☞ Just received, from New York, several cases choice works; also, a complete assortment of Agricultural Books, to which we would invite the attention of our customers.

Frank Forester's Horse and Horsemanship of the United States, in two volumes; the finest work of the kind ever published in the country, can now be seen at our office, bound in different styles—Plain, and Turkey Antique. Having the sole agency of this valuable work, in California, we would invite lovers of the beautiful to call and examine the copies. Subscription books are now open, and those entering their names before the 20th inst., will receive this work at the earliest day. v9-1

☞ **GOUPIL & CO.**, Publishers and Importers of Engravings, Manufacturers and Dealers in Artists' Materials of every description, 366 Broadway, New York, have constantly on hand a great variety of the above-named articles.

*** Catalogues sent per mail to all parts of the United States. v9-2

☞ **Lawton Blackberry Seed.**—A few packets of this choice seed are now ready, and can be mailed to any address. Price, $1. WARREN & CO.,

5 California Farmer Office,

☞ Persons purchasing articles advertised in our columns will confer a favor by saying they saw them advertised in the California Farmer. ☜

ANTELOPE RESTAURANT, Sacramento.

NOTICE.—In consequence of the scarcity of money these hard times, the Proprietors of the ANTELOPE RESTAURANT have concluded to reduce the prices of their well-known establishment, so as to place the necessaries and luxuries within the reach of all.

The undersigned believe that all who visit the ANTELOPE will find it what it should be, a Genteel Eating House, and of the first order.

In addition to the Restaurant department, we have suites of Rooms, and single Rooms for Gentlemen Boarders or Lodgers, equal to any hotel in the city.

We shall at all times be happy to see our Friends.

Antelope Restaurant, J. D. TREAT,

J street, Sacramento. [5] CHAS. D. BROOKS

Landscape Gardener.

THE undersigned offers his services as a Landscape Gardener. Designs made for Parks, Lawns, Carriage Drives, and fine Garden Plats, in the latest style of Gardening, for city or country.

The advertiser is permitted to refer to Editors of Farmer where letters can be left for him by those that wish his services. [5] J. TAYLOR.

VANCE'S GALLERY!

MELEANOTYPES, superior to any in the State, are taken at

VANCE'S GALLERY!

PHOTOGRAPHS universally admired, are taken at reduced prices, at

VANCE'S GALLERY!

THE FIRST PREMIUM AMBROTYPES, unsurpassed in the world, are taken at

VANCE'S GALLERY! 5

FEMALE INSTITUTE.

THE Female Institute in Santa Clara, under the management of James Rogers, A. M., still enjoys a good degree of prosperity. The Board of Instruction is ample, and the Terms of Tuition as liberal as in any school of equal grade in the State.

Those who ship Trees, Shrubs, Plants, Roots, Vines, etc., cannot be too careful in the packing of them for California. Dry moss, close packing, is always best for trees and plants; for tuberous and bulbous roots, thin boxes, one within the other, with a lining of moss between to absorb the moisture, is of great value in preserving them in health. Tuberous roots, such as dahlias, rhubarb, etc., should never be divided. One might as well expect an apple or pear to keep on the passage, when cut in pieces, as bulbous roots to be preserved when divided.

We hope this advice will be heeded, for a loss will surely accrue, when disregarded.

Floral Hotel.—A new name for a hotel surely; but we ask any person to go to Sansome street, and stand upon the sidewalk at Bradshaw & Co's extensive grocery store (go there and make a good purchase), and look opposite at the Tehama House, and they will suppose it some vast conservatory. It is one of the prettiest sights in our city, and does great credit to the proprietor, G. W. Frink, Esq., who certainly shows his good taste in offering so pleasant a promenade for his boarders. Surely one can sleep most sweetly amid the fragrance of such a bevy of Flora's bright gems.

SPECIAL NOTICES.

☞ **Hemp Seed.**—A superior lot of pure seed just received at the office of the Farmer.

☞ **A. W. FABER'S LEAD PENCILS.**—Lead Points, Propelling Pencils, Colored Pencils, White Crayons, Black Crayons, Slate Pencils, Red Chalk, etc.

These popular Pencils can be had of Stationers, Fancy Goods Dealers, and others in the various cities of California.

Extract of a letter from the eminent artist, Chevalier P. von Cornelius, Director of the Royal Academy in Berlin, 27th Oct., 1842: "It is scarcely necessary to say that I find Faber's Polygrades Lead Pencils in every respect most excellent. They are of all degrees of hardness and shade, and adapted as well for fine and firm outline as for finished drawing. The wood which incloses them has the necessary strength, but yields easily to the knife, and the lead never breaks away."

Extract from the Official Report of the Industrial Exhibition of the German Federal States, 1844, 3d Vol.: "Especially have the Pencils of Mr. A. W. Faber set at defiance all competition, and supplied every desideratum that the Artist can expect or desire in this particular."

Extract from the Report of the Great London Exhibition, 1851:

On referring to the Report, page 450, it will be seen that the Jurors have considered A. W. Faber's Pencils deserving of a more extended notice than has been accorded to any other Pencil Manufacturer. The Report farther states as follows: "A. W. Faber's Pencils are of the best description, and the prices extremely low. They are exported throughout the whole civilized world, the demand being created by their good quality and cheapness."

Beware of Counterfeits!

The reputation of A. W. Faber's Lead Pencils has not failed to attract the attention of certain individuals, who have either attempted an imitation of the same, or have undertaken the sale of a counterfeit article, which, though of a totally different manufacture and very inferior quality, are marked, some with the name of the genuine, some with the names, *W. A. Faber, A. W. Fabre, A. K. Faber, C. W. Faber*, etc., and are disposed of as genuine Faber's Polygrade Lead Pencils.

Every person will please to examine carefully the stamps on each Pencil—"A. W. FABER"—and observe that each dozen bears on the label a fac-simile of A. W. Faber's signature; and and further, that every genuine Pencil sold in the United States, has impressed in the wood itself, "E. FABER, 133 William street, New York." E. FABER, Sole Agent.

v9-1 6m 133 William street, New York.

☞ **THORBURN'S Preliminary Wholesale** CATALOGUE OF VEGETABLE SEEDS, *of the present year's growth*, will be published on the 20th JULY, and will be mailed to Dealers and others requiring Seeds in quantities, inclosing stamps for return postage.

J. M. THORBURN & CO.,

10-tf 15 John street, New York.

RARE SEEDS.

☞ We have just received from the East some of the choicest FLOWER and other rare SEEDS, ever received in California; among them a small invoice of Pure LAWTON BLACKBERRY—the only lot in the country, and warranted fresh and pure, crop of 1857.

The collection was made by Mr. J. Q. A. Warren, and brought out by him on last steamer.

Also, opening, a case of FOREST TREE SEEDS—the finest assortment ever imported.

Those desirous of finding choice Seeds will do well to call at once at our office, 130 Washington st (up stairs).

☞ **Wigs! Wigs!! Wigs!!!**—BATCHELOR'S WIGS AND TOUPEES surpass all. They are elegant, light, easy and durable.

Fitting to a charm—No turning up behind—No shrinking off the Head. Indeed this is the only establishment where these articles are properly understood and made.

v8-13 1y 233 Broadway, New York.

☞ **Counterfeit Wistar's Balsam.**—We would caution the purchasers of the *Balsam of Wild Cherry* against an imitation article which has made its appearance in many places, and which might deceive the unwary by its resemblance to the genuine bottle. Of the mixture we need not speak. Unprincipled scoundrels can always be found ready to counterfeit anything by which they can put money in their pockets, and they are sure to choose the most popular and well-known article on which to practice their villanies. It is a lamentable fact that there are also *dealers in medicines* who are willing to lend themselves to carry out this imposition, by selling such *trash* as genuine, because they can buy it for less than half the cost of the real article. Avoid such a man as you would a dealer in counterfeit money, for he is the greater scamp of the two.

They have never dared to forge the written signature of I. Butts, having a wholesome fear of the State Prison before their eyes. *Be sure that you find on the outside wrapper the written signature of I. BUTTS*, and you may rely upon its being genuine. Buy none other.

Seth W. Fowle & Co., 138 Washington street, Boston, Proprietors. Sold by their agents every where.

Agents—C. Morrill, cor. Third and K, sts., Sacramento; H. Johnson & Co., Washington st., San Francisco. 4-1m

☞ **HAIR DYE! HAIR DYE!! HAIR DYE!!!**

Batchelor's Hair Dye is the Best in the World!

GRAY, RED, OR RUSTY HAIR DYED INSTANTLY TO a beautiful Natural Brown or Black, without the least injury to Hair or Skin.

Fifteen Medals and Diplomas have been awarded to Wm. A. Batchelor since 1839, and over 80,000 applications have been made to the Hair of his patrons of his famous Dye. Prejudice against Dying the Hair and Whiskers is unjust, as it would be against covering a bald head with a wig.

WM. A. BATCHELOR'S HAIR DYE produces a color not to be distinguished from nature, and is warranted not to injure in the least, however long it may be continued.

Made, sold or applied (in 12 private rooms) at the Wig Factory, 233 Broadway, N. Y.

Sold in all cities and towns of the United States, by Druggists and Fancy Good Dealers.

☞ The Genuine has the name and address upon a steel plate engraving on four sides of each bottle, of

WILLIAM A. BATCHELOR.

v8-13 1y 233 Broadway, New York.

☞ **Six Reasons why Everybody Uses LYON'S KATHAIRON.**—1st. It is the Cheapest preparation for the hair ever made. 2d. It is pronounced by all to be the Most Beneficial. 3d. It is the most Agreeable to use. 4th. It is the Cleanest and most Carefully Prepared. 5th. It is the most Highly Perfumed. 6th. It is the only article that never fails to give Entire Satisfaction.

The immense sale of the KATHAIRON—nearly 1,000,000 bottles per year—attest its excellence and universal popularity Sold by all dealers, everywhere, for 25 cents per bottle.

HOTEL INTERNATIONAL.

San Francisco, California.

THE UNDERSIGNED INVITES the attention of the Traveling Public and strangers in particular, to the merits of this House.

It was established under its present management on the 1st January, 1857, as a

FIRST-CLASS HOTEL,

in every particular. The present Lessee and Managers,

A. S. HALEY,

JNO. J. HALEY, and E. R. ROBINSON,

with a delicacy not wishing to encroach upon the merits of other houses, cannot but recall the marked favor with which their enterprise has been received by a discriminating public, in a constantly increasing patronage of the

FIRST RESPECTABILITY,

showing conclusively the SUPERIOR MODE in which the Hotel is conducted.

It is contiguous to all of the most POPULAR PLACES OF AMUSEMENT, THE PRINCIPAL THOROUGHFARES, THE FASHIONABLE PROMENADES, AND STEAMBOAT LANDINGS; thus rendering it at all times the most

DESIRABLE STOPPING-PLACE

For Families or Single Gentlemen, during their sojourn in this city.

THE "INTERNATIONAL-HOTEL COACH," under the superintendence of P. B. SMITH, late Stage Agent at Sacramento City, is in attendance at all hours to convey passengers to and from the Hotel, for One Dollar each, including Baggage.

A. S. HALEY, Lessee.

Assisted by: JOHN J. HALEY, and E. R. ROBINSON, formerly of the New York Hotel.

MAGAZINES, ETC.

PHILIPS, SAMPSON AND COMPANY

COMMENCED ON THE FIRST OF NOVEMBER

A NEW MAGAZINE, TO BE CALLED

THE ATLANTIC MONTHLY.

IT will be devoted to LITERATURE, ART, and POLITICS. *THE AIM OF THE PERIODICAL WILL BE,*

First: In Literature, to leave no province unrepresented, so that, while each number will contain articles of an abstract and permanent value, it will also be found that the healthy appetite of the mind for entertainment in its various forms of Narrative, Wit, and Humor, will not go uncared for. They wish to say, also, that while native writers will receive the most solid encouragement, and will be mainly relied on to fill the pages of the Atlantic, the publishers will not hesitate to draw from the foreign sources at their command, as occasion may require, relying rather on the competency of an author to treat a particular subject, than on any other claim whatever. In this way they hope to make their Periodical welcome wherever the English tongue is spoken or read.

Second: In the term Art, they intend to include the whole domain of æsthetics, and hope gradually to make this critical department a true and fearless representative of Art, in all its various branches, without any regard to prejudice, whether personal or national, or to private considerations of what kind soever.

Third: In Politics the Atlantic will be the organ of no party or clique, but will honestly endeavor to be the exponent of what its conductors believe to be the American Idea. It will deal frankly with persons and with parties, endeavoring always to keep in view that moral element which transcends all persons and parties, and which alone makes the basis of a true and lasting national prosperity. It will not rank itself with any set of *parties*, but with that body of men which is in favor of Freedom, National Progress and Honor, whether public or private.

As an earnest of the material at their command, they subjoin the following list of literary persons interested in their enterprise; wishing it, however, to be distinctly understood, that they shall hope for support from every kind of ability which desires the avenue of their columns, and in the remuneration of which thy shall be guided purely by their sense of intrinsic merit:

William H. Prescott,	Mrs. H. Beecher Stowe,
Ralph Waldo Emerson,	Mrs. Gaskell, Author of "Ruth," "Mary Barton," etc.
Henry W. Longfellow,	
Rev. F. H. Hedge, D. D.,	
Nath'l Hawthorne,	Mrs. L. Maria Child,
John G. Whittier,	Mrs. C. M. Kirkland,
Oliver Wendell Holmes,	Mrs. Pike, Author of "Ida May," "Caste," etc.
James R. Lowell,	
J. Lothrop Motley,	Miss Rose Terry,
Geo. Wm. Curtis,	Wilkie Collins, Author of the "Dead Secret," ect.
Herman Melville,	
Prof. C. C. Felton,	G. Ruffini, Author of "Doctor Antonio," etc.
Prof. F. J. Child,	
E. P. Whipple,	Shirley Brooks, Author of "Aspen Court," etc.
Edmund Quincy,	
Author of "Wensley,"	E. M. Whitty, Author of "Political Portraits," etc.
J. T. Trowbridge, Author of "Neighbor Jackwood," etc.	James Hannay, Author of "Singleton Fontenoy,"
C. W. Philleo, Author of "Twice Married."	Thomas W. Parsons.

Terms.—Three dollars a year, or Twenty-Five Cents a Number, and may be obtained of Booksellers, Periodical Agents, or of the Publishers. For sale by all Booksellers and Newsmen in California. 19-3mis

THE "HORTICULTURIST" AND Journal of Rural Art and Rural Taste.

(Commenced by the late celebrated A. J. DOWNING.)

Conducted by J. JAY SMITH, Editor of the North American Sylva.

THE increasing love of Rural Life has brought this popular publication into extended notice. Its success has been amply proved by a large addition of readers, and it is now offered to public patronage with confidence. It embraces in its scope of subjects everything pertaining to the country and country-pursuits, and aims to instruct while it amuses: it is, in short, as now conducted, a popular RURAL MAGAZINE, designed to interest all lovers of the Garden, the Country-house, the Cottage, no less than the Botanist, the admirer of the Green-house, Conservatory, Grape-house, Fruit Cultivator and Planter. Its correspondents are those who have long devoted their energies to these pursuits, and it is believed the number of these, and the information they impart, is greater than any other periodical can boast of either in Europe or America. Indeed, the work has become indispensable to the well-informed country-dweller, who, by a perusal of its varied pages, may maintain an acquaintance with all that is passing in the fruit-garden and orchard, the nursery, the villa, and with the beautiful in nature, whether it is improved by art or adorned by taste. In its Rural Magazine character it is addressed to all who love information, and it has thus become a welcome guest both in town and country. Its circulation now embraces the entire Union and Canada, and endeavors are constantly used to increase its attractions by a liberal outlay in embellishing it with costly engravings of fruit, dwellings, trees, and those numberless rustic adornments which make the individual home attractive.

A new volume (13th year) commences with the January number for 1858: and it will be the constant aim to render it still more worthy, by every practicable improvement, of the liberal patronage it is receiving.

The work is issued on the first of each month, in the best style, each number containg 48 pages, embellished with a frontispiece and several other original and well-executed engravings. The volumes, taken for a number of years, will make a valuable Encyclopedia of Horticultural Literature. As an advertising medium it has few superiors.

TERMS—Two Dollars a year; Four Copies for Six Dollars, payable in advance.

An edition is published with plates colored in the best style of the Art. Price, $5.

☞ All subscripttons must be addressed to the Agents, or to ROBERT PEARSALL SMITH,

Nos. 17, 19, and 21 Minor street, Philadelphia.

WARREN & CO., Agents for the above work, for California. Subscriptions received at the office of the Farmer, 130 Washington street (up stairs). 9-2

Attention, Farmers!

Broadcast Grain Sowers.

THE subscribers have on hand a few of "SAGE'S PATENT BROADCAST SEED SOWERS," for sowing Wheat Barley, Oats, and all grain sown broadcast. These machines are unrivaled by any, and received complimentary notice at the Agricultural Exhibitions at San Jose and Stockton. They need no explanation, as their simplicity will enable any one to understand, at a glance, the manner in which they perform their work.

They have been introduced but one season, and *three* are now at work at Tehama, Sonora, and Petaluma, giving complete satisfaction, as per letters testimonial.

The undersigned will take pleasure in exhibiting them to Farmers or others, and no Farmer should be without one; the saving of *help* and *economy* of *seed* effected by their use, will pay for one in a season.

Price, from $100 to $125. T. H. & J. S. BACON,

61 California street (up stairs), San Francisco.

v8-23-2mis

New Winged Triangular Harrow.

THE undersigned would invite the Farmers and Grain Growers of California to call and examine his newly invented Winged Triangular Harrow.

By the action of this Implement a space of 12 feet of ground is finely pulverized and harrowed, and the work most satisfactorily done. No farmer can look upon the Implement and not be satisfied of its value.

H. G. PRATT, Manufactory 46 Washington st., 16-1-3m between Davis and Drum streets.

Ladies' Department.

[For the California Farmer.]

TO A DEPARTED MOTHER.

Thou hast forever gone, mother.
Thy voice no more we hear;
The home thy smiles once made so bright,
Ah! now is lone and drear.

We miss thee at the social board,
Thy hand oft spread with care;
And when we gathered round the hearth
A vacant seat is there.

When sickness' withering touch, mother,
Forces our forms to bow,
'Tis then we miss thy gentle hand
To soothe our aching brow.

Yet can we wish thee here to share
In all our griefs and pain?
Methinks I hear thy spirit say,
Your loss is but my gain.

How can I forget thee, mother,
Though months have passed away,
Since we in silent anguish watched
Thy life's last glimmering ray.

Yes, thy dear image claims my thought,
When morn first ope's the flower,
And lingers till the hush of eve
To fill that lonely hour.

And to thy tear-strewn grave, mother,
My steps I often bend,
To weep in silence there for one,
My earliest, truest friend.

And if my path in life's rough way,
Temptations e'er beset,
Thy counsels kind, which thou didst give,
Oh may I ne'er forget.

C. W.

VOICES OF THE SEA.

BY EMILY P. LESDERNIER.

Hear the voices of the sea,
Changing sea,
What vast deeps of tirelessness its constant beat foretells;
How it murmurs, murmurs, murmurs,
Through the long and murky night!
While the stars are draped in dimness,
This old ocean in its grimness
Ceaseless rolls.

Hear the dashing of the sea,
Angry sea!
On the strand how turbulent and sullenly it swells,
Ever drifting, drifting, drifting,
High the sea-weeds on the beach,
While the crested foam-banks bearing
The poor fisher's skiff, are tearing
From the shore.

With the surgings of the sea,
Hark! a voice—
What a tale of hopelessness that wild beseeching tells;
Now 'tis wailing, wailing, wailing,
To the deaf sea's maddening roar—
While the stars are draped in dimness,
This old ocean in its grimness,
Ceaseless rolls.

Standing here upon the beach
Watching waves,
What a throb of restlessness their ebb and flow impels;
Ever moaning, moaning, moaning,
Like my lorn heart's dismal beat,
As the shivering waves bewailing
Fold my feet—then bound as quailing
At the touch.

Thou art faithless, oh! thou sea,
Ruthless sea,
Know'st thou aught of pity, in thy palpitating clasp,
Ever throbbing, throbbing, throbbing,
To that chill death-muffled heart,
And dear head my bosom cherished—
Now from earth forever perished—
Mournful sea!

Hear the voices of the sea,
Thrilling sea!
What a depth of sorrow in that melancholy tone—
Ever sobbing, sobbing, sobbing,
With its mighty power of woe,
While the stars are draped in dimness
This old ocean in its grimness,
Ceaseless rolls.

[Alta California.

[For the California Farmer.]

Approbation.

"As rivers meander along,
Mellifluous margins display,
And in their confluence grow strong,
Receiving new strength on the way;

So the fountain of love in the mind,
Makes it flow in desires far abroad,
'Till to others by love it is joined,
On its journey of faith to its God."

"Let love be without dissimulation."—[PAUL.

THERE is nothing which more invigorates and stimulates the mind to good actions, than the love of approbation, and when judiciously bestowed upon those whose efforts and intentions are to do good, although they may be far from perfection, will cause them to double their exertions to do better; when too severe criticism might discourage them from making another attempt. Instance the child making its first efforts at learning to write, if only told of his inaccuracies and the deficiences alone pointed out, will soon become disheartened and will not progress like the one whose teacher encourages him by saying, "it is very well done, but keep trying;" although at the same time he may be obliged to turn aside his face to hide the smile occasioned by the ludicrous appearance of the uncouth scrawl.

The mother knows well the power and efficacy of this all-potent charm, when she requests her little boy to do something, and when he has done it, perhaps with some reluctance, she then says to him, kindly, "you are mother's little man, and she is glad to have her son to help her." His eyes will sparkle with delight, and his energies so aroused, that he will then offer to do twice what he is able to perform, and when finding how little he can really do, will tell his mother in exciting language what he will do for her when he gets to be a "big man," for his mother's words make him already feel that he is a little man.

In my experience in school teaching, I have seen some children whose faculties were slow to expand, and found they needed twice the encouragement in their studies, that others did, who were quicker of apprehension; but believe that the minds of slow growth, like that of trees, are often of most durability if not practicability, and have noticed with what eagerness all school children will seize with trembling hand the little tickets presented them—mere scraps of white paper—hastening home to show them to their parents; and why is it? Because their names are written there with the words of approbation!

And behold the would-be writer, who with palpitating heart sends his first production to the press, awaiting with that anxiety no one else can know, to see what disposition has been made thereof; and if fortunately it has been favorably accepted, how his heart burns to write something better, to produce something more noble, more worthy of being printed and read; when a blunt rejection would have been a death blow to his intellectual aspirations. * * *

I live so far up in the mountains above the head of "mule navigation," that I do not receive my letters or papers oftener than once or twice a month, and on receiving a large package of mail matter the other day (Jan. 17th), I found in reading the FARMER that "Alice" had been talking to me in the Ladies' Department, paying me many beautiful, but more than merited compliments; for which I kindly thank her, for though her face I have never seen, she is one for whom I feel a sister's love, and find, truly,

"How sweet is the union of souls,
In harmony, friendship, and love;"

and wish I were more deserving the love of the wise and good, for the love of such is a foretaste of that better world, and

"Inclines us up to God and heaven."

She is disposed to scold me for omitting to notice her favorites, "Katie King" and "Old Block," and I find by looking over the FARMER that I left out many others of the Colonel's family, which are getting rather numerous to mention each by name, but not so much so but every one is cherished in my memory, and all of their rich and varied productions ever read with increasing interest.

As for "Katie King," I have not seen her in the Ladies' Department so much as once, to my knowledge; and "Bessie" says (but I will not tell it out loud, but will whisper it in your ear, "Alice," "that the reason she does not write any more, is, because her time is so much taken up with that red-headed husband of hers"). And I fear Mr. Delano, whose writings I have always read with a great deal of pleasure (but have failed to recognize in the columns of the FARMER), will not feel very much flattered by the way you handled his nose, and should not think it strange if he set his face against you the next time he sees you; be serving you right.

And now I must scold the Colonel a little, for I think he is too partial to the ladies; or how is it that we find a beautiful Allegory, by "Ben Bolt," which would have done credit to the pen of N. P. Willis, put away in the advertising corner, among the plows, fruit trees and garden seeds, without so much as a word of comment upon so fine a production. How is this? I hope you do not exhaust your compliments so entirely upon the ladies, that you have not so much as a just meed of praise to bestow upon your gentlemen contributors. Perhaps you wrote it yourself and modestly put it there, you personifying the "Oak," and thus figuratively advertising for some "Queen of Flowers," to come and grow by your side. This hint may be of benefit to such *flowers* as may be growing without the protection of an *oak*. * * * *

There are times and scenes when we feel as if standing on the verge of eternity, and almost, as it were, in the visible presence of the Creator; when all the wealth of earth appears as nothing in comparison with the approbation of a good conscience. We feel this when on a bed of sickness; friends gather around our bedside, looking wistfully upon us, speaking in low tones to the physician, who shakes his head, gives some directions about keeping quiet, and leaves us. O how at such a moment the soul turns in upon itself and asks, can I hope for the approving smiles of heaven?

And again, when alone in the midst of the sublimity of nature, where no voice or sound is heard by mortal ear, the soul listens entranced to that impressive language addressed with power to the perceptive faculties, speaking as in thunder tones of the goodness and majesty of God. This I experienced the other evening as I walked out on the crested snow upon the side of the mountain, and sat down on the limb of a fallen tree, and gazed upon the sublimity spread out before me. All around me arose the towering peaks of the Sierras, robed in their snowy mantle, glittering in the light of the broad-faced moon, and casting their long dark shadows far across the deep cañons at their base, where stood in serried ranks the tall cedars like so many sentinels guarding the approach to the lofty throne of the Winter King, above which floated white fleecy clouds as with a canopy of light, of more than regal splendor. While above, how transcendantly beautiful appeared the deep blue vault of heaven, where hung suspended the many-colored lamps of eternity, to guide and lead the mind of man "from Nature up to Nature's God."

Who can look upon a scene like this, and not feel how insignificant are all worldly pomp and grandeur, and also feel the promptings of the Divinity within him, to do something by which he may at last receive that welcome plaudit, "Well done good and faithful servant, enter thou into the joy of thy Lord."

EDITH MONTESSOR.

A TENDER REPROOF.—A little boy had one day done wrong, and was sent, after parental correction, to ask in secret the forgiveness of his Heavenly Father. His offense had been passion. Anxious to hear what he would say, his mother followed, and heard him in lisping accents, asked to be made better, never to be angry again; and then, with childlike simplicity, he added, "Lord, make *ma's temper* better too."

OBITUARY NOTICE.—The Panama Star recently made record of the death of a young and lovely lady at that place whose decease caused a deep and sad sensation there. By the notice we learn that this gifted and highly reverenced young lady died from grief at the loss of a mother that she idolized. The lady, as well as her family, was well-known to Californians. She was deeply loved while living, and truly mourned when dead. We copy the well-deserved eulogy from the Star at Panama:

We noted, briefly, the death of Señorita Martina Quesada, daughter of Don Mariano Arosemeña, of this city. The decease of this young lady is one of the greatest misfortunes the most refined portion of the society at Panama has suffered for many a year. She was gifted with a most brilliant intellect, with a cultivated mind, stored with the richest gems of science, philosophy and literature, and was an elegant writer. She spoke fluently three or four languages, and was thus always, with her accomplished sisters, a great favorite with educated and learned strangers and travelers sojourning for a space on the Isthmus. Among the poor and sick she was revered almost as an angel. When such a soul ascends to the Father, something more than the passing notice we gave in our last, of our misfortune, is due to our readers and to her memory.

SEED, PLANTS, &c.

HORTICULTURAL.

PARSONS & CO.,

FLUSHING, near NEW YORK,

OFFER FOR SALE an assortment of Trees and Plants which they have grown for the use of amateurs, and have prepared, by frequent transplanting and other modes, for success in moving.

They are of fine size and symmetrical form, and among them will be found

Standard Apples of fine quality.
Standard Pears, Plums, and **Cherries.**
Peaches, Apricots, and **Nectarines,** on Plum stocks, and their own roots.
Dwarf Pears, of fine form, and ready for bearing.
Gooseberries and **Currants,** strong plants of the best sorts.
Raspberries, Fastolf, Red Antwerp, Fillbasket, and other known sorts.
Strawberries, of all the best varieties.
Native Grapes—Isabella, Catawba, and other hardy varieties.
Foreign Grapes: all the well-known sorts, with some new varieties of great excellence. These plants are propagated from vines that have borne abundantly for some years, and are known to be correct.

Great care is taken in the cultivation of Fruit Trees, and none but those of the best quality are allowed to be sent out.

The Ornamental Department

Contains trees of all sizes for lawns and streets, including ELM, SILVER, NORWAY, and SYCAMORE MAPLES, CATALPAS, LINDENS, TULIP TREES, CYPRESS, LARCH, WILLOWS, ASH, ABELE, ORIENTAL PLANE, and all the best varieties of deciduous trees.

It also includes EVERGREENS of fine size for single planting, and of small sizes at low prices, from one foot upwards, for massing; among them are NORWAY SPRUCE, BALSAM FIR, AUSTRIAN PINE, HEMLOCK, WHITE PINE, SCOTCH FIR, and other varieties.

The best Shrubs include many fine varieties at low prices, for massing, of which the RHODODENDRON CATAWBIENSE can be particularly recommended for its fine evergreen foliage, showy bloom, and perfect hardiness.

The ROSES are cultivated in very large quantity, on their own roots, of all the most rare varieties, and to those who purchase in quantity, will be sold at greatly reduced rates.

The Exotic Department

Contains a fine assortment of CAMELLIAS, grown as bushy, rather than tall, slender plants; and also contains all the well-known varieties of exotic plants and many rare sorts, introduced from Europe, annually. These are all carefully grown for those who desire plants of symmetry and beauty.

CATALOGUES of all the departments will be furnished on application. Great care will be taken in packing, and trees will be delivered in New York, and thence shipped as directed. v8-16-tf

LAWTON OR NEW-ROCHELLE

BLACKBERRY PLANTS!!

PRICES REDUCED!

THE subscribers announce to their friends and customers that they have now

OVER SIX ACRES
OF THE
GENUINE LAWTON (or New-Rochelle)
BLACKBERRY PLANTS,
under cultivation, and in good condition.

They are therefore prepared to fill large orders the coming FALL and the next SPRING, at the following reduced prices:

One Thousand Plants	$125 00
One Hundred Plants	15 00
Fifty Plants	8 00
Two Dozen Plants	4 50
One Dozen Plants	2 50
One Half Dozen Plants	1 50

☞ Good Plants for setting, of a second size, will be sold for $100 per 1000 Plants, or $12 per 100 Plants.

N. B.—All Plants ordered of us will be taken up and packed with the greatest care, and under our own personal supervision.

Of the many thousands sent out by us last year, we have heard very few instances of failure, notwithstanding that they have been forwarded to *every part of the country, and to California, with perfect success*, and the setting out has often been entrusted to unskillful hands.

Printed directions, for setting and cultivating are sent with every package. GEORGE SEYMOUR & CO.,

Catalogues furnished on application. v8-23 3m

Ravenswood Fruit Garden
PLANTS.

WHOLESALE AND RETAIL.

Brinckle's Orange Raspberry,	$70 ₱ thousand,	$8 ₱ hundred.
Col. Wilder Raspberry,	do	do
Cushing Raspberry,	do	do
Thunderer Raspberry,	do	do

Linnæus Rhubarb, $50 ₱ thousand, $3 ₱ hundred.

ALSO,

Blackberries: New Rochelle or Lawton, Newman's or Thornless, $15 ₱ hundred.
Strawberries: Hovey's Seedling, Boston Pine, Large Early Scarlet, $6 ₱ thousand, $1 ₱ hundred.
Currants: Black Naples and Cherry, $10 and $12 ₱ hundred.

ALL the above plants of best quality; we cultivate most of them for market fruits.

THE BRINCKLE'S ORANGE RASPBERRY, for market or garden, is considered the best of all Raspberries; is unequaled in flavor and beauty; flavor is rich and vinous; and color beautiful bright orange; a very vigorous grower; hardy and exceedingly prolific.

The Cushing and Col Wilder are the best for making jams, preserves, syrups, &c.

THE LINNÆUS RHUBARB is a new variety originated by Myatt of England, who also originated the Victoria, on which this is a great improvement in both *flavor* and *productiveness*.

Its flavor is deliciously aromatic and spirited, and it is entirely free from the toughness and stringiness which characterize the Victoria, but when cooked becomes a fine uniform pulp, like the most tender apple. The plant is a very strong grower, more productive than the Victoria, and very hardy.

We cultivate most of the above Fruits for market, and selected them from our Fruit Gardens, as the choicest varieties known. Brinckle's Orange Raspberry and Linnæus Rhubarb especially are of exceeding excellence.

Orders will be promptly attended to in the order in which they are received, and Plants packed in careful manner.

Terms cash. Bills payable on delivery of Plants to the agents, or order of the purchaser.

Our plants will be ready to ship any time between the first of November and first of April. Circulars with full description of varieties and testimonials, can be had at the office of the California Farmer, San Francisco.

FREEMAN & KENDALL,
RAVENSWOOD, L. I. NEAR NEW YORK,
54 William street, New York City.

"We have visited Messrs. Freeman & Kendall's Fruit Gardens, from which they are now offering to sell Plants; and we can say their Plants are of very superior varieties and well grown, the Orange Raspberry and Linnæus Rhubarb particularly; we take pleasure in recommending them to the public."

v9-1

New Treatise on Land Surveying.

JUST PUBLISHED BY
E. C. & J. BIDDLE,
PHILADELPHIA,

A Treatise on Surveying, by S. Alsop. In this work, the theory is plainly and comprehensively presented; directions for practice are given definitely and precisely; and everything which an extensive business in Land Surveying would be likely to require is embraced. Price per copy, mailed to California, $2, postage included. Price of the KEY to the work, mailed to California, 75 cents.

E. C. & J. B. also publish the following popular educational works, and many others extensively used in the Schools and Colleges of our country: and they would respectfully invite School Directors and Teachers to send for a copy of the descriptive catalogue of their publications:

Crittenden's Treatise on Book-keeping. The series comprises the four volumes below named, and for each of them a KEY, and a set of miniature BLANK BOOKS for the exercises:
1. Treatise on Single Entry Book-keeping.
2. On Single and Double Entry, for Common Schools.
3. do do do for High Schools.
4. do do do for the Counting House.
The volumes are severally the text-books in Commercial Colleges in Boston, New York, Philadelphia, Cincinnati, Chicago, St. Louis, Louisville, etc.; in most of the Normal Schools, and a great number of the High Schools of our country in the Public Grammar and Evening Schools of Philadelphia, etc.; while as a book of reference for practical accountants the Counting House edition is, undoubtedly, the most popular work on the Science of Accounts, published in the United States.

Cleveland's English Literature. *Twenty-fifth Thousand just published.* 1. CLEVELAND'S COMPENDIUM OF ENGLISH LITERATURE, from the 13th to close of 18th century: chronologically arranged; consisting of Biographical Sketches of the Authors, and selections from their works, together with Notes explanatory, etc. 2. CLEVELAND'S ENGLISH LITERATURE OF THE NINETEENTH CENTURY. A sequel to the "Compendium"; arranged on the same plan as it. The above two volumes are text-books in many of the Colleges, in the principal Normal Schools, and in a large number of other first-class Seminaries of our country; and they may with confidence be recommended as an admirable guide or chart for private students of English literature.

Cleveland's American Literature. *Cleveland's Compendium of American Literature*, on the same plan as the author's "Compendium of English Literature," will be published early next year.

Harrison on the Rise, Progress, and Present Structure of the English Language.

The Works of Thomas Dick, LL. D. 10 vols. 12mo. Few books are better adapted for the School or the Family Library, than the works of Dr. Dick.

MACHINES AND IMPLEMENTS.

TREADWELL & CO.,

IMPORTERS,

N. E. corner California and Battery streets, SAN FRANCISCO,

have now landing, and will receive by every packet from New York and Boston, the most extensive assortment of

FARMING MACHINERY and Implements,

ever brought to this market, embracing all the

Latest Styles and Improvements,

which will be sold at lowest rates.....consisting in part of:

REAPERS:

MANNY'S COMBINED REAPER AND MOWER, WITH WOOD'S IMPROVEMENT.-These justly celebrated Machines have become too well known in California to require more than a simple announcement where they can be had. We are sole agents for the Pacific coast, and none genuine elsewhere.

McCORMICK'S REAPER....This universally approved Reaper we keep constantly on hand, and are Agents of the Maker.

KETCHUM'S COMBINED REAPER AND MOWER....This Machine is now very popular—having been greatly improved the last two years.

BURRALL'S IMPROVED GRAIN REAPER. This Reaper cuts six feet, and is one of the strongest and most durable Machines in use.

SEYMOUR AND MORGAN'S REAPER; without the Raker attachment and all late improvements.

HUSSEY'S REAPER....Baltimore make.

PALMER & WILLIAMS' SELF-RAKING REAPER.

THRESHERS:

"HALL'S" 8 and 10 horse THRESHER AND SEPARATOR....This Machine we have had made for this season, with great improvements, and it will be the best *THRESHER* in market this year—34, 36 and 38-inch cylinders, and cannot fail to give entire satisfaction.

"SPENCER'S" 8 and 10 horse THRESHER AND SEPARATOR....This is one of the largest and most durable Machines that comes to California, and has been well tried, and found "good."

STEPHENSON & BIRDSALL'S 8 and 10 horse THRESHER AND SEPARATOR....A large, splendid Thresher, with late improvements.

WHITMAN'S 4 horse THRESHER AND SEPTRATOR....This is a very desirable Thresher for small Farmers. It is got up with great care, and will give good satisfaction.

EMERY'S 2 horse THRESHER AND CLEANER....Greatly improved over last year.

EMERY'S 1 and 2 horse THRESHER, WITH FAN MILL.

The above Threshers will be sold with or without Horse Powers.

"Haynes'" Heading Machines or Harvesters.

These Machines are in general use in the Western States, and are pre-eminently adapted to California.

HORSE POWERS:

SMITH'S 8 and 10 horse PLANET POWERS, WITH HALL'S IMPROVEMENT.

PERRAGO'S 8 and 10 horse PLANET POWERS....This is one of the most successful Powers in use; has taken a greater number of premiums in the Atlantic States than any other Power; is simple, strong, and durable.

WHITMAN'S 4 and 6 horse ROTARY POWERS.
BOGARDUS' 2, 4, and 6 horse do do.
FIELDS' 2, 4, and 6 do do do.
EMERY'S 1 and 2 horse TREAD POWERS.

This Machinery comes in compact cases, can be sent to any part of the State or Coast at small expense, and marked so that it can be easily set up.

Extra Castings, for all the above, constantly on hand.

The Celebrated Boston Steel Clipper Plow.

We have these Plows exclusively, and keep a stock on hand at all times. Extra points and parts can always be had.

This Plow can be run with half the power it takes for the "Peoria" Plow of same size, and must commend itself to all who wish to save "horse-flesh."

The Peoria Steel Plow

Constantly on hand.

These styles of Plows come 10 in a case, and the expense is very small in sending them to the remotest parts of the coast or interior.

HAY PRESSES—Several sizes; best makers.
Do. CUTTERS—Several sizes and kinds; hand and power.
HORSE RAKES—wood and steel teeth; 8, 10, and 12 feet.
GRANT'S GRAIN CRADLES—In cases of one dozen each.
Do. FAN MILLS. Also, the Boston Mill.
CORN SHELLERS—Hand and power.
Scythes and Snaiths—best steel Scythes and Lamson's Snaiths.
Hay and Barley Forks—2, 3, and 4 tine; of best makers.
Carpenter's Patent Wire spring-Tooth Horse Rakes, 10 to 15 feet long, with wheels, and seat for driver.
Ox Yokes and Bows—all sizes.
Churns—Thermometer, Dash, and Cylinder; also, Dog Powers for do.
Garden Barrows. Cauldrons and Furnaces. Cultivators.
Horse Hoes. Seed Sowers. Harrows.

Field and Garden Seeds

Of every description, *via* the Isthmus—this year's growth (1857).

Steam-Engines, 4 to 15 Horse Power.

Suitable for Ranches or Mining purposes.

Portable Flour Mills and Mill Stones—Noyes' make. All sizes, 16 inch to 4 feet.

Belting, Bolting Cloth and Packing—All kinds and sizes of the above.

HARDWARE—The best stock in the State.

MINING GOODS—All kinds in use.

COOPERS' AND TANNERS' TOOLS—Full assortment.

Baling Wire—Annealed.

Hay Rope—Best Manila.

Grindstones—Best dressed Nova Scotia; from 6 inches to 4 feet diameter, packed in casks in sawdust.

Wire Fencing—A neat article for inclosing Gardens, Heneries, &c. Also, for Ornamental Garden work, Grape and Rose Trellises.

Wooden Ware—In great variety: Tubs, Pails, Buckets, Measures, Baby Cabs and Wagons, Peach and Strawberry Baskets, &c, &c. 9v-4

A. P. SMITH'S

POMOLOGICAL GARDEN AND NURSERY,

On the American River, 2½ miles from the Steamboat Levee,

SACRAMENTO.

THE Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of THE VARIETIES—embracing as they do

All Kinds FRUIT TREES, SHADE AND ORNAMENTAL TREES, GREENHOUSE PLANTS, SHRUBS, ROSES,

And also an unusually fine crop of

GENUINE GARDEN VEGETABLE SEEDS.

All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,

Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:

From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.

We call particular attention to our splendid stock of

CHERRY TREES,

THE FINEST AND LARGEST IN THE STATE,

embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from these. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase theirs, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most RELIABLE SOURCES IN THE EAST, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being

CORRECT AS TO NAMES AND VARIETIES,

are as PERFECT AS IS POSSIBLE TO MAKE THEM.

In the department of

Shade and Ornamental Trees,

We have a very fine stock of all the leading varieties, some very fine extra large trees of the

ELMS, LABURNUMS AND LOCUST,

particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.

A very extensive collection of all that is rare and desirable.

The Greenhouse Department is quite full, and our really superb stock of

CAMELLIAS

is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,

Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, WARRANTED PURE and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish GRATIS to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.

v8-18-6m A. P. SMITH.

DOCTOR HOOFLAND'S
CELEBRATED
GERMAN BITTERS,
PREPARED BY
Dr. C. M. JACKSON, Philadelphia, Pa.,
WILL EFFECTUALLY CURE
LIVER COMPAINT, DYSPEPSIA, JAUNDICE,
Chronic or Nervous Debility, Diseases of the Kidneys, and all diseases arising from a disordered Liver or Stomach.

Such as Constipation, Inward Piles, Fullness or Blood to the Head, Acidity on the Stomach, Nausea, Heartburn, Disgust for Food, Fullness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried and difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, Dimness of Vision, Dots of Webs before the Sight, Fever and Dull pain in the Head, Deficiency of Perspiration, Yellowness of the Skin, and Eyes, Pain in the Side, Back, Chest, Limbs, &c., Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of Evil and great Depression of Spirits.

The proprietor, in calling the attention of the public to this preparation, does so with a feeling of the utmost confidence in its virtues and adaptation to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American people, and its reputation and sale is unrivalled by any similar preparations extant. The testimony in its favor given by the most prominent and well-known Physicians and individuals in all parts of the country is immense, and a careful perusal of the Almanac, published annually by the proprietor, and to be had gratis of any of his Agents, cannot but satisfy the most skeptical that this remedy is really deserving the great celebrity it has obtained.

AGRICULTURAL.

FIRST PREMIUM IMPLEMENTS.

TO THE FARMER
AND
Dealer in Agricultural Implements.

PLEASE READ.

HAVING erected a good shop, with facilities not heretofore possessed by any house in this State for manufacturing Agricultural Implements, I beg leave to announce that I am now prepared to receive orders to any extent in this line of business. I employ none but the best and most experienced mechanics, and use only the very best materials. In this way I hope to promote the interest of the good mechanic, the interest of the farmer, the interest of our young and growing Agricultural State; and at the same time that interest which is foremost with all mankind—self. I have had twenty years experience in the manufacturing business;

I ESTABLISHED THE FIRST SHOP,
AND
MADE THE FIRST STEEL PLOW

in the State of Wisconsin, in the dawn of her great agricultural improvement. I also

MADE THE FIRST REAPING AND MOWING MACHINE
AND
THE FIRST STEEL PLOW
Ever Made in this State;

Therefore, with my experience, and a knowledge of the wants of the country (which are different from most others), I feel confident that I can and will do much for the interests of the agriculturists of this county; and in my efforts I trust I shall meet with a good share of patronage from the farmer and all interested in this matter, and in the interest and development of the agricultural improvement of our State.

I design, and have under way, the manufacturing of

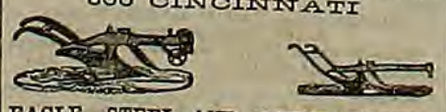
1,500 Cast Steel California Plows;
THE DEEP TILLER;
OR,
"QUEEN OF THE WEST;"

Of stock entirely superior to any ever worked before in this country. Also,

GANG PLOWS,
HARROWS,
CULTIVATORS,
FANN MILLS,
&c., &c., &c.

In addition to what I manufacture, I shall constantly be receiving implements from the best makers of the Eastern and Western States, amongst which are now due

500 CINCINNATI



EAGLE, STEEL AND ROVER PLOWS,

which stand, in point of true merit and worth, altogether higher than any others in the great agricultural State of Ohio.

☞ Please favor me with a call, and see for yourself, and be convinced that I am publishing no humbug, but simply facts as they are; and that your young State can, within itself, already provide the farmer with implements inferior to none now in use. All kinds of agricultural implements and machines repaired on short notice, and in the best manner, and on reasonable terms.

CHARLES DICKENS' WORKS.

TWENTY-NINE DIFFERENT EDITIONS.

NO LIBRARY CAN BE COMPLETE WITHOUT A SET OF THESE WORKS.

CHEAP EDITION.—PAPER COVER.

Complete in Fourteen volumes.

"PETERSON'S" are the only complete and uniform editions of Charles Dickens' works ever published in the world; they are printed from the original London Editions, and are the only editions published in this country. No library, either public or private, can be complete without having in it a complete set of the works of this, the greatest of all living authors. Every family should possess a set of one of the editions. The cheap edition is complete in Fourteen Volumes, paper covers, either or all of which can be had separately, price 50 cents each, as follows:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist
Nicholas Nickleby.	Two Apprentices. 25

A complete set of the above fourteen books, will be sold, or sent to any one, to any place, *free of postage*, for Five Dollars.

LIBRARY OCTAVO EDITION.

Published in Seven Different Styles.

This Edition is complete in SIX very large octavo volumes, with a Portrait on steel of Charles Dickens, containing the whole of the above works, handsomely printed, and bound in various styles.

Vol. 1 contains Pickwick Papers and Curiosity Shop.
" 2 do Oliver Twist, Sketches by "Boz," and Barnaby Rudge.
Vol. 3 contains Nicholas Nickleby, and Martin Chuzzlewit.
" 4 do David Copperfield, Dombey and Son, and Christmas Stories.
" 5 do Bleak House, and Dickens' New Stories.
" 6 do Little Dorrit. In two books—Poverty and Riches.

Price of a set, bound in Black cloth	$9 00
" " Scarlet cloth, extra	10 00
" " Law Library style	11 00
" " Half Turkey, or Half Calf	13 00
" " Half calf, marbled edges, French	14 50
" " Half calf, real ancient antique	18 00
" " Half calf, full gilt backs, etc	18 00

ILLUSTRATED OCTAVO EDITION.

THIS EDITION IS IN THIRTEEN VOLUMES, and is printed on very thick and fine white paper, and is profusely illustrated, with all the original illustrations by Cruikshank, Alfred Crowquill, Phiz, etc., from the original London editions, on copper, steel, and wood. Each volume contains a novel complete, and may be had in complete sets, beautifully bound in cloth, for Nineteen Dollars a set; or any volume will be sold separately at One Dollar and Fifty cents each. The following are their respective names:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist.
Nicholas Nickleby.	

Price of a set, bound in Black cloth, in Thirteen volumes	$19 00
" " Full Law Library style	26 00
" " Half calf, or half Turkey	29 00
" " Half calf, marbled edges, French	32 50
" " Half calf, ancient antique	39 00
" " Half calf, full gilt backs	39 00

DUODECIMO ILLUSTRATED EDITION.

Complete in Twenty-five Volumes.

The Editions in Duodecimo form are beautifully illustrated with over *Five Hundred Steel and Wood Illustrations*, from designs by Cruikshank, Phiz, Leech, Browne, Maclise, etc., illustrative of the best scenes in each work, making it the most beautiful and perfect edition in the world, and each work is also reprinted from the first original London editions that were issued by subscription in monthly numbers, and the volumes will be found on examination, to be published on the finest and best of white paper.

This edition of Dickens' Works is now published complete, entire, and unabridged, in Twenty five beautiful volumes, and supplies what has long been wanted, an edition that shall combine the advantages of portable size, large and readable type, and uniformity with other standard English authors.

The Duodecimo edition alone has been gotten up at an expense of *over forty-five thousand dollars*, but the publishers trust that an appreciative public will repay them for the outlay, by a generous purchase of the volumes. All they ask is for the public to examine them, and they are confident they will exclaim, with one voice, that they are the handsomest and cheapest, and best illustrated Set of Works ever published. This edition is sold in sets, in various styles of binding, or any work can be had separately, price Two Dollars and Fifty cents each, and each work but one being in two volumes, handsomely bound in cloth, as follows:

Pickwick Papers.	Sketches by "Boz."
Nicholas Nickleby.	Barnaby Rudge.
David Copperfield.	Martin Chuzzlewit.
Oliver Twist.	Old Curiosity Shop.
Bleak House.	Christmas Stories.
Little Dorrit.	Dickens' New Stories.
Dombey and Son.	*One volume, cloth*..$1 25

Price of a complete set in Twenty-five volumes, bound in	
" " " Black cloth, gilt backs	$30 00
" " " Full Law Library style	40 00
" " " Scarlet, full gilt, sides, edges, etc.	45 00
" " " Half calf, ancient antique	60 00
" " " Half calf, full gilt back	60 00
" " " Full calf, ancient antique	75 00
" " " Full calf, gilt edges, backs, etc.	75 00

PEOPLE'S DUODECIMO EDITION.

Published in Six Different Styles.

This Duodecimo edition is complete in Thirteen volumes, of near One Thousand pages each, with two illustrations to each volume, but is not printed on as thick or as fine paper as the Illustrated Edition, but contains all the *reading* matter that is in the Illustrated Edition, printed from large type, leaded. The volumes are sold separately or together, price One Dollar and Fifty cents each, neatly bound in cloth; or a complete set in this style will be sold for $19. The following are their names:

Little Dorrit.	Nicholas Nickleby.
Pickwick Papers.	Christmas Stories.
Dickens' New Stories.	Martin Chuzzlewit.
Bleak House.	Barnaby Rudge.
David Copperfield.	Old Curiosity Shop.
Dombey and Son.	Sketches by "Boz."
Oliver Twist.	

Price of a set, bound in Black cloth	$19 00
" " " Full Law Library style	24 00
" " " Half calf, or half Turkey	26 00
" " " Half calf, marbled edges, French	28 00
" " " Half calf, ancient antique	32 00
" " " Half calf, full gilt backs	32 00
" " " Full calf, ancient antique	40 00
" " " Full calf, gilt edges, backs, etc.	40 00

Copies of any one work, in cloth, or any set, of either of the twenty-nine editions, in any of the various styles of bindings, of Charles Dickens' works, will be sent to any person, to any part of the United States, *free of postage or any other expense*, on their remitting the price of the edition they may wish, to the publisher, in a letter.

J. L. POLHEMUS
DRUGGIST

OFFICIAL NOTICE!

POLHEMUS' DRUG STORE,
No. 190 J street, corner of Seventh.
SACRAMENTO, CAL

FELLOW CITIZENS: I have lived among you since the ever glorious FORTY-NINE, have suffered with you in three fires and three floods, and intend to live among you with my family during the term of my natural life, if not longer. I return you my most sincere thanks for your unfaltering patronage and support, which has enabled me to pay One Hundred Cents on the Dollar through all my adverse fortune. I would also give you a few reasons for your continued patronage, and inducements to new patrons likewise.

FIRSTLY.

I claim to be the Oldest Established Legitimate Druggist in this City.

Persons in this connection will please observe that there is as much difference between a DOCTOR and a DRUGGIST as there is between a Druggist and a Doctor, and rather more so between those who have picked up the Drug Business and those who have devoted their whole lives to it. To this latter class I have the honor to belong, having learned my business in the Atlantic States, and been engaged in said business for the last eighteen years.

SECONDLY.

Believing that life is sweet to all, and that the people wish to know where they can get their prescriptions filled with safety, I will hereafter fill them for

Half the Price Usually Charged

By other Druggists, legitimate or illegitimate, and of **The Purest Drugs and Chemicals.**

THIRDLY.

I intend my store shall be ONE of the best, if not THE BEST place in California to obtain everything, NEW, ODD and STRANGE in the Drug line, and especially to make it the most extensive depot for every valuable Patent Medicine, Drug and Chemical. We invite proprietors of valuable and reliable Patent Medicines to send them along. We have a large and thoroughly fire-proof Drug Warehouse to hold them, and patrons to buy them

FOURTHLY.

We Keep Open all Night!

And charge no more for medicines than in the day time.

FIFTHLY.

We will furnish those in indigent circumstances with MEDICINES AT COST! the same being attested by two or three good citizens.

SIXTHLY.

Hereafter we will do a business on a CASH BASIS ONLY. The amounts we have lost heretofore by crediting we intend to distribute equally among our patrons, in the future, in the decreased price of our goods.

SEVENTHLY.

We have received the agencies for the following valuable articles:

Dr. Carl Warburg's Tincture. This article is particularly recommended for Ague and Fever, when every other article fails to cure.

Budds' Nerve and Bone Liniment, warranted the best in California.

Flower of the West, for Fever and Ague.

Delight's Spanish Lustral, for the Hair.

HUDSON'S CALIFORNIA GROWN MUSTARD.

Also, agencies for all the other popular medicines too numerous to mention.

EIGHTHLY AND LASTLY.

We import nearly all of our goods. We think we know how to import them, and how to sell them to satisfy the public as to price and quality. At all events, give us a call, and WE WILL TRY.

v6-12 J. L. POLHEMUS.

To Poultry Raisers.

A SURE Remedy for the Disease of Fowls, peculiar to California, put up in half pound packages, sufficient to cure from forty to fifty fowls.

Full description of the disease and directions for cure accompanying each package. Price $1.

Annual Meeting of the Mechanics' Institute.

The members of the Mechanics' Institute held their annual meeting on Friday evening last. The object was to receive the reports of the Treasurer and Board of Directors on the financial condition of the Association. Not having been present, we copy the Times' Report, which says:

The meeting was numerously attended, and a warm interest was excited in the proceedings. The President, John Sime, occupied the chair. Upwards of $3000 are shown by the report of the Treasurer to have been received during the past year for dues and assessments. The receipts from the late ball and Fair were $21,000, yielding a revenue of $24,000. The total disbursements for the year were $17,000 leaving a balance of $7000 on hand. There are now 403 members, holding 560 shares of capital stock, amountiug to $14,000, the whole amount of which capital stock is $75,000; the balance cannot be issued until the projected new building is commenced. There are now one thousand volumes of standard works in the Library, and one thousand dollars' worth are now being bought of Messrs. Appleton & Co., of New York. During the year one hundred and one volumes have been presented to the Library, including a valuable collection from Capt. C. P. Stone. The Institute, as may be seen from the above facts, is in a flourishing condition.

From the Sandwich Islands.—By the arrival of the Fanny Major on Sunday, we have dates from Honolulu to Jan. 20.

An election for members of the House of Representatives was held Jan. 1st, which resulted in the election of most of the Independent over the Ministerial candidates. In Honolulu 2111 votes were polled, and the Independent ticket received 132 majority. Ballot box stuffing seems to have been practiced extensively at Lanai, 204 votes having been polled where there was a male population of only 150.

A heavy gale visited the Islands Jan. 11th, causing the loss of the schooner Joseph Dunlap.

Very severe storms hand also swept over the Islands about the 1st of that month, blowing down houses and causing the death of numbers of cattle.

On the night of the 4th January, says the Advertiser, the wind, which had for several days been baffling from west and south, set in from about E. N. E., and for the two following days and nights has been blowing a severe gale, accompanied with squalls of rain. Valuable trees have been uprooted, fences blown down, and shrubbery prostrated. In Nuuanu Valley, one of the cottages in course of erection opposite the Methodist Chapel, was prostrated on Tuesday night, and we hear that the country residence of Mr. Edward Burgess, at Waimalu, was also blown down. Several coasters in port have been detained from sailing, owing to the gale. The schooners Excel and John Young were to leave Kauai for this port on Monday last but have probably put back, as it would be impossible for them to beat up against such a gale. The Kalama was to have left Lahaina on Tuesday, but was probably detained for the same cause. We expect to hear of considerable damage done by this gale in different parts of the islands, to the crops of the planters, and possibly to some of our small coasting craft.

The U. S. sloop St. Mary's was to sail for this port on the 25th of January.

The British steamer Vixen had sailed for a month's cruise to the windward islands.

On the 21st December, 1856, there were in port at Honolulu 47 vessels, against 25 at the same date this season.

The French brig of war Alcibiade, Captain Marigny, arrived at Honolulu, 22 days from Tahiti, via Hilo. There was no news of interest at the Society Islands.

The ship John Marshall had received orders to proceed to the guano islands for cargo.

It is stated that the authorities have refused to sanction the shipping of Hawaiians by the Caroline E. Foote, for the purpose of digging guano; the idea having probably gained credence with them that the business is destructive to the lives and health of the laborers.

A grand regatta, in which all the shore boats participated, took place at Lahaina, on Christmas day.

The Commercial Advertiser of Jan. 21st says the Messrs. Allen have chartered the schr Kalana to carry a cargo of sweet potatoes to San Francisco.

From Australia.—By the arrival of the bark Jane and Catharine, from Sydney, dates have been received from that city to the 3d December. The news, except of a political or local character, is unimportant. All branches of trade are extremely depressed. A new colony has been formed out of the northern portion of New South Wales, called Moretown Bay. The Colonial Parliament were engaged in the discussion of the Land Bill; and after thirteen years spent by the Colonial Legislature in attempting to devise some proper method for disposing of the public lands, they have not yet been able to hit upon any.

The yield of the mines still continues to be good.

The exports from New South Wales during 1856, amounted to $60, and the imports to $97 for each inhabitant, on an average. The value of the imports was $27,000,000; of the exports, $17,000,000. From January to October, 43,000 ounces of gold were shipped from Sydney.

Capt. Sherman, of the whaling bark Pacific, from New Bedford, had made a declaration before a magistrate, in New Zealand, that his ship was lost; but the Hobart Town Advertiser says, the vessel had been in that port subsequent to the date of the declaration. The Chilean brigantine Sarah Ann was wrecked on one of the islands of the Pawmatu, and all on board, fourteen persons were lost. The ship Catherine Adamson was wrecked near the Sydney Heads, on the 28th of October, and nineteen persons were lost.

Sir William Denison, the Governor-General, while walking in his park, was assaulted by a red deer, and wounded severely in the thigh.

The Jane and Catharine brought over a cargo of Australian sheep, consisting of 400 ewes and seventy-nine rams.

The Parliament of Victoria was prorogued on the 21st of November. The French authorities at New Caledonia sent an expedition to chastise the islanders, many of whom were sent as prisoners to Tahiti.

Fifty-six thousand gallons of liquor were imported into Sydney, during the single month of November last, as shown by the books of the Custom House: and this is for the use of a population of but little more than half a million. The amount of revenue collected during the month was £38,392, of which more than £25,000 was collected on liquors and wines, and the imports of that month were the smallest of the year.

Stores for Utah.—We learn that the Government supplies for Utah are to be sent around the Horn to the Gulf of California, and thence up the Colorado river.—[Times.

Wholesale Produce Report.

The prices of Flour and Wheat are nominal; many sales made only on p. t. (private terms), which means, pretty ticklish. We would ask those persons who *profess* to know, where all the parcels of wheat came from that have arrived within a few days—nearly 3000 bags on Wednesday! This does not look like starvation, when added to the other products.

ACHROMATIC MICROSCOPES.

J. & W. GRUNOW & CO., New Haven, Connecticut, invite attention to their superior

Achromatic Simple and Compound Microscopes.

These Instruments have obtained the commendation of the most eminent scientific men of America, and have received the premiums of the New-York World's Fair of 1853 and of the Connecticut State Agricultural Society of 1856.

These Microscopes vary from forms of the greatest possible simplicity to those combining the most elaborate of modern improvements.

They call the particular attention of Students and Teachers to their EDUCATIONAL and STUDENTS' Microscopes; which are provided with object-glasses sufficient for all ordinary investigations, and of a quality never before sold by any American or foreign maker at prices so low.

Priced Catalogues will be sent gratis upon application. J. & W. GRUNOW & CO. have also now ready for distribution, an elaborate Descriptive and Illustrated Catalogue which will be sent post-free upon receipt of of 30s in postage stamps. *eoply

LINDSEY'S

Double Acting Rotary Force Pump.

THIS is a new Pump, patented in America and England in 1855; and for Cisterns, Wells, Mines, Engines, Railroads, &c., has no rival: in that it works easier at great depths, discharges water at different hights, can be used for a hose, is made entirely of wrought and cast iron, without suction or packing, simple in construction, easily put in, not likely to get out of order, will last for an age, and is cheaper than any other Pump. It has a wrought iron pipe, side gearing and balance wheels, with everything complete to raise water by hand, from one to one hundred feet; and costs, boxed and shipped, from $18 to $60.

It must stand in the water, and will not rust.

Drawings and a full description sent to all parts of the world, free of postage, by addressing the general agent.

SEEDS

OF FRUIT and ORNAMENTAL TREES.

THOMAS MEEHAN,

Proprietor of the Germantown Nurseries,

Germantown, Philadelphia, Pa.

Includes in his business the collection and importation of

Every Kind of Tree Seeds

That can be obtained in this country or Europe. A Price Current of over Two Hundred Species which can generally be obtained with certainty, is issued every May, in advance of the season of ripening, so as to afford purchasers an opportunity to forward their orders early enough to get them in prime season; fresh, and in the best order for growing.

Most of this year's crops of seeds are now on hand, and they will be sold at the lowest rates at which they can be collected. The supply of PEAR SEED is large this season, and can be supplied at $5 per pound, or $4 50 per pound when 5 pounds are ordered.

23tf November 18, 1857.

The Concord Grape.

The Originator of this New Grape offers for sale a fine stock, raised from the parent Vine. It has fully sustained its reputation as

The Best Grape for Out-door Culture

having survived the last two severe winters unharmed, where the Isabella, Catawba, and other vines were killed to the ground.

For Size, Beauty, Quality and Bearing,

it has unsurpassed. It is perfectly hardy, and has never been affected by rot or mildew, while it ripens from three to four weeks earlier than the Isabella, and two weeks earlier than the Diana, in the garden of the proprietor.

Fine, strong plants, at $1 50 each; $12 per dozen. Two years old, at $2 each. Three years old, extra, at $3 each. A liberal discount to clubs and the trade. Orders, with cash or good reference, promptly attended to. Address

Gophers, Rabbits and Squirrels.—No. 3.

EDITORS FARMER: I made up my mind that I had made an important discovery in regard to the best way of getting quit of the obnoxious Squirrels, namely, by means of Cats, and was puzzling myself about the strangeness of the same *theory* never having occurred to any one before. That was my first idea; my second, to write an essay on the subject for the Agricultural Society ("accompanied by actual experiments!"). But here was a difficulty on which I had not calculated. The testimony which I could produce was merely presumptive evidence. I was afraid it would be impossible to train Cats to do otherwise than follow their own sweet wills as volunteers. To make them artificial hunters seemed impossible. What would the Society say in such a case? Would they undertake to cut me up about it—cats, essay, and all? or would they treat my disposition to serve them with becoming courtesy? Might they not be ready to admit, that it mattered little how essays were written, provided they contained correct and useful information, and that it must be a poor essay not to be worth the small premium which they had seen fit to offer?

Thought I, I will be ruled by circumstances. So I took a turn towards the village, for the purpose of ascertaining the opinion of some of my learned acquaintances there, several of whom have got more good sense under their rugged beavers than the head of many a silly fop has brains to contain. The first person I concluded to consult was my friend Mr. Rogers. Mr. Rogers is a sensible and sententious man. So I briefly put the question to him: "Mr. Rogers, can you tell me any means by which the country can be cleared of Squirrels and Gophers?" "Cats!" says Mr. Rogers. "Cats?" said I, pretending to receive his information with surprise. "Cats? Mr. Rogers, you must be joking." But Mr. Rogers was not joking; and to convince me that he had good reasons for recommending them, he forthwith commenced to give me an account of his own cat.

Mr. Rogers, if I mistake not, was the first man who owned a cat in Millerton; and from then till now no one has had a more useful, or a better-bred. From Mr. Rogers' statements, corroborated by my own previous observations, I have come to the conclusion that at an early stage of its life the Cat prefers a mixed diet—partly flesh, and partly its mother's milk. At least, their mothers prefer to feed them in this way. Such was the case with Mr. Roger's Cat, and such had been the case with mine. Till Mr. Rogers' Cat had kittens, he did not observe anything very particular about her; but sometime afterwards, when the young kittens were beginning to run about, and the small household vermin on which she had been occasionally feeding them were getting exhausted, she saw the necessity of extending her pursuits to a greater distance. Before this time, there were apparently any quantity of Gophers in the neighborhood; and it struck Mrs. Puss, that to eke out the decreasing supply of mice, she might with much propriety direct her attention to their capture. From the frequent visits which she paid to those places where they were most thickly congregated, it was evident that some overt act on her part might be anticipated. The supposition was correct. No sooner had she collected sufficient information on the subject than her plans were carried into effect. One morning, Mr. Rogers found four of the largest Gophers he had ever seen, brought with maternal solicitude as a votive offering to her young ones, lying dead beside them. Day after day, or rather night after night (for it was in the mornings that he found them), she successfully carried on her labor of love, continuing to feed them with the same fare, with unremitting attention, as long as any Gophers could be found.

When the Gophers become so reduced in numbers that the catching of them involved more trouble than the value of their flesh, as feline food, would justify, she concluded to furnish her thriving family with Squirrels, which are very numerous in our vicinity; and Mr. Rogers had the pleasure of perceiving her repeatedly carrying home Squirrels bigger than herself.

The case is established. But the propriety of the Agricultural Society awarding a premium for such an essay as this which I am now writing, was a question involving much doubt, and one on which they might not have been prepared to furnish any report, even yet. It would, apparently, have been as difficult of solution as the drowning of the poor Ophelia, which so puzzled the sapient grave-diggers in Hamlet. With them, the question of her death being a suicide was made to depend on whether the water came to her, or she went to the water. Here, it might have been asked, with equal propriety, who made the experiments? It was evidently the Cat. Then to the Cat the premium was due. Against this ruling the objection arose, that the Cat had not written the essay. Under the circumstances, I came to the conclusion that the Society would feel constrained to retain the premium; and, consequently, I did not compete upon the subject.

But, although I did not write, for the Society, on what, after all, is to many a serious matter, I made up my mind to lay my convictions before the public; and to arrive at more correct conclusions than I may have jumped at in the first instance, I have been at some pains, by consulting the works of naturalists, to ascertain the history of the Cat, and its peculiarities and habits in a state of nature; from which I infer, without any hesitation, that it is fully equal to the duty for which I propose to employ it. "The Cat (*felis catus*)," says one, "belongs to the same class of animals as the lion and tiger. The genus comprises twenty-one species. Though originally a variety of the wild-cat it is now domesticated. The domestic Cat, when suffered to retire, easily returns to a wild state. The flesh of animals or fish is the most agreeable food to Cats; for they partake of vegetable aliment only from necessity."

The two facts, that Cats easily return to a state of nature, and that flesh is their natural food, when taken in connection with the direct testimony which I have adduced, seem to me quite sufficient to convince any one that they may be made useful allies in our warfare against Squirrels and Gophers. The Cat, it is true, has some peculiarities which indicate some little difficulty in founding a colony of semi-wild Cats. They have a great attachment to places, much greater indeed than to persons, or for each other. In these respects the Cat forms a singular contrast to the Dog. It would be vain therefore to attempt removing full-grown cats to the fields, as it is not unlikely that they would be home before us. They must be removed while they are yet kittens; and properly housed, fed, and fastened up, till they are at least half-grown. At that stage, they might, I think, have the doors of their cages left open, and be only half-fed. Instinct will soon teach them to supply the deficiency of their usual rations by their own exertions; and after two months more I would not feed them at all.

The location to which I would remove them would be some sheltered ravine, where there are trees to attract birds, so that they might not be entirely confined to one kind of diet; and where there is a small stream, or pools of water, as the Cat, in consequence of swallowing its food without much chewing, requires to drink plentifully.

As the Cat goes with young fifty-five days, and averages from four to six kittens at a birth, it must be seen that a single pair would soon increase to a large number; and a single pair in the course of a year would kill a large number of Squirrels. Squirrels, it is true, increase in about the same ratio that Cats do; but as a single Cat would be likely to kill at least a hundred Squirrels a year, where it had principally to depend on them for subsistence, it is abundantly evident that, they would soon be exterminated. Besides, the common gray Squirrel is migratory, often leaving its old grounds without any apparent reason. Where it was closely watched by such a dangerous opponent, as the Cat would prove, there is no doubt it would excuse its stay (on the ground of its well-known vagrant habits) from intelligible motives.

AGRICOLA.

MILLERTON, Jan. 25th, 1858.

Salt for Quince Trees.

THE Quince Tree seems to have a constitutional fondness for Salt. We have never seen, says the Horticulturist, such superb specimens of fruit, and such a general luxuriance of the trees, as at Newport, R. I., on the sea coast. A gentleman who noticed this fact several years ago, told us lately that he had profited by the hint, in giving to each of his trees a top-dressing of two quarts of coarse salt every spring. By scattering the salt over the surface it dissolves slowly, and does no harm whatever to the roots, but makes both foliage and fruit much more healthy.

MONUMENT TO ETHAN ALLEN.—Messrs. Adams & Pomeroy, of Burlington, Vt., who constitute the committee for superintending the erection of the monument over the remains of Ethan Allen, provided for by the Vermont Legislature, have issued a circular saying that they are prepared to receive contributions of one dollar each from all patriotic Vermonters, for the purpose of defraying the expense of placing upon the top of the monument a colossal statue of the hero, in granite or marble. The monument, which is a Tuscan column of granite between forty and fifty feet high, is nearly completed, and it is proposed to lay the corner stone on the 10th day of May next, being the eighty-third anniversary of the surprise and capture of Ticonderoga.

THE COUNTRY CHURCH.

WE love to present Rural scenes, and this is one of the best. When we pass from town to town in our golden land, if the village church and village schoolhouse are neat and well-cared for, we feel there is permanency for the place. Where they are neglected and out of repair, it is not safe to tarry long. In a country like California, where "the earth is full of His glory," the minister of God need not look long or study hard to find a text, for open books in every field, bud, and blossom are like open Bibles, and we feel that those who cannot find texts there, those who cannot see much of the prophesy of old revealed to us in this land, are not among those "who are called."

We love a simple and beautiful church in the country, and hope to see a better taste prevailing, and a desire to select appropriate places and designs for our churches more in keeping with their sacred object.

From a Subscriber in the Country.

EDITORS FARMER: You will please to excuse the request I make. I have just read in your paper "a special gift to subscribers," and that they will be sent by mail, if requested.

I shall feel exceedingly obliged if you will send me a parcel of Flower Seeds. I am not only fond of a Garden, but I love to work, plant, and watch the little germ placed in the earth, to come forth a beautiful flower or shrub. I am anxious to have as much of variety in my garden as I can get, and if you will supply me with the above, or any other, if convenient, it will afford me pleasure.

We are not doing much as regards improvement this spring, owing, alas, to the unsettled state of the title to land. I am almost discouraged at the prospect before us. After paying a big sum of money for a claim, working hard for six years, and expending over seven thousand dollars towards improving and making the land profitable; always intending this for a permanent home, and place of quiet rest, against the time of old age, with the idea of it becoming Government land: then comes a claimant, patent given by Government, not only asking an enormous price per acre, but a notice of ejectment, with suit for ten thousand dollars damages. What damage can be done to the claimant, when so much has been done to improve the estate, is more than I can tell. But with sorrow I write, that we live at a time when men come with impunity, overstep the bounds of propriety, and remove the original land mark.

These are great trials to the settler, and a great cause why so little has been done in this valley. But we live in hopes that the day is at hand, when every man will "sit beneath his own vine and fig tree," and enjoy the fruit of his own labor.

I am heartily glad that your valuable paper takes its stand on the right side of this thing. May every righteous effort made in support of a noble cause, by the FARMER, meet with its due reward, is the earnest wish of your subscriber,

H. E. S.

Extract of a Letter from Napa.

THE thanks of our friend for the facts from Napa county; they are valuable. This is one of the great Grain-growing districts. It has told, and will tell again, when speculators *try* the market. For the kind offer made of that Butter, we are truly thankful. Editors are always glad to know that their *bread is buttered*, and we should not object to have it buttered on *both sides*. We know the *quality* of the Butter promised, and the very thought of it makes our mouth water now. The *Bread* shall be ready!

FRANKLIN RANCHO, Feb. 15th, 1858.

"We are having fine weather for the growing crops. The majority of our farmers have got their crops in. The grain that was sowed early is up, and growing finely, and bids fair for a splendid crop next harvest. From present appearances, I do not think there is much danger of starvation in this State this season.

"We shall put in about five acres of Chinese Sugar-cane, for our milch cows. We tried a few hills the last season, and find all kinds of stock are very fond of it. We have left a few hills, to see if it will sprout from the roots. It keeps green, and grew fast until the middle of November; at that time we had a severe frost, that cut it down.

"We shall sow a small piece, broad cast, for an experiment. Will let you know the result. Will you please send me a small parcel of those French Radish seed; Breakfast Radish, you call them? Will commence making Butter soon, and will send you a can, to try on some of that Bread you speak about. Do not forget to let me know about the Blackberry, as soon as possible."

Yours, E. N.

We have received the following letter from one of our kind subscribers and correspondents, and like all who feel that the approbation of the good is worth preserving, we place this most acceptable and valuable letter in our columns as the best means of preserving it as a record that shall stimulate us to greater exertions:

MESSRS. EDITORS: Although the FARMER seldom finds its way so far up in the mountains as here, yet it meets with a hearty welcome whenever it does come, and is the best paper in the State for family reading, for its intellectual feast is spread before us, without the addition of those spicy condiments of scandal, murder, &c., which only create a hankering in the mind for unnatural food, but is set out with tempting, healthful viands, well calculated to improve our morals and our health.

Another superiority it possesses, is its large, beautiful type, which makes it so pleasant to read of an evening; for the small type with which most newspapers are printed, is calculated to injure the eyes of the too constant reader, particularly those of old people.

It may perhaps be as well that your paper does not come any oftener, for I fear it would make half the miners turn farmers; and some who once were sailors, think they would like to try their hand at farming, notwithstanding "Wash's" recent and rather discouraging letter to the contrary. We will try and send you a list of subscribers in the spring when the trails are open, till then, *Adieu*. J. W. MEREDITH.

PINE COTTAGE, Jan. 22, 1858.

Coloring Matter in our Native Grapes.

The grape should produce its own coloring without any admixture, which is the case with all pure, high-colored foreign wines.

During the last fall, while the grape was ripening, we accidentally stumbled on a fact, which may, in some one's hands, prove of use, in coloring or rather producing a colored wine. We had a pretty good crop of Isabellas, Catawbas, and Alexander or Schuylkill's in our garden, and as the latter variety ripened, the fruit was stewed with a small quantity of sugar, and used as sauce at the table. We were truly surprised to observe, that the juice, which was very abundant, was of equal body with the best Port wine, and as deeply colored. We tried the same experiment with the Isabella, when it ripened, and with the like result. The process was a simple one. A quart of grapes was put into a brass stewpan, a quarter of a pound of sugar added, half a teacupful of water, and left to stew from five to ten minutes. All the juice is thus extracted, and the coloring matter contained in the skin is set free. In this condition the juice is to our taste delicious. When the Catawba ripened, we pressed about two bushels of them, and added to their juice, sufficient juice of the Isabella, prepared as above, to color the whole of a rich hue. About three pints of the latter was sufficient; and we went into the process of wine-making in a small way. Fermentation took place in due time, and we have now a beautifully colored wine, too new, of course, to have strength. What it will ultimately be, time will determine. The stewing has not, however, left any disagreeable flavor or effect upon it. We do not know that this hint will ever prove useful, but will leave it in the hands of our wine-makers, who may improve the suggestion, by instituting a series of experiments on the subject. [Ohio Farmer.

Justice to California.

TRUTH is mighty! Justice, though slow, is sure! For years the press at the East have hesitated to do justice to California, or to herald her good deeds, or make known the glorious condition of her resources; but such manifestations of her prosperity as have been shown lately, by the cargoes of her productions sent thither, and the vast amount of gold sent to the poor and distressed in their time of need, compels even the New York Herald to awake and proclaim the worth of California to the Union.

We rejoice at this evidence of the triumph of justice, and we need only to call the attention of our readers to the editorial of the Herald which we publish below, and they will see there that the Herald admits the very truths which have been again and again spoken, for years, as the FUTURE OF CALIFORNIA. What we predicted, years since, is now admitted, and we commend the following to all who regard the welfare of our State:

Prosperity that is not Artificial—California Entering upon Her Really Golden Days.—In the midst of the gloom which our financial disasters have cast over the greater portion of the Union, there is one ray of light breaking upon us from a quarter in which it was least to be expected. While the storm has swept relentlessly over most of our other States, California seems to have been almost entirely exempted from its effects. Its general condition, in fact, has never been more substantially prosperous and flourishing than at the present moment. Whilst it has sympathized in the commercial embarrassments that have overtaken us only to the extent of some half dozen failures of leading houses, it presents commercially, socially, and politically, all the evidences of a steady progress. The political purification that it underwent through the agency of the Vigilance Committee seems to have exercised a healthy influence over all the other features of its condition. The elements of disturbance and disorganization which created so much alarm in timid minds a few months ago, have gradually settled down into a state of apparent quiescence and contentment. The administration of public affairs is no longer marked by the avowed corruption and rascality that formerly invaded every department. We hear no more complaints of the dishonesty of public officers, or of malversations of the public funds. The criminal statistics of the State also exhibit a marked improvement—the number of murders and acts of violence being considerably less than at any former period. In fact, judging from the evidence afforded by the newspapers alone, we should say that the condition of San Francisco and Sacramento is in this latter respect relatively much better than that of New York.

Whilst we notice these political and social ameliorations in the condition of California, it gives us pleasure to add that the material progress of the State fully keeps pace with them. Taught by experience, the Californians have arrived at the conviction that gold is not the real basis of the wealth of a community, and that the attention that is bestowed on Agriculture is infinitely more productive, in the long run, than that devoted to the slow and painful process of Mining. Accordingly we find that the quantity of grain raised during the past year is nearly double that grown during the previous one, and there is no doubt that in the course of a little time California will become almost as noted as a corn exporting country as it now is for its metallic products. And in this latter respect it is equally satisfactory for us to learn that the increased attention devoted to agricultural and industrial operations has in no way affected the returns of the precious metals. If we are justified in forming an estimate of the produce of gold for the next eleven months, by the excess of the first arrival in January over that of the corresponding period last year, we should say that it will be considerably in advance of it—the difference between the two months amounting to $400,000. An unmistakeable evidence of the growing internal prosperity of the State is to be found in the statement that, while the produce of gold is increasing at this ratio the amount retained for domestic uses is relatively much larger than it has ever been before. This proves, of course, an augmented activity in all the branches of industrial and commercial operations, as well as a healthy condition of things generally. When we take, in connection with such facts, the rapid multiplication of the facilities of internal communication, as shown by the Postmaster General's report, we cannot but arrive at the conclusion that California is at last entering upon a career of substantial and permanent prosperity.

STITCH! STITCH!! STITCH!!!—We spent a few moments very pleasantly in the rooms on Sacramento street, in examining the very elegant sewing machines of Messrs. Hayden & Co., now in operation there under the direction of Mrs. S. E. Smith, where, without the everlasting toil of "stitch! stitch! stitch!" on "band, and gusset, and seam," the operator is placed before a neat and pretty machine, as a lady would be placed before a piano, and the work is completed in a brief space of time. These machines of Messrs. Hayden & Co. are worthy a special visit, and no one can more agreeably explain them than the lady who presides over this genteel place of industry and usefulness.

THE FLOUR PACKER.—Much has been said and much is expected from the new Flour Packer, invented by a gentleman in our city. It promises great things—a saving of the size of the bag, as well as space when stored or sent abroad, by its being packed so solid in the bags. We sincerely hope it will be found useful, for we glory in new and valuable inventions originating among Californians.

California Notes.

ABOUT GRASSHOPPERS AND LOCUSTS
In California and the World.

BY ALEXR. S. TAYLOR, OF MONTEREY.

[CONTINUED.]

The following extraordinary account of drowned Locusts, appears in the autobiography of James Silk Buckingham, who traveled extensively over the Holy Land and the countries of the Mediterranean Sea, and has the character of being a faithful and careful observer, and is well known by his lectures and works on the Holy Land, India and the United States:

Ship Impeded by Dead Locusts.—At length the wind shifted to the southeast, and then to the south, with a suffocating heat, this being the sirocco of the Levant; and blowing over the great Lybian and Numidian deserts, comes charged with hot and sulphurous vapors, causing a most disagreeable sensation of a stifling and oppressive kind. On the third day after the shift of the wind, and when we were well up abreast of Sicily, but nearer to the African shore, we were surprised one morning at seeing all the headmost vessels of the fleet arrested in their course by some object which impeded the progress of each ship as she came up with it, until the entire convoy formed an almost straight line.

On looking over the ship's side there was seen a thick mass of brown water, which it was difficult to sail through with all the canvas spread—it appearing to be between the consistency of oil and tar; or melted butter and honey. Buckets full of it were drawn upon deck for inspection; but all we could perceive was that it was some animal matter in a state of decay, and emitting a most disagreeable odor. Sending the buckets deeper and deeper, however, by attaching weights to their bottom, so as to bring up some of the lower strata, we perceived the legs, wings and half putrid bodies of brown locusts in a less advanced state of decomposition than the brown oily mass of the surface; and we concluded of course, that the whole mass was composed of the same material.

Desirous of ascertaining the extent of the space occupied by it, I went to the fore-top-mast cross-trees with a glass, and sweeping the horizon ahead and on each side of us, I perceived that it extended as far as the eye could reach to the east, north and south, which presented one solid and unbroken mass of smooth brown surface, while to the west the open sea presented the deep blue which distinguishes the waters of the Mediterranean. The conclusion was, that this vast flight of locusts, passing from Africa to Europe, had encountered a contrary wind in their passage, and had fallen exhausted into the sea, and were there gradually decaying in the state in which we found them. Such flights of locusts have from time to time been recorded in history, as marking the devastation everywhere caused by their numbers.

In the year 593 a famine was caused in Turkey and Persia, by their consumption of the fruits and grain of the fields. In 677 Syria and Mesopotamia were overron by them. In 852 immense swarms of them took their flight from the eastern regions into the west, flying with such a sound that they might be mistaken for birds; they destroyed all vegetables, not sparing either the bark of trees or the thatch of houses; and they devoured the corn so rapidly as to destroy on computation, one hundred and forty acres in a day. Their daily progress was about twelve miles; and their movements appear to have been *regulated by kings or leaders*, who flew first and settled on the spot which was to be visited the next day at the same hour by the whole legion, their movements always commencing at sunrise.

After traversing the continent of Europe they were driven at last into the Baltic Sea, where being thrown back on the shores, they caused a dreadful pestilence by their putrification. In 1271 all the cornfields around Milan were destroyed by locusts; in 1339 all those of Lombardy; and in 1541 such incredible hosts of them afflicted Wallachia and Moldavia, that they darkened the sun by their numbers, and ravaged all the fruits of the earth.

An old American settler who resided for ten years near the bay of San Francisco, informs us that in the summer of 1838, the sowings and gardens of the missions and ranchos thereaway, were nearly destroyed from the ravages of the Grasshopper. In July 1840, a friend of ours, living in Monterey, was personally cognizant of a field of eight or nine acres on the Salinas Plains, planted in corn, frijoles, etc., being completely consumed to the ground in a single day. The appearance of the field afterwards was as if it had been blackened and killed by heavy frost.

The following extract from a Texas paper will show, that these animals made their appearance in that State and ours at simultaneous periods:

Grasshoppers are beginning to be troublesome in this vicinity. We hear some of our farmers complaining a great deal of their depredations. Some of the wheat that has been lately sown is completely destroyed, and the fields will have to be replanted. A heavy norther would rid us of these insects.—[Dallas Gazette, Nov. 20, 1855.

MONTEREY, October 12, 1857.—The following curious account, from Gage's West Indies, on pages 368–69, will show the effects of a visitation of the Locusts in the parishes of Mixco and Pinola, and other parts of the uplands of Guatamala, in the year 1632. The title of this rare old book, the English editions of which are now scarce, is as follows: "A New Survey of the West Indies: being a journal of three thousand and three hundred miles within the main land of America, by Thomas Gage, the only Protestant that was ever known to have traveled those parts: setting forth his voyage from Spain to San Juan de Ulloa; and thence to Xalapa, Tlaxcalla, the city of Angels, and Mexico: with a description of that great city, as in former times and at present; likewise his journey thence through Guaxaca, Chiapa, Guatamala, Vera Paz, &c.: with his abode xii. years about Guatamala; his wonderful conversion and calling to his native country: with his return through Nicaragua and Costa Rico to Nicoya, Panama, Porto Bello, Cartagena and Havana, with an account of the Spanish navigation thither; their government, castles, ports, commodities, religion, Priests and Friers, negros, mulattos, Mestisos, Indians; and of their feasts and solemnities: with a Grammar, or some few rudiments of the Indian tongue called Ponconchi or Poncoman. The fourth edition, enlarged by the author, with an accurate map. London: printed by M. Clark, for J. Nicholson, at the King's Arms in Little Britain, and T. Newborough, at the Golden Ball in St. Paul's Church yard, 1699." The work is in small octavo of 477 pages. The map contains no part of either Lower or Upper California. The book is one of the most celebrated on American travels, and has gone through no less than four editions in English, the first of which was published in London in 1648; four editions in French, one in German and one in Dutch, all prior to 1700.—Vide Ternaux Cowpans, Biblio thique American ante 1700. Paris 1837. An edition seems also to have been published in Mexico, in Spanish, by A. Masse, about 1849:

"In the meantime I lived full five years (as parish priest)in the two towns of Mixco and Pinola; where I had more occasion to get wealth and money than any who lived there before me; for the first of my abiding there it pleased God to send one of the plagues of Egypt to that country, which was of Locusts, which I had never seen till then. They were after the manner of our Grasshoppers, but somewhat bigger, which did fly about in number so thick and infinite that they did truly cover the face of the sun, and hinder the shining forth of the beams of that bright planet. Where they lighted, either upon trees or standing corn, there nothing was expected but ruin, destruction, and barrenness; for the corn they devoured, the fruits of trees they ate and consumed, and hung so thick upon the branches that with their weight they tore them from the body. The highways were so covered with them that they startled the traveling mules with their fluttering about their head and feet: my eyes were often struck with their wings, as I rode along, and much ado I had to see my way; what with a montero, wherewith I was fain to cover my face, what with the flight of them which were still before my eyes. The farmers towards the south sea coast cried out, for that their Indigo, which was then in grass, was like to be eaten up; from the *Ingenios* of sugar, the like moan was made, that the young and tender sugar-canes would be destroyed: but, above all, grievous was the cry of the husbandmen of the valley where I lived, who feared that their corn would in one night be swallowed up by that devouring legion. The care of the Magistrate was, that the towns of Indians should all go out into the fields with trumpets, and what other instruments they had, to make a noise, and to affright them from those places which are most considerable and profitable to the commonwealth; and strange it was to see how the loud noise of the Indians, and sounding of the trumpets, defended some fields from the fear and danger of them. Where they lighted, in the mountains and highways, there they left behind them their young ones, which were found creeping upon the ground, ready to threaten such a second year's plague, if not prevented; wherefore all the towns were called, with spades, mattocks, and shovels, to dig long trenches and therein to bury all the young ones. Thus, with much trouble to the poor Indians, and their great pains (yet after much hurt and loss in many places), was that flying pestilence chased away out of the country to the south sea, where it was thought to be consumed by the ocean, and to have found a grave in the waters, whilst the young ones found it in the land. Yet they were not all so buried, but that shortly some appeared, which being not so many in number as before, were, with the former diligence, soon overcome. But whilst all this fear was, these outcries were made by the country, and this diligence performed by the Indians, the priests got well by it; for, everywhere, processions were made, and masses sung, for the averting of that plague. In Mixco, most of the idols were carried to the field, especially the pictures of Our Lady, and that of St. Nicholas Tolentine, in whose name the church of Rome doth use to bless little bread and wafers, with the Saint stamped upon them; which they think are able to defend them from agues, plague, pestilence, contagion, or any other great and imminent danger. The next year, following, all that country was generally infected with a kind of contagious sickness, almost as infectious as the Plague, which they call Tabardillo, and was a fever in the very inward parts and bowels, which scarce continued to the seventh day, but commonly took them away from the world to a grave, the third or fifth day. The filthy smell and stench which came from those who lay sick of this disease, was enough to infect the rest of the house, and all who came to see them; it rotted their very mouths and tongues, and made them as black as a coal before they died. Very few Spaniards were infected with this contagion, but the Indians, generally, were taken with it. It was reported to have come from Mexico (the city) and to have spread from town to town, till it came to Guatamala, and went on forwards, and so likewise did the Locusts the year before, marching as it were from Mexico all over the country. In Mixco, I buried ninety, old and young, and in Pinola above an hundred, which brought unto me, in less than half a year, an hundred pounds (English) for almost two hundred that died.

"The judgments ceased not there, in that country, in my time, but after this contagion there was such an inundation of rain that the husbandmen feared again the loss of all their corn; at noontime the dark clouds, for a month together, pouring down such stormy showers, as swept away much corn, and many poor cottages of Indians; besides the rain, the fiery thunderbolts threatened a doleful judgment to the country, and killing a friar besides other people. The summer following (i. e. the year 1633) there was more than ordinary earthquakes about Guatamala which did not much more hurt than shake down some mud walls, but in the kingdom of Peru they were so great that a whole city, called Truxillo, was swallowed up by the earth, which opened itself, and almost all the people were lost whilst they were at church."

It seems, therefore, that Grasshoppers and Locusts are as old in Central America as earthquakes and volcanoes. At any rate, the damage the Locusts committed in Guatamala and Honduras in 1855 and 1856, seems to have exceeded in amount anything Gage has written.

Clavijero, in his history of Mexico (Cullen's English Translation, 3 vols., Philadelphia, 1804), says of the *Locusta* of Mexico, that no animal or insect in that country "can compare in numbers or ravages with the *Locusts*, which sometimes darkening the air, like thick clouds, lay waste all the vegetation of the country, as I have myself witnessed in the year 1738 or 1739, upon the coasts of Xicayan, in Oaxuaca. From this cause, *a great famine* was lately occasioned in the province of Yucaytan; but no country in America has been visited by this dreadful scourge so often as the wretched California, as related by Father Michael del Barco, who lived thirty years in that country as one of the Missionaries of our Society." This is the account published in the FARMER of January 22, taken from Clavijero's California, and which the author refers to in his Mexican history.

The Grasshopper, Locust, or Langosta, is called, by the Indians of the Valley of Mexico, *Chapulis*, and which designation is the popular name among Mexicans and Californians, to this day. The insect is well known in the Aztec History of Mexico, and gave name to the Hill of Chapultepec, famous in the chronicles of the race of Montezuma, and afterwards in the Acts of Hernan Cortes, and the Spanish Conquest. Chapultepec was the site of the famous gardens of Montezuma, some of the immense cypress trees of which are still standing. The buildings erected on this celebrated ridge of hills, by the Aztecs, were afterwards taken by the Spaniards, and make a strong fortification, and figure greatly in all accounts of Mexico. Under the Republic it was turned into a National Military School, and the Hill of Chapultepec was the scene of one of the hardest-fought battles between the army of the United States and the forces of Mexico.

The celebrated Egyptologist, Lepsius, who was sent by the government of Prussia to Egypt, in 1843, to investigate the geography and monuments of that ancient land, thus describes a flight of Locusts in March of that year, in the district around Sagara: "I had descended into a mummy pit with Abeken, that we might open some sarcophagi we had discovered, and I was not a little astonished, on stepping out, to find myself in an actual snowstorm of Locusts, which almost darkening the sky, moved above our heads in hundreds of thousands from the desert in the southwest, towards the valley. I fancied it was a single flight, and in haste called the others out of the tombs, that they might witness the Egyptian wonder before it had passed away. But the flight continued; indeed, the workman said it had begun an hour previously. We now observed, for the last time, that the whole country, far and wide, was covered with Locusts. I sent a servant out into the desert to find out the breadth of the flight. He ran for a quarter of an hour, then returned, saying, that as far as he could see he could discover no termination. I rode home in the storm of Locusts. They fell down in heaps on the border of the fruitful plain, and so it continued until the sixth day after my observing them, and even longer, but in less numerous flights. The day before yesterday a storm of rain seems for the first time to have beaten down the rear guard, and destroyed them in the desert. The Arabs rattle and scream all day, and make great smoking fires in their fields to protect their crops from the invasion. But it will avail them little.

"These millions of graminivorous winged insects cover even the adjacent sandy plain like a new living vegetation, to such a degree, that scarcely anything is to be seen of the ground; and, when they swarm up from any point, they fall down again on whatever is in the immediate neighborhood; exhausted by their long journey, in their eagerness they fill their hollow stomachs, and, as if conscious of their enormous number, they appear to have lost even all fear of their natural enemies—man, animals, smoke, and noise. But what is most wonderful to me is their origin from the naked desert, and the instinct which has led them from some oasis across the inhospitable sandy sea to the rich pastures of the Nile valley. The last time that this Land plague of Egypt exhibited itself to a similar extent was above fourteen years ago. The people say that it is sent by the comet, which we have observed in the southwest for the last twelve days, and which now, in the hours of evening, since it is no longer outshone by the moon, again stretches its magnificent tail of fire across the Heavens."—Vide Lepsius' Travels in Egypt, Ethiopia, Arabia, etc., 1843–45, page 68.—Bohn's London Edition, 1853.

[TO BE CONTINUED.]

SALE OF REAL ESTATE IN KONA, HAWAII.—We learn that S. H. Atkins, Esq., recently of Victoria, N. S. W., has purchased that fine tract of land at Knawaloa, in the district of Kona, belonging to the Chiefess Keohokalole. It is said to be the finest spot in the district for farming and grazing purposes, and has been obtained on very favorable terms. Mr. Atkins has the reputation of being a thorough practical agriculturist, and we congratulate the residents of Kona upon their acquisition of a good neighbor and co-worker in developing the agricultural resources of their side of Hawaii. We understand that Mr. A. intends introducing upon his place, some superior breeds of cattle and other stock, from his late residence in Australia. [Pacific Com. Adv.

STATE LIBRARIAN.—Bruce Husband, of Amador county, has been appointed by the Secretary of State, the State Librarian.

Agriculture at the Sandwich Islands.

HAVING received from the late President of the Royal Hawaiian Agricultural Society his Annual Address, we take great pleasure in presenting a portion of it, which we know will be of interest. By this Report our citizens can see what honorable mention is made of the Agriculture of California, by the President and orator, J. B. F. Marshall, Esq.:

I know, therefore, of no subject of deeper interest to us, or more appropriate to this occasion, than "the present position and prospects of the Hawaiian Islands." On this theme I venture to submit a few thoughts for your consideration; although of little value in themselves, yet if their expression has the effect of calling your attention more fully to the subject, some good result will be attained.

What are *now*, and what are *to be*, our chief sources of national prosperity? What means of developing our resources are within our reach, and are we availing ourselves to the utmost of those means?

These are questions of deep significance to all who have the welfare of Hawaii *nui* at heart. Can we answer them satisfactorily?

Let us look back to the period of the formation of the Society, and review the history of the past seven years. Have the bright hopes and prospects which animated its founders, been realized? From the circular which first called together this Association, I quote the following:

"For years past, the agricultural interests of these Islands have been insignificant, and their pursuit unprofitable. With an uncertain and distant market, with little or no encouragement or facilities given to foreign tillers of the soil, without proper knowledge of that soil, or sufficient capital to experiment upon its capabilities, most of the agricultural enterprises here have languished or utterly failed, and with the exception of a few sugar and coffee plantations, the proprietors of which have invested too much capital to be able to abandon them without heavy loss, and which were still struggling on with doubtful prospects, the whole amount of agricultural operations at these Islands, consisted in the raising of fruit and vegetables for the fleet of whaleships that semi-annually touched here for supplies.

"Within the last two years, however, a great and sudden change has taken place in the prospects of this group. The extension of the territory and government of the United States to the borders of the Pacific, the wonderful discoveries in California, and the consquent almost instantaneous creation of a mighty State on 'the western front of the American Union,' has, as it were, with the wand of a magician, drawn this little group into the very focus of civilization and prosperity. We find ourselves suddenly surrounded by intelligent, enterprising neighbors, who call loudly to us to furnish of our abundance, and receive in exchange of theirs. Our coffee and sugar no longer remain piled in our warehouses. Our fruits and vegetables no longer decay on the spot where they were grown. We are not even compelled to seek for them a market, but clamorous purchasers come to our very doors and carry off our supplies with an eagerness that has caused us to feel a scarcity ourselves; and we are assured that not only for all these, but for any other products of the soil that we will raise, a ready and increasing demand may be relied on from our enterprising neighbors."

Such were the brilliant hopes and prospects which animated us seven years ago. Does our history for those seven years show their realization? Has our progress during that period been commensurate with our expectations? Have we made *any* progress? We cannot shut our eyes to the facts. They tell us that while our exports of domestic produce in 1850 amounted to $380,000, the average value of the exports, for the six subsequent years, has been only $145,000, or but little more than *one-third* of that amount; that even the average value of the supplies furnished to whaling and other vessels, is not equal to that of 1850; that we have not exported, in any one year, so much of our great staples, sugar, molasses and coffee, as we did then; that our coffee plantations have not increased in number, and that several of our sugar estates have gone out of cultivation; that the raising of Irish potatoes for export, which at that time was so important and profitable a branch of industry, has entirely ceased, and that the "clamorous purchasers," who were then sometimes waiting for weeks with their vessels for cargoes, and almost fighting for priority, have become *producers*, and are now beginning *to undersell* us in our own market! Real estate has decreased in value; our aboriginal population has been decimated, and though the foreign element is increasing, it is at so slow a rate as to be scarcely perceptible; and we are still almost wholly dependent for our means of support on the uncertain business of furnishing supplies to the whaling fleet. Let that fleet omit one of its annual visits, and almost general bankruptcy would be the result.

Thus, with every variety of soil, with a climate unsurpassed, with a geographical position which would seem of itself a guarantee of prosperity, in a country where life and property are safer than almost anywhere else, and with an enlightened and liberal government, where the resident foreigner enjoys privileges unheard of elsewhere, we have been, as it were, at a stand, or dragging out a precarious existence on the uncertain bounty which the enterprise of distant lands brings to our inviting shores. While all around us are the indications of wide-spread and substantial prosperity. On the breath of every gale there comes to our ears the busy hum of industry and progress. During these seven years, our "enterprising neighbors," California and Oregon, have grown into mighty and prosperous States, and advanced with giant strides in wealth and population. Their history, though as it were the history of a day, is the wonder of the age. They are not only gold-producing, but they are beginning to take a high rank as *agricultural* States, and are already sending their produce to the four quarters of the globe. They have, as I have shown, taken out of our hands one profitable branch of industry, and not content with this, they are now threatening to give the *coup-de-grace* to our waning resources, by enticing from us the whaling fleet, which is now almost our sole dependence.

The picture is not an inviting one, we must confess, and yet it behooves us to look at it long and steadily. It will not avail us to close our eyes upon its repulsive features, if we would seek a remedy for the ills which they represent.

Let us consider what have been the chief obstacles to our progress, and if there are no means of surmounting them. Foremost among them is the absence of labor and capital. Labor and capital! these are the potent genii by whose aid mountains are leveled, and the howling wilderness transformed into smiling fields and fruitful vineyards. How can we successfully invoke their presence? Without them, we may almost fold our arms and passively await our destiny.

Let us examine the question of *labor*. We are often told by persons unacquainted with the character of our native population, that there can be no scarcity of labor with us at present; that until we have a much more extended cultivation than we now have, our native population is large enough to more than supply the demand. So perhaps it is; but if the natives have no desire to work, and do not feel the necessity of it, of what avail is its presence? From an able report on this subject, made to our Society in 1854, by his present Majesty, I quote the following remarks:

"It seems to be generally allowed that throughout these Islands labor is hard to procure, and that a good day's wages is by no means sure to command a good day's work. We are not here, however, in the position of many *newly settled* countries, where labor is scarce because the laborers are few, and where every available arm is exercised from Monday morning till Saturday night. It is on the fact of laboring power being allowed to lie dormant, of good muscle becoming flaccid from inaction; that we must briefly depend for an answer to the oft-repeated question, Why is labor so hard to procure? The Hawaiians are not naturally fond of labor; the natives of hot countries seldom are. They read in their Bible that labor was imposed as a curse upon fallen Adam, and, like other people, when the scriptures coincide with their prejudices, they believe in them devoutly. Then again, it is only as yesterday that *forced labor* was abolished, and the people are still taking breath, as it were; for to be coerced to do a thing, is to hate it. Then, again, there are those *kuleanas*, too, that have turned our peasantry into petty chiefs, and while supplying them with more than enough to satisfy their present needs, have not tended to enlarge the circle of their wants. It sounds paradoxical, but all our poorer people are rich, and the spur of necessity being removed, they are unluckily insensible to that other spur which a desire to reach some higher platform in society would create."

Having shown that we cannot hope for any extensive development of our agricultural resources, without the aid of foreign labor and capital, let us now inquire into our *present* condition, and whether we cannot do something of ourselves for its improvement. If we cannot keep pace with our more favored neighbors in progress and enterprise, can we not at least keep ourselves from *retrograding?* By availing ourselves of the means within our reach, can we not bring up the average of our productions to what they were seven years ago? We certainly can do this. The picture we have had presented to us of the general results of those seven years, is gloomy and disheartening at first sight, but has it no lighter shades to relieve its somber coloring? Can we not, by a closer scrutiny, discern some pleasing features from which to draw consolation for the past and hope for the future?

We may well rejoice that at least one new enterprise has been initiated for the increase of our national wealth, and to take from us "the reproach of barrenness." I refer to the introduction of the wheat culture. A nobler could not have been undertaken. All honor to the brave pioneers who, in spite of obstacles, have carried forward this most praiseworthy enterprise to success. Insignificant as this branch of industry may now appear, it is a germ of future national prosperity, and as such should be encouraged and fostered by every friend of Hawaii. When the cultivation of this noblest of cereals was first commenced on Maui, its failure was confidently predicted. A few enterprising individuals, however, persevered, and what is the result? It is now a profitable pursuit, and is extending to other islands. It is an employment suited to the native as well as the foreigner, and is leading the former to habits of industry. In the small district on Maui where it is now raised, from twelve to fifteen thousand dollars will be distributed in cash this season for its purchase. Flour of excellent quality is now manufactured at the Company's mill in this place. The original proprietors of this mill, from various causes, were compelled to follow the example of most pioneers—reaping the honors but not the rewards of their noble enterprise. Their successors who have entered into their labors, have thus far been highly prosperous, and it will probably not be long before the increased production of wheat will render importations of flour and bread unnecessary. *Here*, certainly, is ample cause for *congratulation* and *hope*.

An examination into the present state of the sugar interest, too, will show a most satisfactory and encouraging result. The few estates now under cultivation, are in able hands and in a most prosperous condition. Their productiveness is being stimulated to a greater extent than ever before, and the sugar crop of 1857 and '58 bids fair to be the largest ever produced at the Islands. The quality of the sugar, also, is much improved. Several new plantations have been commenced, within the past year, on the Island of Hawaii, by Chinese, and though on a small scale, yet with iron mills and greatly improved appliances over those generally used by this industrious class.

The cultivation of coffee has lately been increased to some extent, and it is generally considered a safe and lucrative business. It has received a check this year by the ravages of a new insect, which has nearly destroyed the present crop. It hoped however, and believed, that this difficulty will prove but temporary.

The species of native moss, called *pulu*, which grows abundantly on Hawaii, has been found to be a profitable article of export to California, and is now quoted in the San Francisco Prices Current as a regular marketable commodity.

The manufacture of oil from the kukui, or candle-nut, has been recommenced, and an article of superior quality is now produced. It is a cheap substitute for linseed, a very good lamp oil, and is used in the manufacture of soap, as well as for other purposes. Some method of refining this oil will doubtless be soon discovered, which will create a demand for it as an article of export.

The grazing interests appear to be in a flourishing condition. The export of hides and tallow has largely increased. Wool is becoming a prominent article of domestic produce, and the quality of our sheep has been much improved by the introduction of animals of superior breed. The business of packing beef is largely increasing. Also the production of fruits, and various other articles, to their advantage.

Miscellany.

YOUR OWN HEART'S HISTORY!

We who were friends, yet are not now,
We who must daily meet
With ready words and courteous bow,
Acquaintance of the street;
We must not scorn the holy past—
We must remember still
To honor feelings that outlast
The reason and the will.

I might reprove thy broken faith,
I might recall the time
When thou wert chartered mine till death,
Through every fate and clime;
When every letter was a vow,
And fancy was not free
To dream of ended love; and thou
Wouldst say the same of me.

No, no! 'tis not for us to trim
The balance of our wrongs;
Enough to leave remorse to him
To whom remorse belongs!
Let our dead friendship be to us
A desecrated name;
Unutterable—mysterious—
A sorrow and a shame.

A sorrow that two hearts, which grew
Encased in mutual bliss,
Should wander, callous strangers, through
So cold a world as this!
A shame that we, whose hearts had earned
In life an early heaven,
Should be like angels, self-returned
To death, when once forgiven!

Let us remain as living signs,
That they who run may read
Pain and disgrace in many lines,
As of a loss indeed!
That of our fellows any, who
The prize of love hath won,
May tremble at the thought to do
The thing that we have done!

Rest.

"If the mind is wearied by study, or the body worn with sickness, it is well to lie fallow for a while in the vacancy of sheer amusement—[Tupper.

"COME ye yourselves apart into a desert place and rest a while," said our Divine Teacher to the Twelve when they returned to Him, after their tour, preaching and performing miracles.

Human nature wearies and wearies in any work, however worthy, even if the call be urgent and the success cheering.

But in this "fast age," so full of business and bustle, who takes time for rest or retrospect? To be sure there are plenty of people, busy and inefficient, but of course they are always too much in the rear to get refreshing rest.

Riches or honors, popularity or position, learning or fashion, "hurry up" the masses. Others are in great haste to do a little good on a large scale, or perhaps great good on a small scale. Some seem to be in a hurry because the rest of the world are.

There are plenty of persons who live for amusement alone, and pursue it to the ruin of both body and spirit; who spurn rest, and to whom the shade of retirement is not *refreshing*, but *depressing*. Then we have a class who always work, whose *only* recreation is a change of occupation, whose *only* amusement is profitable employment.

"How to join advantage to amusement, to gather profit with pleasure," is an art to which few have attained. "Yet it is the wise man's necessary aim when he lieth in the shade of recreation." One great want of the age is amusements and exercises which do not dissipate and enervate, but which tend to divert the mind and develop the body. Amusements for all ages and classes, which will cultivate the social, the amiable, the graceful, the physical qualities of our nature. Amusements which for the time would overshadow all responsible cares and business perplexities, and also the prim proprieties of life in general, and let us laugh heartily as healthy children who play games on the village green. "A merry heart doeth good like medicine," said the wise man, and we of water-cure faith believe it better than that.

Those who make haste to be rich, not only "fall into many a worldly snare," but often into an early grave. Apoplexy, paralysis, and more obscure diseases of the brain and nervous system, are selecting their victims from among our most successful business men. Many within the circle of our acquaintances are receiving slight warnings of the approach of a final failure of health, in the way of numbness of the limbs, disagreeable sensations in the top of the head, throbbing and ringing in the ears, dark spots before the eyes, dimness of vision, sleeplessness, etc. Those who take warning at these monitions, and "turn aside into a desert place and rest awhile," and thereafter, when they return again to the busy world, work more prudently, may last to labor many a year. But few listen to these warnings, for along with them comes a restless haste, a nervous solicitude, which impels them on faster than ever before.

An illustration of this type we know amid our friends. He began his business life with only twenty-five dollars, and is now a millionaire. Though now surrounded with all the elegancies of life, and blessed with children, and children's children, still the same imperative business haste hurries him on, so that he has no time to enjoy the good things he has gathered about him, or rather, he has no relish for anything but work. So he hurries on, till quite exhausted in body and brain, and then he will sit quietly in the corner by the open grate, seldom speaking, and then in a low tone, eating very little and sleeping much. In this state he will remain for three or four weeks, and then suddenly, as he says, he "feels the electrical fire return to him again," and then he is up and off again at three o'clock in the morning, driving his business hard as ever, riding fast, talking loud, and sleeping but little, till again worn out, when this state of quietness again returns, and effects a recuperation, and then again to business life.

One day a friend said to him, "Mr. G——, why do you not now rest and enjoy your riches?" "*Rest*, REST," said he, "I hate rest, and wish I did not have to take time to eat and sleep." "Why," responded the friend, "don't you expect to rest in heaven?" "No," he replied, "if that were a place of rest I should not want to go there. To me the great beauty of that country is, that there we can work all the time without eating or sleeping." He is much respected by those who know him best, and it is said this imperative haste has come upon him within the last few years, as the result of an overwrought brain.

There are many morbid symptoms which are often supposed to call for active measures, when it is passive ones the patient needs.

A clergyman, a friend of ours, had been subject to severe attacks of what was then thought to be bilous cholic, and had been treated according to the allopathic mode for that disease, to the great injury of his sensitive organization. These attacks have since been proved to be of a purely neuralgic type, induced by brain exhaustion, coming on after close mental labor, as when he has written a sermon which has called forth much thought or feeling. A lady of my acquaintance, whose position requires much anxious thought and responsible care, was subject to severe and sudden attacks of pain in the stomach, and through the section of the back opposite. For hours a groaning agony would rest upon her. The suffering she described as more intense than anything she ever experienced before. For a time they were supposed to arise from indigestion, and *more* and *more* care as to diet was exercised, and *less* and *less* food was taken, but still the attacks grew more frequent and more severe. Becoming certain that they were not induced by undigested food, other habits of life were watched, and the discovery was soon made, that they came on after any close and continued mental activity, especially when, from anxious care, her usual meals had been omitted, and that the less she ate the more frequent and severe the attacks.

Her usual responsibilities were then resigned, a journey taken, which restored her appetite so that she ate freely, slept abundantly, and exercised a great deal in the open air, and had no return of those terrible attacks since, though a year has now elapsed. On her return to her home labors, she found that, whenever her brainwork was so increased that her appetite diminished, the symptoms of a return of the dreaded guest would re-appear. But these warnings have been promptly heeded, and more bodily exercise, more brain-rest, and more food, have prevented their return.

In this case the nervous force seems to have been so expended that there was a temporary failure in the action of the ganglionic system of nerves distributed to the stomach, and hence this indescribable agony in that region.

Here let me add, for the benefit of inquiring friends, that we, *too*, have had *our* rest, not by "turning aside into a desert place" exactly, but by closing our doors to invalids, and opening our hearts to our children and our friends in health, we are happy to state that we are neither "broken down" nor "used up," as madam Rumor has whispered, but merely stopped to rest *before* we were. We have visited various water-cures, gathering items for the improvement of our own. And now, having had this refreshing rest, and having enlarged and refitted our establishment, we have a bright face, and a "clean apron on all round," and are ready again to see our invalid friends.—[R. B. Gleason in Water-cure Journal.

THOMPSON'S SUSCOL NURSERIES.

Situated on the Napa River, at Suscol Ferry, NAPA COUNTY.

THE undersigned wishes to call the attention of the public and patrons of these well-known Nurseries to the present extensive stock of

FRUIT AND SHADE TREES,

GRAPE-VINES, etc;

Also a choice lot of *GARDEN and GREENHOUSE PLANTS, ROSES, SHRUBS, &c.*,

Comprising all of the Very Best Varieties of Cultivated Fruits, such as

APPLE, PEAR, PEACH, PLUM, NECTARINE, APRICOT, CHERRY, ALMOND, QUINCE, and FIG TREES, GOOSEBERRY, CURRANT, and RASPBERRY BUSHES, &c.,

Together with a large lot of

Nut-Bearing and Shade Trees,

Consisting in part of Black Walnut, English Walnut (or Madeira Nut), Shell-bark Hickory, Elm, Weeping Willow, Locust, Sugar and Silver Maples, &c.

Grape-vines of all the Best Foreign and Native Varieties.

The Fruit Trees offered for sale are all budded and grafted from the best, most approved and popular varieties now cultivated in the United States and Europe: all of which are growing, and a large majority of which have fruited in our own orchards and vineyards, under our own immediate inspection.

Our trees are of one and two year's growth from Bud and Graft, thrifty and of large size; all of which have been grown *without irrigation*.

We would call particular attention to our large stock of Apple Trees, which for vigor of growth and beauty of form, cannot be excelled in the State.

Our stock of Garden and Greenhouse Plants, Roses, Shrubs, &c., comprise all the leading varieties most desirable for beautifying private gardens and residences.

CATALOGUES containing a full list of all the varieties, with a brief description of each, together with their time of ripening *in this State*, will be forwarded either by mail or express, to all who are desirous of purchasing trees.

Orders from a distance will be promptly attended to, and carefully packed for shipment.

Our prices will be as low as *reliable Trees, Vines, &c.*, of like quality, can be bought for in any Nursery in the State.

Our terms are CASH on delivery of the trees at the Nursery or *approved* notes for a short time, bearing interest. Parties desiring to purchase can apply either in person or by mail, or by Wells, Fargo & Co's Express, to

S. THOMPSON, at the Nurseries.

Or to S. PERKINS & Co., corner of Second and M streets, Sacramento; DERBY & BALDWIN, Petaluma; GOODMAN & Co., Napa City,—*Agents who will show samples and receive orders.*

☞ The above-named gentleman are our sole agents, in whom the public can place implicit confidence, and all who may favor them with their patronage can be assured that they are not getting Trees from *Auction Houses* and *Peddler's Wagons*. 21-3m

Cranberry Plants.

THE BELL OR EGG SHAPED VARIETY

IS the kind best adapted for cultivation on damp, loamy soil, also on wet bogs or poor land, where nothing else will grow. When cultivated, after two years, they often bear from

200 to 300 Bushels per Acre.

Price 50 cents per 100, or $4 per 1000 for Bearing Plants.

New Rochelle (or Lawton) *Blackberry Plants*, of the genuine variety, at reduced prices:

$2 per dozen.....$12 per hundred.....$50 per 500.

Brinckle's Orange Raspberry,

$8 per hundred.....$1 25 per dozen.

Fine Red Antwerp, Franconia, Knevatts Giant, and Fastolf Raspberries,

$4 per hundred.....62½ cents per dozen.

NEW HOP TREE.

(See cut and description in the FARMER.)

Price 50 to 75 cents each.

This Hop is much stronger than the common one, for family use, and highly ornamental. Circulars relating to culture, sell, etc., can be found at the office of the FARMER, or by letter to the subscriber, by inclosing a stamp.

Orders will be received for the above plants, at the office of the FARMER, or by mail to my address, by inclosing the amount. I would also suggest, in addition, the amount of freight to be prepaid here, to secure their safe and speedy transmission.

For sale by F. TROWBRIDGE,
NEW HAVEN, CONN.

Dealer in every variety of TREES, PLANTS, VINES, etc. GARDEN, FIELD and FLOWER SEEDS by the 100 papers. v8-24 2mis

Landscape Gardener.

THE undersigned offers his services as a Landscape Gardener. Designs made for Parks, Lawns, Carriage Drives, and fine Garden Plats, in the latest style of Gardening, for city or country.

The advertiser is permitted to refer to Editors of Farmer where letters can be left for him by those that wish his services. [5] J. TAYLOR.

HORTICULTURAL.

SANTA CLARA NURSERY.

Half a Mile West of Santa Clara, on the San Francisco Road.

The Proprietor of this extensive and well-known Nursery, informs the public that he has for sale this winter, a large and very choice stock of the very best varieties of

FRUIT TREES, VINES AND PLANTS.

Consisting in part of

3,000 two year old Apples;
12,000 one year old Apples;
2,500 one year old Pear, on Pear stock;
2,500 one and two year old Cherry.

Besides a large stock of

PEACH, PLUM, APRICOT AND NECTARINE TREES.

Also a lot of

Fig Trees, Raspberries, Currants, Gooseberries, and about 20,000 Grape Vines.

500 lbs. China Sugar-Cane Seed,
At $1 25 per Pound;

One pound and a-half being a great plenty to seed one acre of ground.

The Proprietor will sell his Trees, Bushes and Vines as low as any other responsible nursery in the country. His stock is taken wholly from trees which have borne fruit in California, and is therefore known and reliable.

☞ All orders will be promptly attended to. The expense of packing and freight will be charged to the purchaser. Terms cash.

L. A. GOULD, Proprietor.

Santa Clara, Nov. 24, 1857. v7-22 3m

COMMERCIAL NURSERY, SAN JOSE.

THE Proprietors of this old-established Nursery are now prepared to furnish to their friends and patrons the

Largest and Most Select Collection of

FRUIT, SHADE, AND ORNAMENTAL TREES, VINES, &c.,

ever offered in this State,

At Reduced Prices!

The FRUIT TREES offered by us are all grown and worked in the Nursery by us, from varieties obtained from the celebrated MOUNT HOPE NURSERIES, o Rochester, most of which we have fruited in our Orchards, and offer for sale only such varieties as we have found to be best adapted to this climate.

We have in Nursery:

25,000 APPLE TREES, of two years' growth, large size, thrifty, fine heads.
10,000 One year from graft.
1,000 Three years' growth, extra large, fine Trees, suitable for planting in yards and gardens, and such as cannot be obtained in any other Nursery in the State.
2,000 PEAR TREES on Pear stocks, one and two years' growth.
2,000 Pear, on Angiers' Quince, one year from bud.
3,000 CHERRY TREES, of twenty-five best varieties.
5,000 PEACH, of twenty varieties, one year from bud.
1,000 PLUM, of twenty best selected varieties.
APRICOTS, six varieties.
NECTARINE, SOFT-SHELLED ALMOND, &c. &c.
10,000 GRAPE VINES, Los Angeles, 1, 2 and 3 years' old.
3,000 Catawba, Isabella, Sweetwater, and foreign varieties.
GOOSEBERRY, STRAWBERRY, RASPBERRY, CURRANTS, &c., &c.

Catalogues can be obtained on application at the Nursery, by mail or otherwise.

All orders from a distance carefully attended to, securely packed and shipped to any part of the State, at the risk of the purchaser.

Our terms are cash, or short credit, on approved notes, on delivery of the Trees at the Nursery.

Explicit directions for marking and shipping should accompany each order, and when particular varieties are wanted, state whether and to what extent others may be substituted, in case the varieties cannot be furnished. Persons trusting to us to select varieties may rely upon being furnished with the leading sorts, and proper proportion for each season.

MR. DELABIGNE, 54 Clay street, San Francisco.
C. W. LECOUNT, 99 Davis street, San Francisco.
MR. JACQUIER, Sonora. MR. A. VIENRICH, Oroville.

The above named will have Trees to sell and will receive and forward orders to me. [24

STOCKTON-RANCH NURSERY.

Almaden Road, between San José and Santa Clara.

50,000 FRUIT TREES.

50,000 NURSERY TREES of the VERY CHOICEST Varieties, of the most important kinds of Fruit, raised under the personal care of the subscribers.

The Varieties consist of Apple, Pear, Plum, Cherry, Peach, Apricot, Nectarine, and all the needed kinds of fruit trees for the Orchard and Private Garden.

The undersigned having had the experience of years in England, and many years in the Nursery of Hovey & Co. of Massachusetts, need only say that they can warrant Trees to be what they are represented, and that they have taken pains to offer as choice a collection as can be be found in the State.

Purchasers are invited so visit the Nursery, as they may rest assured the quality of the Trees and the price will be sure to suit.

☞ C. W. LECOUNT, of San Francisco, is our only Agent. [23] B. S. FOX & CO.

☞ FOX & CO. have received from Messrs. HOVEY, of Boston,

100 Concord Grape-vines,

said to be the finest Grape in growth for making Wine;

Also, the far-famed REBECCA, the finest White Grape ever raised.

300 *PEABODY'S SEEDLING STRAWBERRY*, the greatest Strawberry of the day; all of which we offer on liberal terms. 2

HORTICULTURAL.

A. P. SMITH'S POMOLOGICAL GARDEN AND NURSERY,

On the American River, 2½ miles from the Steamboat Levee,

SACRAMENTO.

THE Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of THE VARIETIES—embracing as they do

All Kinds FRUIT TREES,
SHADE AND ORNAMENTAL TREES,
GREENHOUSE PLANTS,
SHRUBS, ROSES,

And also an unusually fine crop of

GENUINE GARDEN VEGETABLE SEEDS.

All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,

Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:

From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.

We call particular attention to our splendid stock of

CHERRY TREES,

THE FINEST AND LARGEST IN THE STATE,

embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from these. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase theirs, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most RELIABLE SOURCES IN THE EAST, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being

CORRECT AS TO NAMES AND VARIETIES,

are as PERFECT AS IS POSSIBLE TO MAKE THEM.

In the department of

Shade and Ornamental Trees,

We have a very fine stock of all the leading varieties, some very fine extra large trees of the

ELMS, LABURNUMS AND LOCUST,

particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.

A very extensive collection of all that is rare and desirable.

The Greenhouse Department is quite full, and our really superb stock of

CAMELLIAS

is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,

Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, WARRANTED PURE and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish GRATIS to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.

v8-18-6m A. P. SMITH.

20,000 APPLE TREES,

FOR SALE

AT REDUCED PRICES, AT THE

HOPE NURSERY.

THE Nursery is located second block northeast of the new Steam Flour Mill, on Seventh street, San Jose.

The stock consists of over seventy varieties, carefully selected. No pains or expense has been spared to obtain the best sorts, and to render these Trees what they are,

THE BEST APPLE TREES, OF THEIR AGE,

in California. D. T. ADAMS.

v8-23-3m

The Concord Grape.

THE ORIGINATOR OF THIS NEW GRAPE offers for sale a fine stock, raised from the parent Vine. It has fully sustained its reputation as

The Best Grape for Out-door Culture

having survived the last two severe winters unharmed, where the Isabella, Catawba, and other vines were killed to the ground.

For Size, Beauty, Quality and Bearing,

it is unsurpassed. It is perfectly hardy, and has never been affected by rot or mildew, while it ripens from three to four weeks earlier than the Isabella, and two weeks earlier than the Diana, in the garden of the proprietor.

Fine, strong plants, at $1 50 each; $12 per dozen. Two years old, at $2 each. Three years old, extra, at $3 each. A liberal discount to clubs and the trade. Orders, with cash or good reference, promptly attended to. Address

2 3m E. W. BULL, Concord, Mass.

Ornamental Shrubbery.

THE Greatest Variety in the State may be found at the

GOLDEN GATE NURSERY,

Corner of Fourth and Folsom streets,

COMPRISING

5,000 Monthly Roses, of 150 varieties;
2,000 Carnations, of 120 kinds;
500 Monthly Honeysuckles, of 8 varieties;
500 Acacias, of 10 varieties;
Laburnums, Arbor Vitæ, Myrtles, Euonymous, Silver Maples, Mimosa, Clematis, Cytisus, Eucalyptus, Lilacs, Jasmines, Mock Orange, Athæas, Spireas, Weigelias, Deutzias;
and a general variety of

Hardy and Green House Plants.

☞ Skillful Gardeners provided for laying out grounds. Office at the Nursery, and 171½ Clay street, above Montgomery v7-24

FARM STOCK, ETC.

French Merino Sheep.

HAVING been engaged in importing and breeding FRENCH MERINO SHEEP for several years past, I can now furnish RAMS and EWES, either imported, or raised by myself from imported stock, equal to any that can be found in this country or Europe.

I was awarded all the prizes on French Merino Sheep at our last State Fair; and all the premiums awarded to this class of Sheep at our last National Fair, and the most of those at the State Fairs of CALIFORNIA, Michigan, Indiana, Missouri, Wisconsin, and also at the Provincial Show of Upper Canada, for the present year, were awarded either to Sheep raised by myself, or to stock from Sheep raised by me, and sold to others.

CIRCULARS, giving a full description of my flock, sent by mail to all applicants. Information can also be obtained of the Editors of the CALIFORNIA FARMER.

Prices as low as the *same quality* can be purchased of any other person, and Sheep delivered in New York, free of charge. JOHN D. PATTERSON,

WESTFIELD, Chautauque County, NEW YORK.

PHELAN'S MODEL BILLIARD TABLES AND PATENT COMBINATION CUSHIONS,

ACKNOWLEDGED BY THE BEST

PROFESSIONAL AND AMATEUR PLAYERS

TO BE THE ONLY

CORRECT CUSHIONS NOW IN USE.

THESE TABLES AND CUSHIONS ARE NOW SOLD as low as the *"OLD FOGIE"* Tables of the day. And as a proof of their superior merit, it is only necessary to call attention to the

Miserable Imitations

got up in this city, made from *Pasteboard* and old *Horse Blankets*, and palmed off on the unsuspecting as

PHELAN'S PATENT.

One of these miserable Imposters has been caught in the act. His name, and the name of the gentleman he deceived, will be the subject of another communication.

☞ Parties sending their old rails to the subscriber (who is now making these Cushions under Phelan's Patent), can have them covered with sets of the genuine article, and returned in twenty-four hours afterwards.

Just received, some splendid Model Tables, Oak, Rosewood and Mahogany, with Slate and Marble Beds. Also; Billiard Trimmings of every description.

Address M. E. HUGHES, SOLE AGENT,
180 Jackson street, San Francisco.

N. B. Phelan's "Game of Billiards," a work especially illustrative of the science of this Game (as "Hoyle" is to other Games), is for sale at the FARMER office. 9v-4 tf

Pioneer Establishment.

FOR curing of FISH of all kinds; also for the curing of prime HAMS AND BACON. Always on hand, the best article of Smoked and Pickled Salmon and Herrings, warranted of superior quality, in packages to suit.

The Subscriber is now engaged in Pork Packing, and is desirous of extending the business; for that purpose he will purchase well-fatted Hogs in any quantity.

The Smoking of Beef is also a branch attended to at this establisement.

☞ On hand and for sale—one hundred tons of SALT—Liverpool, St. Quentin, Carobine Island and China Salt, of superior quality. GEO. COOPER,

Front street, opposite Water Works Building,
v8-15 Sacramento.

Colored Plates of California Fruit.

THE beautiful Fruit Pieces which were so finely prepared, of the FRUIT of California at the State Fair in 1855, are on sale at the Farmer Office. Every person who wishes a beautiful Fruit Piece should have a copy.

The California Farmer.

SAN FRANCISCO, FRIDAY, FEBRUARY 19, 1858.

Morus Multicaulis vs. Flour and Grain.

Who does not remember the mulberry fever, and did not learn it to their cost. There were those who stood firm, and resisted the tempting bate of the speculator; who knew, or felt assured they knew, its fate; for it was so preposterous, prudent men saw the folly of those who were pretending to raise the food for silk worms, when there were comparatively no silk worms to be fed.

At the time the mulberry fever was raging, there were trees enough raised to have supplied *a thousand large silk manufactories*; yet there were no factories to demand them, and consequently the speculation failed.

And so with the present speculation. There is more food than are mouths to eat it, and all will see the result. The mulbery fell to nothing, for there was nothing to eat it; and flour will fall to its legitimate value, just in proportion to the quantity wanted, and that is twenty-five per cent less than its nominal price this week. Such will be the result within ninety days, or perhaps sixty; and we now say to farmers, sell your grain, or wait and take less.

Any intelligent reader can see that while good western flour is quoted at $4 50 in New York, it is also selling in England and France at $5 75 to $7, and fancy brands at proportionate prices.

Look at the crops in Chile, see reports from Australia, and read of the importations into Rio. At the present moment, the price of Gallego and Haxall even would make a splendid shipment from thence to this market; and we should not be surprised to see a cargo of Gallego and Haxall arrive in San Francisco, direct from Rio. It would be a grand speculation to bring flour from thence to this market.

We say, without fear of contradiction, that it is impossible to maintain the price of flour at its present rates. It is injurious to the farmer, to the miller, to the merchant, and to our whole State; for the tendency is and will be to bring foreign flour and grain into our State, and this consumes and carries away the capital we want at home; and those parties who have been instrumental in bringing about this false and baseless value to our great staple, deserve the severest condemnation; and we think they will receive and feel a small portion of the penalty from the sentence which the *true* market reports will give very shortly.

The whole country is liberally supplied now, and in many places in the interior flour can be purchased for less than in this city, if reports are true that come to us daily, and we have no reason to doubt them. The finale is near. "Rats desert a sinking ship."

The Next State Fair.

The Marysville Express announces that the next State Fair will be opened at that city on the 23d August, to continue one week. There can be no doubt that a wide interest will be manifested in all the upper counties for this Fair, and there is not a county in the State that should not be alive to this all-important aid to the progress of Agriculture. The President and his co-laborers are men of great energy, and it will not be their fault if there is not a successful Fair.

To Our Readers and Correspondents. We crave pardon of those who don't love Locusts and Grasshoppers, for the space we are obliged to occupy with this important history, just now. One or two numbers more will finish it, when we shall issue it in book form. It will form one of the most important works of the kind ever published. After that, we shall have space for all our correspondents.

We have copy from many of our correspondents, which shall all be published speedily. The continuation of the manuscript from our valued correspondent "Sallie;" "Old Maids," same author; "Hope, and the Death Angel," a gem from our new correspondent from the sunny South, "Rena," will appear next week. An appeal to the citizens of California upon the subject of a new steamer line, from our New York correspondent B, next week. "Lines to King Frost," from A. J. W., New York, received and accepted. The letter complimentary to "Agricola," from T. C., will appear next issue.

The Farmer of this week will be found to be composed of nearly all original articles, each and all worthy perusal.

We would especially call attention to our advertising columns.

Our Agent at San Jose.—Messrs. Loewy & Bro., Booksellers, at San José, are our Agents for the Farmer. They will always be supplied with copies for the steamer, and at all times; and we invite all persons in that vicinity to call at their bookstore and examine the new volume of the Farmer—the ninth volume. Will those of our Patrons to whom we have sent bills, and all whose time has expired, call and settle and renew, and thus aid us in the work. All letters from our friends, all correspondence, and all orders for our new importations can come through Messrs. L. Bro. We cheerfully recommend all to call on our agents; they have a fine stock of the useful, beautiful and ornamental in their line, to which we call especial attention.

Chinese Sugar-cane of Perpetual Growth. We examined some specimens of the Chinese Sugar-cane, a few days since, growing in the garden of the Brothers Phillips, on Silver street, near Rincon Point, which was planted late last season, and produced seed. The stalk at the roots was fresh and healthy, and is now shooting up boldly, thus clearly indicating that it will survive a second year in sheltered places. We hope growers will give us accounts from the various parts of the State.

Agricultural Colleges.

We most earnestly call the attention of every friend of the cause of Agriculture to the letter in our columns which we received the last mail.

We trust our Legislature, now in session, will take action upon it. We hope, too, our State Society, and every County Society in our State, and all the friends everywhere, will examine this question and be prepared to use their influence in securing such a grant of land as California deserves, and desires, and let us have a State College of the highest character.

We ask, in all earnestness, shall California, the very richest agricultural State in the Union, remain silent when such important subjects are agitated?

Now is the time to act. Now is the time to memorialize. During the last session of our Legislature, measures were taken, and action was had in the Assembly. We trust *those* measures will be revived, and let it not be said that California was *silent*, when other States were active. Most sincerely do we thank our kind friend, Professor Williams, for his letter. His wishes shall be observed; and we wish our voice could reach every friend of this noble cause, and awake him to action. The great success of the Colleges named, would be but a tithe of one established here, and we now speak, and speak with hope:

Agricultural College of State of Michigan, Lansing, January 6, 1858.

Publishers of the California Farmer:

Gentlemen: You doubtless have perceived that the bill of Mr. Morrill, designed to appropriate lands to the several States for the purpose of establishing Agricultural Colleges, has been referred in Congress to the Committee on Public Lands. Various memorials on the same subject have been presented. Mr. Morrill's bill may not be the best; it may be deemed advisable by the committee so to modify the bill as to make area as well as population the basis of distribution. Mr. M.'s bill embraces guarantees that a State accepting the trust shall keep the fund entire and sacred; it allows the interest of the fund only to be used, and it forbids the use of the fund in the erection of buildings. Where States have no public lands within their limits, it allows scrip to be issued for the quantity due such State; provided, however, that no State, as a State, can locate of lands within the boundaries of another, but individual purchasers of scrip can locate anywhere. Perhaps any bill ought also to prohibit the sale of scrip by any State at less than one dollar per acre.

There seems to have been a simultaneous attention aroused to the whole subject over the country. Ours, I believe, is the only Institution of the kind in actual operation. It opened on the 13th of April last. So far, it has been successful. We have now about one hundred students in attendance. The resources of the Institution were $96,000. Our farm consists of 676 acres.

The Agricultural College of New York it is designed to open next year. Their resources are about $80,000. They are erecting a building which will accommodate 350 students. One half the sum named was raised by subscription, and one-half was loaned by the State.

The Farmers' High School of Pennsylvania, they propose to open next year. They are erecting buildings which will accommodate 300 Students. The Institution feels that $100,000 is secured; one half from private subscription, and the other half from the State. Their Farm consists of 400 acres; 200 acres of it is a donation from Guil Irwin, at Bellefonte, and 200 in possession, under a conditional sale.

In Maryland, private individuals have subscribed $50,000, and the State is pledged to pay $6000 per annum.

In South Carolina a plan is on foot to create a College, by one thousand subscriptions of $100 each.

In Virginia, the public spirited citizens have founded a Professorship at Charlottesville, and purchased an Experimental Farm near Petersburg.

In Iowa, Wisconsin and Ohio, bills have been introduced into their respective Legislatures, to establish State Agricultural Societies, but have failed.

Agricultural Professorships have been established in many of the old Colleges of the country.

In times past, Michigan, Illinois, and two or three other States, have asked an appropriation by Congress of public lands for the purpose in question, and so has the United States Agricultural Society.

These are some of the evidences that general necessity has aroused the public mind to the propriety of such a grant. The donation of lands for purposes of Education, has become the recognized policy of the Government. It appears from a Report of the Secretary of the Interior, in 1854, that more than 4,000,000 of acres had been granted to Universities and higher Seminaries of Learning. If it is legitimate to grant lands for the promotion of Classical and Professional Education, it surely is to do so for the promotion of Education bearing directly on the Industrial and Agricultural pursuits of the people. It appears also that nearly 50,000,000 acres had been granted for Public Schools. No demand that the States would now make would exceed one per cent of our great public domain. Even Ex-President Pierce's veto of the Indigent Insane Bill in 1854, concedes, that grants of lands for purposes of Education, are constitutional. The friends of the measure in hand believe that it only needs concert and prompt action, to secure the passage of a bill this very session.

Will you in the next number of your periodical, arouse public attention to it, in an earnest article, and send a number to each of the gentlemen composing the Committees on Public Lands and Agriculture in both the House and Senate at Washington?

Will you bring all the personal influence you can, to bear on individual members of your delegation in Congress?

I should be pleased to hear from you, in reponse, and also to receive an extra copy, marked, if you contribute your aid in the matter.

I remain yours,

J. R. Williams,
President of Michigan State Agricultural College.
Per Walter Chester.

The Real Question.

The following very just *exposé* of the condition resulting from the *credit system*, we find in our English journals, as quoted below. England speaks as a creditor of the American people, and as she speaks to them, so could the Eastern States speak of California; although we do believe that California has most nobly redeemed herself and her credit by great promptitude and integrity through years of trial. However well she has done, there can be no question but that a *vast difference* is made in the East between gold and credit. It matters not how good the debtor may be, or how high his name may stand, all shrewd merchants know that *Cash makes the best purchases*, and California has had to pay dear for all the credit she has asked at the East.

We sincerely hope that all who are looking for banks, paper currency, or places of deposit, or any currency other than *gold* for our own beloved State (unless it is Mint Certificates of Uncle Sam), will carefully peruse this article from the English paper, and see how applicable it is. We hope every farmer and mechanic in the land will set his face like a flint against all kinds of money, except California gold. We go for "home manufacture," and a specie currency:

Our Losses and Gains by the Financial Crisis.—In America, as in England, the commercial crisis is rapidly passing away. The latest journals received from New York announce that the banks are universally resuming specie payments, and the general prospects of trade for the opening of the New Year unusually favorable. During the three months' collapse it seems that bullion has been collecting in vast quantities; that produce and manufactures are accumulating abundantly in readiness for foreign markets; that credit, purified by the storm, will become sound and healthy; and, above all, as the New York Herald remarks: "Within the past three or four months no man has embarked in a rash enterprise; no money has been locked up in new schemes of any kind; all undertakings of a speculative character, including many unprofitable manufactures, mines, and other enterprises, which were great consumers of wealth in good times, have been suspended, and the money that would have been appropriated to them has been saved."

It is satisfactory to find that our best customers are getting on their legs again, and will shortly be in a position to resume their commercial dealings with this country upon a scale almost, if not quite, as extensive as before. But it would, we must confess, add considerably to our gratification, if our American relations showed some symptoms of paying their debts to England. Business in New York, we are told, is in "process of liquidation;" but the process appears to stop short at the seaboard. In fact the amount of indebtedness to European creditors, accompanied by the assumption that their debts are never to be paid, is actually claimed as an addition to the national wealth—a sort of bonus which the sharp commercialists of America have won from the Britishers. "The bulk of the losses that have been occasioned by the revulsion," says the New York Herald, "will fall not on us, but upon the manufacturers of England and France and the capitalists of Europe. When our people fail it is the foreigners who suffer—we keep the goods, they lose the money."

For a commercial organ our contemporary "goes ahead" rather fast. His doctrine is rather fitted for Walker's filibustering gang than the sober *habitués* of Broadway and Wall street. To get commodities on credit, and then fail under circumstances which enable "our people" to keep the goods while strangers lose their money, is a very compendious way of increasing one's wealth. It may also, like any other species of roguery, be practised upon unsuspicious persons with eminent success. But the mine, if easily worked, is soon exhausted. The trick will not do twice—while the precautions which the sufferers are pretty sure to take against its repetition will prove expensive in the end even to its original inventors. Traders who give long credits have also long memories. An English merchant who has been taken in by an insolvent customer in New York will find means to cover his loss at the cost, if not of the defaulter himself, at all events of his brother dealers. The principle of insurance is now thoroughly understood, and incorporated in every branch of commerce. It is all a question of risks. Every trade transaction, beyond the primitive operation of selling and buying for ready money, involves a greater or less degree of risk. The shop-keeper who gives credit to a customer runs the risk of not getting his money. The merchant who ships goods to a foreign market runs a heavier risk, varying according to the character of the nation with whom he deals. In both cases the seller soon learns by experience what is the extent of his risk, and then charges such an extra amount of profit as will suffice by way of insurance to replace in the aggregate the losses he may sustain by particular transactions. A ship and a customer are insured upon precisely the same conditions. The owner of an ill-found vessel must pay higher terms to the underwriters. It is the same with an ill reputed market. In bragging of the gains secured to America by her keeping English consignments without paying her English debts, the Herald does but advertise the world, in most emphatic terms, that New York credit is "doubly hazardous."

Some years since, Lord Talbot was granted a divorce by the English House of Lords; his wife a modest and unassuming woman, having been charged with an amour with an illiterate groom. The principal witness against her was the family clergyman, the Rev. Mr. Sergeant, who swore that he caught her in the act of crime. This clergyman has just given himself up to the authorities, confessing that he had perjured himself by conspiracy, and that he had no reason to suspect the state of affairs which he had sworn to. He is now almost insane from remorse. The prosecution of Lady Talbot made her a maniac, and she died without recovering her reason. Lord Talbot married a woman who proved herself all he had charged his first wife with, and soon deserted him. He died horribly, in the midst of his beastly orgies, with a company of degraded women. Thus vengeance has overtaken all the parties to this diabolical conspiracy.

What would be the result of an investigation into all the causes which have wrecked so many householders in California. Let those who instigate this separation of man and wife, read the above, and reflect upon the consequences that follow.

Why are good resolutions like fainting ladies? They want carrying out.

Beautiful Flowers.

Foster the good, and thou shalt tend the flower,
Already sown on earth;—
Foster the beautiful, and every hour,
Thou call'st new flowers to birth.

Who does not love flowers? One would think that everybody in our city was running mad for gold; and we truly believe this inordinate desire for wealth is the great, first cause of all the suicides, murders, and divorces that blast the hopes of so many of our young men, and destroy the prospects and homes of many who, were it not for this terrible lust for wealth, would be an ornament to society. Why not cease this passion for wealth? Let those who feel this mania of gold enter into their very souls, leave the city and go to the beautiful gardens that environ it. Go to *Walker's Gardens*, and look upon the vast collections of the truly beautiful; and while there remember that of each of these, "Solomon, in all his glory, was not arrayed like one of these."

We pray our citizens will not prevent scenes so beautiful as are now presented at the gardens of Walker, and many other places, to pass away without a visit. It will remove from the mind sorrow and sadness, and recuperate the toil-worn body, and wearied mind.

Cultivate flowers! Go to S. W. Moore's, and see the rare collection of beautiful bulbous roots. Buy and cultivate them; and when this *mania d'oro* comes on, look at these germs of life, and as they push forth a bud and blossom, remember

"Flowers have tones—
God gave to each a language of its own."

And let this language drive from the heart all sorrow and care. Most earnestly do we commend the cultivation of flowers everywhere. Better be studying these emblems of the good and true, than planning self-destruction; and although one does not meditate suicide, it is suicidal to be idle, or loafing away precious moments, that could be better employed. Reader, go to Moore's and see those lilies that are more glorious than Solomon in his kingly robes; and go to Walker's and see them in all their glory, then ennui, sorrow, care, despondency, and despair will be driven from the mind and heart.

Books for the Million.—We do not believe there is a spot in the wide world where there is so much reading matter sold "per capita," as there is in California. It would astonish any one to see the amount in figures. Some idea of what is done can be learned by spending an hour or two at the Post Office, when the steamer mail comes in. We spent about three to four hours there on the arrival of the mail, the present week, and they were continually calling "Sullivan," "Noisy Carrier," "Loomis," "Hutchings," &c., and the amounts were enormous. We saw the entries of over 50,000 papers, magazines, etc., to Sullivan; and the amount to Noisy Carriers' was also large; but these are all light reading. There are others who furnish solid reading, the scientific in all its varied departments, and also for practical purposes.

The Messrs. McGlashin & Co. are now offering the largest stock of Books on every subject, at about New York prices; school books, historical, scientific and biographical, with account books, stationery, etc. We know his offer is true, having experience of the fact; it is a *real sale*, and prices about half the usual California prices. All who want books should visit him.

Washington's Birthday.—On Monday next the roar of artillery will proclaim the return of a day that will be famous in all time. The birthday of Washington should be kept in perpetual remembrance. Although we rejoice to know that in all our cities and our principal towns, it will be observed as a festive day, we hope ere long to see a desire in every great city to make that day one sacred to a higher purpose. We would that it might be made a day for mighty minds to congregate, and review the private life and public actions of the *Father of his country*, and by such a review, present to the minds of young men, and all political men, a standard of public action that shall tend to make our country what Washington desired it should be.

Musical Entertainments.—We are most happy to lay before our readers No. 1 of a series of Musical Entertainments, in the form of Addresses and Criticisms, from our able and highly esteemed correspondent, M. A. Sarles, Esq., of the Collegiate Institute of Benicia. These Entertainments will be continued, and we trust our patrons will extend the notice of this fact to those who love music, as it is our purpose to make our journal more and more worthy as a family paper. The name of the author is sufficient to insure to our readers a series of articles of a high character, worthy their especial notice.

Clearing Land Titles.—Gen. Sutter, it is said has proposed to enter into a bond with the settlers on land which he claims to the east and south of Feather river, to surrender all pretensions to title to the same, for the consideration of $150,000, to be paid to him by the present occupants of said lands, one half cash, and the balance secured by mortgage. The settlers interested have had several meetings, and are now engaged, with good prospects of success, in raising the money.

Three at a Birth.—Mr. Charles Spear, residing just beyond the Mission, says the Herald, has a fine American cow that gave him three handsome calves at one time, on Tuesday last. The mother and her progeny are doing as well as could be desired.

Extraordinary Equine Feat.—A celebrated horse, known as "Walter Gay," lately galloped twenty miles, leaping in the first seven miles twenty hurdles, within two minutes and a half of an hour. Question for solution: Who was the greater brute, the horse or his rider?

Lawton Blackberry.—A consignment of these valuable Plants were received by us by the last steamer, from Messrs. Seymour & Co. They came through in the most perfect order, and are for sale at our Office.

Burning of the Sarah Sands.—The steamer Sarah Sands, while conveying troops to India, took fire and burned for fifteen hours. All the after part of the ship was destroyed, and she put into Mauritius for repairs. The troops showed perfect discipline, and the preservation of all on board was extraordinary.

A letter from Captain Castle, commander of the Sarah Sands, is published, describing the partial destruction of the ship, and the escape of the troops and crew. The fire was discovered at 3:45 P. M. The flames burnt through the upper deck, and, at about 9 P. M., a fearful explosion took place in the port magazine. By this time, says Captain Castle, the ship was one body of flame from the stern to the main rigging; and thinking it scarcely possible to save her, I called Major Brett, in command of the troops, forward, and told him my opinion, requesting him to keep order among the troops until the last, but at the same time to use every exertion to check the fire. No person can describe the manner in which the men worked to keep the fire back. One party were below, keeping the bulkhead coal from burning, several of whom were dragged up senseless, when fresh volunteers took their places, but who soon, in turn again, had to be dragged up in the same state. At 11 P. M. the maintopsail yard took fire. Mr. Welsh, quartermaster, and four or five soldiers, went aft, with wet blankets, and succeeded in extinguishing the flames there, but not until the yard and mast were nearly burnt through. About midnight we appeared to have made some impression on the fire, and after that drove it back inch by inch until daylight, when it had been completely got under. The ship now appeared in a fearful plight, merely the shell remaining. The port quarter was blown out by the explosion, fifteen feet of water was in the hold, and the ship was rolling heavily and taking in large quantities of water aft.

The Sugar Crop of Louisiana.—It is stated in the New Orleans Crescent, that the sugar crop of Louisiana for 1857 will be from 225,000 to 250,000 hhds., against about 75,000 hhds. in 1856. Prices are, of course, much lower than last year; but, nevertheless, planters will realize about $2,000,000 more for the crop of this season than from that of 1856, while consumers will also gain largely.

The Best Paid.—A well known political economist says: "We pay best—first, those who destroy us, generals; second, those who cheat us, politicians and quacks; third, those who amuse us, singers and musicians; and least of all, those who instruct us, ministers, authors, schoolmasters and editors.

NOTICE TO NURSERYMEN.

☞ Parties who have ordered Nursery Stock from the Eastern States, to be forwarded by Express, should have made arrangements for the receipt of the same, or remitted charges, as all such freight must be prepaid without exception. Hitherto, a satisfactory guarantee from the shipper was considered sufficient—the charge to be paid at destination. Should any disappointment occur to our friends, this will be a sufficient explanation.

23 A. FROST & CO.

LAYING OUT GARDENS.

☞ Those who wish their Grounds Laid Out in the best style, and those who wish them remodeled, can have them done in the most scientific manner, by sending to our Office their orders; or they will be waited upon, and designs made and Gardens completed from the rough sod. We have those under eye on whom we can rely to complete any plan of work of public or private Ground however extensive, and furnish all the required article of Trees, Vines, Shrubs, Plants, or Seeds.

The American Rothschilds.

As much has been said and written upon the subject of the great American Banker, Peabody obtaining aid of the Bank of England for the enormous amount of "three millions of dollars;" yet we look upon it as one of the wisest acts of the Bank administration. The amount of acceptance bearing the name of Peabody, at the time this aid was rendered, was about six million pounds sterling, or "thirty millions of dollars."

We would ask, what would have been the result in the city of London, had that aid been *refused?* We wait an answer.

THANKS FOR FAVORS.—Freeman & Co. furnished us with steamer papers, at the earliest moment.

We are indebted to the Alta Express Company for liberal supplies of up-river papers daily.

The Noisy Carrier's has our thanks for favors this week.

J. H. Still furnished us with Boston papers.

We are also indebted to James McGinn for English and Irish papers, and for Forney's Philadelphia Press.

To each and all we tender our thanks.

Those kind friends that have sent us names to our list of subscribers will accept our most grateful acknowledgments.

GOLD DUST CLAIMED.—William Lush, who left a purse of gold containing over $4,000, some three years since, with Bull, Baker & Co., of Shasta, has recently made his appearance and claimed his deposit. Nothing having been heard from him in the interim, he was supposed to be dead. It appears that, considering his money safe, he had kept on mining at Cañon Creek, Trinity County, and not troubled himself to inquire further about it.

RARE SEEDS.

☞ We have just received from the East some of the choicest FLOWER and other rare SEEDS, ever received in California; among them a small invoice of Pure LAWTON BLACKBERRY—the only lot in the country, and warranted fresh and pure, crop of 1857.

The collection was made by Mr. J. Q. A. Warren, and brought out by him on last steamer.

Also, opening, a case of FOREST TREE SEEDS—the finest assortment ever imported.

Those desirous of finding choice Seeds will do well to call at once at our office, 130 Washington st (up stairs).

☞ **Wigs! Wigs!! Wigs!!!** — BATCHELOR'S WIGS AND TOUPEES surpass all. They are elegant, light, easy and durable.

Fitting to a charm—No turning up behind—No shrinking off the Head. Indeed this is the only establishment where these articles are properly understood and made.

v8-13 1y 233 Broadway, New York.

☞ **Farm Stock.**—Having completed our arrangements for the importation of choice stock, we are now prepared to receive orders for any of the following breeds, and would call the attention of those in want, to our unsurpassed facilities for the importation and improvement of the choicest stock:

Thorough-bred Devon Cattle,	French Merino	do
Shorthorns do	Spanish do	do
Thorough-bred Ayrshire do	Cotswold do	do
Suffolk and Essex Pigs.	Chester White Hogs.	

Fancy Fowls—all the best varieties.

All communications addressed to us will receive immediate attention, and we shall be happy to correspond with any and all upon the subject. Address

2 WARREN & CO., Cal Farmer Office.

☞ REGISTRY OF STOCK.—All who are interested in the purchase and sale of Stock, of every description, will find a Register kept at our Office, for the entry of all Stock for sale, and their full and correct pedigrees; so that persons who have Stock for sale, or wish to purchase, can gain important information. Those in want of choice Stock will find this opportunity a valuable one, as we are in correspondence with the principal Stock Breeders in the States, and are fully prepared at all times to make sales of Stock of any quality.

☞ J. Q. A. Warren, just from the East, will be happy to see all interested in the subject, at the FARMER Office. January 8, '58

NEW BOOKS,

☞ Just received, from New York, several cases choice works; also, a complete assortment of Agricultural Books, to which we would invite the attention of our customers.

Frank Forester's Horse and Horsemanship of the United States, in two volumes; the finest work of the kind ever published in the country, can now be seen at our office, bound in different styles—Plain, and Turkey Antique. Having the sole agency of this valuable work, in California, we would invite lovers of the beautiful to call and examine the copies. Subscription books are now open, and those entering their names before the 20th inst., will receive this work at the earliest day. v9-1

☞ **GOUPIL & CO.**, Publishers and Importers of ENGRAVINGS, Manufacturers and Dealers in ARTISTS' MATERIALS of every description, 366 Broadway, New York, have constantly on hand a great variety of the above-named articles

*** Catalogues sent per mail to all parts of the United States. v9-2

☞ **Lawton Blackberry Seed.**—A few packets of this choice seed are now ready, and can be mailed to any address. Price, $1.

5 WARREN & CO., California Farmer Office,

☞ Persons purchasing articles advertised in our columns will confer a favor by saying they saw them advertised in the California Farmer. ☜

A Gentleman Wishes Board

IN a quiet private family, where the social comforts of a home can be realized. Address, J. Q. A. W., post office.

Packets of seed, 50 cents each, for sale at this office. 4

Choice Seeds.

A VERY choice assortment of GARDEN SEEDS, selected with great care, expressly for

4 4t BRYANT & CO., 68 Battery st.

A MONSTER CASTING AT GLASGOW.—At seven o'clock, a. m., 60 tons—40 cart-loads—of pig iron were put in the cupolas of Finniestone Ironworks, and by four o'clock of the same day this enormous mass of metal was in a condition to be poured into the mould. This mould contained, in one mass, the engine-bottom, including two condensers, two chambers to receive the air-pumps, as well as feed and bilge pumps and pillow block for main shafts.

The length of the block which had to be cast was 24 feet 6 inches, the breadth 10 feet 6 inches, and the hight 9 feet. The casting when taken from the mould in the course of six or seven days, will be 47 tons 10 cwt.—the largest casting as far as is known, ever made in the world. This is the second casting of the same kind in the same work, and the engines for which it was cast are to be fitted up for the new Australian line of steam vessels.—[English Paper.

HOLLOWAY'S OINTMENT is not a mere surface salve. It does not begin and end by simply skinning over an ulcer, or discharging the redness of inflamation from the cuticle. On the contrary, it sinks, with the aid of gentle friction, to the creative cause of the disease in the flesh, the fibres, and the larger blood vessels, and expels it.

Sold at the manufactories, No. 80 Maiden Lane New York, and No. 244 Strand, London; and by all druggists, at 25c., 62½c., and $1 per pot.

IS CONSUMPTION CURABLE.—We cannot doubt that in many cases of seated Consumption a cure has been effected solely by the use of the Wild Cherry preparation of Dr. Wistar. Its healing effects are certainly wonderful. None genuine unless signed I. Butts on the wrapper.

IMPORTANT!

I AM
GOING OUT OF BUSINESS
and
SELLING OFF MY ENTIRE STOCK
..OF..

BOOKS, STATIONERY,

Port Monnaies, Pocket Knives,

FANCY ARTICLES, &C.

And that I may make a SPEEDY clearance, and close everything out as early as possible, I have determined on making GREAT REDUCTIONS, and will sell everything at nearly ONE-HALF the prices the same goods are usually selling at. You have now a fine opportunity of furnishing your Libraries, and supplying yourselves with all kinds of Fancy and Staple Stationery, at a comparatively trifling cost, as they

MUST BE SOLD.

My stock consists of all kinds of Books, such as Histories, Biographies, Travels and Adventures; Theological, Poetical, Mechanical, Agricultural, Scientific, College, School, and Text Books; Novels, &c.

Blank Books; Letter, Cap and Note Paper of all kinds. Envelopes, Inks, Gold and Steel Pens.

In short, everything in the line. As an earnest of my intentions, I subjoin a list of prices of a few items, and everything else will be sold equally low in proportion:

Prices usually sold at.		Prices now selling at.	
Blank Books, ℔ quire, from	$ 50 to $1 50	Blank books, ℔ quire, from	$ 18 to $ 75

Sugar Beet and Chinese Sugar-Cane.

A FINE Invoice of Seed of the above, just received and for sale at our office.

WARREN & CO.

The Leonardi Cauliflower.

THIS famed Cauliflower has already astonished every grower of this species of the Brassica tribe, and specimens have been shown, having grown from twenty to thirty pounds each. The seed is rare, and the price, now, for a quarter pound package is $5. WARREN & CO.,

1 130 Washington street (up stairs).

ANCIENT EPITAPH.—The following was copied more than thirty years ago, from an old book, and is rather better than the *imitations* we occasionally see:

EPITAPH ON A COMPOSITOR.

No more shall copy bad perplex my brain;
No more shall type's small face my eyeballs strain;
No more the proof's foul page create me troubles,
By errors, transpositions, outs and doubles.
No more my brain shall ache from author's whims,
In over-running, driving outs and ins;
The stubborn pressman's frown I now may scoff;
Revised, corrected, finally wrought off.

SPECIAL NOTICES.

☞ **3000 Pounds California Tobacco.**—We have samples of superior TOBACCO, raised in California, grown and cured correctly, by a person from Kentucky. It is the best lot ever raised in the State, and is worthy the notice of Cigar Makers. For sale at the FARMER office. 6

☞ **THORBURN'S Preliminary Wholesale** CATALOGUE OF VEGETABLE SEEDS, *of the present year's growth*, will be published on the 20TH JULY, and will be mailed to Dealers and others requiring Seeds in quantities, inclosing stamps for return postage.

J. M. THORBURN & CO.,
19-tf 15 John street, New York.

☞ **Hemp Seed.**—A superior lot of pure seed just received at the office of the Farmer.

☞ **A. W. FABER'S LEAD PENCILS.**—Lead Points, Propelling Pencils, Colored Pencils, White Crayons, Black Crayons, Slate Pencils, Red Chalk, etc.

These popular Pencils can be had of Stationers, Fancy Goods Dealers, and others in the various cities of California.

Extract of a letter from the eminent artist, Chevalier P. von Cornelius, Director of the Royal Academy in Berlin, 27th Oct., 1842: "It is scarcely necessary to say that I find Faber's Polygrades Lead Pencils in every respect most excellent. They are of all degrees of hardness and shade, and adapted as well for fine and firm outline as for finished drawing. The wood which incloses them has the necessary strength, but yields easily to the knife, and the lead never breaks away."

Extract from the Official Report of the Industrial Exhibition of the German Federal States, 1844, 3d Vol.: "Especially have the Pencils of Mr. A. W. Faber set at defiance all competition, and supplied every desideratum that the Artist can expect or desire in this particular."

Extract from the Report of the Great London Exhibition, 1851:

On referring to the Report, page 450, it will be seen that the Jurors have considered A. W. Faber's Pencils deserving of a more extended notice than has been accorded to any other Pencil Manufacturer. The Report further states as follows: "A. W. Faber's Pencils are of the best description, and the prices extremely low. They are exported throughout the whole civilized world, the demand being created by their good quality and cheapness."

Beware of Counterfeits!

The reputation of A. W. Faber's Lead Pencils has not failed to attract the attention of certain individuals, who have either attempted an imitation of the same, or have undertaken the sale of a counterfeit article, which, though of a totally different manufacture and very inferior quality, are marked, some with the name of the genuine, some with the names, *W. A. Faber, A. W. Fabre, A. K. Faber, C. W. Faber*, etc., and are disposed of as genuine Faber's Polygrade Lead Pencils.

Every person will please to examine carefully the stamps on each Pencil—"A. W. FABER"—and observe that each dozen bears on the label a fac-simile of A. W. Faber's signature; and and further, that every genuine Pencil sold in the United States, has impressed in the wood itself, "E. FABER, 133 William street, New York." E. FABER, Sole Agent

v9-1 6m 133 William street, New York.

Fine, beautiful hair—jet black or brown,
Or tresses, curling or golden—
Is the certain result—without chance or doubt—
Of the use of LYONS KATHAIRON.

☞ **The immense sale of Lyons Kathairon**—nearly 1,000,000 bottles per year—proves its excellence and universal popularity. It restores the hair after it has fallen out, invigorates and beautifies it—making it soft, curly and glossy—cleanses it from all Scurf and Dandruff, and imparts to it a delightful perfume. The Ladies universally pronounce it the finest and most agreeable article ever used.

Sold by all dealers, everywhere, for 25 cents per bottle.

HEATH, WYNKOOP & CO.,
Proprietors and Perfumers,
61 Liberty street, New York.

PARK & WHITE, Wholesale Dealers,
9 6m *San Francisco, California.*

☞ **Counterfeit Wistar's Balsam.**—We would caution the purchasers of the *Balsam of Wild Cherry* against an imitation article which has made its appearance in many places, and which might deceive the unwary by its resemblance to the genuine bottle. Of the mixture we need not speak. Unprincipled scoundrels can always be found ready to counterfeit anything by which they can put money in their pockets, and they are sure to choose the most popular and well-known article on which to practice their villanies. It is a lamentable fact that there are also *dealers in medicines* who are willing to lend themselves to carry out this imposition, by selling such *trash* as genuine, because they can buy it for less than half the cost of the real article. Avoid such a man as you would a dealer in counterfeit money, for he is the greater scamp of the two.

They have never dared to forge the written signature of I. Butts, having a wholesome fear of the State Prison before their eyes. *Be sure that you find on the outside wrapper the written signature of I. BUTTS*, and you may rely upon its being genuine. Buy none other.

Seth W. Fowle & Co., 138 Washington street, Boston, Proprietors. Sold by their agents every where.

Agents—C. MORRILL, cor. Third and K, sts., Sacramento; H. JOHNSON & Co., Washington st., San Francisco. 4-1m

---

☞ **HAIR DYE! HAIR DYE!! HAIR DYE!!!**

Batchelor's Hair Dye is the Best in the World!

GRAY, RED, OR RUSTY HAIR DYED INSTANTLY TO a beautiful Natural Brown or Black, without the least injury to Hair or Skin.

Fifteen Medals and Diplomas have been awarded to Wm. A. Batchelor since 1840, and over 80,000 applications have been made to the Hair of his patrons of his famous Dye. Prejudice against Dying the Hair and Whiskers is unjust, as it would be against covering a bald head with a wig.

WM. A. BATCHELOR'S HAIR DYE produces a color not to be distinguished from nature, and is warranted not to injure in the least, however long it may be continued.

Made, sold or applied (in 12 private rooms) at the Wig Factory, 233 Broadway, N. Y.

Sold in all cities and towns of the United States, by Druggists and Fancy Good Dealers.

☞ The Genuine has the name and address upon a steel plate engraving on four sides of each bottle, of

WILLIAM A. BATCHELOR.
v8-13 1y 233 Broadway, New York.

Attention, Farmers!

Broadcast Grain Sowers.

THE subscribers have on hand a few of "SAGE'S PATENT BROADCAST SEED SOWERS," for sowing Wheat Barley, Oats, and all grain sown broadcast. These machines are unrivaled by any, and received complimentary notice at the Agricultural Exhibitions at San Jose and Stockton. They need no explanation, as their simplicity will enable any one to understand, at a glance, the manner in which they perform their work.

They have been introduced but one season, and *three* are now at work at Tehama, Sonora, and Petaluma, giving complete satisfaction, as per letters testimonial.

The undersigned will take pleasure in exhibiting them to Farmers or others, and no Farmer should be without one; the saving of *help* and *economy* of *seed* effected by their use, will pay for one in a season.

Price, from $100 to $125 T. H. & J. S BACON,
61 California street (up stairs),
v8-23-2mis San Francisco.

New Winged Triangular Harrow.

THE undersigned would invite the Farmers and Grain Growers of California to call and examine his newly invented WINGED TRIANGULAR HARROW.

By the action of this Implement a space of 12 feet of ground is finely pulverized and harrowed, and the work most satisfactorily done. No farmer can look upon the Implement and not be satisfied of its value.

H G. PRATT, Manufactory 46 Washington st.,
16-1a3m between Davis and Drum streets

HOTEL
INTERNATIONAL.

San Francisco, California.

THE UNDERSIGNED INVITES the attention of the Traveling Public and strangers in particular, to the merits of this House.

It was established under its present management on the 1st January, 1857, as a

FIRST-CLASS HOTEL,

In every particular. The present

Lessee and Managers,

A. S. HALEY,

JNO. J. HALEY, and E. R. ROBINSON,

with a delicacy not wishing to encroach upon the merits of other houses, cannot but recall the marked favor with which their enterprise has been received by a discriminating public, in a constantly increasing patronage of the

FIRST RESPECTABILITY,

showing conclusively the SUPERIOR MODE in which the Hotel is conducted.

It is contiguous to all of the most POPULAR PLACES OF AMUSEMENT, THE PRINCIPAL THOROUGHFARES, THE FASHIONABLE PROMENADES, AND STEAMBOAT LANDINGS; thus rendering it at all times the most

DESIRABLE STOPPING-PLACE

For Families or Single Gentlemen, during their sojourn in this city.

THE "INTERNATIONAL-HOTEL COACH," under the superintendence of P. B. SMITH, late Stage Agent at Sacramento City, is in attendance at all hours to convey passengers to and from the Hotel, for One Dollar each, including Baggage.

A. S. HALEY, LESSEE.

ASSISTED BY: JOHN J. HALEY, and E. R. ROBINSON, formerly of the New York Hotel.

Some of the Patrons of the Hotel International:

OIL!

FOR QUARTZ MILLS.

STANFORD BROTHERS,

PACIFIC OIL AND CAMPHENE WORKS,

INVITE attention to the following Certificates from GRASS VALLEY:

NEW-ENGLAND QUARTZ LEAD, Dec. 23, 1857.

W. LOUTZENHEISER, Agent of Stanford Brothers, Pacific Oil and Camphene Works:

Dear Sir: I have now given those Oils from Stanford Brothers, which I purchased from you, a fair trial, and find them the VERY BEST I have ever used.

Z. WHEELER, Superintendent.

ALISON RANCH, Dec. 25, 1857.

This is to certify, that we have been using the Oils from Stanford Brothers Pacific Oil and Camphene works, for a long time, and find them of a superior quality.

JOHN ANDERSON, First Engineer.

ALTA HILL, Jan. 12, 1858.

I hereby certify, that we are now using on our Machinery, Oils manufactured by Stanford Brothers' Pacific Oil and Camphene works, purchased at their Agency in Grass Valley, and have no hesitation in saying I believe them to be superior to any other manufactured in the State.

L. CARLSSEN, Sup't Alta Mining Co. No. 2.

The SPERM OIL furnished to these Mills is worthy the particular attention of ALL who use OIL for lubricating purposes.

Proprietors of Sawmills, Gristmills, Steamboats, and other Machinery, throughout the State, supplied in quantities to suit, and quality guaranteed in all cases.

STANFORD BROTHERS,
PACIFIC OIL AND CAMPHENE WORKS

MAGAZINES, ETC.

THE "HORTICULTURIST" AND Journal of Rural Art and Rural Taste.

(Commenced by the late celebrated A. J. DOWNING.)

Conducted by J. JAY SMITH, Editor of the North American Sylva.

THE increasing love of Rural Life has brought this popular publication into extended notice. Its success has been amply proved by a large addition of readers, and it is now offered to public patronage with confidence. It embraces in its scope of subjects everything pertaining to the country and country-pursuits, and aims to instruct while it amuses: it is, in short, as now conducted, a popular RURAL MAGAZINE, designed to interest all lovers of the Garden, the Country-house, the Cottage, no less than the Botanist, the admirer of the Green-house, Conservatory, Grape-house, Fruit Cultivator and Planter. Its correspondents are those who have long devoted their energies to these pursuits, and it is believed the number of these, and the information they impart, is greater than any other periodical can boast of either in Europe or America. Indeed, the work has become indispensable to the well-informed country-dweller, who, by a perusal of its varied pages, may maintain an acquaintance with all that is passing in the fruit-garden and orchard, the nursery, the villa, and with the beautiful in nature, whether it is improved by art or adorned by taste. In its Rural Magazine character it is addressed to all who love information, and it has thus become a welcome guest both in town and country. Its circulation now embraces the entire Union and Canada, and endeavors are constantly used to increase its attractions by a liberal outlay in embellishing it with costly engravings of fruit, dwellings, trees, and those numberless rustic adornments which make the individual home attractive.

A NEW VOLUME (13th year) commences with the January number for 1858: and it will be the constant aim to render it still more worthy, by every practicable improvement, of the liberal patronage it is receiving.

The work is issued on the first of each month, in the best style, each number containg 48 pages, embellished with a frontispiece and several other original and well-executed engravings. The volumes, taken for a number of years, will make a valuable Encyclopedia of Horticultural Literature. As an advertising medium it has few superiors.

TERMS—Two Dollars a year; Four Copies for Six Dollars, payable in advance.

An edition is published with plates colored in the best style of the Art. Price, $5.

☞ All subscriptions must be addressed to the Agents, or to ROBERT PEARSALL SMITH,
Nos. 17, 19, and 21 Minor street, Philadelphia.

WARREN & CO., Agents for the above work, for California. Subscriptions received at the office of the FARMER, 130 Washington street (up stairs). 9t-2

PHILIPS, SAMPSON AND COMPANY

COMMENCED ON THE FIRST OF NOVEMBER

A NEW MAGAZINE, TO BE CALLED

THE ATLANTIC MONTHLY.

IT will be devoted to LITERATURE, ART, and POLITICS.

THE AIM OF THE PERIODICAL WILL BE,

FIRST: In Literature, to leave no province unrepresented, so that, while each number will contain articles of an abstract and permanent value, it will also be found that the healthy appetite of the mind for entertainment in its various forms of Narrative, Wit, and Humor, will not go uncared for. They wish to say, also, that while native writers will receive the most solid encouragement, and will be mainly relied on to fill the pages of the ATLANTIC, the publishers will not hesitate to draw from the foreign sources at their command, as occasion may require, relying rather on the competency of an author to treat a particular subject, than on any other claim whatever. In this way they hope to make their Periodical welcome wherever the English tongue is spoken or read.

SECOND: In the term ART, they intend to include the whole domain of æsthetics, and hope gradually to make this critical department a true and fearless representative of Art, in all its various branches, without any regard to prejudice, whether personal or national, or to private considerations of what kind soever.

THIRD: In Politics the ATLANTIC will be the organ of no party or clique, but will honestly endeavor to be the exponent of what its conductors believe to be the American Idea. It will deal frankly with persons and with parties, endeavoring always to keep in view that moral element which transcends all persons and parties, and which alone makes the basis of a true and lasting national prosperity. It will not rank itself with any set of *antics*, but with that body of men which is in favor of Freedom, National Progress and Honor, whether public or private.

As an earnest of the material at their command, they subjoin the following list of literary persons interested in their enterprise; wishing it, however, to be distinctly understood, that they shall hope for support from every kind of ability which desires the avenue of their columns, and in the remuneration of which they shall be guided purely by their sense of intrinsic merit:

William H. Prescott,	Mrs. H. Beecher Stowe,
Ralph Waldo Emerson,	Mrs. Gaskell, Author of "Ruth," "Mary Barton," etc.
Henry W. Longfellow,	
Rev. F. H. Hedge, D. D.,	Mrs. L. Maria Child,
Nath'l Hawthorne,	Mrs. C. M. Kirkland,
John G. Whittier,	Mrs. Pike, Author of "Ida May," "Caste," etc.
Oliver Wendell Holmes,	
James R. Lowell,	Miss Rose Terry,
J. Lothrop Motley,	Wilkie Collins, Author of the "Dead Secret," ect.
Geo. Wm. Curtis,	
Herman Melville,	G. Ruffini, Author of "Doctor Antonio," etc.
Prof. C. C. Felton,	
Prof. F. J. Child,	Shirley Brooks, Author of "Aspen Court," etc.
E. P. Whipple,	
Edmund Quincy, Author of "Wensley,"	E. M. Whitty, Author of "Political Portraits," etc.
J. T. Trowbridge, Author of "Neighbor Jackwood," etc.	James Hannay, Author of "Singleton Fontenoy,"
C. W. Philleo, Author of "Twice Married."	Thomas W. Parsons.

TERMS.—Three dollars a year, or Twenty-Five Cents a Number, and may be obtained of Booksellers, Periodical Agents, or of the Publishers. For sale by all Booksellers and Newsmen in California. 19-3mis

[For the California Farmer.]

HEART WORSHIP.

Oh, tell me, *dear one*, say dost thou remember well
Those vanished hours when love and fancy
Charmed the sense with joy and gladness;
And around our hearts with secret spell
Did weave such strange delight? Hast thou forgotten
All the dreams we cherised, or does memory wake
Strains of the happy past, and form of loved ones take?
Thou hast become my spirit's beauteous star,
Smile on me sweetly from thy home afar.

Thine eyes within whose dreamy depths I loved
To lingering gaze; thy poet brow so broad, and yet so fair;
The sweet rich coral lips that parting oft did say,
Thou art beloved! and then thy clustering locks of raven hair,
And looks of fondest love: These ever haunt me—
And my soul doth move enamored of each gleam
That gives thee to my presence, fond yet fleeting dream.
O still I worship! at thy shrine I bow,
Thou art the idol, list thou to my vow.

Though shadows deep may settle o'er thy brow, and tears
Hot scalding tears, sear the deep fountains of thy heart;
Misfortune blight, and friends grow cold and strange;
False ones betray, and Earth no pity lend
To shield thee from the cold world's withering scorn:
One true and constant heart remains, to bless with holiest power
Thy future love, howe'er so dark the clouds of sorrow lower.
The worship that my loving heart doth give
Is all *thine own*, while truth and being live.

RENA.

[For the California Farmer.]

CONFESSION OF LOVE.

BY J. B. M.

[Most respectfully Dedicated to Miss A— E— B—, of San Francisco.]

I confess I love all nature,
The tiny flowers, the towering pine;
I have love for each fair feature,
That proclaims its source divine.

I confess an admiration
For the beauteous things of earth,
That I feel an exaltation
When I hear their songs of mirth.

I love the eyes that sparkle bright,
The voice of low and dulcet tone,
The lips that breathe but to delight—
The Hearts, whose echoes fill my own.

Not unto one can I confine
The love I have for all that's fair,
For one a love sick youth may pine—
Mine be the beautiful and rare.

A Series of Musical Entertsinments,

Given to the Contributors of the California Farmer.

BY M. A. BARLES,

Professor of Music and Elocution, in the Collegiate Institute at Benicia.

MUSIC—1.

PROGRAMME—PART I.

1. Fantasia Operatic from Norma..composed and executed by M. A. Sarles.

5. "When other lips and other hearts".....Bohemian Girl."

PART II.

1. Recollections of Madam Sontag's Concerts..composed and executed by M. A. Sarles.
2. "Kathleen Mavourneen".....Crouch.
3. "Jenny Jones".....John Parry.
4. "White Squall".....Barker."

PART III.

1. "Home thoughts Polka".....M. A. Sarles.
2. "Johnny Sands".....Sinclair.
3. "Sally, Sally".....Lover.
4. The Toothache—Comic
5. "Sally in our Alley".....Henry Carey.

LADIES AND GENTLEMEN: It is with an overpowering sense of unworthiness, that I appear before you this evening, for it is no inconsiderable undertaking, and brings into action no inferior amount of talent, to successfully entertain an audience of the character I see before me now; but I am aware that an American audience is nearly always discriminating, and hence rarely subject to fits of churlishness or ill humor.

I shall do my best to please you, and in doing my best, can offer you no more; but it is my earnest hope that I shall be able to afford you sincere gratification, and place in the possession of each memory some jewel that will not prove evanescent, and bright as the sparkling dew-drops of early morn; some flower that is not doomed to early fade and die.

From the earliest antiquity, the public entertainment of the people has brought to the observation of the world an incalculable amount of genius that otherwise would have slumbered forever, and has required the unceasing assiduity of a large portion of the educated and their assistants, who have devoted themselves especially to this one object, for it is the educated who alone can hope to please for any length of time; and it is they who are allowed to exercise a vast and immensely powerful influence upon the public mind.

This influence is either good or evil, and history enables us to draw, with distinctness, the line of demarkation between those things that elevate and foster the higher and nobler feelings, and those that encourage the brutal and demoralizing tendencies of the multitude. This should be a subject of especial importance to philanthropists; they should give their attention to it, and publish the result of their investigations for the benefit of mankind. Government should make the amusement of the people their charge, for unquestionably its power is immense, and propagates good or evil sentiments, that in time will bear corresponding fruit.

The influence upon communities may be popularly demonstrated by glancing at the national amusements of the Spaniards and their character, and at the amusements of the Americans and *their* standing. In the first we find them encouraging a brutal and disgusting taste, and hence find the elements of treachery, revenge and immorality growing into activity; while in the other case we find the people disposed to patronize the more refined and genial pleasures, and hence their characteristics are more worthy intellectual man; better adapted to the beings made in the image of God.

If the importance of public enjoyment is so marked upon a people, it is equally decided when we view their domestic condition and contrast the family misery of the one with the very general happiness of the other home, in the one case is as a desert waste, in the other is as a garden filled with flowers of the most exquisitely lovely hues and the most delicious perfumes: in the one is cheerless and uninhabitable, in the other is beautiful and happy as an Oriental's dream of Heaven: in the one case the heart shrinks at the name, in the other it is the magnet of every hope.

Of course, in the earliest ages of the world, a rude and barbarous taste universally prevailed; but as nations advanced in civilization, and became attached to the more enlightened pleasures that are cultivated by the progress of the arts and sciences, they, almost in common, rejected their rude pastimes, their barbarous sports, for ones more intellectual, and infinitely better calculated to improve and encourage the noblest sentiments of mankind.

At the present time, the entertainments may be divided into three distinct organizations: the physical, the elocutionary, and the musical. The Physical embraces the circus and all its various departments, and when conducted in the proper spirit, exercises a most healthy and invigorating feeling; for we are so constituted by God in his infinite wisdom, that our mental and bodily powers require equal and impartial attention; and if we wish to become men we must not forget, in our anxiety to attain the summits of intellectual supremacy, that our muscles and physical powers require and *demand* careful and constant training to enable us to work out and carry into execution the plans of the mysterious mind. What boots it to a man if he is possessed of all the acquirements and learning of a Newton, if by physical debility it is wasted away; if, by a want of common sense he is robbed of the result of years of industrious exertion and unremitting toil; if he is compelled to end his days in an inferior position in life, when he might have attained an eminent one; if he become the inmate of a lunatic assylum, and die an uncared for and an unpitied maniac. Like the magnificent palace of frost-work reared upon a Russian plain by one of the Czars, he may exist to dazzle with a splendid light, a few short months, and then, having no foundation of strength, when the sunshine and the flowers, the warm wind and the singing birds come, alas! where is he!

Physical Strength, whenever and however exhibited, therefore, in an enlightened country, is rarely devoid of interest, excites attention to a necessity of its cultivation, and may become an important and influential agent in the hands of progress. But where it was used as by the Romans in their gladiatorial shows and men and beasts were placed on one level, and indiscriminately sacrificed at the shrine of selfish and disgusting passions; or when it is used as at present in a Spanish bull fight, it becomes revolting to every thinking being, and must excite a feeling of intolerable abhorrence in the mind of Him who sees all things. Then again it is opposed to every principal of humanity; a counter spirit to every working of good, and will lead, surely and directly, any people into the paths of vice and degradation, cover their colloseums with the dust of ruin, and their hearth-stones with the ashes of extinguished fires. They may give birth to Homers, Virgils, and Ciceros, but it will avail them not; the raven will perch upon their ruins, and history alone will enable them to exist, if, indeed, they are allowed to exist at all.

The elocutionary amusements of a people wield the greatest power in our time, and it is a power that, as before, is either good or evil.

When the transcendant genius of a Shakspeare presides, its lessons are of wisdom; but when immorality—when looseness of principle is in the slightest degree smiled at, woe be to the land that encourages it; for, like France and Italy, vice will hold her court where her pathway is strewn with admirers, and where vice is, happiness cannot be. The lecturers of a community are capable of exerting an important influence; and when, like Chalmers, their eloquence, their magnificent attainments and their examples are directed properly, and are intended to advance the condition of the human race, they should receive every attention; but when, like Robert Owen and Chas. Fourier, their philosophy is so uncertain and so injurious, they should be placed under the strictest surveillance.

Next and lastly come the musical pleasures, and these are, equally with the other classes of amusement, the encouragers of what is calculated to administer to our happiness, or the poison that instils into our minds the elements of misery; but the predominating power of music is good.

Music is the natural language of virtue, and of divine origin, can seldom be made an assistant of crime. In its unadulterated state, as in instrumental music for instance, it is always pure and holy, and it is impossible then for its influence to be degrading, or its promptings to be otherwise than eminently calculated to inspire us with sentiments of virtue and wisdom. It is the barometer of civilization, the indicator of prosperity, the guardian angel of religion, and the only portion of mortality that we are taught by God to expect in another world.

Looking then upon music as the assistant of all that is beautiful, I enter upon my duty of entertaining you this evening, with a confidence that I could not otherwise expect, certain that if I am unequal to my subject, *that* at least will excite your feelings, and afford you food for pleasant reflection.

A musical entertainment should be varied so as to suit the peculiarities of each of my audience, and I have therefore divided my evening into three portions: the first to be devoted to operatic, the second to ballads, and the third to comic songs.

PART I.

1. My selections from Norma I have chosen because Bellini has always been considered as one of the most remarkable men whom the world has produced. Eminently gifted, possessed of a purity and depth of feeling, his music always leaves an impression upon the heart. Any one of his operas would have created an immortal fame. As Milton is to English poetry, so is Bellini to Italian music; and any person who will carefully study his works must come to the conclusion that, both in conception of his subject, in his exquisite and poetic melody, and his purity of heart, he has no equal.

2. Of the very many beautiful operas that have emanated from the mind of Donizetti, none will bear a more minute examination, will teach more charmingly the hearer, or will impress itself more vividly upon the mind and imagination than the Opera of Lucia di Lammermoor. It abounds in beauties, and in a wildness of feeling that is both exciting and fascinating; it is one of the very few world-renowned operas that please and delight one at the first hearing. But, ladies and gentlemen, you must not expect that the Scena I shall have the honor of singing for you, this evening, will sound as it would do with all the surroundings of gorgeous dresses, fine scene painting, and the excitement with which it is invested in a theater; it would be far easier for me, and would please you better; but you will, I am sure, make the necessary allowances for a want of them, and imagine yourselves looking upon the gaudily arrayed Edgardo.

It is a custom, in singing these selections from Italian operas, to follow, whether we understand them or not, the foreign words. I shall take the liberty, with your permission, to deviate from a rule that is considered almost universally ridiculous, and sing for you this incomparable Scena in a language that Wadsworth calls "a magnificent one," our own—the language of Shakspeare and Milton.

3. My next selection, I think, will afford you pleasure. It is a sweet and touching melody, by Mr. Comer, the Musical Director of the Boston Museum; he often writes very pretty songs, and as they are not given to the world ostentatiously they are liable to be passed over. Modesty is seldom rewarded until the grass and flowers bloom upon a grave.

4. If the Italian composers have won for themselves the applause of the world, they have not worn entirely the mantle of popularity, and have been successfully competed with by English composers, of no inconsiderable attainments. I know of no selection more favorable for a display of their merits than the two I shall now have the pleasure of singing for you. Amalie is an opera of very great merit, and "My Boyhood's Home," for feeling and beauty, is not inferior to many of the finest gems of the Italian school.

5. "Where other Lips," is from the most popular opera on the English stage, and was the wave that carried Balfe to fortune.

PART II.

1. It is very seldom that we find a woman of Mad. Sontag's appearance, rank and genius, willing to re-appear upon the public stage, after having attained a distinguished position in social life; or who, if she is compelled to do so, complies with destiny cheerfully and unrepining. It is very seldom that we find an instance of such wonderfully preserved powers, but Madame Sontag was no common woman, and claims the admiration of all who can set a value upon independence of character and extraordinary talents. In honor of her have I composed this Fantasie, and you would all, I am sure, bear a slight tribute, if you knew her, to the amiability and energy of the Countess Rossi.

2. How beautifully is love expressed by Music—its delicacy, its refinement, its purity of character sympathises with the divine art; and when they are in company they seem as united as naturally as the moss to the stem of the rose. I recollect an incident that occurred under my observation in connection with "Kathleen Mavourneen," that will be interesting to many. I was visiting in one of the most enchanting villages of Vermont, and often amused my evenings in stealing away from the busy circles around each door porch, and enjoying undisturbed the silent but impressive and touching influence of nature by moonlight. The evening in question was a lovely one, and the moon sailing through the wandering clouds, like an angel spirit through the Valley of Death, seemed indeed the type of purity and beauty. Its silvery beams slept on the glossy and lake-like waters of the Connecticut, and seemed to me like a statue of a beauteous babe upon a tablet of black marble. Every now and then a low, soft gurgle would float pleasantly upon my ear, and I could easily imagine myself listening to the whisper of a fairy. Near where I stood was a cottage, almost buried beneath the clustering flowers of the sweetly smelling vines. As I mused I noticed a man leaning upon the gate in front of the door; his position indicated a sad train of thought, and my curiosity was at once aroused, for I fancied that his features wore a wild appearance. Suddenly he aroused himself from his mournful reverie, and commenced in low, plaintive accents, the words of this song. Ere he finished, his heart mirrored itself in his music, and I wept, for I felt that I listened to the last breathings of one whose heart had broken, and gradually was withering as the last rose-bud of a summer's day.

3. "Jenny Jones" is one of the oldest English ballads, and is, next to "Black-Eyed Susan," the most popular one with every sailor. I cannot sing it as Charles Mathews did of old; but it will call back his memory to those who have listened to him.

4. The sea, with all its charms and all its perils, when it slumbers on a soft and sunny noon in midsummer, like a volcano at rest—or when it waves up its angry waters mountains high, and dares the anger of the howling Storm King, has ever been the theme of the musician, the poet and the painter; and many of our most celebrated songs, many of our inspired poems, and many of our glorious pictures owe their popularity to its varying phases.

Ladies and gentlemen, many of you have witnessed a White Squall, but for those who have never read such a page in Nature's book, I will, although an indifferent painter, sketch such a scene: It is the Mediterranean, on the afternoon of a summer's day. The bright sky looks as wondrously beautiful as ever; the waves are tinged in the shade with a blue so deep that the eye never tires of gazing, and the spirits of the wind seem sleeping. All is silent except the gurgling of the waters, as the gallant ship plunges through them. The sunbeams are laying upon the waves like molten gold, except when they are disturbed by some sportive dolphin, who, leaping into the air, dashes them about in a thousand spray drops, that glitter like a shower of diamonds. The soft and balmy air seems to exercise a lulling influence, and the voyager is indisposed for other exertion than building those enchanting castles which live but in the fanciful imagination. Suddenly the calm bosom of the ocean becomes troubled, and each wave attires itself in a robe of white, and dances about in fantastic motion. They approach the ship, and as they strike her, in a moment she careens, madly plunges, and goes down, down into the depths of the unfathomed ocean.

PART III.

1. "Johnny Sands," a sometimes true picture, is the offspring of a talented mind, John Sinclair.

2. "Sally, Sally," by Lover, is a good description of a lover's quarrel. This author is one of the most versatile men whom Ireland has produced. He is an opal added to her casket of jewels. Any individual can attain eminence in *one* thing by working untiringly and hopefully, but there are few, like Lover, who have the ability to succeed in all things.

4. "The Toothache" is one of the funniest comic songs ever published.

5. "Sally in our Alley." Henry Carey, the author of the celebrated ballad "Sally in our Alley," was one of the most brilliant and versatile men of his day—who, by his superior attainments and his exceedingly amiable disposition won the hearts of all who knew him. He was the author of several operas which became very celebrated; but "Sally in our Alley" is the only song which has retained its position in the popular mind. It is the only ballad that won the kind opinion of Addison, and Carey was considered peculiarly fortunate in having pleased so exacting a critic. It is unquestionably the finest ballad ever written. Its design is one that does infinite honor to the generous disposition of the author, and which obtained for him a universal popularity among the lower classes of England. Poor Carey, like too many men of genius, died in penury and want, and his friends only came to his assistance when the wild flowers were blooming upon a pauper's grave. Carey always received large sums for his compositions, but, kind-hearted and never thoughtful of self, he always responded unsparingly to every appeal of poverty, and would always give the last sovereign to those needing his generosity. He flourished about the year 1730.

HORTICULTURAL.

LAWTON OR NEW-ROCHELLE
BLACKBERRY PLANTS!!
PRICES REDUCED!

THE subscribers announce to their friends and customers that they have now
OVER SIX ACRES
OF THE
GENUINE LAWTON (or New-Rochelle)
BLACKBERRY PLANTS,
under cultivation, and in good condition.

They are therefore prepared to fill large orders the coming FALL and the next SPRING, at the following reduced prices:

One Thousand Plants	$125 00
One Hundred Plants	15 00
Fifty Plants	8 00
Two Dozen Plants	4 50
One Dozen Plants	2 50
One Half Dozen Plants	1 50

☞ Good Plants for setting, of a second size, will be sold for $100 per 1000 Plants, or $12 per 100 Plants.

N. B.—All Plants ordered of us will be taken up and packed with the greatest care, and under our own personal supervision.

Of the many thousands sent out by us last year, we have heard very few instances of failure, notwithstanding that they have been forwarded to *every part of the country, and to California, with perfect success*, and the setting out has often been entrusted to unskillful hands.

Printed directions for setting and cultivating are sent with every package. GEORGE SEYMOUR & CO.,
v2-2 3m South Norwalk, Conn.

Ravenswood Fruit Garden
PLANTS.
WHOLESALE AND RETAIL.

Brinckle's Orange Raspberry, $70 ₱ thousand, $8 ₱ hundred.
Col. Wilder Raspberry, do do
Cushing Raspberry, do do
Thunderer Raspberry, do do

Linnæus Rhubarb, $50 ₱ thousand, $8 ₱ hundred.
ALSO,

Blackberries: New Rochelle or Lawton, Newman's or Thornless, $15 ₱ hundred.
Strawberries: Hovey's Seedling, Boston Pine, Large Early Scarlet, $6 ₱ thousand, $1 ₱ hundred.
Currants: Black Naples and Cherry, $10 and $12 ₱ hundred.

ALL the above plants of best quality; we cultivate most of them for market fruits.

THE BRINCKLE'S ORANGE RASPBERRY, for market or garden, is considered the best of all Raspberries: is unequaled in flavor and beauty; flavor is rich and vinous; and color beautiful bright orange: a very vigorous grower; hardy and exceedingly prolific.

The Cushing and Col Wilder are the best for making jams, preserves, syrups, &c.

THE LINNÆUS RHUBARB is a new variety originated by Myatt of England, who also originated the Victoria, on which this is a great improvement in both *flavor* and *productiveness*.

Its flavor is deliciously aromatic and spirited, and it is entirely free from the toughness and stringiness which characterize the Victoria, but when cooked becomes a fine uniform pulp, like the most tender apple. The plant is a very strong grower, more productive than the Victoria, and very hardy.

We cultivate most of the above Fruits for market, and selected them from our Fruit Gardens, as the choicest varieties known. Brinckle's Orange Raspberry and Linnæus Rhubarb especially are of exceeding excellence.

Orders will be promptly attended to in the order in which they are received, and Plants packed in careful manner.

Terms cash. Bills payable on delivery of Plants to the agents, or order of the purchaser.

Our plants will be ready to ship any time between the first of November and first of April. Circulars with full description of varieties and testimonials, can be had at the office of the California Farmer, San Francisco.

FREEMAN & KENDALL,
RAVENSWOOD, L. I. NEAR NEW YORK,
54 William street, New York City.

"We have visited Messrs. Freeman & Kendall's Fruit Gardens, from which they are now offering to sell Plants; and we can say their Plants are of very superior varieties and well grown, the Orange Raspberry and Linnæus Rhubarb particularly; we take pleasure in recommending them to the public."

PARSONS & CO.,
FLUSHING, near NEW YORK,

OFFER FOR SALE an assortment of Trees and Plants which they have grown for the use of amateurs, and have prepared, by frequent transplanting and other modes, for success in moving.

They are of fine size and symmetrical form, and among them will be found

Standard Apples of fine quality.
Standard Pears, Plums, and **Cherries.**
Peaches, Apricots, and **Nectarines,** on Plum stocks, and their own roots.
Dwarf Pears, of fine form, and ready for bearing.
Gooseberries and **Currants,** strong plants of the best sorts.
Raspberries, Fastolf, Red Antwerp, Fillbasket, and other known sorts.
Strawberries, of all the best varieties.
Native Grapes—Isabella, Catawba, and other hardy varieties.
Foreign Grapes: all the well-known sorts, with some new varieties of great excellence. These plants are propagated from vines that have borne abundantly for some years, and are known to be correct.

Great care is taken in the cultivation of Fruit Trees, and none but those of the best quality are allowed to be sent out.

The Ornamental Department

Contains trees of all sizes for lawns and streets, including ELM, SILVER, NORWAY, and SYCAMORE MAPLES, CATALPAS, LINDENS, TULIP TREES, CYPRESS, LARCH, WILLOWS, ASH, ABELE, ORIENTAL PLANE, and all the best varieties of deciduous trees.

It also includes EVERGREENS of fine size for single planting, and of small sizes at low prices, from one foot upwards, for massing; among them are NORWAY SPRUCE, BALSAM FIR, AUSTRIAN PINE, HEMLOCK, WHITE PINE, SCOTCH FIR, and other varieties.

The best Shrubs include many fine varieties at low prices, for massing, of which the RHODODENDRON CATAWBIENSE can be particularly recommended for its fine evergreen foliage, showy bloom, and perfect hardiness.

The ROSES are cultivated in very large quantity, on their own roots, of all the most rare varieties, and to those who purchase in quantity, will be sold at greatly reduced rates.

The Exotic Department

Contains a fine assortment of CAMELLIAS, grown as bushy, rather than tall, slender plants; and also contains all the well-known varieties of exotic plants and many rare sorts, introduced from Europe, annually. These are all carefully grown for those who desire plants of symmetry and beauty.

CATALOGUES of all the departments will be furnished on application. Great care will be taken in packing, and trees will be delivered in New York, and thence shipped as directed. v8-16-tf

BOOKS, &c.

New Treatise on Land Surveying.
JUST PUBLISHED BY
E. C. & J. BIDDLE,
PHILADELPHIA,

A Treatise on Surveying, by S. Alsop. In this work, the theory is plainly and comprehensively presented; directions for practice are given definitely and precisely; and everything which an extensive business in Land Surveying would be likely to require is embraced. Price per copy, mailed to California, $2, postage included. Price of the KEY to the work, mailed to California, 75 cents.

E. C. & J. B. also publish the following popular educational works, and many others extensively used in the Schools and Colleges of our country: and they would respectfully invite School Directors and Teachers to send for a copy of the descriptive catalogue of their publications:

Crittenden's Treatise on Book-keeping. The series comprises the four volumes below named, and for each of them a KEY, and a set of miniature BLANK BOOKS for the exercises;
1. Treatise on Single Entry Book-keeping.
2. On Single and Double Entry, for Common Schools.
3. do do do for High Schools.
4. do do do for the Counting House.
The volumes are severally the text-books in Commercial Colleges in Boston, New York, Philadelphia, Cincinnati, Chicago, St. Louis, Louisville, etc.; in most of the Normal Schools, and a great number of the High Schools of our country. In the Public Grammar and Evening Schools of Philadelphia, etc.; while as a book of reference for practical accountants the Counting House edition is, undoubtedly, the most popular work on the Science of Accounts, published in the United States.

Cleveland's English Literature. *Twenty-fifth Thousand just published.* 1. CLEVELAND'S COMPENDIUM OF ENGLISH LITERATURE, from the 14th to close of 18th century: chronologically arranged: consisting of Biographical Sketches of the Authors, and selections from their works, together with Notes explanatory, etc. 2. CLEVELAND'S ENGLISH LITERATURE OF THE NINETEENTH CENTURY. A sequel to the "Compendium"; arranged on the same plan as it. The above two volumes are text-books in many of the Colleges, in the principal Normal Schools, and in a large number of other first-class Seminaries of our country; and they may with confidence be recommended as an admirable guide or chart for private students of English literature.

Cleveland's American Literature. *Cleveland's Compendium of American Literature,* on the same plan as the author's "Compendium of English Literature," will be published early next year.

Harrison on the Rise, Progress, and Present Structure of the English Language.

The Works of Thomas Dick, LL. D. 10 vols. 12mo. Few books are better adapted for the School or the Family Library, than the works of Dr. Dick.

CHARLES DICKENS' WORKS.

TWENTY-NINE DIFFERENT EDITIONS.

No Library can be Complete without a Set of These Works.

CHEAP EDITION—PAPER COVER.

Complete in Fourteen volumes.

"PETERSON'S" are the only complete and uniform editions of Charles Dickens' works ever published in the world; they are printed from the original London Editions, and are the only editions published in this country. No library, either public or private, can be complete without having in it a complete set of the works of this, the greatest of all living authors. Every family should possess a set of one of the editions. The cheap edition is complete in Fourteen Volumes, paper covers, either or all of which can be had separately, price 50 cents each, as follows:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist.
Nicholas Nickleby.	Two Apprentices. 25

A complete set of the above fourteen books, will be sold, or sent to any one, to any place, *free of postage*, for Five Dollars.

LIBRARY OCTAVO EDITION.

Published in Seven Different Styles.

This Edition is complete in SIX very large octavo volumes, with a Portrait on steel of Charles Dickens, containing the whole of the above works, handsomely printed, and bound in various styles.

Vol. 1 contains Pickwick Papers and Curiosity Shop.
" 2 do Oliver Twist, Sketches by "Boz," and Barnaby Rudge.
Vol. 3 contains Nicholas Nickleby, and Martin Chuzzlewit.
" 4 do David Copperfield, Dombey and Son, and Christmas Stories.
" 5 do Bleak House, and Dickens' New Stories.
" 6 do Little Dorrit. In two books—Poverty and Riches.

Price of a set, bound in Black cloth.....$9 00
" " Scarlet cloth, extra.....10 00

" " Half calf, ancient antique.....39 00
" " Half calf, full gilt backs.....39 00

DUODECIMO ILLUSTRATED EDITION.

Complete in Twenty-five Volumes.

The Editions in Duodecimo form are beautifully illustrated with over *Five Hundred Steel and Wood Illustrations*, from designs by Cruikshank, Phiz, Leech, Browne, Maclise, etc., illustrative of the best scenes in each work, making it the most beautiful and perfect edition in the world, and each work is also reprinted from the first original London editions that were issued by subscription in monthly numbers, and the volumes will be found on examination, to be published on the finest and best of white paper.

This edition of Dickens' Works is now published complete, entire, and unabridged, in Twenty five beautiful volumes, and supplies what has long been wanted, an edition that shall combine the advantages of portable size, large and readable type, and uniformity with other standard English authors.

The Duodecimo edition alone has been gotten up at an expense of *over forty-five thousand dollars*, but the publishers trust that an appreciative public will repay them for the outlay, by a generous purchase of the volumes. All they ask is for the public to examine them, and they are confident they will exclaim, with one voice, that they are the handsomest and cheapest, and best illustrated Set of Works ever published. This edition is sold in sets, in various styles of binding, or any work can be had separately, price Two Dollars and fifty cents each, and each work but one being in two volumes, handsomely bound in cloth, as follows:

Pickwick Papers.	Sketches by "Boz"
Nicholas Nickleby.	Barnaby Rudge.
David Copperfield.	Martin Chuzzlewit.
Oliver Twist.	Old Curiosity Shop.
Bleak House.	Christmas Stories.
Little Dorrit.	Dickens' New Stories.
Dombey and Son.	*One volume, cloth*..$1 25

J. L. POLHEMUS
DRUGGIST

OFFICIAL NOTICE!
POLHEMUS' DRUG STORE,
No. 190 J street, corner of Seventh.
SACRAMENTO, CAL

FELLOW CITIZENS: I have lived among you since the ever glorious FORTY-NINE, have suffered with you in three fires and three floods, and intend to live among you with my family during the term of my natural life, if not longer. I return you my most sincere thanks for your unfaltering patronage and support, which has enabled me to pay One Hundred Cents on the Dollar through all my adverse fortune. I would also give you a few reasons for your continued patronage, and inducements to new patrons likewise.

FIRSTLY.

I claim to be the Oldest Established Legitimate Druggist in this City.

Persons in this connection will please observe that there is as much difference between a DOCTOR and a DRUGGIST as there is between a Druggist and a Doctor, and rather more so between those who have picked up the Drug Business and those who have devoted their whole lives to it. To this latter class I have the honor to belong, having learned my business in the Atlantic States, and been engaged in said business for the last eighteen years.

SECONDLY.

Believing that life is sweet to all, and that the people wish to know where they can get their prescriptions filled with safety, I will hereafter fill them for

Half the Price Usually Charged

By other Druggists, legitimate or illegitimate, and of **The Purest Drugs and Chemicals.**

THIRDLY.

I intend my store shall be ONE of the best, if not THE BEST place in California to obtain everything, NEW, ODD and STRANGE in the Drug line, and especially to make it the most extensive depot for every valuable Patent Medicine, Drug and Chemical. We invite proprietors of valuable and reliable Patent Medicines to send them along. We have a large and thoroughly fire-proof Drug Warehouse to hold them, and patrons to buy them.

FOURTHLY.

We Keep Open all Night!

And charge no more for medicines than in the day time.

FIFTHLY.

We will furnish those in indigent circumstances with MEDICINES AT COST! the same being attested by two or three good citizens.

SIXTHLY.

Hereafter we will do a business on a CASH BASIS ONLY. The amounts we have lost heretofore by crediting we intend to distribute equally among our patrons, in the future, in the decreased price of our goods.

SEVENTHLY.

We have received the agencies for the following valuable articles:

Dr. Carl Warburg's Tincture. This article is particularly recommended for Ague and Fever, when every other article fails to cure.

Budds' Nerve and Bone Liniment, warranted the best in California.

Flower of the West, for Fever and Ague.

Delight's Spanish Lustral, for the Hair.

HUDSON'S CALIFORNIA GROWN MUSTARD.

Also, agencies for all the other popular medicines too numerous to mention.

EIGHTHLY AND LASTLY.

We import nearly all of our goods. We think we know how to import them, and how to sell them to satisfy the public as to price and quality. At all events, give us a call, and WE WILL TRY.

v6-12 J. L. POLHEMUS.

AGRICULTURAL.

FIRST PREMIUM IMPLEMENTS.

TO THE FARMER
AND
Dealer in Agricultural Implements.

PLEASE READ.

HAVING erected a good shop, with facilities not heretofore possessed by any house in this State for manufacturing Agricultural Implements, I beg leave to announce that I am now prepared to receive orders to any extent in this line of business. I employ none but the best and most experienced mechanics, and use only the very best materials. In this way I hope to promote the interest of the good mechanic, the interest of the farmer, the interest of our young and growing Agricultural State; and at the same time that interest which is foremost with all mankind—self. I have had twenty years experience in the manufacturing business;

I ESTABLISHED THE FIRST SHOP,
AND
MADE THE FIRST STEEL PLOW

In the State of Wisconsin, in the dawn of her great agricultural improvement. I also

MADE THE FIRST REAPING AND MOWING MACHINE
AND
THE FIRST STEEL PLOW
Ever Made in this State;

Therefore, with my experience, and a knowledge of the wants of the country (which are different from most others), I feel confident that I can and will do much for the interests of the agriculturists of this county; and in my efforts I trust I shall meet with a good share of patronage from the farmer and all interested in this matter, and in the interest and development of the agricultural improvement of our State.

I design, and have under way, the manufacturing of

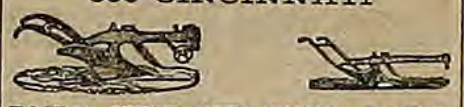
1,500 Cast Steel California Plows;
THE DEEP TILLER;
OR,
"QUEEN OF THE WEST;"

Of stock entirely superior to any ever worked before in this country. Also,

GANG PLOWS,
HARROWS,
CULTIVATORS,
FANN MILLS,
&c., &c., &c.

In addition to what I manufacture, I shall constantly be receiving implements from the best makers of the Eastern and Western States, amongst which are now due

500 CINCINNATI



EAGLE, STEEL AND ROVER PLOWS,

which stand, in point of true merit and worth, altogether higher than any others in the great agricultural State of Ohio.

☞ Please favor me with a call, and see for yourself, and be convinced that I am publishing no humbug, but simply facts as they are; and that your young State can, within itself, already provide the farmer with implements inferior to none now in use. All kinds of agricultural implements and machines repaired on short notice, and in the best manner, and on reasonable terms.

DOCTOR HOOFLAND'S
CELEBRATED
GERMAN BITTERS,
PREPARED BY
Dr. C. M. JACKSON, Philadelphia, Pa.,
WILL EFFECTUALLY CURE

LIVER COMPAINT, DYSPEPSIA, JAUNDICE, *Chronic or Nervous Debility, Diseases of the Kidneys, and all diseases arising from a disordered Liver or Stomach.*

Such as Constipation, Inward Piles, Fullness or Blood to the Head, Acidity on the Stomach, Nausea, Heartburn, Disgust for Food, Fullness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried and difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, Dimness of Vision, Dots of Webs before the Sight, Fever and Dull pain in the Head, Deficiency of Perspiration, Yellowness of the Skin, and Eyes, Pain in the Side, Back, Chest, Limbs, &c. Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of Evil and great Depression of Spirits.

The proprietor, in calling the attention of the public to this preparation, does so with a feeling of the utmost confidence in its virtues and adaptation to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American people, and its reputation and sale is unrivalled by any similar preparations extant. The testimony in its favor given by the most prominent and well-known Physicians and individuals in all parts of the country is immense, and a careful perusal of the Almanac, published annually by the proprietor, and to be had gratis of any of his Agents, cannot but satisfy the most skeptical that this remedy is really deserving the great celebrity it has obtained.

Principal Office and Manufactory, No. 96 ARCH STREET Philadelphia, Pa.

For sale by all Druggists in California and elsewhere.

MACHINES AND IMPLEMENTS.

TREADWELL & CO.,

IMPORTERS,

N. E. corner California and Battery streets,
SAN FRANCISCO,

have now landing, and will receive by every packet from New York and Boston, the most extensive assortment of

FARMING MACHINERY and Implements,

ever brought to this market, embracing all the

Latest Styles and Improvements,

which will be sold at lowest rates.....consisting in part of:

REAPERS:

MANNY'S COMBINED REAPER AND MOWER, WITH WOOD'S IMPROVEMENT. These justly celebrated Machines have become too well known in California to require more than a simple announcement where they can be had. We are sole agents for the Pacific coast, and none genuine elsewhere.

McCORMICK'S REAPER....This universally approved Reaper we keep constantly on hand, and are Agents of the Maker.

KETCHUM'S COMBINED REAPER AND MOWER....This Machine is now very popular—having been greatly improved the last two years.

BURRALL'S IMPROVED GRAIN REAPER. This Reaper cuts six feet, and is one of the strongest and most durable Machines in use.

SEYMOUR AND MORGAN'S REAPER; without the Raker attachment and all late improvements.

HUSSEY'S REAPER....Baltimore make.

PALMER & WILLIAMS' SELF-RAKING REAPER.

THRESHERS:

"HALL'S" 8 and 10 horse THRESHER AND SEPARATOR....This Machine we have had made for this season, with great improvements, and it will be the best *THRESHER* in market this year—34, 36 and 38-inch cylinders, and cannot fail to give entire satisfaction.

"SPENCER'S" 8 and 10 horse THRESHER AND SEPARATOR....This is one of the largest and most durable Machines that comes to California, and has been well tried, and found "good."

STEPHENSON & BIRDSALL'S 8 and 10 horse THRESHER AND SEPARATOR....A large, splendid Thresher, with late improvements.

WHITMAN'S 4 horse THRESHER AND SEPTRATOR....This is a very desirable Thresher for small Farmers. It is got up with great care, and will give good satisfaction.

EMERY'S 2 horse THRESHER AND CLEANER....Greatly improved over last year.

EMERY'S 1 and 2 horse THRESHER, WITH FAN MILL.

The above Threshers will be sold with or without Horse Powers.

"Haynes'" Heading Machines or Harvesters.

These Machines are in general use in the Western States, and are pre-eminently adapted to California.

HORSE POWERS:

SMITH'S 8 and 10 horse PLANET POWERS, WITH HALL'S IMPROVEMENT.

PERRAGO'S 8 and 10 horse PLANET POWERS....This is one of the most successful Powers in use; has taken a greater number of premiums in the Atlantic States than any other Power; is simple, strong, and durable.

WHITMAN'S 4 and 6 horse ROTARY POWERS.
BOGARDUS' 2, 4, and 6 horse do do.
FIELDS' 2, 4, and 6 do do do.
EMERY'S 1 and 2 horse TREAD POWERS.

This Machinery comes in compact cases, can be sent to any part of the State or Coast at small expense, and marked so that it can be easily set up.

Extra Castings, for all the above, constantly on hand.

The Celebrated Boston Steel Clipper Plow.

We have these Plows exclusively, and keep a stock on hand at all times. Extra points and parts can always be had.

This Plow can be run with half the power it takes for the "Peoria" Plow of same size, and must commend itself to all who wish to save "horse-flesh."

The Peoria Steel Plow

Constantly on hand.

These styles of Plows come 10 in a case, and the expense is very small in sending them to the remotest parts of the coast or interior.

HAY PRESSES—Several sizes; best makers.
Do. CUTTERS—Several sizes and kinds; hand and power.
HORSE RAKES—wood and steel teeth; 8, 10, and 12 feet.
GRANT'S GRAIN CRADLES—In cases of one dozen each.
Do. FAN MILLS. Also, the Boston Mill.
CORN SHELLERS—Hand and power.
Scythes and Snaiths—best steel Scythes and Lamson's Snaiths.
Hay and Barley Forks—2, 3, and 4 tine; of best makers.
Carpenter's Patent Wire spring-Tooth Horse Rakes, 10 to 15 feet long, with wheels, and seat for driver.
Ox Yokes and Bows—all sizes.
Churns—Thermometer, Dash, and Cylinder; also, Dog Powers for do.
Garden Barrows. Cauldrons and Furnaces. Cultivators.
Horse Hoes. Seed Sowers. Harrows.

Field and Garden Seeds

Of every description, *via* the Isthmus—this year's growth (1857).

Steam-Engines, 4 to 15 Horse Power.

Suitable for Ranches or Mining purposes.

Portable Flour Mills and Mill Stones—Noyes' make. All sizes, 16 inch to 4 feet.

Belting, Bolting Cloth and Packing—All kinds and sizes of the above.

HARDWARE—The best stock in the State.

MINING GOODS—All kinds in use.

COOPERS' AND TANNERS' TOOLS—Full assortment.

Baling Wire—Annealed.

Hay Rope—Best Manila.

Grindstones—Best dressed Nova Scotia; from 6 inches to 4 feet diameter, packed in casks in sawdust.

Wire Fencing—A neat article for inclosing Gardens, Heneries, &c. Also, for Ornamental Garden work, Grape and Rose Trellises.

Wooden Ware—In great variety: Tubs, Pails, Buckets, Measures, Baby Cabs and Wagons, Peach and Strawberry Baskets, &c, &c. 9r-4

Letter from New York.

NEW YORK, January 20, 1858.

To the Editor of the California Farmer:

IT is perfectly useless to talk any longer about the climate of California, or at least to claim any *very great advantage* over other '*diggings*." We are having a perfect California winter here, with plenty of rain, warm weather, muddy streets, fog, moonshine, gaslight, and darkness thrown in, "free gratis for nothing."

The *oldest inhabitant*, it is supposed, started on the last steamer for the south, to examine the *gearing* of the machinery that twists and turns and jostles our little earth. He is apprehensive that there is a screw loose somewhere, and fears a general breakdown; hence the journey. You will please take note of this matter, and keep a "leetle" more quiet about California weather; for here, in New York, on the 20th of January, I could write in a comfortable manner with my window up, if—it was not *quite so chilly*.

The news for the last fortnight has been varied and interresting from all parts of the world. All Americans are now deeply interested in the proceedings of Congress. Some think Kansas will bleed longer, and some think it will be more comfortable. She and several other young ladies, propose knocking at the door of our capitol, to join our little family coterie. If any of them prefer to bring a few *colored people* with them, to wait upon them a little, until the novelty of their new position wears off, let them do it; and if others prefer to be without any help, all right. Oregon it seems is determined to do her own housework, and probably most or all of the others, seeing her elastic step, and the ruddy glow upon her youthful cheek, will follow her example. The President *seems desirous* of pleasing all parties, I am afraid he never read the story of the Parson's wig.

THE MORMON WAR.

If there is to be war with the Latter-day Saints, it will be prosecuted in the spring in the most vigorous and decided manner. Our troops are now all in snug winter quarters.

The Kansas question and the return of the fillibuster Walker, have been the two subjects of the most importance before Congress the past week. I think Kansas will have her own way, and Walker won't.

HEAVY RAINS

Have fallen in many of the States. In some great damage has been done by the floods. They have had a terrific storm in New Orleans, which did much damage to shipping at the wharves, houses, fences, &c., also killing a number of persons.

THE PETTICOAT MOVEMENT

Goes bravely on. When red flannel skirts were first mentioned in the presence of the "bon ton," there was a wonderful "puckering" of pretty aristocratic mouths; but dame "Fashion" has decided that red flannel skirts are the very thing, for queens and empresses to wear; and as our ladies are all queens, they feel in duty bound to dress like queens. Why should they not?

Lord Napier gives a grand state ball, for the purpose of celebrating the wedding day of the Princess Royal, on the 25th instant. A large number of tickets have been sent out. The papers say it will be *the great ball* of the season.

The great Agricultural Congress has recently been held in Washington. Its proceedings will be found of a highly interesting character, a sketch of which, from the New York Daily Times of the 16th, I inclose. [We intend to publish this next week in full.]

THE MILDNESS OF THE WINTER, THUS FAR,

Has prevented much suffering among the poor in the large cities, and has been a Godsend to nearly all classes. Work is becoming more generally the *rule* than the exception. Many of our manufacturing establishments are commencing their work again; some with half the usual number of hands, but most of them with a full complement The money market is easier, which renders miscellaneous things generally more satisfactory.

A sharp correspondence has taken place between Gen. Wool, late of California, and Senator Davis, from Mississippi. There may yet be a call for "pistols and coffee for two."

Cyrus W. Field, Esq., has left for England with an able engineer, to make preparations for laying the Atlantic cable early in the spring. May the attempt prove entirely successful the next trial. The company engaged in this great work will have the sympathy and the best wishes of every intelligent citizen in every country on the globe.

A few days since there was completed a continuous line of the electric wires between this city and New Orleans, more than two thousand miles in length, being the longest continuous line in this country or Europe. Messages were sent each way so promptly and rapidly that before the last words of a sentence fell from the lips of the speaker in New York, the first words of the same were being read in New Orleans. All praise and honor to such noble achievements.

FROM EUROPE,

The news is highly interesting, though not of unusual importance. The money panic had passed away, and financial matters generally were in a healthy and satisfactory condition. Spain seems determined to have war with Mexico at all hazards. Santa Ana is said to be waiting in Cuba, to go to his old home, and plunge into the troubled waters of strife now rolling in a devastating flood over that distracted country. There seems to be no other way, than for *Uncle Samuel* to dandle Cuba and Mexico upon his parental knee and pacify them, and then send them out with a Yankee hoe and spade to earn their own living; posting up notices all around them: "*positively no admittance.*" That will be nice, cool, and comfortable, and save Spain from a fierce quarrel, and Santa Ana, perhaps, from losing his other leg. Through all Europe, except in the Neapoletan States, there is comparatively a calm. The attention of most of the crowned heads, and their high government officers, being occupied by the pleasant thoughts and anticipations connected with the approaching marriage of the Princess Royal of England, which *august* ceremony will take place on the 25th inst. May the young couple be as happy in future life as their position in the world is exalted.

A terrible earthquake occurred in Naples, by which ten thousand *lives* were lost, by some accounts, and by others some five or six, and others still estimate the number as high as fifteen or twenty thousand. From India the news is favorable. There were some thousand rebels slain at Lucknow, and they are, in most of the districts of the late rebellion, now subdued.

The English and French were both to attack Canton early in December. Each nation has a quarrel of its own, but will fight together. The Chinese have lately become very arbitrary and cruel, and need some wholsome lessons. Uncle Sam will probably look on and see that there is fair play, and have an eye to the *tea interest* of his country; for England and France may be obliged to drink coffee, unless Brother Jonathan *can supply them the pure article.* Why do you not raise tea in California? B.

Wholesale Produce Report.

We only repeat our words of last week, but more emphatically—The prices of Flour and Wheat are nominal; many sales made only on p. t. (private terms), which means pretty ticklish.

SEEDS
OF FRUIT and ORNAMENTAL TREES.

THOMAS MEEHAN,
PROPRIETOR OF THE GERMANTOWN NURSERIES,
Germantown, Philadelphia, Pa.

Includes in his business the collection and importation of
Every Kind of Tree Seeds
That can be obtained in this country or Europe. A Price Current of over Two Hundred Species which can generally be obtained with certainty, is issued every May, in advance of the season of ripening, so as to afford purchasers an opportunity to forward their orders early enough to get them in prime season; fresh, and in the best order for growing.

Most of this year's crops of seeds are now on hand, and they will be sold at the lowest rates at which they can be collected. The supply of PEAR SEED is large this season, and can be supplied at $5 per pound, or $4 50 per pound when 5 pounds are ordered.
23tf November 18, 1857.

MANUFACTURERS, &c.

PREMIUM BROOM FACTORY.
JOHN A. WOLF, Manufacturer,
And Wholesale and Retail Dealer in
CALIFORNIA BROOMS,
Corner of Drum and Sacramento streets.

☞ Brooms of all qualities made to order and constantly on hand, for sale at the lowest market rates, by
16-3m JOHN A WOLF.

HOBBS, GILMORE & CO.,
MANUFACTURERS
OF
BOXES,
Market street, between Beale and Main streets,
SAN FRANCISCO.

Gold Dust, Specie and Fruit Boxes, and all other kinds of Boxes used in trade, on hand and made to order with dispatch.

All Boxes made at our Factory are manufactured from the best quality of SEASONED LUMBER. 9v-2 3m

C. MAIN. E. H. WINCHESTER.
MAIN & WINCHESTER,
Manufacturers and Importers of
Harness, Saddles, Bridles,
WHIPS, COLLARS,
SADDLE WARE, &C.,
No. 82 Battery Street,
Between Long Wharf and Sacramento street,
SAN FRANCISCO.

N. B.—Repairing promptly attended to.—Good assortment Concord Stage Harnesses, Stage Stocks and Lashes, of the best quality, constantly on hand. v9-1 6m

[For the California Farmer.]

The Demands of Agriculture in California. No. 1.

EDITORS FARMER: While in the older States and foreign countries there are many evident reasons, resulting from their increasing population, which tend to establish the now common belief that a certain amount of Science is indispensable in the cultivation of the soil, the absence of such a dense population in California, and the abundance of good land, incline us at the first view to conclude that, with us, the same amount of scientific knowledge is not wanted, for profitably and satisfactorily carrying on Practical Agriculture. But second thoughts must convince every prudent man, and engaging in the business the most sanguine, that in many respects the reverse of this *prima facie* conclusion is nearer the truth, and that in no State in the Union is Science of more importance to the farmer than here.

The climate is so different, both as respects temperature, and the usual quantity of rain which falls in the course of a year (and the times at which it falls), and the necessity of so far obviating these difficulties in cultivating our fields in the usual way, and planting them with crops adapted to our new circumstances, so apparent, that skill of some kind must be used, or failure is certain. Science is but the accumulation of the skill of ages, and conclusions naturally resulting from observed facts. It is true that the humble Ferguson when but a boy, made clocks, and maps of the starry heavens, from the suggestions of his own brain, while tending his employer's flocks on the heaths of Scotland, and the not less humble Lawrence, without a master, drawings which by the most accomplished were recognized as masterpieces; and Yankee ingenuity in the common affairs of life, we know, is world-renowned. But so far is this from being an argument against the necessity of scientific teaching, that it is one of the principal adducible in its support. Ferguson became a distinguished astronomer, and as a scientific lecturer was the Lardner of his day; and Lawrence, president of the Royal Academy of England, and one of the most distinguished painters of the age. But how did they? Not by continuing, unaided and uninformed, to carry out their own crude notions. Their unusual attainments marked them out as prodigies, and procured for them the patronage of those who were able and willing to advance their studies. The result showed that the appreciation of their capabilities was correct. And ought not, for similar reasons, the aptitude for inventions as called forth by circumstances, so largely possessed by our citizens, to mark them out as deserving and demanding every aid which previous science and skill in agricultural knowledge are capable of affording? especially when our peculiar circumstances are taken into account, and the benefits to be derived from following such a rule, so self-evident? Taking a mere glance at Nature, we find the plants of one zone bearing little resemblance to those of another; and (in the tropical regions especially) a very different species of plants growing on the tops of mountains, from those at their base. In both cases, this is to be accounted for, speaking generally, from the difference of temperature. But when we come to examine the matter more minutely, we find that there are various circumstances to be taken into account, which have a direct influence on their production and growth, and which, though themselves so far the result of temperature, only affect it in their turn to a limited extent, though they materially modify the relationship of plants to the several temperatures in which they are found growing, or where they might otherwise be expected to grow but are found wanting. The study of this portion of Natural History is of much importance in a State like ours, and must tend greatly to diminish useless experiments in regard to the acclimating of many plants which are not indigenous to California. Again, this acclimating of plants is a fact which is well known, but the laws by which Nature submits to bend to altered circumstances are seldom inquired into by farmers, or the limits to which acclimatation can profitably be conducted, investigated. Then again, we find great varieties of soils, and on analyzing them find that there is a great disparity in their composition, and that while in some soils certain plants grow luxuriantly, there are others in which the same plants languish; and on analyzing plants e find that their components are as various as the soils on which they grow. Still more, we find that the removing of plants from their original location, to places, the circumstances of which are considerably different, is apt to give them a difference of character—in some instances better, in some worse—and that in almost all cases, by being taken under the immediate supervision of man as cultivated plants, their qualities undergo considerable change, and in most instances are improved.

To proceed further, we find that temperature does not depend entirely on latitude or altitude, and that by means of cultivation and artificial shelter the natural temperature may be improved, and plants made to grow luxuriantly in situations where otherwise they could barely exist.

All these are facts, and facts of the highest importance to California farmers, yet "the reason why" of the greater portion is not so thoroughly understood by many, as to make the knowledge thus derivable of much service in practical agriculture.

So long as we remained at our native homes, we did not stand so much in need of such knowledge. The Agriculture of any country is of all the arts practised in it the least mysterious. The blacksmith, the weaver, the cabinet-maker, severally, does his work in-doors. The farmer works in open day, the observed of all observers, and as he merely adds a wheel or two to the grand Machinery of Nature, forms properly a part and parcel of herself, and is so looked upon. No one in passing through a strange land but directs his attention to the people at work in the fields, and what they are doing, as naturally as he does to the aboriginal trees. The Agriculture of his own State he knows intimately. The veriest cockney in existence has got an uncle or cousin in the country whom he visits on the holidays, and on other occasions when he has an opportunity. And though the practice of these farmers may not in some cases be of the most scientific character, it always approximates towards it; for as Gay says of his shepherd philosopher,

"Long experience makes them sage."

They are pretty nearly right in all the more important branches of their profession. But take those simple men to California, and how can they expect but in many things to be thrown aback? Their experience has been gathered under other circumstances, and is not applicable here. They have in many things to learn anew; and in many cases, instead of finding an almost perfect system as they had seen established where they previously lived, find practices adopted which they have knowledge enough to perceive must eventually produce a very uncomfortable result.

We have different ideas of the importance of Science in exact proportion as we have studied. Self-esteem is at the bottom of this. The full value of any kind of knowledge cannot be expected to be appreciated by a person to whom it is not known. But it may be of great value, notwithstanding. Let us think seriously on the facts which I have enumerated before we discard them as useless. We may derive some good from doing so, and it can do no harm; and if we discover that they are really of importance, we may soon succeed in making our knowledge more complete.

AGRICOLA.

MILLERTON, Feb. 15th, 1858.

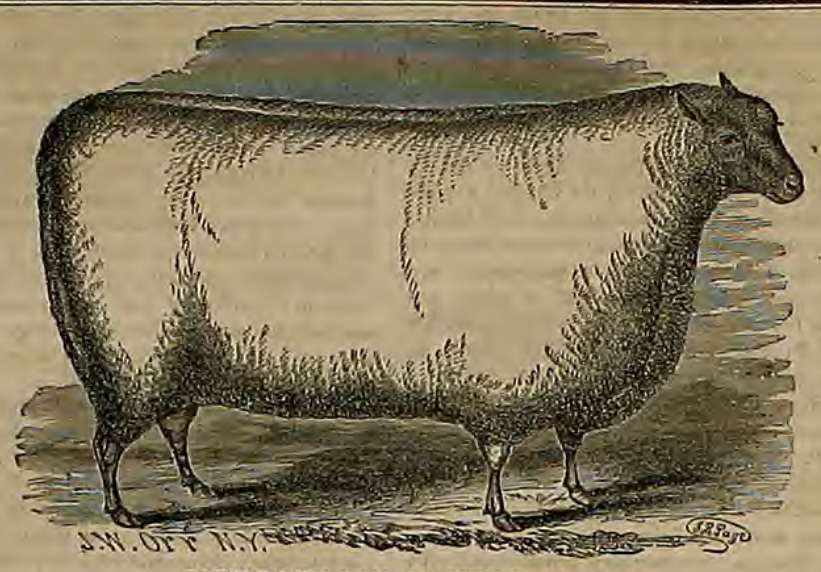
Important Facts for Farmers.

WE present to the Farmers of California the following valuable practical essay upon true California farming. We feel under great obligations to the writer, Col. T. J. Henley, the Agent of Indian Affairs, for this very valuable document.

Our readers will well remember that we have often called their attention to these most important truths; but this letter comes to us and them with the full force of a practical illustration. To any scientific mind, the climate and soil of California plainly tell that the kind of cultivation which Col. Henley has adopted so successfully, and which he recommends, must be the true way, and we trust his letter will be carefully perused, and his recommendation promptly followed.

Now is the time of action! One of the most successful cultivators, upon this plan, is I. D. Morley, near La Grange, Stanislaus county. We visited his grounds last August, on our way to the Yosemite Falls, and Mr. Morley was then planting his crops upon the land plowed and subsoiled the autumn and spring previously, and his crops well repayed the labor.

We hope, therefore, that not only will the farmers of our State examine and practice the plan of Col. Henley—but we hope, too, they will give us all their practical results, etc. Our columns are open to receive communications from practical men, and all others, and it is not our fault if they will not act upon the suggestion of Col. H. and write. We know how backward farmers are to give due thought and time to this matter; it is of the highest moment to them, and to the State, that all these facts should be widely scattered, and we know we have often earnestly invited their attention to this matter. We hope now, after they shall have read the valuable letter which follows, and which we know all will be glad to see that they will act upon it:



SOUTHDOWN RAM "MASTER FORDHAM,"

Winner of the first prize of his age and class, at the Monmouth County Show, held at Freehold; and also the first prize of his age and class at the New Jersey State Show, held at New Brunswick, in the year 1857. He is the property of James C. Taylor, of Holmdel, Monmouth County, New Jersey, and was bred by Col. Morris, sired by the celebrated buck "Young York," his dam a celebrated imported ewe, selected by Mr. Jonas Webb, to breed to "Young York." The above sheep was purchased by his present owner at the Mount Fordham sale, in June, 1856, then four months old, and brought the highest price of any lamb at the sale; and Colonel Morris unhesitatingly says that he is the best ram he ever bred.

Wheat Cultivation in California.

SAN FRANCISCO, Feb 22d, 1858.

EDITORS FARMER: In conformity with your request, I give an account of the method of cultivating Wheat on the Indian Reservations, in this State.

The extent of land cultivated on the Indian farms must, necessarily, be large, and my attention was, at an early day, directed to the importance of adopting the best method of producing the largest quantity of grain, with a given amount of force in teams, plows, etc.

Lands in California cannot be plowed in the summer, and the ordinary mode of putting in the crops by plowing and sowing at the same time, after the rains commence in the winter, is subsubject to many uncertainties. In some seasons the rains commence late, and in this way the object of a large crop is defeated. At other times the rain falls in such quantities and the showers are so continuous as to render the land unfit for plowing for days and sometimes weeks together, until the season for sowing is almost past by. Again, by this method of farming much of the land is plowed when it is *too wet*—it bakes upon the seed, and the result is a deficient crop.

In traveling through the country in the months of May and June, you frequently see fields of wheat, oats and barley upon land equal in fertility to any in the State, and yet not worth harvesting. It has been the wonder of all not acquainted with the subject, why this is so, in a country, the productiveness of which is so much the boast of its citizens.

This failure of crop can be easily traced to its true cause. The soil is good; a sufficient amount of labor and seed has been expended upon it, but there is no crop. Now what is the cause and the remedy? It is plain and simple. The labor has been performed at the wrong season of the year. The rains have prevented the plowing of the land until the season is too far advanced—the seed has been sown in February or March instead of November and December, and the *dry* season, which, like the tide, waits for no man, is soon at hand—the crop is cut short, and the farmer wonders why it is he cannot raise such crops as we "read about." He has been industrious, and has lost no time—has plowed all the time the weather would admit of it, and oftentimes exposed himself to wet and cold, and still his crops have failed. But what is the remedy? It is simply this. Plow your land in the spring, which you intend for cultivation the coming year. It is the proper season now to commence this process of farming. Plow all your land this spring that you intend to plant next fall. The crop for the present year is now in; your teams have but little else to do. They may be worked moderately, and will improve in condition—as the grass will be good during the plowing season. Start your plows now and keep them running as long as the land is in suitable condition to plow. That will be until some time in the month of May, and will enable you to prepare a large quantity of land for cultivation. The land thus prepared should be sown in the fall before the rains commence, and it requires only to be well harrowed once each each way. This secures the benefit of all the rain, and you are certain of a good crop in any ordinary season.

Wheat requires a certain length of time to mature. In the East the period between sowing and harvesting is from November to June, inclusive, eight months. In the winter it grows but little. But during that period it is *taking root*. Its principal time of growing is from the middle of March until harvest. The roots grow during the first three or four months, and after that the stalk shoots up and grows rapidly for two months; within the last month the grain forms and matures.

Any one can make the calculation that chooses. Our seasons give us time enough (but there is none to spare) for making our crops. Then those who depend upon plowing the same season they sow will be restricted in the amount they cultivate, driven for want of time, annoyed by the delays of bad weather, and exposed to the inclemencies of a California winter. But he who prepares his land the previous season, and has it sown before the rain commences, is not subject to these annoyances, and has the consolation to know that his crop is certain.

The difference between the two modes of farming is this: the man who pursues the one, drives his business before him; is never pressed for time; has always a day to spare if he desires it, and is certain of good results. But he who pursues the other, is driven by his business; is always pressed for time; has never an idle day, and the results, if certain at all, are certain to be unsatisfactory.

As it is our object, on the Reservations, to produce as much grain as possible, our plan is to plow during the entire rainy season, and until we are stopped by the dry season; and to sow all that is thus plowed before the rains begin in the fall. I would also mention, that the land which is plowed in the spring, and intended for wheat in the fall, may be turned to advantage by planting it in corn, and if planted early (a little frost does not hurt it) will produce from ten to thirty bushels to the acre, without irrigation.

If the land is situated so it can be irrigated, a better yield may be expected. The best crop of wheat I have ever seen in this country, was upon a piece of corn land, sown and put in with a harrow, before any rain had fallen. This principle is equally applicable to the cultivation of broomcorn, potatoes, pumpkins, melons, beans and peas (in drills), and in fact every description of vegetables. All land thus cultivated may be sown in wheat, with entire confidence of a good crop.

On some other occasion I propose to give you the method of cultivation which we have adopted for the land upon the coast, which is subject to the influences of the fogs; with observations upon the description of crops best adapted to their character, soil and climate.

California probably possesses a greater diversity of soil and climate, than any other country of the same extent known to civilization. On the coast the land is fertile, the climate cool and subject to heavy fogs. In the valleys and near the streams of water, the land is equally fertile; during the day these localities are subject to extreme heat, which is changed to a cool and even chilling temperature at night. One place produces wild oats, another clover, a third herdsgrass, or red-top, and a fourth bunch-grass, etc.; each apparently the natural or spontaneous product of the soil; the result of some particular characteristic or unknown quality of the soil in that particular location.

It is evident then that the peculiarities of soil as well as the mode of cultivation, should be consulted, in order to a successful system of farming. To this end a general interchange of sentiment between the farmers of the different sections of the State, is indispensable. You have the means to accomplish this, and your journal can be made much more useful by the insertion of communications from the different localities, describing the character of the soil, the time of planting, mode of cultivation, and the result of the crops.

I have myself felt the want of such information, and would be pleased to see it much more extensively given through the columns of your paper. Your ob't. serv't.,

THOS. J. HENLEY.

Cultivation of the Sweet Potato.

DOUGLASS FLAT, February 13, 1858.

EDITORS FARMER: As no one appeared in your last issue to give "Subscriber" any information with regard to the cultivation of the Sweet Potato, and as it is now near time to make preparations for a crop the ensuing season, I have concluded to give him the benefit of what little I know about it, hoping that some others, more experienced in the business, will come out and enlighten him further.

I have had but one year's experience in their cultivation, in California, but the success which I had induces me to believe that I pursued something near the right course. In the first place, I make a hotbed, by nailing four slabs or planks together, fifteen inches wide and eight by sixteen feet long (larger, if you cultivate more extensively). I fill in with half-rotted stable manure, to the depth of eight or ten inches; on this put a covering, four inches thick, of good rich soil; then split your potatoes, and place them on this covering; cover them three inches with good soil. In about six weeks, or two months, the plants will be ready for transplanting.

Having selected my ground, in which to transplant them, I plow, harrow, and roll it, thoroughly pulverizing the soil; after which I run two furrows, throwing the dirt out; in these I run the *subsoil plow* back and forth several times; then throw these two furrows back together, adding two more, thus forming a considerable ridge. This done, I proceed to run other rows in the same manner as at first, making them *four feet wide*. After finishing with the plow, I take a hoe, and draw the earth from the middles on to the ridges; and, when I am ready to put in my plants, I take a fine-toothed rake, and rake the tops of these ridges off, until they are not over ten inches high. I set my plants about fifteen inches apart. I plow and hoe twice, using the subsoil plow. The last hoeing, I draw the earth up on the ridges. I find by irrigating that they grow larger, but they are *not* as *sweet* as those where but little or no water was used.

The yield of my crop was about 350 *bushels to the acre*. They should be dug before frost kills the vines, as the potato is very easily injured by frost. Seventy-five pounds of potatoes will produce plants sufficient to set an acre of ground.

As to the best mode of keeping them I have not learned. I put some in dry sand, but they all spoiled. I should be glad to learn the proper way of putting them away for winter use and seed.

I have said all which is necessary, with the exception of naming the time of putting them out, which, I presume, varies in different parts of the State. In the valleys, where the frost is not so severe, they can be got out much earlier than with me. I put them out, last year, about the middle of May. My hotbed was made the latter part of March.

Hoping that what little I have said will induce some one, better qualified to write than myself, and to give his experience and views on the cultivation of this important vegetable, I will close.

E. F. S.

WOLF'S BROOM MANUFACTORY.—The manufacturing of Brooms in California is now an important item in home manufactures. At the State Fair at Sacramento, in 1855, California Brooms were exhibited for the first time, publicly. These were samples from Marysville and from Sacramento, both very handsome specimens; but the quantity of broomcorn grown was small and the number of brooms made very trifling. Now it has become a business of importance, and brooms are made in various sections of the State to a large amount, so much so as to preclude the necessity of importing any at all. The manufactory of J. A. Wolf, corner of Sacramento and Drumm streets, is an evidence of the success of home manufactures; the business has increased more than one hundred per cent within a year. Mr. Wolf contracts for the growing of several hundred acres of broomcorn the present year. Three hundred dozen brooms are made per month at this factory, and they are far superior to any that are imported; the prices ranging from $4 50 to $5 50 and $6 50 per dozen, according to the size, fineness and finish of the broom.

Our broom-makers on the other side will see the folly of sending their refuse stock to this market now. Brooms enough are made in California, and made good and strong enough to *sweep away all opposition from abroad*. We were pleased in looking in at our friend Wolf's factory, to see these evidences of prosperity, as Mr. W. was one of the earliest of the manufacturers and a pioneer in the trade.

ABOUT GRASSHOPPERS AND LOCUSTS
In California and the World.

BY ALEXR. S. TAYLOR, OF MONTEREY.

[CONTINUED.]

In a recent work on South Africa, entitled "Lake Ngami," etc., by Charles J. Anderson, London, 1856—1 vol, 550 pages, post 8vo, the author describes the Locusts of that country, in February, 1852: "The day after our departure we met with vast numbers of the larvæ of the Locust (Gryllus devastator, Lich.) commonly called by the Boers, 'voet gangers,' literally, footgoers. In some places they might be seen packed in layers several inches in thickness, and myriads were crushed and maimed by our wagon and cattle. Towards nightfall they crawled on to the bushes and shrubs, many of which, owing to their weight and numbers, were either bowed down to the ground, or broken short off. They were of a reddish color, with dark markings; and as they hung thus suspended they looked like clusters of rich fruit. These 'voet goers' are justly dreaded by the colonists, as no obstacles seem capable of staying their progress. The Orange river is even no obstacle, the drowned insects affording a bridge for their headlong survivors to pass. Fires are extinguished by their numbers, and to diminish their numbers would appear like attempting to drain the ocean with a pump.

"As we travelled on, next morning, we encountered the Locust itself, and in such masses as literally to darken the air,

> 'Onward they came, a dark, continuous cloud,
> Of congregated myriads, numberless,
> The rushing of whose wings was as the sound
> Of a broad river, headlong in its course,
> Plunged from a mountain summit; or the roar
> Of a wild ocean, in the autumn storm,
> Sheltering its billows on a shore of rocks.'

"Our wagon, or any other equally conspicuous object could positively not be distinguished at the distance of one hundred paces. In a particular spot, within the circumference of a mile, they had not left a particle of any green thing. The several columns that crossed our path, in the course of the day, must have, each, have been many miles in length and breadth. The noise of their wings was very great; not unlike that caused by a gale of wind through the shrouds of a ship at anchor. It was interesting to witness, at a distance, the Locust rise abruptly in a compact body, as if propelled by a strong gust of wind; then, suddenly sinking, they would disperse into smaller battalions, like vapors on a hillside at early morn. Or they would resemble huge columns of sand and smoke, changing, every minute, their shape and evolutions.

"During their flight, numbers were constantly falling like large flakes in a snowstorm. At the approach of night they encamp, and woe to the spot they select for a resting place! for on the rising of the sun, places previously rich in vegetation are left as bare and naked as the Sahara.

"'When a swarm lights on a garden,' says the Rev. Mr. Moffatt, 'or even fields, the crops, for one season, are destroyed. I have observed a field of young maize devoured in the space of two hours. They eat not only tobacco, but also flannel and linen.'

"To the poor Bushmen of the desert, who have no crops to lose, their arrival is a cause of rejoicing. Pringle, in his song of the wild Bushman, has the following lines:

> 'Yes, even the wasting locust storm,
> Which mighty nations dread,
> To me nor terror brings, nor harm;
> I make of them my bread.'

"On the present occasion we found a great number of Hottentots, as also Hill Damaras, busy collecting the Locusts by making fires of dry fuel directly across their path, and as they passed over the flames their wings were scorched and they fell helplessly to the ground. They are also collected by cartloads at night, when they have retired to rest. The Locusts, after being partially roasted, are eaten fresh, or they are dried in the hot ashes and stored away. They are also reduced to powder and mixed with water to a kind of thick soup; I have tasted them, prepared in various ways, but never found them palatable. *But they must contain a vast deal of nourishment, since the poor people thrive wonderfully on them.*

"Birds of almost every description, more especially storks and kites are seen devouring them greedily. The great enemy, however, is the Locust Bird, or "spring hang vogel" of the colonists—a species of thrush [the same family and character as our California thrush and blackbird —A. S. T.], about the size of a swallow, and which is a constant attendant on the insect, which moreover prey on each other when crippled, its companions instantly devouring it. The Locust of South Africa is said to be different from that of Asia.

"The Cape Colony has been particularly subject to this dreadful scourge, which is invariably followed by famine. Their inroads are periodical; according to Pringle, once in about every fifteen years. In 1808, they made great waste and disappeared, not returning until 1824. They then remained for several years, but in 1830 took their departure. The proper home of the Locust is yet a mystery. Experience tells us, in South Africa, that they come southwards, flying from the north. They rarely appear, in any numbers, except in years of abundance. We encountered them almost every day, *for several months*, in innumerable swarms, until we crossed the Orange river, when we lost sight of them."—Vide chapter 23.

Gordon Cumming, in his "Lion Hunter in South Africa," 2 vols., 8vo, London, 1855, gives the following description of a swarm of Locusts, during his visit to that country in 1843, vide vol. 1, page 74:

"On the following day (6th November) I had the pleasure of beholding the first flight of Locusts that I had seen since my arrival in the colony. We were standing in the middle of a plain of unlimited length, and about five miles across, when I observed them advancing. On they came, like a snowstorm, flying slow and steady, about a hundred yards from the ground. I stood, looking at them, until the air was darkened with their masses, while the plain on which we stood became densely covered with them. Far as my eye could reach—east, west, north, and south—they stretched in one unbroken cloud; and more than an hour elapsed before their devastating legions had swept by. I was particularly struck with this most wonderful and interesting sight; and, I remember at the time, my feeling was one of self-gratulation at having visited a country where I could witness such a scene."

The present U. S. Treasury Agent for the Pacific Coast, in his "Journal of a Whaling Voyage" —New York, 1848—mentions the use of Locusts, as an article of food, mixed with rice, among the people of Madagascar. In a conversation with this gentleman, in August, 1857, it would seem that the visits of the Locusta to Madagascar, and the Portuguese settlements of Mozambique, are not unfrequent. This of course would follow from the proximity, and the similarity to the soil and climate of the Cape Colonies and settlements.

In the "Utah and the Mormons," by B. G. Ferris—1 vol., 8vo, 347 pages, New York, 1854, mention is thus made of the visitation of the Locusts, in the Salt Lake country, on page 149:

"The year 1848 was one of privation and suffering, prior to the maturing of the growing crops. Among other discouraging incidents, a curious kind of 'cricket' made its appearance, in myriads, manifesting all the destructive properties of Eastern countries. All vegetation was swept clean, before its frightful progress, as effectually as the grass before the scorching fury of a prairie conflagration, and the crops, put in with so much toil, and on which so much depended, were fast disappearing. Suddenly, however, flocks of white gulls floated over the mountain tops, with healing in their wings, and stayed this withering destruction by feasting on the destroyer. It is no matter for wonder that the leaders should place this in the list of miraculous interpositions in their favor, nor that the mass of the saints should implicitly believe that the gulls were hatched into sudden maturity for the occasion; but it is a little strange that one, of the evident intelligence of Col. Kane, should speak of these fowl as 'before strangers to the valley.' The crickets and the gulls have been annual visitors since, as they were before, the bane and the antidote together."

Every western man remembers the visitation of Grasshoppers in 1855 and '56, in Kansas, Nebraska, and Minnesota Territories, which caused such injury to the crops of the Indians. In the travels of Jonathan Carver, in the northwest parts of the Mississippi and Lake Countries—1 vol., 8vo, London, 1779, the following mention is made of the Locust or Grasshopper: "I must not omit to mention that the Locust is a septennial insect, as they are only seen, a small number of stragglers excepted, every seven years, when they infest these parts, and the interior colonies, in large swarms, and do a great deal of mischief. The years when they thus arrive are denominated the Locust years."—Page 494.

But it would be useless to continue these accounts of the Locusta, as there is scarcely a writer who has written on Egypt, Palestine, Turkey in Asia, and Turkey in Europe, all the Mediteranean countries, South Africa, Java, the Phillipines, Persia, Arabia, China, and the dry interior countries of Hindostan, and of Central Asia, from the sacred writers to the profane writers of Greece and Rome; of Herodotus, Strabo, and Diodorus; the Chronicles of the Crusaders and of the Monks of the Holy Land; of Marco Polo, of Sir John Maundeville, and of innumerable other authors, poetic, dramatic, historic, and geographic; the extracts from which would form a book of the greatest interest and curiosity.

The following extract from La Gironiere's Twenty Years in the Phillipines, 1 vol., 8vo, Harper's English edition of 1854, will show the terrible effects of the peculiar *Locusta* of that archipelago of islands. The Locusta may have its nativity, in some of the volcanic and arid districts of that country, effected by droughts, but its ravages in richly wooded tropical countries are small compared to such districts as Egypt and California:

"How often at Jala-Jala did I behold hurricanes and inundations destroy the fine harvest that I had protected with so much labor against the buffalos, the wild boars, monkeys, and the Locust—an insect still more destructive than *all* the other pests which I have mentioned—one of the plagues of Egypt, seemingly transported into this province, which almost regularly every seven years leave the islands of the south in clouds, and fall upon Luzon, bringing desolation and often famine. It is indeed necessary to have witnessed this desolation to be able to form any idea of it. When the Locusts arrive, a fire cloud is perceived in the horizon, formed of countless myriads of these destructive insects. They fly rapidly, often covering, in a closely packed body, a space of two or three leagues in diameter, and occupy from five to six consecutive hours in passing over head. If they perceive a fine green field they pounce down upon it, and in a few minutes all verdure has disappeared, the ground is stripped completely bare; they then continue their flight elsewhere, bearing on their wings destruction and famine.

"At evening, it is in the forests, on the trees, that they take shelter. They hang in such dense masses upon the ends of the boughs that they break down even the stoutest limbs from the trees. During the night, from the spot where they are reposing, there issues a continual croaking, and so loud a noise that one scarcely believes it to be produced by so small an insect. The following morning they leave at daybreak, and the trees upon which they have reposed are left stripped and broken, as though the lightning had swept the forest in every direction; they pursue their course elsewhere, to commit fresh ravages. At certain periods they remain on vast plains, or on fertile mountains; where, elongating the extremity of their bodies in the form of a gimlet, they pierce the earth to the depth of an inch and upwards, to deposit their eggs. The operation of laying being completed, they leave the ground pierced like a sieve and disappear, for their existence has now reached its termination. Three weeks afterwards, however, the eggs open, and myriads of young locusts swarm the earth. On the spot where they are born, whatever will serve them for food is quickly consumed. As soon as they have acquired sufficient strength they abandon their birthplace, destroy all kinds of vegetation that comes in their way, and direct their course to the cultivated fields, which they desolate until the period when their wings appear, when they take flight to devastate other plantations."—Vide pages 229, 30 and 31.

The Grasshoppers made their appearance again, in 1856, in Oregon, Utah, and California, and in Texas, near Austin, and westward, but in, greatly diminished numbers, and so as not to do extensive harm, except in partial localities. But it seems, from the periodical press, that in the Upper Mississippi (Minnesota, etc.) they committed great injury in the fall of that year, as the following extract will show:

"At Little Falls, says the St. Anthony Express, they destroyed corn, oats, wheat, and everything of the grain kind which came in their way. At Elk river they appeared in a perfect cloud, and lighting upon a cornfield of twenty acres, destroyed the whole crop in a short space of time. At Crow Wing, on the farm of Isaac Moulton, they destroyed 500 bushels of oats.

Their ravages extended along the first central mesas or steppes; bordering eastward the Rocky Mountains, covering the dry soils of Texas, and away down into the south of Mexico. In the vicinity of Cordova, in the State of Vera Cruz, the people made "a regular campaign against them, and succeeded in destroying one hundred and ninety-two arobas, computed as numbering four hundred millions of Grasshoppers. In the State of Guerrerro they also committed great injury, particularly within the districts around Acapulco.

It would seem that the *Locusta* makes its destructive appearance within the boundaries of the U. S. territories, west of the Mississippi, in some portion or other, nearly every year. The following extract, from a correspondent of the New York Tribune, dated Fort Kearny, 31st August, 1857, and who was in the expedition of Colonel Sumner against the Cheyenne Indians of the upper branches of the Missouri, shows the effect of the re-appearance of the plague in a strong light:

"The grass along our route has been short and scanty, although refreshed by the recent rains. It is injured by myriads of Grasshoppers, some of which are monstrous in size. I have noticed several between three and four inches, and many nearly three inches long. Last Friday, a swarm passed over the fort, *which darkened the sun so as to render it impossible to gaze at it with the naked eye.* We saw this swarm at a distance of ten or twelve miles, at which it resembled a cloud of smoke."

In the celebrated old Roman work of Pliny, the elder, on the Natural History of the World, published about the year 77 of the Christian Era, the great philosopher discourses in this wise of *Locusts* and *Grasshoppers*. Some of his history, to be sure, reads rather queer to Californians, but in the main his statements concerning the *Locusta* will be proved, as most faithful to nature.

The Edition we quote from is that of Bostock and Riley, published by H. G. Bohn, London—5 vols., 1856. In book 29, chapter 30, Pliny says, "that the smaller kind of *Locusts*, destitute of wings, are called *Attaleba*, and are reputed a good remedy for the sting of Scorpions."

"Book 11, chapter 32. The Cicada (general ancient name for Grasshopper, as Cuvier assumes, in his notes on Pliny), also lives on dew and spiders, and is divided into two kinds. The smaller kind are born the first and die the last, and are without a voice. The others are of the flying kind and have a note; there are two sorts, those known as *Ackastæ*, and the smaller ones called *Tettigonia;* these last have the loudest voice. In both of these last-mentioned kinds, it is the male that sings, while the female is silent. There are nations in the East that feed upon these insects—the Parthians, even, wealthy and affluent as they are. They prefer the male before it has had sexual intercourse, and the female after; and they take their eggs which are white. They engender with the belly upward. Upon the back they have a sharp edged instrument, by means of which they execute a hole in the ground to breed in. The young is at first a small maggot in appearance, after which the larva assumes the form in which it is known as the *tettigometra* (or mother of the *Grasshopper*.—Com.) It bursts its shell about the time of the summer solstice, and then takes to flight, which always happens in the night. The insect at first is black and hard.

"This is the only living creature that has no mouth; though it has something instead, which bears a strong resemblance to the tongues of those insects which carry a sting in the mouth. This organ is situated in the breast of the animal, and is employed by it in sucking up the dew. [The trunk of the *Grasshopper*, Cuvier says, is situate so low down that it seems to be attached to the breast. With it the insect extracts the juices of leaves and stalks.—Commentators].

"The corslet itself forms a kind of pipe; and it is by means of this that the Achetæ utter their note as already mentioned. Beyond this they have no viscera in the abdomen. When surprised they spring upward, and eject a kind of liquid, which, indeed, is our only proof that they live upon dew. This also is the only animal that has no outlet for the evacuations of the body. Their powers of sight are so bad, that if a person contracts his finger, and then suddenly extends it close to them, they will come upon it just as though it were a leaf. Some authors divide these animals into two kinds, the *surcularia* (or twig *Grasshopper*.—Com.) which is the largest, and the frumentaria (or corn *Grasshopper*), by many known as the *avenaria* (or *oat Grasshopper*. Com.)

"The *Grasshopper* is not a native of countries that are bare of trees; hence it is that there are none in the city of Cyrene (in ancient Lybia), nor is it in fact produced in Champaign countries, or in cool and shady thickets. They will take to some places much more readily than others. In the district of Miletus (in Asia Minor), they are only to be found in some few spots; and in Cephalenia (Ionian Islands), there is a river which runs through the country, on one side of which they are not to be found, while on the other they exist in vast numbers. In the territory of Rhegium (in Italy, opposite Sicily), they have no note, while beyond the river in the territory of Locri, they sing aloud. Their wings are formed similarly to those of bees, but are larger in proportion to the body."

"Book xi, chap. 35, on *Locusts*.—Those insects which have feet move sideways. Some of them have the hind feet longer than the fore ones, and curving outward, the *Locust* for example. These creatures lay their eggs in large masses in the autumn, thrusting the end of the tail into holes which they form in the ground. These eggs remain under ground throughout the winter, and in the ensuing year, at the close of spring, small *Locusts* issue from them of a black color, and crawling without legs and wings. (This is a mistake, as the young *Locusts* are not destitute of feet.—Com.) Hence it is that a wet spring destroys their eggs, while, if it is dry, they multiply in great abundance.

"Some persons maintain that they breed twice a year, and die the same number of times; that they bring forth at the rising of the Virgiliæ (7th of May), and die at the rising of the dog star (18th of July), after which others spring up in their places. According to some it is at the setting of Arcturus (11th of May), that the second litter is produced. That the mothers die the moment they have brought forth, is a well known fact, for *a little worm immediately grows about the throat which chokes them.* At the same time too, the males perish as well. This insect which thus dies, through a cause apparently so trifling, is able to kill a serpent by itself, when it pleases, by seizing its jaws with its teeth. (Cuvier treats the story as purely imaginary.) *Locusts* are only produced in Champaign places, that are full of chinks and crannies. In India it is said that they attain the length *of three feet* (which Cuvier seems to say is erroneous, as they have not been found more than a foot in length), and that the Indians *dry the legs and thighs and use them for saws!* [Here is a fine old yarn—the italics are ours. It is pleasant to read such affairs in these matter-of-fact times; it smacks of Sinbad the sailor, which men and women will half believe, if for no other purpose than for the jollity and fun of getting out of the *tyranny of facts*, and of what is called *absolute truth*. What a pleasant thing it is to lose oneself now and then in the mazy wanderings of the mystic forests and the illimitable plains of visible nature, or in the region of clouds and of airy imagination, where no argument or logic holds the value of a *tlaco;* for there the weary mind can fling off its slavery of vile cares and anxieties. We hope one of these days to see one of the saws made of Locust's legs.—A. S. T.]

"There is another mode also, in which these creatures perish: the winds carry them off in vast swarms, upon which they fall into the sea or standing waters, and not as the ancients supposed, because their wings have been drenched by the dampness of the night. The same authors have also stated that they are unable to fly during the night, in consequence of the cold, being ignorant of the fact, *that they travel over lengthened tracts of sea for many days together*, a thing more to be wondered at, as they have to endure hunger all the time as well, for this it is which causes them to be thus seeking pastures in other lands.

"This is looked upon as a plague inflicted by the gods (alluding to the ravages committed by the migratory Locust, *Grillus mygratorius* of Linnæus); for as they fly they appear to be larger than they really are, while they make such a loud noise with their wings, that they might be readily supposed to be winged creatures of quite another species. Their numbers too are so vast, that they quite darken the sun; while the people below are anxiously following them with the eye, to see if they are about to make a descent, and so cover their lands. After all they have the requisite energies for their flight; and as though it had been but a trifling matter to pass over the seas, they cross over immense tracts of country, and cover them in clouds which bode destruction to the harvests, scorching numerous objects by their very contact; they eat away everything with their teeth, the very doors of the houses even.

"Those from Africa are the ones which chiefly devastate Italy. More than once the Roman people have been obliged to have recourse to the Sybilline Books, to learn what remedies to employ under their existing apprehensions of impending famine.

HORTICULTURAL.

COMMERCIAL NURSERY, SAN JOSE.

THE Proprietors of this old-established Nursery are now prepared to furnish to their friends and patrons the

Largest and Most Select Collection of
FRUIT, SHADE, AND ORNAMENTAL TREES, VINES, &c.,
ever offered in this State,
At Reduced Prices!

The FRUIT TREES offered by us are all grown and worked in the Nursery by us, from varieties obtained from the celebrated MOUNT HOPE NURSERIES, o Rochester, most of which we have fruited in our Orchards, and offer for sale only such varieties as we have found to be best adapted to this climate.

We have in Nursery:

25,000 APPLE TREES, of two years' growth, large size, thrifty, fine heads.
10,000 One year from graft.
1,000 Three years' growth, extra large, fine Trees, suitable for planting in yards and gardens, and such as cannot be obtained in any other Nursery in the State.
2,000 PEAR TREES on Pear stocks, one and two years' growth.
2,000 Pear, on Angiers' Quince, one year from bud.
3,000 CHERRY TREES, of twenty-five best varieties.
5,000 PEACH, of twenty varieties, one year from bud.
1,000 PLUM, of twenty best selected varieties.
APRICOTS, six varieties.
NECTARINE, SOFT-SHELLED ALMOND, &c. &c.
10,000 GRAPE VINES, Los Angeles, 1, 2 and 3 years' old.
3,000 Catawba, Isabella, Sweetwater, and foreign varieties.
GOOSEBERRY, STRAWBERRY, RASPBERRY, CURRANTS, &c., &c.

Catalogues can be obtained on application at the Nursery, by mail or otherwise

All orders from a distance carefully attended to, securely packed and shipped to any part of the State, at the risk of the purchaser.

Our terms are cash, or short credit, on approved notes, on delivery of the Trees at the Nursery.

Explicit directions for marking and shipping should accompany each order, and when particular varieties are wanted, state whether and to what extent others may be substituted, in case the varieties cannot be furnished. Persons trusting to us to select varieties may rely upon being furnished with the leading sorts, and proper proportion for each season.

v8-23 SMITH & WINCHELL.

Agent, in San Francisco, C. W. LECOUNT.

SAN JOSE NURSERY.

FRUIT TREES,

ORNAMENTAL TREES,
ORNAMENTAL SHRUBS,
18,000 ROSES.

....ALSO....

GREENHOUSE PLANTS,
GRAPE-VINES,
ETC., ETC., ETC.

FOR SALE in lots to suit purchasers. TRADE supplied at a liberal discount.

☞ I have the larest variety of Fruit and Ornamental Trees, Shrubs, Roses, etc., that can be found in any one Nursery in California.

Being determined to sell, my prices shall be very low, so as to give full satisfaction to my old customers as well as to new patrons.

*** All Orders will be promptly attended to, and the Trees well packed up in bundles or boxes—according to size, and the distance they have to go—and delivered free on board the steamer at Alviso. My Collection of

ROSES

received the FIRST PREMIUM at the State Fair held at San Jose.

My Catalogue, giving a description of each variety I have to sell, and giving information about transplanting, the prices, etc., can be had at the Nursery.* Direct to

L. PREVOST,
San José, Cal.

*The prices in the catalogue are for trees of large size; for smaller ones the price will be greatly reduced, and a still further reduction made when taken by the quantity.

Agents:
MR. DELABIGNE, 64 Clay street, San Francisco.
C. W. LECOUNT, 99 Davis street, San Francisco.
MR. JACQUIER, Sonora. MR. A. VIENRICH, Oroville.
The above named will have Trees to sell and will receive and forward orders to me. [24

STOCKTON-RANCH NURSERY.

Almaden Road, between San José and Santa Clara.

50,000 FRUIT TREES.

50,000 NURSERY TREES of the VERY CHOICEST Varieties, of the most important kinds of Fruit, raised under the personal care of the subscribers.

The Varieties consist of Apple, Pear, Plum, Cherry, Peach, Apricot, Nectarine, and all the needed kinds of fruit trees for the Orchard and Private Garden.

The undersigned having had the experience of years in England, and many years in the Nursery of Horey & Co. of Massachusetts, need only say that they can warrant Trees to be what they are represented, and that they have taken pains to offer as choice a collection as can be be found in the State.

Purchasers are invited to visit the Nursery, as they may rest assured the quality of the Trees and the price will be sure to suit.

☞ C. W. LECOUNT, of San Francisco, is our only Agent. [23] B. S. FOX & CO.

SANTA CLARA NURSERY.

Half a Mile West of Santa Clara, on the San Francisco Road.

The Proprietor of this extensive and well-known Nursery, informs the public that he has for sale this winter, a large and very choice stock of the very best varieties of

FRUIT TREES, VINES AND PLANTS.

Consisting in part of
3,000 two year old Apples;
12,000 one year old Apples;
2,500 one year old Pear, on Pear stock;
2,500 one and two year old Cherry.

Besides a large stock of
PEACH, PLUM, APRICOT AND NECTARINE TREES.

Also a lot of
Fig Trees, Raspberries,
Currants, Gooseberries,
and about 20,000 *Grape Vines.*

500 lbs. China Sugar-Cane Seed,
At $1 25 per Pound;

One pound and a-half being a great plenty to seed one acre of ground.

The Proprietor will sell his Trees, Bushes and Vines as low as any other responsible nursery in the country. His stock is taken wholly from trees which have borne fruit in California, and is therefore known and reliable.

☞ All orders will be promptly attended to. The expense of packing and freight will be charged to the purchaser. Terms cash.

L. A. GOULD, Proprietor.
Santa Clara, Nov. 24, 1857. v7-22 3m

Mammoth Squash.

WE have a few seed of the MAMMOTH SQUASH, weighing over *Two Hundred* Pounds.
Packets of seed, 50 cents each, for sale at this office. 4

Choice Seeds.

A VERY choice assortment of GARDEN SEEDS, selected with great care, expressly for
4 4t BRYANT & CO., 68 Battery st.

NEVER HOLD MALICE.

BY MISS ELIZA COOK.

Oh, never hold malice! it poisons our life,
With the gall-drop of hate, and the night-shades of strife.
Let us scorn where we must and despise where we may,
But let anger, like sunlight, go down with the day;
Our spirits in clashing may bear the hot spark,
But no smouldering flame to break out in the dark:
'T is the narrowest heart that creation can make,
Where passion folds up like the coils of a snake.

Oh, never hold malice! it cannot be good,
For 't is nobler to strike in the rush of hot blood,
Than to bitterly cherish the name of the foe—
Wait to sharpen a weapon or measure the blow.
The wild dog in hunger, the wolf in its spring—
The shark in the waters—the asp with its sting,
Are less to be feared than the vengeance of man,
When it lieth in secret to wound where it can.

Oh, never hold malice! dislike if you will,
Yet, remember, humanity linketh us still:
We are all of us human, and all of us erring,
And mercy with us should always be stirring.
Shall we dare to look up to the Father above,
With petitions for pardon, or pleading for love—
Shall we dare, while we pant for revenge on another,
To ask from our God, yet deny to a brother!

To the Citizens of California.

MESSRS. EDITORS: I herewith forward to you a continuation of the article sent you by the steamer of the 5th January. Hoping that this may accord with your views and find a place in your journal, I send it forth.

In my last I promised to state to you my reasons for believing that Capt. Randalls's New Line of Steamships would be an immediate and permanent benefit to California.

The first advantage I propose to consider is the decided *moral* influence it will exert upon her own citizens and upon the world. For States, as well as individuals, have a moral or immoral character and influence. It is well, while the individual or State is young, to take the right direction. Beginning right, lays the foundation of immediate and prospective stability in well doing.

How often has it been said of young men of wealth, "that they were very clever, and that they might as they then were, live respectably and be comparatively useful; but why should they, with all their endowments, their wealth, and social position, spend their whole life in *puerile* inactivity? Why do they not come out and do something, worthy their name, their standing, their country and their race?" Let them take a high stand on the side of morality, virtue and humanity. Let a young man, thus situated, strike boldly from his compeers, who are content to follow any who will lead. Let him perform a noble, magnanimous and benevolent act, and continue in a course of well doing, and the prestige of his name, character and influence will command the admiration of all, and from the impregnable position he occupies, must necessarily become irresistible, and sweep away every barrier opposing it. So with a young State, starting out upon her radiant path of honor, fame and immortal glory. California is yet young, not having even entered her teens. But she is rich, surpassingly rich in gold, rich in agricultural products, in a glorious climate, rich in physical beauty, in the magnificent grander of scenery, but richer far in the sterling integrity, the intelligence, activity, enterprise, zeal and perseverance of her population. Why should she not now with a graceful bound come into the brilliant circle of the sisterhood of Stars, and wave higher and wider the victor's laurel crown? She has all the elements of success, of a glorious victory within herself. She has the wealth, intelligence, tact, talent, the bone, muscle and sinew to do all that is necessary to render her one of the grandest States in the world. All that seems to be wanting is, that this power should be concentrated and rightly directed. Why should she not now rise up and do a work that will add more permanent renown to her name than all the gold that sparkles in her mines. Let her build these steamships with her own capital, or mainly so, and she will do that which will be of more benefit to her in a moral and financial view, than may at first appear.

It would surely be a work of humanity to build ships that will be safe, swift and comfortable, to ply between New York and San Francisco, so that when your friends leave your shores you may not soon hear that the waves roll over them; that you and your families may travel safely and pleasantly, also. California has long been charged with being reckless as to the safety of her citizens. Stand forth, I beg you, and wipe away the very suspicion that such is now the case. Show the world that you *do care* for your fellow citizens, that you think too much of them to let them be led forth as sheep for the slaughter, to feed the hungry maw of the monsters of the deep.

Let this work be done and it will be seen that *parsimonious cupidity cannot hide from California her duty to herself and to the world.* Here in the East, many really feel a little jealous that her people are to bring out, to a successful accomplishment, this grand enterprise. Do this and your moral influence as a State will be far stronger than it ever could be otherwise.

Strangers wishing to associate with those they know not, always prefer such as have a high sense of morality combined with manly vigor, and physical comeliness. So also those seeking a home in a young and far-distant State, wish and would greatly prefer that the State as such should possess a high-toned moral character and influence. I do not say you cannot be moral *without* this, but that *with it* you will wield a far mightier power.

This would be a work that would secure the respect and admiration of mankind. When done, Californians will breathe deeper and freer, will feel conscious of having begun and finished a humane and praiseworthy work, and the very exercise of the powers called forth to accomplish the object will make them feel that they can take still higher ground and accomplish greater works. It is unnecessary in this connection to explain to you what this enterprise proposes to do. You are doubtless familiar with its plans and details, as they have been published in the FARMER, and most of the other prominent journals of the country. If the work is done by you, you will never have reason to regret it. If others perform it, you will lose the opportunity of leading the world in one of the grandest enterprises of the age, one that will produce as great a change within the next ten years in the comfort, speed and safety of travel, as has been witnessed since Fulton first in his pet boat steamed up the Hudson river.

It may be said that all this is very well, but does not immediately, or only very remotely, benefit us.

Now my *second* reason is, that it will immediately put money in your pockets, and that at the end of the year you will have some five millions more money than you would otherwise possess. The ships will cost one million of dollars, out of pocket; very well. You will save the five hundred thousand dollars per month, in hard cash, now paid to foreign companies, and what is more valuable still, many precious lives. You will pay $1,000,000 for steamships, and in one year after they are built you will have six millions saved to the State, or $5,000,000 above what has been expended, and still own the best stock in the world. It is unnecessary for me to point out to you, the great good that this money yearly saved by all classes, might do, in enriching the State, in improving the lands, building manufacturing establishments, in producing the raw material, opening new sources of wealth scarcely yet dreamed of, in establishing schools, colleges, and seminaries of learning, in nurturing and sustaining many embryo sources of wealth and power, yet scarcely known and little appreciated. You thus have it in your power, *now* to grasp the lion by the mane, that has so long *devoured* your *substance*, to pull out his teeth, and cut off his claws, and if you do not *now* do it, he may devour *you* also. Will you not weigh this matter well, and act with the decision, and energy, becoming citizens of the most glorious State on which the sun ever shone!

In the third place, it will benefit you by adding some one hundred thousand annually to the population of the State from the very classes which you wish to be there. Miners, farmers, mechanics, tradesmen, merchants and professional men, will be able then to send for their families, or go for them even, without spending the earnings of years, to get them safely there. From San Diego to Oregon, from the Pacific to the Nevadas, the whole land will begin to swarm with intelligent, honest, and hardy pioneers. Many will carry large capitals with them, few will bring capital away. Railroads will be constructed; splendid roads will wind among the valleys, and climb up the mountain sides. The home of a happy, busy and prosperous population, will cheer all the land. Countless spindles will be in motion, thousands of looms will weave webs, the warp and woof of which, were produced upon the soil, which may well compare with England's choicest fabrics, or the most celebrated looms of France. Sugar enough to supply the whole continent can be produced there. Should the grain market of the world be insufficient to meet the demand, you can plant your seed, harvest your crop, and deliver it in Europe or at any port in the world, sooner and cheaper, than it could possibly be done by any State on this side of the Rocky Mountains. Thus you can, if you will, control the grain markets of the world.

There is no land where sheep can be made more *immediately* and permanently profitable than in California. Vast coal-fields underlie many portions of the State, which will, sooner or later, be opened. Marble, as rare as any imported from Italy or Egypt, exists in many portions of the State. Iron ore enough to keep scores of smelting furnaces in constant and profitable operation, is known to exist.

To render all these adventitious advantages, availably profitable, there should be at least half a million more of the right kind of citizens added to your present number. This can easily be done in less than five years from the time your steamers commence running. You will retain, during these five years, at least six millions of dollars per annum within yourselves, which you now pay to foreign capitalists. Who can tell what advantage the State will receive from this large increase of population during each year? The accruing profits from all departments of human industry, largely increasing every year, added to the profits of the steamers, will render the State one of the most thrifty and prosperous in the whole Union. It will thus be seen that in carrying forward this enterprise you do not merely benefit the shareholders, who are mostly from your own citizens, but also set in motion those mighty impulses that will work out for you a grander destiny than has ever fallen to the lot of any country. Onward is the watchword that rings out from the living masses all over the land. The multitude is swayed to and fro by the electric current of thought flaming out to enlighten and benefit mankind. In the mighty struggle for wealth and renown that is now commencing, young as your State is, you may take the lead, if you will, and the living tide of immigration rolling over all your land, will enable you to plant your standard and unfurl your banner upon the Sierra's snowy summit, and there it should ever wave, seen and admired by the whole American continent, and respected by the civilized world.

Another immediate and permanent benefit that would surely arise from introducing this line of steamships, will be the securing of a population, that will build up the best interests of human society. Now, one great objection urged by many against going there, is, that there is not that refinement, virtue, and polish there that secures the happiness of those leaving the homes and the home circles in the East. Even in the larger cities, society has not assumed that fixed and stable character that it has enjoyed in other lands. Families are unwilling to leave the elegancies and comforts of established homes, until they are assured at least that there will be enough refined society to render their new homes pleasant. No prudent parent would be willing to take a family and place them in a position where they would be cut off from nearly all that is held sacred around the domestic fireside. You have there now, many of the choicest spirits gathered from all lands, but so widely dissevered, that those already there cannot find the material with which to rear and adorn the great social fabric. They need many, very many, polished stones for that majestic structure, that will, at the same time, be the pride of every true American heart, and challenge the admiration of all. The late financial storm has swept over all the principal civilized countries on the earth. Like a strong giant it has gone forth, rocking the monetary world to its very centre, and with iron heel, crushed into the dust the massive pillars of the temples of wealth, and driven forth their inmates to grapple with the stern realities that cluster along their rugged path. Oh, will you not use all honorable exertions to lead them to your shores? How much of intellectual wealth, of business tact and talent, of mechanical skill, of agricultural and horticultural knowledge, could you secure; what vast literary attainments to guide, elevate, and purify the sentiment arising from the new combinations constantly taking place.

There is another thought connected with this matter, that should have great influence with all true Californians. It is stated that an immense Dutch and German emigration will commence early in the spring, and that those proposing to come to this country are mostly farmers—some mechanics and merchants—nearly all of whom will bring more or less capital with them, and they intend to invest their money in lands, or in manufacturing establishments in some of the new States or Territories of our Union. There will be a steamship precisely like the California steamers, connected with them, running from New York to Havre, Bremen, and Southampton, thus enabling passengers to pay from any of those ports on the Continent to California if they wish so to do. Now I ask you in all candor, if it is not worth a strong effort to secure a large portion of that population. They will not go unless you have the means of carrying them, with their household treasures, their siver and gold, in safety. Our new States and Territories are even now forming plans, and making extensive arrangements to turn that mighty tide as soon as it touches our shores, to their own borders. They are building railways and steamboats, constructing roads and bridges, and doing all in their power to render their respective localities desirable places for a pleasant and permanent residence. In this they are right; I commend them for it and so will every right-thinking man.

Whatever California may think of doing in this matter should be done quickly, for the heavings of that mighty tide are even now perceptible on the other side of the water. It will be far easier to give it *a direction towards California at first*, than to *turn* its rushing and impetuous power, after it has fairly begun to flow in another direction.

If no exertions are made to this end, I do not say that California *is ruined*, by no means. But I would simply ask, *what you will do?* You have the talent, tact and energy necessary to transact the business of a million or more. Every steamer brings us news of dull times. Why so dull, with all the business habits, capital and facilities possessed by you? Simply because your population is so small that it is all soon supplied with the necessaries and even the luxuries of life. Then the only movement in the business world there, is just enough to keep it from entire and absolute stagnation. Clipper ships are constantly arriving, and landing upon the wharves, supplies sufficient for four times your present population. What will this state of things lead to, if your supplies increase four times as fast as your consumers? I leave you to work out the problem, believing that your figures will not lie, though my fears may be groundless.

There is another point in relation to your position, in regard to the Eastern Continent. Japan is now desirous of entering into a commercial treaty with the United States, and no doubt a treaty, based upon a reciprocity of interests, will be laid before the present Congress, in such form as will be satisfactory to all parties. Whenever any treaty may be ratified by both governments, the true importance of California will be seen by the commercial world. Then the greater your individual and aggregate wealth, the more freely you may share in the accruing profits derived from our opening trade with that vast and populous empire. Possessing the vantage ground over all other States in the Union, every land carrying on trade with that country, China or India, and the adjacent islands, must almost necessarily become tributaries to your wealth. You are ten thousand miles nearer the countries named than New York.

This will at once suggest to you the importance of a direct and speedy means of visiting those countries. Taking the lead in this enterprise now before your community, you will be far better able to lead *in*, or carry *through*, another gigantic work of immense importance to the commercial interests of our country. If a treaty should be entered into with that country within twelve months from the present time, I predict that before the next President of the United States takes his seat in the White House, there will be a line of four-wheeled steamships in operation between Japan, China and India, and San Francisco. Capt. Randall's ships will be constructed with a view to carry coal enough for long voyages. Think of it, a line of steamers from Europe to New York, thence to San Francisco, and still onward to the glorious East. From her geographical position, her climate and soil, California must necessarily become a great commercial, as well as an agricultural and manufacturing State. If you now invest one million in commencing this line with two ships, then increase the number as fast as they *earn* the necessary means; you will soon have a line of fine ships, which in one year will earn enough to build three or four more for the "Oriental, California and New York Steamship Company." Other lines may be put upon the routes, but you *can*, if you will, be first in the field and thereby secure many advantages, and become the leading competitor in the great commercial movement that will succeed the opening of this new and important channel of trade to our citizens.

It remains with you to say whether California shall be the first and principal actor, or be content with an unimportant and subordinate part, and *that only* because her ports and territory are necessary adjuncts in securing the highest and most lucrative position to those who will carry away the spoils, leaving California to glean the fields after the golden sheaves have been gathered and carried away by those who make a *convenience* of your advantages to enrich themselves.

Ponder these things well, I entreat you, and forget not that now everything is in favor of your immediate and prompt action. Commence the work, and it will be completed. Time will not pause for you to consider longer. Interests of the most grave and important character are now pressing this enterprise upon the attention of the community. Onward rushes the tide of events. The clashing interests of the *few*, or the indifference and irresolution of the *many*, will not turn it aside. Those who are ready and willing to swing from their moorings, and venture out upon the swelling wave, *will succeed*, while those who hesitate, fear and tremble, will be swept away by its ebbing waters.

The Pacific Railroad will be an important and profitable auxiliary to your work, when completed. The greater the number of Railroads from the East to California, the better it will assuredly be for all; for the tendency of all these facilities for traveling will increase the number of passengers.

In every point of view, California will be the great gainer, by carrying out speedily this work. Her rising importance to the commercial world; the pride and ambition, and personal interests of her adopted citizens, alike urge wise, prompt, and energetic action, in a matter which concerns her most vital, permanent interests. May your action be such as will secure the greatest good to the greatest number, and wheel the brilliant star of your destiny higher and higher into the moral heavens, until it shall flame out with a dazzling splendor that shall induce all to acknowledge it as the brightest in the magnificent constellation, that is at once the admiration of all lands, and the hope of the oppressed in every country.

NEW YORK, January 20, 1858. B

HORTICULTURAL.

A. P. SMITH'S

POMOLOGICAL GARDEN AND NURSERY,

On the American River, 3½ miles from the Steamboat Levee,

SACRAMENTO.

THE Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of THE VARIETIES—embracing as they do

All Kinds FRUIT TREES,
SHADE AND ORNAMENTAL TREES,
GREENHOUSE PLANTS,
SHRUBS, ROSES,

And also an unusually fine crop of

GENUINE GARDEN VEGETABLE SEEDS.

All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,

Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:

From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.

We call particular attention to our splendid stock of

CHERRY TREES,

THE FINEST AND LARGEST IN THE STATE,

embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from these. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase theirs, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most RELIABLE SOURCES IN THE EAST, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being CORRECT AS TO NAMES AND VARIETIES, are as PERFECT AS IS POSSIBLE TO MAKE THEM.

In the department of

Shade and Ornamental Trees,

We have a very fine stock of all the leading varieties, some very fine extra large trees of the

ELMS, LABURNUMS AND LOCUST,

particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.

A very extensive collection of all that is rare and desirable.

The Greenhouse Department is quite full, and our really superb stock of

CAMELLIAS

is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,

Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, WARRANTED PURE and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish GRATIS to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.

v8-18-6m A. P. SMITH.

20,000
APPLE TREES,

FOR SALE
AT REDUCED PRICES, AT THE
HOPE NURSERY.

THE Nursery is located second block northeast of the new Steam Flour Mill, on Seventh street, San Jose.

The stock consists of over seventy varieties, carefully selected. No pains or expense has been spared to obtain the best sorts, and to render these Trees what they are, THE BEST APPLE TREES, OF THEIR AGE, in California.

v8-23-3m D. T. ADAMS.

The Concord Grape.

THE ORIGINATOR OF THIS NEW GRAPE offers for sale a fine stock, raised from the parent Vine. It has fully sustained its reputation as

The Best Grape for Out-door Culture

having survived the last two severe winters unharmed, where the Isabella, Catawba, and other vines were killed to the ground.

For Size, Beauty, Quality and Bearing,

it is unsurpassed. It is perfectly hardy, and has never been affected by rot or mildew, while it ripens from three to four weeks earlier than the Isabella, and two weeks earlier than the Diana, in the garden of the proprietor.

Fine, strong plants, at $1 50 each; $12 per dozen. Two years old, at $2 each. Three years old, extra, at $3 each. A liberal discount to clubs and the trade. Orders, with cash or good reference, promptly attended to. Address

2 3m E. W. BULL, Concord, Mass.

Ornamental Shrubbery.

THE Greatest Variety in the State may be found at the

GOLDEN GATE NURSERY,

Corner of Fourth and Folsom streets,

COMPRISING

5,000 Monthly Roses, of 150 varieties;
2,000 Carnations, of 120 kinds;
500 Monthly Honeysuckles, of 8 varieties;
500 Acacias, of 10 varieties;
Laburnums, Arbor Vitæ, Myrtles, Euonymous, Silver Maples, Mimosa, Clematis, Cytisus, Eucalyptus, Lilacs, Jasmines, Mock Orange, Althæas, Spireas, Weigelias, Deutzias; and a general variety of

Hardy and Green House Plants.

☞ Skillful Gardeners provided for laying out grounds. Office at the Nursery, and 171½ Clay street, above Montgomery v7-24

FARM STOCK, ETC.

SHORT-HORN CATTLE FOR SALE.

H. RENICK—Circleville, Pickaway Co., Ohio—for a long time an extensive Breeder of the Best SHORT-HORN CATTLE, will sell as low as stock of the same merit can be bought for. [v8-21-6mis] Address as above.

FARMERS OF CALIFORNIA!

I AM Breeding Thorough-bred Ayrshire Cattle; Merino, Southdown, and Cotswold Sheep; Suffolk and Chester White Hogs,

Of which I will sell and deliver per steamer in Cincinnati, at the following prices:

AYRSHIRE CATTLE	$75 to $200 each.
MERINO SHEEP	$15 to $30 "
SOUTHDOWN do	$20 to $50 "
COTSWOLD do	$20 to $50 "
SUFFOLK PIGS, ₱ pair	$25 to $40
CHESTER WHITE PIGS, ₱ pair	$30 to $50

☞ All Orders promptly attended to, and Hogs and Sheep securely boxed. Cattle, all appendages provided, and delivered in Cincinnati *free of freight and charges.*

Address, H. T. WOLLARD,
v8-21-1y Castine, Darke Co., Ohio.

WEBB, SOUTHDOWN SHEEP.

HAVING RAISED MY FLOCK OF PURE WEBB SHEEP (by importations, and purchase of Col. L. G. MORRIS), to as large a number, as my land will accommodate, I now offer a few EWES, and several BUCKS, for sale, at from $40, to $100 each.

I believe mine to be the only flock of PURE Webb Sheep in America, and am confident, that no other person can sell as fine quality, at as reasonable prices.

Also for sale BERKSHIRE and ESSEX PIGS, of the best blood, from COL. MORRIS' importations.

For further information—address,

J. C. TAYLOR,

Colored Plates of California Fruit.

THE beautiful Fruit Pieces which were so finely prepared, of the FRUIT of California at the State Fair in 1855, are on sale at the Farmer Office. Every person who wishes a beautiful Fruit Piece should have a copy.

The California Farmer.

SAN FRANCISCO, FRIDAY, FEBRUARY 26, 1858.

Californians All Coming Back.

"Let well enough alone!" We have been permitted to make use of the annexed letter from Michigan, addressed to a friend in Napa. In this letter we have the evidence of the great advantages we have in California for all the comforts and blessings of life. The writer of the letter is an old Californian, but left here four years since to better himself on the Atlantic side. He bought a farm and settled down—but he tells his own story, and it speaks volumes. He is home-sick, and wants to come back. Let farmers here, that ever dare to complain of prices, read this letter, and compare the amount usually grown per acre in the Eastern States, with the toil to raise it, and then estimate the crop. How will it compare with California? Wheat, 15 and 20 bushels per acre, and 45 cents per bushel; Barley, 25 bushels per acre, and 35 cents per bushel; Oats, 25 and 30 bushels per acre, and 15 to 17 cents per bushel. Thus we see that the *wheat* crops yield $9 per acre, barley $8 75, oats $4½ to $5 per acre; quite a contrast to California. We hope these facts will create a spirit of content among those who think of leaving, and prompt them to renewed effort:

LETTER FROM MICHIGAN.

JANESVILLE, January 10th, 1858.

Friend S——: I am here yet in this land of prairies; but should not have been here had not the times turned against me, so that I could not sell; but I have concluded to reduce my price as low as I can afford, and try to sell in the spring or summer following. It is impossible to make much calculation ahead, here. Ever since I made up my mind to go back to California the times have been continually growing worse, so that it has been next to impossible to sell. Grain is very low, wheat 45 cents, barley 35 cents a bushel; and they both have come down from $1 50; so you see the effect it must have on the country. Oats are 15 and 17 cents a bushel.

I do not expect to make anything here if I should stay, and I dare not make too much sacrifice in selling, for fear it will take too long to get it back.

I see by the papers that Napa Valley is getting to be one of the places. Now my opinion is, that any one that was ever in California long enough to learn the advantages of the State, is a fool to try to live in any other State in the Union; and I find that most of the returned Californians are of the same opinion, but some are situated as I am, and some another way, and so on, but by and by you will get us all back there again, except what starve or freeze to death these hard times; though by the by we are having a very mild winter.

I see by your papers, that you are beating the world in raising fruit; but it seems to me that some of it must be a little mixed. Do you think apples are going to do well there? I did not used to think that they would, but you can judge better at this day, than I could when I was there; further, I did not take any interest in the subject at that time. I think F—— will sell, too, and return to California as soon as he can. Write and let me know something about the price of stock with you, horses, cattle, etc.

We are all as well as usual, but my health is not as good here as it was in California.

Yours with much respect, J. M. L.

To Our Readers and Correspondents. We tender our thanks to those of our friends who are so kind as to furnish us facts in either department of the science in which we are engaged.

As we remarked in our last issue, we shall now soon close the history of the Locusts, and we can then present a greater opportunity for the appearance of our numerous correspondents and friends.

The truly beautiful letter from our correspondent "Sallie," is worthy the special notice of all who love home influences. This is a theme that we sincerely hope will receive more attention from those ready writers of the present day. Home is the great corner stone of all our best institutions; it is the key-stone which must be placed in the triumphal arch which secures human happiness.

The second of the series of Musical Entertainments has been received.

We regret that we are obliged to defer any article sent from our friends; but we know they will pardon us when they see our crowded columns.

We received by the Golden Age, that came so suddenly, valuable manuscript from our friends. "Building Anew," a prose sketch of remarkable beauty, and "Thou or I," a gem for the poet's corner, both from our accomplished correspondent "Florence Percy."

We received from Mrs. E. W. Farnham, of New York, a valuable letter, which will appear next week.

We received, also, valuable letters from the ever ready pen of B.

Letters on the Crops.—Thanks, friends, thanks; your valuable favors shall all have place.

The Little Pilgrim came to our sanctum (a bundle of them), in order, we believe, to remind us of a duty. We shall send these copies to those who desire them; and we hope that all who wish a valuable newspaper for their children will send and subscribe.

International Hotel.—This Hotel is gaining more and more favor every day, and has become one of the most fashionable hotels in our State.

Imposition Upon the Public.

We have often cautioned all who desire to obtain good and reliable trees &c., against the mass of trash peddled in our streets in city and country, and forced off at auction. There is a species of imposition now practiced, that should receive a check, or great evil will result from it. It is the practice now to announce almost all the sales of trees, shrubs, &c., forced of at auction, as from premium nurseries, first premium nurseries, special premium nurseries, &c.

Now, in all reason, we would like to know, if a person obtaining a premium years ago upon articles then in existence, and long since gone, is always to father upon a State Agricultural Society all the blame that results in years' accumulation of trash. Is everything a man has on his farm a premium article, because he took a premium for his calf: then as well might a man sell lilacs and pinks, and call them premium, as to claim it for them, when his premium only rested upon a peach, pear, apple or plum tree. We hope the true legitimate nurseryman, and all others will look to this matter. It looks like the fashion abroad of "shoemaker to her Majesty," "corset-maker to her Majesty," &c. Where products of great merit receive premiums deservingly, that fact, published in a legitimate card, is enough; but to handbill it for everything the man deals in is a gross imposition, and should be rebuked.

A Well-merited Compliment.

We are happy to lay the following honest and generous expression of feeling towards Agricola, from a farmer, before our readers. He is only one of a thousand, however, of those who will always feel grateful to Agricola for his most able and scientific efforts to promote the cause of Agriculture: —

SACRAMENTO, Feb. 15, 1858.

Editors Farmer: I am a subscriber to your paper. If you think proper to send me a parcel of your Seeds, I will make good use of them. I might state here, with regard to your journal, that on landing in San Francisco, last June, from the States, my first object was to look up a good work on Agriculture, Horticulture, etc., and I was informed there was no work of that kind extant, as yet, in California. I finally got hold of the California Farmer, and read an article signed by Agricola.

This was the very thing that I wanted, so I subscribed for your paper, forthwith; and I now declare to you that nothing affords me more pleasure than my walk to the Sacramento Post Office every Saturday afternoon, to get your valuable journal. Let Agricola know that there is one that wishes the blessing that was pronounced upon Humboldt, by his King and friend: "That his days and strength be long amongst us, to teach us the practical workings of Nature."

This is my sincere wish for Agricola.

Your humble servant, T. C.

Another Important Letter.

Although the following was strictly a private letter, yet the character of it, its importance to the varied interests of our State, especially that of Mining and Agriculture, as alluded to by our correspondent, and the hint that the subject of agriculture among the mining districts is beginning to receive that attention which its value to these districts demands, urge us to publish the letter, in the hope of calling out many facts from those who are practically engaged in agriculture in all these localities. We shall be most happy to hear from them all. We thank our correspondent for his letter. The seed has gone forward, and we trust many years hence to still find him among our enrolled subscribers and correspondents:

Messrs. Warren & Co.—Gentlemen: I notice in the farmer an offer of rare and desirable seeds to new and old subscribers who desire to have them. I hardly know to which class you will decide I belong. If, however, I am not an old subscriber, I intend to be. I hope this intention will entitle me to receive your present of seeds. I should esteem it a great favor also to receive a copy of the Patent Office Reports. Could a copy be sent to me by Wells, Fargo & Co's Express?

Although mining is by far the most important of any business in this vicinity, agriculture is beginning to demand attention; and there are points of importance in connection with it, peculiar to our soil, climate, and locality, which I think might be reported and discussed in your valuable paper, and tend largely to advance the interests of mountain farmers generally.

Yours respectfully, P. H. P.

J. D. Arthur's Agricultural Warehouse. We spent a little time very agreeably the past week, in the warehouse of the above named *working* merchant, and confess we were pleased with many facts gathered, relative to business and business prospects, and especially those relating to improvements in Agricultural Implements. Mr. Arthur has a large and excellent stock—largely beyond the figures of his advertisement—and all selected by himself at the East, during his visit there the past season, and purchased under the best auspices. We would call special attention to this house for one particular reason, which is a very important one with us; we have said Mr. Arthur is a *working* merchant; this we know; and we remember years "lang syne" in California (the years that tried merchants' souls), and then we saw our friend Arthur off coat, roll up sleeves, and work, work, work; and it was from that date, from hard work and small beginning that his present large stock has been won, and his handsome business been built up and established. Such industry will always be rewarded. We invite attention to his card in our columns.

General Directions for Cultivating Flower-Seeds, &c.

"No tale of passion have I to breathe;
Yet, gentle reader, I fain would wreathe
A floral garland, whose leaves shall be
Emblems and tokens of love to thee.
Flowers! they bloom by the lowliest cot—
May they gladden, and brighten, and bless thy lot."

"Of all kinds of flowers," remarks Mrs. Loudon, "the ornamental garden annuals are perhaps the most generally interesting, and the easiness of their culture renders it peculiarly suitable for a feminine pursuit."

"It is astonishing," says the same excellent authoress, "how much beauty may be displayed in a little garden only a few yards in extent, by a tasteful arrangement of ornamental annuals. Many of the flowers now grown in our gardens are not worth culture, but they are grown year after year, because their cultivators know them, and do not know anything better."

The culture of annuals has two great advantages over the culture of all other flowers whatever. In the first place it is attended with less expense than any other description of flower culture; and, in the second, all the enjoyment of which it is susceptible is obtained within the compass of six or eight months. The seeds of annual flowers cost a mere trifle, and the expense of stirring the soil, sowing them, and thinning them when they come up, is also very little; while the effect produced is as great or greater than that of many bulbs or tubers, and most perennials.

HARDY ANNUALS.

The flowering plants, which are denominated hardy, are such as are capable of enduring any ordinary weather incident to our climate, such as frosty mornings; provided, always, that the plants be advanced beyond their seed-leaf, when exposed to sharp frost, otherwise the hardiest may chance to be cut off, as we have seen the young leaves of the oak destroyed by an accidental frost in the early part of summer, in the northern climate.

PREPARATION OF THE SOIL.

As one of the chief points in the cultivation of annuals is to have the seed germinate well and quickly, and to get the plants in their second leaf, it is obvious that a soil either very light and dry, or very heavy and wet, will be alike unfavorable in ordinary seasons; because in light, dry soils, in a cold dry spring, the seeds have neither enough of warmth or moisture to dissolve their albumen and stimulate the embryo; and in heavy, wet seasons, the embyro is rendered dropsical and perishes.

These evils must be obviated as far as possible by suitable digging, or by artificial shelter. The sludge from a pond or a canal, if it can be procured, or in lieu of this, some well-rotted dung or leaf mold, dug into a soil too light or dry, will tend to make it retain water, more particularly if it be raked very fine. In heavy, wet soils, again, an opposite course must be pursued, by repeatedly rough digging, by avoiding fine raking, and by digging in lime and ashes, so as not to overload the the soil with them. In very wet soils it might be advisable to raise little hillocks about a foot in diameter, and less or more than a foot along the borders.

SEED SOWING.

The best time for sowing the seeds of annuals will in some cases depend upon the time when the plants are required to blow, and in others on the species. The middle or end of February is the best time for general sowing, and even this is too early for some sorts. Successions may be sown every fortnight, which will, of course, produce a succession in the flowering, though, as the season advances, the latest sown ones, owing to the greater warmth of the weather, will make such rapid advances of growth as greatly to diminish the intervals of flowering.

The mode of sowing is to make circles of from four to twelve inches in diameter, according to the size of the sorts along the borders, making the soil smooth, scattering the seeds evenly, and not too thick, and covering them lightly by sifting mold over them. The rake is not a convenient implement in these sowings.

An excellent mode of protecting the seedlings of annuals is to invert, over the small circles where they have been sown, flower pots of proportional size, raised above the soil by means of a bit of wood or brick, to the height of an inch or more, to admit air. In case of severe weather, they may be placed down on the surface, and the hole covered.

The flower pots over the seeds, after the first ten days, ought to be examined every two days, and as soon as the seed leaves are seen pointing through the ground, light and air should be admitted by raising the rim of the pot to the hight of two or three inches. On the plants getting into their second leaf, and acquiring a little vigor, the pots may be removed altogether, unless the weather prove bleak, when they may be replaced, as they should always be during the night, where the trouble of doing so is not an objection. At this stage of their growth, slugs and snails must be watched, or they will frequently devour all the young plants. These flower-pot protectors are very advantageous for keeping the seeds in the dark, and the soil sufficiently moist till germination commences;—for keeping the seeds warmer, by preventing the loss of heat through evaporation and radiation from the soil, and concentrating the sun's heat through the pot; for warding off accidental frosts, and, what is no less important, our heavy rains, which often wash the soil off the seed, and even the seed away; and for screening the seeds from the depredations of birds, of mice, and of rats.

When the inverted pots are not used, it will be advantageous, if the weather be dry and not very cold or bleak, to give occasional light waterings, with a fine-nosed pot, both before and after the plants come up. The evening is the best time for watering, during mild weather; the morning is best when there is frost during the night. As soon as the plants are about an inch high, they ought, according to their kinds, to be thinned out, to admit light and to give room for those left to grow strong.

Little more is requisite during the growth of the plants than to keep them free from weeds, and, should they grow too close or crowded, to thin them a second time.

MODE OF TRANSPLANTING.

When the plants, either reared in the indoors or in a frame or hotbed, are fit for transplanting, cloudy rather than showery weather should be chosen; and if this does not occur, the after part of the day, towards evening. It is important to take up as much earth with each plant as will adhere to the fibers of the root. Some plants, such as poppies, will not bear transplanting on account of the fewness of their root fibers. Each plant should be fixed in its new place so firmly as not to come out when gently pulled. In all cases, even in rainy weather, it will be indispensable to give a copious watering immediately after transplanting, and to shade delicate sorts for a few days with flower pots and cabbage leaves.

Perennials may be sown the same as annuals, and in August and September. The reader is referred to treatises on the subject, for full and more particular directions.

SEASON AND CLIMATE OF CALIFORNIA.

Practical experiments teach us that we are about *three months* in advance of the climate of the Northern States, and we can calculate that *February* with us is equal to May there; but a little careful attention and practical experience is an invaluable guide and instructor. We urge, however, that in all our Gardening operations, we should bear in mind our *dry season*, and that *deep cultivation* is of the highest importance to the gardener and amateur cultivator.

Post Office.—We want to say a word for the Post Office, and for all interested in it, in this our city—we should say the great commercial city of California. Col. Weller, the present incumbent, with his Assistant, Mr. Ferguson, have now been long engaged in bringing the office into a perfect state of discipline; and with Col. Fry, the Mail Agent, the Post-office matters of the State are approaching to a wise and wholesome order. We have often been present at the reception of mails and at the hour of departure, and we know there is a promptitude and decision of action that tend to complete success. We trust that no cry of "rotation in office," or any other cry, will be raised, to remove those who have labored long and faithfully for the good of the public. We trust every friend of a good system will make their wishes known, and that the present officers, Postmaster, Assistant and Clerks, who cannot be bettered, may be continued, and permitted to go on still improving for the public weal.

Loss of a Splendid French Merino Ram. One of those large and superior full-blooded Rams, imported by Samuel Brannan, Esq., some time since, and placed on his ranch opposite Nicolaus, on the Feather river, disappeared very suddenly within the present week. What has become of him is unknown. He was seen by the herdsman half an hour before he was to bring them up. Whether he fell from the bank of the river and perished, or wandered off to other flocks, or was stolen, is unknown; at all events we make this notice to call the attention of all persons to the fact, and to awaken and solicit the attention of any persons that may see, hear or know, of this animal, dead or alive. This Ram was a full-blood, horns immense, having grown into the head the past year, and have been cut off at the point; neck very large with monstrous dew-laps. As the loss of such an animal is a public loss, we ask of all persons in that vicinity to render us information of the animal, if possible.

Thanks.—We are indebted to Freeman & Co., and to Alta Express, with news from the East.

To Kierski & Brothers, for copies of the State Agricultural Society's Reports. We shall speak of them next week.

To Senator Gwin, many thanks for Documents and Seeds from the Patent Office. They shall be carefully sown for a good crop.

A parcel of the famed Wyandot Corn was received by us from Geo. S. Bandell, Esq., Baltimore, Maryland. We shall endeavor to see it planted and report.

Godey's Lady's Book, extra copies, came to us. The first three numbers of the present year are truly elegant, and this book should be in the hands of every lady in the land. The plates of embroidery and needlework are worth four times the cost of the book.

We most truly return our thanks to J. C. Harvey, Esq., for the basket of splendid Tomatoes sent us. They were a luxury, indeed. Fresh Tomatoes in February. What say our friends East to this?

The Gallery of Art.—Vance's Gallery is now the most splendid exhibition gallery on the Pacific Coast; and for specimens of arts, such as are embraced in Photography, Ambrotyes, and Daguerreotypes, we believe a more splendid collection has never been shown. In this gallery will be seen all the various styles of the art in their highest perfection; and faces "familiar as household words" to our citizens, will be seen true to life. This gallery is now the place of popular resort.

Young Washingtonians.—We see by the record of the festivals of the 22d inst., that the Collegiate Institute of Benicia and the Santa Clara College, both institutions for the education of young men, that this memorable day was duly observed by them, and with much spirit, energy and decorum, reflecting credit upon themselves and the Institutions to which they belong.

The Ohio Farmer, published at Cleveland, thus notes, under date of Jan. 23, the progress of the season: "Lilac buds are quite green. Alders show leaf. A shrubby St. Johnswort in our garden has come out in full leaf. Violets are peeping out here and there, and the buds of rose bushes are considerably swollen. Gooseberries and all varieties of currants ditto."

See Us!—These ominous words we see in the Petaluma Journal. Well may our able cotemporary say *us*. We, poor bachelor-like editor, say *us* too, but singular-ly; but we both mean the same thing—a gentle hint to those of our subscribers who wish *us* well.

New Advertisements.—Those of our patrons that sent their favors at the last moment shall be attended to next week. Our readers will please look to our list.

The Oxygenated Bitters have no equal as a tonic medicine, and as it contains no alcohol, is especially adapted to the delicate constitution of females suffering from any derangement of the natural functions, weakness or irregularity, nervous debility, &c.

Counterfeits of Holloway's Pills and Ointment are in the market. Look to the book of directions. If the paper on which they are printed is water-marked "Holloway, New York and London," the medicine is genuine, but not otherwise. In looking for the water-mark, hold the paper between the eyes and the light.

Sold at the manufactories, No. 80 Maiden Lane New York, and No. 244 Strand, London; and by all druggists, at 25c., 62½c., and $1 per box or pot.

Lawton Blackberry.—A consignment of these valuable Plants were received by us by the last steamer, from Messrs. Seymour & Co. They came through in the most perfect order, and are for sale at our Office.

Love of Music.—We believe the love of Music, and the cultivation of it in all our schools, will tend to a love of other studies, and thus give a quickening power to all the energies of the mind. We have listened with much pleasure to the morning songs of the pupils in our public schools, and rejoice to know it is being fully appreciated by parents. We desire to do all in our power, through the medium of our journal, to create and extend a love of Music in all the associations of life and we are happy to offer our readers the interesting Musical Entertainments which appear in our columns, prepared by our valuable correspondent M A Sarles, Esq., to which we call particular attention; and we shall also present, as we now do, those places where the best collections of Music can be found; and we are happy to say, we shall always be supplied, both from the East and elsewhere, with the newest and best Music, which will be reviewed by our friend M. A. Sarles. We call especial attention to Kohler's Musical Publications, as one of the sources from which we shall receive supplies; and also to Salvator Rosa, whose collections will also be received as published. To both these Musical Establishments we call public attention, as we intend to give publicity to all New Music, for the benefit of schools, colleges and families.

The Three Ages of the World.

The Anti-Humbug Age.—The world has had its golden age, its iron age, and according to the Satirist its "Age of Bronze." The present age has been designated, par excellence, the age of Humbug. In our opinion, however, the era in which we live has been very fatal to humbugs—especially your time-honored, venerable, conventional humbugs. To one of these—the art of dragging people to death under the pretence of treating them according to the rule of medical science—Professor Holloway has given the *coup de grace*. In the first place he has simplified the pharmacopœia, by substituting for its ten thousand nostrums two remedies, a Pill and an Ointment, which actually accomplished all that the medical godfathers of said nostrums promise in their name, but never cause them to perform. The scrofulous, the dyspeptic, the bilious, the fever-ridden, the lame, the rheumatic, the debilitated, the abandoned of hope and of the faculty, have used them, have recovered, and rejoicingly testify to their health-restoring properties. The testimony is from the sick of all nations, from the learned and the ignorant, the rich and the poor, the throne and the cottage. If it is not to be received as truth, then no evidence, direct or circumstantial, is worth a doit, and no man ought to be crowned with honor or condemned for crime, on the affidavits of voluntary witnesses, however numerous or respectable.

But we cannot refuse our credence to statements founded on the personal experience of those who make them. We cannot say to the lame who walk, the sick restored to health and vigor, the multitudes relieved from agony and despair, "you are in error, you know not what you assert." We cannot help admitting that those who languished and grew worse under an avalanche of drugs administered by regular physicians and apothecaries, and who subsequently recovered under Professor Holloway's treatment, were injured by the one and cured by the other. Before we can deny the truth of such an inference, we must adopt the dogma of Berkley, the metaphysician, and declare that matter has no existence, and that all we suppose to be visible and tangible is a mere phantasm. Not being prepared to subscribe to that theory, we are bound to believe that the decision of the world on the efficacy of Holloway's medicines is founded upon impregnable facts.—[Glasgow Saturday Post.

RARE SEEDS.

☞ We have just received from the East some of the choicest FLOWER and other rare SEEDS, ever received in California; among them a small invoice of Pure LAWTON BLACKBERRY—the only lot in the country, and warranted fresh and pure, crop of 1857.

The collection was made by Mr. J. Q. A. Warren, and brought out by him on last steamer.

Also, opening, a case of FOREST TREE SEEDS—the finest assortment ever imported.

Those desirous of finding choice Seeds will do well to call at once at our office, 130 Washington st (up stairs).

☞ Lawton Blackberry Seed.—A few packets of this choice seed are now ready, and can be mailed to any address. Price, $1. WARREN & CO.,

5 California Farmer Office,

HUTCHINGS' MAGAZINE.—This truly Californian monthly appears for March in more than its usual elegance. It is embellished with portraits and sketches of character of the chief magistrate of our State, and the principal officers of the State government, with an interesting sketch of Tehuantepec accompanied with spirited engravings, and with much other excellent matter, indicating a growing prosperity to this magazine which we much rejoice to see.

STEAMER NEWS.—The Golden Age being signaled at the time of going to press, we felt it a duty to give our readers a gleam of news. It is important.

SPECIAL NOTICES.

☞ **GOUPIL & CO.,** Publishers and Importers of ENGRAVINGS, Manufacturers and Dealers in ARTISTS' MATERIALS of every description, 366 Broadway, New York, have constantly on hand a great variety of the above-named articles

*** Catalogues sent per mail to all parts of the United States. v9-2

☞ **Wigs! Wigs!! Wigs!!! — BATCHELOR'S** WIGS AND TOUPEES surpass all. They are elegant, light, easy and durable.

Fitting to a charm—No turning up behind—No shrinking off the Head. Indeed this is the only establishment where these articles are properly understood and made.

v8-13 1y 233 Broadway, New York.

☞ **3000 Pounds California Tobacco.**—We have samples of superior TOBACCO, raised in California, grown and cured correctly, by a person from Kentucky. It is the best lot ever raised in the State, and is worthy the notice of Cigar Makers. For sale at the FARMER office. 6

☞ **THORBURN'S Preliminary Wholesale** CATALOGUE OF VEGETABLE SEEDS, *of the present year's growth*, will be published on the 20TH JULY, and will be mailed to Dealers and others requiring Seeds in quantities, inclosing stamps for return postage.

J. M. THORBURN & CO.,
19-tf 15 John street, New York.

☞ **Hemp Seed.**—A superior lot of pure seed just received at the office of the Farmer.

NOTICE TO NURSERYMEN.

☞ PARTIES who have ordered Nursery Stock from the Eastern States, to be forwarded by Express, should have made arrangements for the receipt of the same, or remitted charges, as all such freight must be prepaid without exception. Hitherto, a satisfactory guarantee from the shipper was considered sufficient—the charge to be paid at destination. Should any disappointment occur to our friends, this will be a sufficient explanation.

23 A. FROST & CO.

☞ **A. W. FABER'S LEAD PENCILS.**—Lead Points, Propelling Pencils, Colored Pencils, White Crayons, Black Crayons, Slate Pencils, Red Chalk, etc.

These popular Pencils can be had of Stationers, Fancy Goods Dealers, and others in the various cities of California.

Extract of a letter from the eminent artist, Chevalier P. von Cornelius, Director of the Royal Academy in Berlin, 27th Oct., 1842: "It is scarcely necessary to say that I find Faber's Polygrades Lead Pencils in every respect most excellent. They are of all degrees of hardness and shade, and adapted as well for fine and firm outline as for finished drawing. The wood which incloses them has the necessary strength, but yields easily to the knife, and the lead never breaks away."

Extract from the Official Report of the Industrial Exhibition of the German Federal States, 1844, 3d Vol.: "Especially have the Pencils of Mr. A. W. Faber set at defiance all competition, and supplied every desideratum that the Artist can expect or desire in this particular."

Extract from the Report of the Great London Exhibition, 1851:

On referring to the Report, page 450, it will be seen that the Jurors have considered A. W. Faber's Pencils deserving of a more extended notice than has been accorded to any other Pencil Manufacturer. The Report further states as follows: "A. W. Faber's Pencils are of the best description, and the prices extremely low. They are exported throughout the whole civilized world, the demand being created by their good quality and cheapness."

Beware of Counterfeits!

The reputation of A. W. Faber's Lead Pencils has not failed to attract the attention of certain individuals, who have either attempted an imitation of the same, or have undertaken the sale of a counterfeit article, which, though of a totally different manufacture and very inferior quality, are marked, some with the name of the genuine, some with the names, *W. A. Faber, A. W. Faber, A. K. Faber, C. W. Faber*, etc., and are disposed of as genuine Faber's Polygrade Lead Pencils.

Every person will please to examine carefully the stamps on each Pencil—"A. W. FABER"—and observe that each dozen bears on the label a fac-simile of A. W. Faber's signature; and and further, that every genuine Pencil sold in the United States, has impressed in the wood itself, "E. FABER, 133 William street New York."

v2-1 6m E. FABER, Sole Agent 133 William street, New York.

Fine, beautiful hair—jet black or brown,
Or tresses, curling or golden—
Is the certain result—without chance or doubt—
Of the use of LYONS KATHAIRON.

☞ **The immense sale of Lyons Kathairon**—nearly 1,000,000 bottles per year—proves its excellence and universal popularity. It restores the hair after it has fallen out, invigorates and beautifies it—making it soft, curly and glossy—cleanses it from all Scurf and Dandruff, and imparts to it a delightful perfume. The Ladies universally pronounce it the finest and most agreeable article ever used.

Sold by all dealers, everywhere, for 25 cents per bottle.

61 Liberty street, New York.
PARK & WHITE, Wholesale Dealers,
9 6m *San Francisco, California.*

☞ **Counterfeit Wistar's Balsam**—We would caution the purchasers of the *Balsam of Wild Cherry* against an imitation article which has made its appearance in many places, and which might deceive the unwary by its resemblance to the genuine bottle. Of the mixture we need not speak. Unprincipled scoundrels can always be found ready to counterfeit anything by which they can put money in their pockets, and they are sure to choose the most popular and well-known article on which to practice their villanies. It is a lamentable fact that there are also *dealers in medicines* who are willing to lend themselves to carry out this imposition, by selling such *trash* as genuine, because they can buy it for less than half the cost of the real article. Avoid such a man as you would a dealer in counterfeit money, for he is the greater scamp of the two.

They have never dared to forge the written signature of I. Butts, having a wholesome fear of the State Prison before their eyes. *Be sure that you find on the outside wrapper the written signature of I. BUTTS*, and you may rely upon its being genuine. Buy none other.

Seth W. Fowle & Co., 138 Washington street, Boston, Proprietors. Sold by their agents everywhere.

Agents—C. MORSELL, cor. Third and K. sts., Sacramento; H. JOHNSON & Co., Washington st., San Francisco. 4-1m

☞ **HAIR DYE! HAIR DYE!! HAIR DYE!!!**

Batchelor's Hair Dye is the Best in the World!

GRAY, RED, OR RUSTY HAIR DYED INSTANTLY TO a beautiful Natural Brown or Black, without the least injury to Hair or Skin.

Fifteen Medals and Diplomas have been awarded to Wm. A. Batchelor since 1839, and over 20,000 applications have been made to the Hair of his patrons of his famous Dye. Prejudice against Dying the Hair and Whiskers is unjust, as it would be against covering a bald head with a wig.

WM. A. BATCHELOR'S HAIR DYE produces a color not to be distinguished from nature, and is warranted not to injure in the least, however long it may be continued.

Made, sold or applied (in 12 private rooms) at the Wig Factory, 233 Broadway, N. Y.

Sold in all cities and towns of the United States, by Druggists and Fancy Good Dealers.

☞ The Genuine has the name and address upon a steel plate engraving on four sides of each bottle, of

WILLIAM A. BATCHELOR,
v8-13 1y 233 Broadway, New York.

THE HISTORY OF THE LOCUST AND GRASSHOPPER.—This very important history, which has been published in a series of numbers in our journal, will be completed, we expect, in the next number; and we shall then publish it in a handsome pamphlet form. This will be the only complete history of these insects ever published, and must be invaluable; and for this reason we now call attention to it, as the edition will no be large. Those who desire copies should send their names early. The price of the work will be fifty cents. This work has been prepared with great care, and after untiring research, by A. S. Taylor, Esq., of Monterey, one of the most indefatigable historic writers of the Pacific coast.

Churns! Churns!! Churns!!!

A Chance for Every Good Dairyman, that would Save Time, Money and Labor.

THE undersigned is now making the celebrated

THERMOMETER CHURN,

the style and quality that won the FIRST PREMIUM at San Jose, and a Churn that has won the approbation of the people.

Please come and see me at my WORKSHOP, and judge for yourselves. I intend to give you the CREAM of a Churn, and you will patronize me if you know which side your bread is buttered. H. G. PRATT,

Manufactory 46 Washington street,
7-3m between Davis and Drum.

WHEELER & WILSON
MANUFACTURING COMPANY'S
SEWING MACHINES.
343 Broadway, New York.
Agencies throughout the United States.

Highest Premium again awarded by the American Institute, at the Crystal Palace, Nov. 6, 1857.

Also, highest Premium awarded at the Illinois State Fair, and Maryland Institute, Baltimore; and Maine State Fair.

THE COMPANY INVITES THE ATTENTION OF Housekeepers, Seamstresses, Dressmakers, Tailors, Manufacturers of Shirts, Collars, Skirts, Cloaks, Mantillas, Clothing, Hats, Caps, Corsets, Ladies' Gaiters, Linen Goods, Umbrellas, Parasols, and Silk Goods, to the perfect adaptation and unrivaled excellence of these SEWING MACHINES for their uses. They combine all the improvements that have been invented for sewing. Their extensive and increasing sale, and the unanimous commendation that they have received, warrant the Company in warmly recommending them. They have been in use sufficiently long to test them thoroughly, and have given entire satisfaction.

They are simple in construction, efficient and durable in operation, beautiful in model and finish, fitted to adorn the parlor, and suited to the workshop—applicable alike to the use of the family and the manufacturer. Their speed is from 1,200 to 2,000 stiches per minute, or equal in efficiency to 12 seamstresses. Substituting as they do, healthful exercise and rational employment for the soul-and-body-destroying drudgery of hand sewing, they are hailed as WOMAN'S FRIEND.

The Company feels confident that these machines, in their present form, are the best ever offered to the public; and refers, for confirmation of this opinion, to the thousands of families and manufacturers who use them.

OIL!

FOR QUARTZ MILLS.

STANFORD BROTHERS,
PACIFIC OIL
AND
CAMPHENE WORKS,

INVITE attention to the following Certificates from GRASS VALLEY:

NEW-ENGLAND QUARTZ LEAD, Dec. 23, 1857.

W. LOUTZENHEISER, Agent of Stanford Brothers, Pacific Oil and Camphene Works:

Dear Sir: I have now given those Oils from Stanford Brothers, which I purchased from you, a fair trial, and find them the VERY BEST I have ever used.

Z. WHEELER, Superintendent.

ALISON RANCH, Dec. 25, 1857.

This is to certify, that we have been using the Oils from Stanford Brothers Pacific Oil and Camphene works, for a long time, and find them of a superior quality.

JOHN ANDERSON, First Engineer.

ALTA HILL, Jan. 12, 1858.

I hereby certify, that we are now using on our Machinery, Oils manufactured by Stanford Brothers' Pacific Oil and Camphene works, purchased at their Agency in Grass Valley, and have no hesitation in saying I believe them to be superior to any other manufactured in the State.

L. CARLSSEN, Sup't Alta Mining Co. No. 2.

The SPERM OIL furnished to these Mills is worthy the particular attention of ALL who use OIL for lubricating purposes.

Proprietors of Sawmills, Gristmills, Steamboats, and other Machinery, throughout the State, supplied in quantities to suit, and quality guaranteed in all cases.

STANFORD BROTHERS,
PACIFIC OIL AND CAMPHENE WORKS
v9-4 46 Front street, corner California.

☞ **Farm Stock.**—Having completed our arrangements for the importation of choice stock, we are now prepared to receive orders for any of the following breeds, and would call the attention of those in want, to our unsurpassed facilities for the importation and improvement of the choicest stock:

WARREN & CO., Cal. Farmer Office.

☞ REGISTRY OF STOCK.—All who are interested in the purchase and sale of Stock, of every description, will find a Register kept at our Office, for the entry of all Stock for sale, and their full and correct pedigrees; so that persons who have Stock for sale, or wish to purchase, can gain important information. Those in want of choice Stock will find this opportunity a valuable one, as we are in correspondence with the principal Stock Breeders in the States, and are fully prepared at all times to make sales of Stock of any quality.

☞ J. Q. A. Warren, just from the East, will be happy to see all interested in the subject, at the FARMER Office. January 8, '58.

NEW BOOKS.

☞ JUST received, from New York, several cases choice works; also, a complete assortment of Agricultural Books, to which we would invite the attention of our customers.

Frank Forester's Horse and Horsemanship of the United States, in two volumes; the finest work of the kind ever published in the country, can now be seen at our office, bound in different styles—Plain, and Turkey Antique. Having the sole agency of this valuable work, in California, we would invite lovers of the beautiful to call and examine the copies. Subscription books are now open, and those entering their names will receive this work at the earliest day. v9-1

MAGAZINES, ETC.

PHILIPS, SAMPSON AND COMPANY
COMMENCED ON THE FIRST OF NOVEMBER
A NEW MAGAZINE, TO BE CALLED
THE ATLANTIC MONTHLY.

IT will be devoted to LITERATURE, ART, and POLITICS. *THE AIM OF THE PERIODICAL WILL BE,*

FIRST: In Literature, to leave no province unrepresented, so that, while each number will contain articles of an abstract and permanent value, it will also be found that the healthy appetite of the mind for entertainment in its various forms of Narrative, Wit, and Humor, will not go uncared for. They wish to say, also, that while native writers will receive the most solid encouragement, and will be mainly relied on to fill the pages of the ATLANTIC, the publishers will not hesitate to draw from the foreign sources at their command, as occasion may require, relying rather on the competency of an author to treat a particular subject, than on any other claim whatever. In this way they hope to make their Periodical welcome wherever the English tongue is spoken or read.

SECOND: In the term ART, they intend to include the whole domain of esthetics, and hope gradually to make this critical department a true and fearless representative of Art, in all its various branches, without any regard to prejudice, whether personal or national, or to private considerations of what kind soever.

THIRD: In Politics the ATLANTIC will be the organ of no party or clique, but will honestly endeavor to be the exponent of what its conductors believe to be the American Idea. It will deal frankly with persons and with parties, endeavoring always to keep in view that moral element which transcends all persons and parties, and which alone makes the basis of a true and lasting national prosperity. It will not rank itself with any *set* of *antics*, but with that body of men which is in favor of Freedom, National Progress and Honor, whether public or private.

As an earnest of the material at their command, they subjoin the following list of literary persons interested in their enterprise; wishing it, however, to be distinctly understood, that they shall hope for support from every kind of ability which desires the avenue of their columns, and in the remuneration of which they shall be guided purely by their sense of intrinsic merit:

William H. Prescott,
Ralph Waldo Emerson,
Henry W. Longfellow,
Rev. F. H. Hedge, D. D.,
Nath'l Hawthorne,
John G. Whittier,
Oliver Wendell Holmes,
James R. Lowell,
J. Lothrop Motley,
Geo. Wm. Curtis,
Herman Melville,
Prof. C. C. Felton,
Prof. F. J. Child,
E. P. Whipple,
Edmund Quincy,
Author of "Wensley,"
J. T. Trowbridge, Author of "Neighbor Jackwood," etc.
C. W. Philleo, Author of "Twice Married."
Mrs. H. Beecher Stowe,
Mrs. Gaskell, Author of "Ruth," "MaryBarton," etc.
Mrs. L. Maria Child.
Mrs. C. M. Kirkland,
Mrs. Pike, Author of "Ida May," "Caste," etc.
Miss Rose Terry,
Wilkie Collins, Author of the "Dead Secret," ect.
G. Ruffini, Author of "Doctor Antonio," etc.
Shirley Brooks, Author of "Aspen Court," etc.
E. M. Whitty, Author of "Political Portraits," etc.
James Hannay, Author of "Singleton Fontenoy,"
Thomas W. Parsons.

TERMS.—Three dollars a year, or Twenty-Five Cents a Number, and may be obtained of Booksellers, Periodical Agents, or of the Publishers. For sale by all Booksellers and Newsmen in California. 19-3mls

THE
"HORTICULTURIST"
AND
Journal of Rural Art and Rural Taste.

(Commenced by the late celebrated A. J. DOWNING.)

Conducted by J. JAY SMITH, Editor of the North American Sylva.

THE increasing love of Rural Life has brought this popular publication into extended notice. Its success has been amply proved by a large addition of readers, and it is now offered to public patronage with confidence. It embraces in its scope of subjects everything pertaining to the country and country-pursuits, and aims to instruct while it amuses: it is, in short, as now conducted, a popular RURAL MAGAZINE, designed to interest all lovers of the Garden, the Country-house, the Cottage, no less than the Botanist, the admirer of the Green-house, Conservatory, Grape-house, Fruit Cultivator and Planter. Its correspondents are those who have long devoted their energies to these pursuits, and it is believed the number of these, and the information they impart, is greater than any other periodical can boast of either in Europe or America. Indeed, the work has become indispensable to the well-informed country-dweller, who, by a perusal of its varied pages, may maintain an acquaintance with all that is passing in the fruit-garden and orchard, the nursery, the villa, and with the beautiful in nature, whether it is improved by art or adorned by taste. In its Rural Magazine character it is addressed to all who love information, and it has thus become a welcome guest both in town and country. Its circulation now embraces the entire Union and Canada, and endeavors are constantly used to increase its attractions by a liberal outlay in embellishing it with costly engravings of fruit, dwellings, trees, and those numberless rustic adornments which make the individual home attractive.

A NEW VOLUME (13th year) commences with the January number for 1858: and it will be the constant aim to render it still more worthy, by every practicable improvement, of the liberal patronage it is receiving.

The work is issued on the first of each month, in the best style, each number containg 48 pages, embellished with a frontispiece and several other original and well-executed engravings. The volumes, taken for a number of years, will make a valuable Encyclopedia of Horticultural Literature. As an advertising medium it has few superiors.

TERMS—Two Dollars a year; Four Copies for Six Dollars, payable in advance.

An edition is published with plates colored in the best style of the Art. Price, $5.

☞ All subscriptions must be addressed to the Agents, or to ROBERT PEARSALL SMITH,
Nos. 17, 19, and 21 Minor street, Philadelphia.

WARREN & CO., Agents for the above work, for California. Subscriptions received at the office of the FARMER, 130 Washington street (up stairs). 9v2

STOCKTON FEMALE SEMINARY.

THE First Session of this Institution will commence on Monday, March 1, 1858, and continue five months, under the charge of Dr. C. Collins and Lady, assisted by competent instructors.

FEMALE INSTITUTE.

THE Female Institute in Santa Clara, under the management of James Rogers, A. M., still enjoys a good degree of prosperity. The Board of Instruction is ample, and the Terms of Tuition as liberal as in any school of equal grade in the State.

LAYING OUT GARDENS.

☞ THOSE WHO WISH THEIR GROUNDS LAID OUT IN the best style, and those who wish them remodeled, can have them done in the most scientific manner, by sending to our Office their orders; or they will be waited upon, and designs made and Gardens completed from the rough sod. We have those under eye on whom we can rely to complete any plan of work of public or private Ground however extensive, and furnish all the required article of Trees, Vines, Shrubs, Plants, or seeds.

Ladies' Department.

[For the California Farmer.]

KING FROST.

King Frost, with silent tread, stalks
Up and down each street,
And whitens the stoops and walks,
With his snowy feet.

Of the rich, he little knows,
They have coal and wood;
On the poor his breath he blows,
And it chills their blood.

In at the broken windows,
Through the shaky doors,
Where the orphans are, and widows,
Gathers he his stores.

No warm clothes there repel him,
No fire in the stove,
No warmth in all the dwelling,
But the warmth of love.

Not by force, nor by device,
Can they from him go;
They must breathe his breath of ice,
Feel his weight of snow.

All the long, chill winter night,
Toils he in the cold,
And with little waifs of white,
Makes a master-mold.

A little baby lying
On an aching breast,
A friendless mother dying,
And going to rest.

Pause, oh, human amateurs!
View his work of art;
Is it not as good as yours?
Has it not more heart?

A. J. W.

[For the California Farmer.]

Home Influences.

Night has fallen, but instead of drawing her sable curtains, she has thrown over the earth a soft drapery of silvery sheen, and the moonbeams fall silently over each frozen stream and snow-covered mountain and vale.

A fitting time it is for comtemplation, seeming to draw the thoughts from earth, and cause them to dwell in the regions of imagery; or to the pure in heart it speaks of a land ever thus peaceful, and far more gloriously lighted by beams from the throne of God.

We have again chosen home, and home influences, for our theme, hoping thereby to awaken fond recollections in many hearts, and to arouse the attention of some sister spirit, who with thoughts more eloquent, and pen more powerful, shall aid in portraying the blessings and beauties with which that sacred spot ought ever to abound, and thus lead the hearts of our own sex to high resolves and active efforts towards enhancing the happiness, and rendering more gentle and holy those dear ones by whom God's Providence surrounds us. And as we have already written of the mother's influence, we will now consider those relations which children of one household ought mutually to bear towards each other, and the kindly obedience which a child ought ever to render those, who tenderly cherishing the frail, tiny infant, have reared it to manhood or girlhood's prime; shielding its pathway, and bearing it gently over life's troubled waters, until the feeble arm has gained strength, and the infant mind expanded into mature wisdom. No lovelier type of heavenly blessedness can earth present, than a home over which the father presides with patriarchial dignity and power; where the mother is treated with tender reverence, and each son and daughter like pillars, and ornaments to the temple, support, embellish and beautify the honored structure.

Such a home is the nursery where good men are found, where wisdom descends to earth, and where "peace like a brooding dove" ever maintains her sittings. It is a garden for the soul, where it may expand and blossom, and prepare for the glorious fruition of Heaven. It is a refuge from every ill below, for although thorns may pierce the flesh, yet *there* is a consoling balm and soothing draught outstretched by the hand of love. Such a refuge and protection ought home ever to become; such it is in *our* power to render it.

Alas! that it should so often be defiled; that the fire on its altar should be suffered to expire; the unwillingness to sacrifice our own selfishness, so often lead to the destruction of life's most noble ends, and of earth's most reliable joys.

Seriously, then, ought young hearts, while blessed with parental guidance and love, strive to cultivate those sacred home affections, and exert that holy influence, which, like a halo surrounding the orbs of light, emanates from every good sister and true-hearted brother.

A brother whose heart abounds in noble impulses, and well regulated acts of love, must exert a powerful influence over even the most giddy and wayward of sisters. In his disapproval she fears that of his sex generally, and his high standard of thought and clear discrimination of character give tone to her mind, enlarge her understanding, and develop the most noble faculties of her soul.

So too in the depths of her heart is a fountain of love unfathomable, pure and holy, whose waters are ever sweet, and gush spontaneously forth, falling in gentle spray over the evergreen islet of fraternal affection. Powerless is the pen in portraying a sister's love; yet actions may make it manifest, and good deeds recount it daily. And what heart, uncontaminated by an evil world, would willingly resign the pleasures and blessings wrought by these holy home-loves, for all the pomp and pageantry of earth, for emolument, fame or applause? And who that has once enjoyed parental and fraternal sympathy, and solicitude, does not ever after, even amid the smiles of strangers, turn with an irresistible yearning towards the spot where those loved ones are sheltered.

When misfortune comes, and with prodigal hand scatters the hoard by us so carefully accumulated, or when disease, subtile, invidious, preys upon our vitals and robs us of our boasted strength, infusing langour and decay, where all was formerly vivacity and power; when the approving smiles of the multitude seem turned into sneers of derision; oh! how earnestly does the weary one long for that heart-sympathy, and solace, which is only extended in the atmosphere of home.

To you, then, I appeal, O stalwart sons! And gentle daughters of our land; and by all the consolation their love has wrought, by the innumerable ills from which they have shielded you, implore you to remember, that one commandment, with promise, "Honor thy father and thy mother." And to you, brothers, I would say, cherish tenderly the frail blossoms which flourish beside you; thrust not rudely away the tendrils by which they cling to you for support; and their love, arising as a perfume from the flowers they resemble, shall float ever along your pathway, and subside only when those hearts shall be pulseless in death. Sisters tread warily; be gentle, be loving. May no impetuous act, no word unkindly spoken, estrange from you that heart on which you can most undoubtingly rely; the arm upon which you can confidently lean; and never distrust its kind support. His cares you may lighten, his griefs you may solace, his perplexities relieve, and in return be blessed with such counsel as only a brother can bestow. "Among those of one household blessed be harmony."

Sallie.

January 16th, 1858

Hope and the Death Angel.

[Welcome again, Daughter of the sunny South. Thy pure thoughts will find a ready greeting from the many friends thy recent visits have already made. Rena will always be welcome; her truthful portraits will find a ready acknowledgment in every intellectual mind:]

'Tis night upon the earth, the dew is on the flowers, and the bright moon sails high, reflecting silver radiance o'er lake and hill. Within a home of choicest wealth, a fair but fragile girl is passing to the world of spirits. Her golden hair now unconfined, falls in clustering ringlets on her snowy neck, her eyes so deeply blue are dim and lusterless, and her marble brow is marked with heavy lines of suffering. An old man weeps beside her, weeps sad, bitter tears. His step is feeble, his locks have turned to gray, his days are well nigh numbered, and the "recording angels" will soon have registered his name another saint in Heaven. 'Tis for his child those tear-drops start, for her the bright and beautiful of earth. The destroyer comes to breathe with icy coldness and destruction on the flower his age so cherished, and his heavy heart is crushed with bitterness and grief. And yet she shrinks not from the dreaded messenger, for with his summons suffering will end, and in another world a Mother's arms are open to receive her. The "Angel of Hope" is hovering at her side, whispering of that realm where beams Eternal day, and pointing to the spirit-land where dwells Eternal peace. A smile has wreathed her lips, a brightness kindles in her eye; she takes one lingering look of earth, then wings her flight to Heaven.

A noble manly form is standing by the couch of death. His hopes and dreams long garnered up, are blasted in an instant; for she whose pure and gentle spirit spoke to him in joyous accents, love's fond tale, is silent in the cold embrace of death. The lily hand which he so oft has pressed with love's warm fervency, like marble sculpture lies upon her virgin breast; her lips, now mute and colorless, will ne'er again return the pressure of his own. The fond deep vows unchanged by time will tremble ne'er again upon her tongue, nor will her eyes again reflect the pure devotion mirrored within his own:

Oh vain, delusive, earthly hope,
Like bubbles on the sea;
Thou cheatest all who vainly trust,
Poor, blinded slaves, in thee!

The last farewell is spoken, the last look of love been given, with a bruised and bleeding heart he bows to stern Fate's decree. Then from amid his sorrow and despair comes a form with Angel beauty clad, it steals upon his anguish with its spiritual presence, and bids him look beyond this changing earth, to a land where all is harmony and joy. He sees life's journey toilsome and embittered, death's passage dark and terrible; the grave cold and gloomy; but beyond, a home illumined by the brightness of the ever-shining sun. No longer will he mourn for earth's short-lived happiness, 'tis but the glimmering of a joy and beauty of the home above, nor will he mourn for the chaste spirit who has fled from earth, to lead his thoughts to Heaven.

'Tis bright and glorious day in the far-off land. Angels have tuned their "Thousand Harps," white robed Seraphs nestle close their wings and swell the gushing melody. A sister comes to join the glittering band, and songs of praise ring through the vaults of Eden. A bright and glittering crown is ready for her brow, the pearly gates are open, and God receives his child.

Rena.

A Noble Proof of True Friendship.

We have been permitted the perusal of the following most friendly epistle, from a beautiful and accomplished lady from that land of glorious spirits (Old Virginia), to a lady then in New York, about to come to California. This letter breathes those pure and fresh thoughts which are a proof of their sincerity. They were not intended for publication, but we have been permitted the honor of laying the letter before our readers, and our hope is that it may not be the *last* we shall have the pleasure to present to our readers. Where such a fountain of thought lies, we would hope we might Bec-on it this way. Fair and beautiful as are the sunny slopes of Virginia, and we have enjoyed much among the hospitable and generous hearted ones there, yet *our* golden shores can offer as fair and as happy homes to denizens of other States, as any land in the world; and our fair correspondent would be joyously welcomed hither with her kindred, where they will find warm hearts to receive them:

Dear Friend: The announcement of your intended departure for your new home, on the shores of the far-distant Pacific, awakens in me a remembrance of the once happy time it was my good fortune to enjoy, under your kind guidance, and in your sweet society. Many circumstances have conspired to prevent my writing to you ere this time. This is the only reason and apology I can offer for my seeming neglect and forgetfulness of your very warm and disinterested friendship, and for the non-performance of a duty, to which I was prompted alike by unfeigned pleasure and a flood of grateful recollections.

But I throw myself upon the generosity of your kind nature, with the assurance of a full forgiveness of a fault which was of the head and not of the heart. Your contemplated move has thrown a mantle of gloom over all of our family circle. It is true your new home is within the bounds of our own loved land, yet it seems like severing the chain of affection which binds us all to you. Not alone those who have been blest with an opportunity of associating with you, but in the hearts of every member of our family, your name is enshrined with a love that will live as long as memory can point to one cherished incident of the past. Need I assure you of the deep anxiety we all have to see you ere your departure. It would indeed be a pleasure, but fate's relentless hand seems to have set its seal upon a "consummation so devoutly wished," lest you should in the spring run on to "Old Virginia," when we will promise you a welcome as warm as our genial clime, and as sincere as loving hearts can offer.

You will doubtless hear from all of our family, for each and all seem desirous of sending you some expression of regret at your separation, and of giving utterance to a heartfelt prayer for a safe and prosperous voyage to you, and a happy meeting with your beloved husband.

You will do me a favor by giving my love to Mr. C. I., also to your dear children.

I will now close with sincere prayer, that the golden gates of California may open to you El Dorado of happiness, and that your future may be as bright as the glittering soil of your new home. Be assured there are none who more fervently pray for that future continued brightness (however dim her own), than your sincere little friend.

Bec.

IMPORTANT!

I am GOING OUT OF BUSINESS and *SELLING OFF MY ENTIRE STOCK* ..of..

BOOKS, STATIONERY,

Port Monnaies, Pocket Knives,

FANCY ARTICLES, &C.

And that I may make a SPEEDY clearance, and close everything out as early as possible, I have determined on making GREAT REDUCTIONS, and will sell everything at nearly ONE-HALF the prices the same goods are usually selling at. You have now a fine opportunity of furnishing your Libraries, and supplying yourselves with all kinds of Fancy and Staple Stationery, at a comparatively trifling cost, as they

MUST BE SOLD.

My stock consists of all kinds of Books, such as Histories, Biographies, Travels and Adventures; Theological, Poetical, Mechanical, Agricultural, Scientific, College, School, and Text Books; Novels, &c.

Blank Books; Letter, Cap and Note Paper of all kinds. Envelopes, Inks, Gold and Steel Pens.

In short, everything in the line. As an earnest of my intentions, I subjoin a list of prices of a few items, and everything else will be sold equally low in proportion:

	Prices usually sold at.	Prices now selling at.
Blank Books, ₱ quire,	from $ 50 to $1 50	from $ 18 to $ 75
Letter Paper, ₱ ream,	from 2 50 to 5 00	from $1 75 to 3 00
Letter and Note Papers, ₱ quire,	50	25
Envelopes, buff and white ₱ package of 25,	50	12
Ink, ₱ bottle,	from 12½ to 1 50	from 6¼ to 75
Cornell's High-school Geography,	2 50	1 75
" Intermediate "	1 00	70
" Primary "	75	50
Spelling Books,	25	12
Primers,	25	12
Copy Books, with copies,	25	12
" " without "	12	6

NOVELS.

Of which we have upwards of Five Hundred different kinds, by the most popular and eminent writers of the past and present time, from 12½ to 25 cents, just half the prices they are sold for in New York, Boston, and Philadelphia.

Now is the time for Bargains.

J. L. POLHEMUS
DRUGGIST

OFFICIAL NOTICE!
POLHEMUS' DRUG STORE,
No. 190 J street, corner of Seventh.
SACRAMENTO, CAL

FELLOW CITIZENS: I have lived among you since the ever glorious FORTY-NINE, have suffered with you in three fires and three floods, and intend to live among you with my family during the term of my natural life, if not longer. I return you my most sincere thanks for your unfaltering patronage and support, which has enabled me to pay One Hundred Cents on the Dollar through all my adverse fortune. I would also give you a few reasons for your continued patronage, and inducements to new patrons likewise.

FIRSTLY.

I claim to be the Oldest Established Legitimate Druggist in this City.

Persons in this connection will please observe that there is as much difference between a DOCTOR and a DRUGGIST as there is between a Druggist and a Doctor, and rather more so between those who have picked up the Drug Business and those who have devoted their whole lives to it. To this latter class I have the honor to belong, having learned my business in the Atlantic States, and been engaged in said business for the last eighteen years.

SECONDLY.

Believing that life is sweet to all, and that the people wish to know where they can get their prescriptions filled with safety, I will hereafter fill them for

Half the Price Usually Charged

By other Druggists, legitimate or illegitimate, and of **The Purest Drugs and Chemicals.**

THIRDLY.

I intend my store shall be ONE of the best, if not THE BEST place in California to obtain everything, NEW, ODD and STRANGE in the Drug line, and especially to make it the most extensive depot for every valuable Patent Medicine, Drug and Chemical. We invite proprietors of valuable and reliable Patent Medicines to send them along. We have a large and thoroughly fire-proof Drug Warehouse to hold them, and patrons to buy them

FOURTHLY.

We Keep Open all Night!

And charge no more for medicines than in the day time.

FIFTHLY.

We will furnish those in indigent circumstances with MEDICINES AT COST! the same being attested by two or three good citizens.

SIXTHLY.

Hereafter we will do a business on a CASH BASIS ONLY. The amounts we have lost heretofore by crediting we intend to distribute equally among our patrons, in the future, in the decreased price of our goods.

SEVENTHLY.

We have received the agencies for the following valuable articles:

Dr. Carl Warburg's Tincture. This article is particularly recommended for Ague and Fever, when every other article fails to cure.

Budds' Nerve and Bone Liniment, warranted the best in California.

Flower of the West, for Fever and Ague.

Delight's Spanish Lustral, for the Hair.

HUDSON'S CALIFORNIA GROWN MUSTARD.

Also, agencies for all the other popular medicines too numerous to mention.

EIGHTHLY AND LASTLY.

We import nearly all of our goods. We think we know how to import them, and how to sell them to satisfy the public as to price and quality. At all events, give us a call, and WE WILL TRY.

v8-12 J. L. POLHEMUS.

CHARLES DICKENS' WORKS.

TWENTY-NINE DIFFERENT EDITIONS.

NO LIBRARY CAN BE COMPLETE WITHOUT A SET OF THESE WORKS.

CHEAP EDITION.—PAPER COVER.
Complete in Fourteen volumes.

"PETERSON'S" are the only complete and uniform editions of Charles Dickens' works ever published in the world; they are printed from the original London Editions, and are the only editions published in this country. No library, either public or private, can be complete without having in it a complete set of the works of this, the greatest of all living authors. Every family should possess a set of one of the editions. The cheap edition is complete in Fourteen Volumes, paper covers; either or all of which can be had separately, price 50 cents each, as follows:

Little Dorrit.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist.
Nicholas Nickleby.	Two Apprentices. 25

A complete set of the above fourteen books, will be sold, or sent to any one, to any place, *free of postage*, for Five Dollars.

LIBRARY OCTAVO EDITION.
Published in Seven Different Styles.

This Edition is complete in SIX very large octavo volumes, with a Portrait on steel of Charles Dickens, containing the whole of the above works, handsomely printed, and bound in various styles.

Vol. 1 contains **Pickwick Papers and Curiosity Shop.**

DUODECIMO ILLUSTRATED EDITION.
Complete in Twenty-five Volumes.

The Editions in Duodecimo form are beautifully illustrated with over *Five Hundred Steel and Wood Illustrations*, from designs by Cruikshank, Phiz, Leech, Browne, Maclise, etc., illustrative of the best scenes in each work, making it the most beautiful and perfect edition in the world, and each work is also reprinted from the first original London editions that were issued by subscription in monthly numbers, and the volumes will be found on examination, to be published on the finest and best of white paper.

This edition of Dickens' Works is now published complete, entire, and unabridged, in Twenty five beautiful volumes, and supplies what has long been wanted, an edition that shall combine the advantages of portable size, large and readable type, and uniformity with other standard English authors.

The Duodecimo edition alone has been gotten up at an expense of over *forty-five thousand dollars*, but the publishers trust that an appreciative public will repay them for the outlay, by a generous purchase of the volumes. All they ask is for the public to examine them, and they are confident they will exclaim, with one voice, that they are the handsomest and cheapest, and best illustrated Set of Works ever published. This edition is sold in sets, in various styles of binding, or any work can be had separately, price Two Dollars and Fifty cents each, and each work but one being in two volumes, handsomely bound in cloth, as follows:

Pickwick Papers.	Sketches by "Boz"
Nicholas Nickleby.	Barnaby Rudge.
David Copperfield.	Martin Chuzzlewit.
Oliver Twist.	Old Curiosity Shop.
Bleak House.	Christmas Stories.
Little Dorrit.	Dickens' New Stories.
Dombey and Son.	*One volume, cloth*..$1 25

Price of a complete set in Twenty-five volumes, bound in

" "	Black cloth, gilt backs	$30 00
" "	Full Law Library style	40 00
" "	Scarlet, full gilt, elder, edges, etc.	45 00
" "	Half calf, ancient antique	60 00
" "	Half calf, full gilt back	60 00
" "	Full calf, ancient antique	75 00
" "	Full calf, gilt edges, backs, etc.	75 00

PEOPLE'S DUODECIMO EDITION.
Published in Six Different Styles.

This Duodecimo edition is complete in Thirteen volumes, or near One Thousand pages each, with two illustrations to each volume, but is not printed on as thick or as fine paper as the Illustrated Edition, but contains all the *reading* matter that is in the Illustrated Edition, printed from large type, leaded. The volumes are sold separately or together, price One Dollar and Fifty cents each, neatly bound in cloth; or a complete set in this style will be sold for $19. The following are their names:

Little Dorrit.	Nicholas Nickleby.
Pickwick Papers.	Christmas Stories
Dickens' New Stories.	Martin Chuzzlewit.
Bleak House.	Barnaby Rudge.
David Copperfield.	Old Curiosity Shop.
Dombey and Son.	Sketches by "Boz."
	Oliver Twist.

Price of a set, bound in	Black cloth	$19 00
" "	Full Law Library style	24 00
" "	Half calf, or half Turkey	26 00
" "	Half calf, marbled edges, French	28 00
" "	Half calf, ancient antique	32 00
" "	Half calf, full gilt backs	32 00
" "	Full calf, ancient antique	40 00
" "	Full calf, gilt edges, backs, etc.	40 00

Copies of any one work, in cloth, or any set, of either of the twenty-nine editions, in any of the various styles of bindings, of Charles Dickens' works, will be sent to any person, to any part of the United States, *free of postage or any other expense*, on their remitting the price of the edition they may wish, to the publisher, in a letter.

LINDSEY'S
Double Acting Rotary Force Pump.

THIS is a new Pump, patented in America and England in 1855; and for Cisterns, Wells, Mines, Engines, Railroads, &c., has no rival: in that it works easier at great depths, discharges water at different hights, can be used for a hose, is made entirely of wrought and cast iron, without suction or packing, simple in construction, easily put in, not likely to get out of order, will last for an age, and is cheaper than any other Pump. It has a wrought iron pipe, side gearing and balance wheels, with everything complete to raise water by hand, from one to one hundred feet; and costs, boxed and shipped, from $18 to $60.

It must stand in the water, and will not rust.

Drawings and a full description sent to all parts of the world, free of postage, by addressing the general agent.

HARVEST, 1858!

MACHINES AND IMPLEMENTS.

TREADWELL & CO.,
IMPORTERS,
N. E. corner California and Battery streets,
SAN FRANCISCO,
have now landing, and will receive by every packet from New York and Boston, the most extensive assortment of
FARMING MACHINERY
and Implements,
ever brought to this market, embracing all the
Latest Styles and Improvements,
which will be sold at lowest rates.....consisting in part of:

REAPERS:

MANNY'S COMBINED REAPER AND MOWER, WITH WOOD'S IMPROVEMENT.—These justly celebrated Machines have become too well known in California to require more than a simple announcement where they can be had. We are sole agents for the Pacific coast, and none genuine elsewhere.

McCORMICK'S REAPER....This universally approved Reaper we keep constantly on hand, and are Agents of the Maker.

KETCHUM'S COMBINED REAPER AND MOWER....This Machine is now very popular—having been greatly improved the last two years.

BURRALL'S IMPROVED GRAIN REAPER. This Reaper cuts six feet, and is one of the strongest and most durable Machines in use.

SEYMOUR AND MORGAN'S REAPER; without the Raker attachment and all late improvements.

HUSSEY'S REAPER....Baltimore make.

PALMER & WILLIAMS' SELF-RAKING REAPER.

THRESHERS:

"HALL'S" 8 and 10 horse THRESHER AND SEPARATOR....This Machine we have had made for this season, with great improvements, and it will be the best *THRESHER* in market this year—34, 36 and 38-inch cylinders, and cannot fail to give entire satisfaction.

"SPENCER'S" 8 and 10 horse THRESHER AND SEPARATOR....This is one of the largest and most durable Machines that comes to California, and has been well tried, and found "good."

STEPHENSON & BIRDSALL'S 8 and 10 horse THRESHER AND SEPARATOR....A large, splendid Thresher, with late improvements.

WHITMAN'S 4 horse THRESHER AND SEPTRATOR....This is a very desirable Thresher for small Farmers. It is got up with great care, and will give good satisfaction.

EMERY'S 2 horse THRESHER AND CLEANER....Greatly improved over last year.

EMERY'S 1 and 2 horse THRESHER, WITH FAN MILL.

The above Threshers will be sold with or without Horse Powers.

"Haynes'" Heading Machines or Harvesters.

These Machines are in general use in the Western States, and are pre-eminently adapted to California.

HORSE POWERS:

SMITH'S 8 and 10 horse PLANET POWERS, WITH HALL'S IMPROVEMENT.

PERRAGO'S 8 and 10 horse PLANET POWERS....This is one of the most successful Powers in use; has taken a greater number of premiums in the Atlantic States than any other Power; is simple, strong, and durable.

WHITMAN'S 4 and 6 horse ROTARY POWERS.
BOGARDUS' 2, 4, and 6 horse do do.
FIELDS' 2, 4, and 6 do do do.
EMERY'S 1 and 2 horse TREAD POWERS.

This Machinery comes in compact cases, can be sent to any part of the State or Coast at small expense, and marked so that it can be easily set up.

Extra Castings, for all the above, constantly on hand.

The Celebrated Boston Steel Clipper Plow.

We have these Plows exclusively, and keep a stock on hand at all times. Extra points and parts can always be had.
This Plow can be run with half the power it takes for the "Peoria" Plow of same size, and must commend itself to all who wish to save "horse-flesh."

The Peoria Steel Plow

Constantly on hand.
These styles of Plows come 10 in a case, and the expense is very small in sending them to the remotest parts of the coast or interior.

HAY PRESSES—Several sizes; best makers.
Do. CUTTERS—Several sizes and kinds; hand and power.
HORSE RAKES—wood and steel teeth; 8, 10, and 12 feet.
GRANT'S GRAIN CRADLES—In cases of one dozen each.
Do. FAN MILLS. Also, the Boston Mill.
CORN SHELLERS—Hand and power.
Scythes and Snaths—best steel Scythes and Lamson's Snaths.
Hay and Barley Forks—2, 3, and 4 tine; of best makers.
Carpenter's Patent Wire spring-Tooth Horse Rake, 10 to 15 feet long, with wheels, and seat for driver.
Ox Yokes and Bows—all sizes.
Churns—Thermometer, Dash, and Cylinder; also, Dog Powers for do.
Garden Barrows. Cauldrons and Furnaces. Cultivators.
Horse Hoes. Seed Sowers. Harrows.

Field and Garden Seeds

Of every description, *via* the Isthmus—this year's growth (1857).

Steam-Engines, 4 to 15 Horse Power.

Suitable for Ranches or Mining purposes.

Portable Flour Mills and Mill Stones—Noyes' make. All sizes, 16 inch to 4 feet.

Belting, Bolting Cloth and Packing—All kinds and sizes of the above.

HARDWARE—The best stock in the State.

MINING GOODS—All kinds in use.

COOPERS' AND TANNERS' TOOLS—Full assortment.

Baling Wire—Annealed.

Hay Rope—Best Manila.

Grindstones—Best dressed Nova Scotia; from 6 inches to 4 feet diameter, packed in casks in sawdust.

Wire Fencing—A neat article for inclosing Gardens, Heneries, &c. Also, for Ornamental Garden work, Grape and Rose Trellises.

Wooden Ware—In great variety: Tubs, Pails, Buckets, Measures, Baby Cabs and Wagons, Peach and Strawberry Baskets, &c, &c. 9v-4

AGRICULTURAL.

FIRST PREMIUM IMPLEMENTS.
TO THE FARMER
AND
Dealer in Agricultural Implements.

PLEASE READ.

HAVING erected a good shop, with facilities not heretofore possessed by any house in this State for manufacturing Agricultural Implements, I beg leave to announce that I am now prepared to receive orders to any extent in this line of business. I employ none but the best and most experienced mechanics, and use only the very best materials. In this way I hope to promote the interest of the good mechanic, the interest of the farmer, the interest of our young and growing Agricultural State; and at the same time that interest which is foremost with all mankind—self. I have had twenty years experience in the manufacturing business;

I ESTABLISHED THE FIRST SHOP,
AND
MADE THE FIRST STEEL PLOW
In the State of Wisconsin, in the dawn of her great agricultural improvement. I also
MADE THE FIRST REAPING AND MOWING MACHINE
AND
THE FIRST STEEL PLOW
Ever Made in this State;
Therefore, with my experience, and a knowledge of the wants of the country (which are different from most others), I feel confident that I can and will do much for the interests of the agriculturists of this county; and in my efforts I trust I shall meet with a good share of patronage from the farmer and all interested in this matter, and in the interest and development of the agricultural improvement of our State.

I design, and have under way, the manufacturing of
1,500 Cast Steel California Plows;
THE DEEP TILLER;
OR,
"QUEEN OF THE WEST;"
Of stock entirely superior to any ever worked before in this country. Also,
GANG PLOWS,
HARROWS,
CULTIVATORS,
FANN MILLS,
&c., &c., &c.

In addition to what I manufacture, I shall constantly be receiving implements from the best makers of the Eastern and Western States, amongst which are now due
500 CINCINNATI

EAGLE, STEEL AND ROVER PLOWS,
which stand, in point of true merit and worth, altogether higher than any others in the great agricultural State of Ohio.

☞ Please favor me with a call, and see for yourself, and be convinced that I am publishing no humbug, but simply facts as they are; and that your young State can, within itself, already provide the farmer with implements inferior to none now in use. All kinds of agricultural implements and machines repaired on short notice, and in the best manner, and on reasonable terms.

DOCTOR HOOFLAND'S
CELEBRATED
GERMAN BITTERS,
PREPARED BY
Dr. C. M. JACKSON, Philadelphia, Pa.,
WILL EFFECTUALLY CURE
LIVER COMPAINT, DYSPEPSIA, JAUNDICE,
Chronic or Nervous Debility, Diseases of the Kidneys, and all diseases arising from a disordered Liver or Stomach.
Such as Constipation, Inward Piles, Fullness or Blood to the Head, Acidity on the Stomach, Nausea, Heartburn, Disgust for Food, Fullness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried and difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, Dimness of Vision, Dots of Webs before the Sight, Fever and Dull pain in the Head, Deficiency of Perspiration, Yellowness of the Skin, and Eyes, Pain in the Side, Back, Chest, Limbs, &c. Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of Evil and great Depression of Spirits.

The proprietor, in calling the attention of the public to this preparation, does so with a feeling of the utmost confidence in its virtues and adaptation to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American people, and its reputation and sale is unrivalled by any similar preparations extant. The testimony in its favor given by the most prominent and well-known Physicians and individuals in all parts of the country is immense, and a careful perusal of the Almanac, published annually by the proprietor, and to be had gratis of any of his Agents, cannot but satisfy the most skeptical that this remedy is really deserving the great celebrity it has obtained.

Arrival of the Golden Age.

The P. M. S. Co.'s steamer Golden Age, Commodore Watkins, arrived, unexpectedly, to-day, at half-past 1 o'clock, P. M., bringing the mails and passengers that left New York and New Orleans on the 5th inst. This is the quickest passage ever made between New York and San Francisco, being less than 21 days—running time, 19 days and two hours.

In New Orleans, on the 4th February, the Grand Jury found true bills of indictment against Walker, Col. Frank Anderson, and others, for a violation of the Neutrality Laws. They were held to appear on the 4th Monday in April, for trial.

On the 20th January a discussion was had in the House of Representatives on the President's recommendation of a Pacific Railroad, which was finally, by a vote of 136 to 60 referred to a select committee. The only rock on which it can now be lost is that of sectional jealousies and selfishness. Mr. Jeff Davis, of Mississippi, has made a minority report, providing for the construction of the road from El Paso to Fort Yuma.

Mr. Buchanan has sent in a message to Congress, in which he takes firm ground in favor of the Lecompton Constitution. That famous document had arrived in Washington and caused some sensation.

The deposits now in bank, say the N. Y. papers of the 4th inst., to the credit of individuals, are greater than ever before reported. The returns for the week ending June 6, 1857, showed actual deposits amounting to $69,233,090—the largest figure up to that time. Now the aggregate is up to seventy million, and is actually on the increase. This shows an abundance of money unprecedented in the history of our local finances.

The Altrato expedition had arrived within thirty miles of the Pacific, on the 25th of December, and Lieut. Craven expected to reach the ocean by the middle of January.

The news from Salt Lake, brought by the mail steamer, is not so late as that recently received via Los Angeles. From the seat of war in Utah there is no intelligence of importance. The health of the troops was good, and they were as comfortable as circumstances permitted. There was no snow to the east of Fort Laramie, and grass and buffalo were abundant. A salt train from Fort Laramie was met by Mr. Davidson on its way to the camp.

Mexico.—Gen. Comonfort has receded from the plan of Tacubaya, and uniting with the liberals, has placed himself at the head of the army to operate against the reactionists, who have proclaimed Santa Anna. By this move Chief Justice Juarez becomes President of the country, and as the enemy are in partial possession of the city of Mexico, the government is to be transferred to Celage, famous for being the city where Iturbide raised the cry of independence which drove out the Spaniards.

As the clergy are at the bottom of the reaction, the liberal party is prepared to issue a general decree of confiscation against the church property as soon as it shall have put down the Santanistas. At last accounts, desperate fighting was going on in the city of Mexico.

The gallant Gen. Havelock had died in India. He was carried of by an attack of dysentery.

Crawford's equestrian statue of Washington, at Richmond, Va., was, on the 28th ult., elevated to the top of the monument, in the presence of hundreds of spectators.

John W. Seymour, Secretary and Treasurer of the Hartford County Savings Association, left that town recently, and, since he left, it has been ascertained that he was a defaulter to that institution in the sum of $100,000 or more. The money has been lost in stock and other speculations.

At a meeting of the creditors of Messrs. Lawrence, Stone & Co., of Boston, held Feb. 3d, in the Insolvency Court, claims were presented and allowed against the firm for nearly $1,100,000.

Fifteen thousand lives were lost by the recent earthquake in Naples. Whole townships were destroyed. Three thousand bodies have been recovered.

Wholesale Produce Report.

The present condition of the Flour and Grain Market is attributable to the efforts made to sustain it; for it must surely be seen from the large surplus already come in from Oregon, and what will come in, and from the quantity from the East, which will exceed ten thousand barrels, that our market will be supplied; in fact, the marked decrease in demand is a proof of it, although it is said the demand is large. We regret to believe that the farmers will feel the injury done by these high rates, in their crops next year.

HORTICULTURAL.

THOMPSON'S SUSCOL NURSERIES.

Situated on the Napa River, at Suscol Ferry, NAPA COUNTY.

THE undersigned wishes to call the attention of the public and patrons of these well-known Nurseries to the present extensive stock of

FRUIT AND SHADE TREES,

GRAPE-VINES, etc;

Also a choice lot of *GARDEN and GREENHOUSE PLANTS, ROSES, SHRUBS, &c.*,

Comprising all of the Very Best Varieties of Cultivated Fruits, such as

APPLE, PEAR, PEACH, PLUM, NECTARINE, APRICOT, CHERRY, ALMOND, QUINCE, and FIG TREES, GOOSEBERRY, CURRANT, and RASPBERRY BUSHES, &c.,

Together with a large lot of

Nut-Bearing and Shade Trees,

Consisting in part of Black Walnut, English Walnut (or Madeira Nut), Shell-bark Hickory, Elm, Weeping Willow, Locust, Sugar and Silver Maples, &c.

Grape-vines of all the Best Foreign and Native Varieties.

The Fruit Trees offered for sale are all budded and grafted from the best, most approved and popular varieties now cultivated in the United States and Europe: all of which are growing, and a large majority of which have fruited in our own orchards and vineyards, under our own immediate inspection.

Our trees are of one and two year's growth from Bud and Graft, thrifty and of large size; all of which have been grown *without irrigation*.

We would call particular attention to our large stock of Apple Trees, which for vigor of growth and beauty of form, cannot be excelled in the State.

Our stock of Garden and Greenhouse Plants, Roses, Shrubs, &c., comprises all the leading varieties most desirable for beautifying private gardens and residences.

CATALOGUES containing a full list of all the varieties, with a brief description of each, together with their time of ripening *in this State*, will be forwarded either by mail or express, to all who are desirous of purchasing trees.

Orders from a distance will be promptly attended to, and carefully packed for shipment.

Our prices will be as low as *reliable Trees, Vines, &c.*, of like quality, can be bought for in any Nursery in the State.

Our terms are CASH on delivery of the trees at the Nursery or *approved* notes for a short time, bearing interest. Parties desiring to purchase can apply either in person or by mail, or by Wells, Fargo & Co's Express, to

S. THOMPSON, at the Nurseries.

Or to S. Perkins & Co., corner of Second and M streets, Sacramento; Derby & Baldwin, Petaluma; Goodman & Co., Napa City,—*Agents who will show samples and receive orders.*

☞ The above-named gentlemen are our sole agents, in whom the public can place implicit confidence, and all who may favor them with their patronage can be assured that they are not getting Trees from *Auction Houses* and *Peddler's Wagons*. 21-3m

Cranberry Plants.

THE BELL OR EGG SHAPED VARIETY

IS the kind best adapted for cultivation on damp, loamy soil, also on wet bogs or poor land, where nothing else will grow. When cultivated, after two years, they often bear from

200 to 300 Bushels per Acre.

Price 50 cents per 100, or $4 per 1000 for Bearing Plants.

New Rochelle (or Lawton) *Blackberry Plants*, of the genuine variety, at reduced prices.

$2 per dozen.....$12 per hundred.....$50 per 500.

Brinckle's Orange Raspberry,

$3 per hundred.....$1 25 per dozen.

Fine Red Antwerp, Franconia, Knevatts Giant, and Fastolf Raspberries,

$4 per hundred.....62½ cents per dozen.

NEW HOP TREE.

(See cut and description in the FARMER.)

Price 50 to 75 cents each.

This Hop is much stronger than the common one, for family use, and highly ornamental. Circulars relating to culture, soil, etc., can be found at the office of the FARMER, or by letter to the subscriber, by inclosing a stamp.

Orders will be received for the above plants, at the office of the FARMER, or by mail to my address, by inclosing the amount. I would also suggest, in addition, the amount of freight to be prepaid here, to secure their safe and speedy transmission.

HORTICULTURAL.

LAWTON OR NEW-ROCHELLE BLACKBERRY PLANTS!!

PRICES REDUCED!

THE subscribers announce to their friends and customers that they have now

OVER SIX ACRES
OF THE
GENUINE LAWTON (or New-Rochelle)

BLACKBERRY PLANTS,

under cultivation, and in good condition.

They are therefore prepared to fill large orders the coming FALL and the next SPRING, at the following reduced prices:

One Thousand Plants	$125 00
One Hundred Plants	15 00
Fifty Plants	8 00
Two Dozen Plants	4 50
One Dozen Plants	2 50
One Half Dozen Plants	1 50

☞ Good Plants for setting, of a second size, will be sold for $100 per 1000 Plants, or $12 per 100 Plants.

N. B.—All Plants ordered of us will be taken up and packed with the greatest care, and under our own personal supervision.

Of the many thousands sent out by us last year, we have heard very few instances of failure, notwithstanding that they have been forwarded to *every part of the country, and to California, with perfect success*, and the setting out has often been entrusted to unskillful hands.

Printed directions for setting and cultivating are sent with every package. GEORGE SEYMOUR & CO.,
v9-2 3m South Norwalk, Conn.

Ravenswood Fruit Garden PLANTS.

WHOLESALE AND RETAIL.

Brinckle's Orange Raspberry,	$70 ₱ thousand,	$8 ₱ hundred.
Col. Wilder Raspberry,	do	do
Cushing Raspberry,	do	do
Thunderer Raspberry,	do	do

Linnæus Rhubarb, $50 ₱ thousand, $8 ₱ hundred.

ALSO,

Blackberries: New Rochelle or Lawton, Newman's or Thornless, $15 ₱ hundred.

Strawberries: Hovey's Seedling, Boston Pine, Large Early Scarlet, $6 ₱ thousand, $1 ₱ hundred.

Currants: Black Naples and Cherry, $10 and $12 ₱ hundred.

ALL the above plants of best quality; we cultivate most of them for market fruits.

THE BRINCKLE'S ORANGE RASPBERRY, for market or garden, is considered the best of all Raspberries: is unequaled in flavor and beauty; flavor is rich and vinous; and color beautiful bright orange: a very vigorous grower; hardy and exceedingly prolific.

The Cushing and Col. Wilder are the best for making jams, preserves, syrups, &c.

THE LINNÆUS RHUBARB is a new variety originated by Myatt of England, who also originated the Victoria, on which this is a great improvement in both *flavor* and *productiveness*.

Its flavor is deliciously aromatic and spirited, and it is entirely free from the toughness and stringiness which characterize the Victoria, but when cooked becomes a fine uniform pulp, like the most tender apple. The plant is a very strong grower, more productive than the Victoria, and very hardy.

We cultivate most of the above Fruits for market, and selected them from our Fruit Gardens, as the choicest varieties known. Brinckle's Orange Raspberry and Linnæus Rhubarb especially are of exceeding excellence.

Orders will be promptly attended to in the order in which they are received, and Plants packed in careful manner.

Terms cash. Bills payable on delivery of Plants to the agents, or order of the purchaser.

Our plants will be ready to ship any time between the first of November and first of April. Circulars with full description of varieties and testimonials, can be had at the office of the California Farmer, San Francisco.

FREEMAN & KENDALL,
RAVENSWOOD, L. I. NEAR NEW YORK,
54 William street, New York City.

"We have visited Messrs. Freeman & Kendall's Fruit Gardens, from which they are now offering to sell Plants; and we can say their Plants are of very superior varieties and well grown, the Orange Raspberry and Linnæus Rhubarb particularly; we take pleasure in recommending them to the public."

PARSONS & CO.,

FLUSHING, near NEW YORK,

OFFER FOR SALE an assortment of Trees and Plants which they have grown for the use of amateurs, and have prepared, by frequent transplanting and other modes, for success in moving.

They are of fine size and symmetrical form, and among them will be found

Standard Apples of fine quality.
Standard Pears, Plums, and **Cherries.**
Peaches, Apricots, and **Nectarines,** on Plum stocks, and their own roots.
Dwarf Pears, of fine form, and ready for bearing.
Gooseberries and **Currants,** strong plants of the best sorts.
Raspberries, Fastolf, Red Antwerp, Fillbasket, and other known sorts.
Strawberries, of all the best varieties.
Native Grapes—Isabella, Catawba, and other hardy varieties.
Foreign Grapes: all the well-known sorts, with some new varieties of great excellence. These plants are propagated from vines that have borne abundantly for some years, and are known to be correct.

Great care is taken in the cultivation of Fruit Trees, and none but those of the best quality are allowed to be sent out.

The Ornamental Department

Contains trees of all sizes for lawns and streets, including ELM, SILVER, NORWAY, and SYCAMORE MAPLES, CATALPAS, LINDENS, TULIP TREES, CYPRESS, LARCH, WILLOWS, ASH, ADELE, ORIENTAL PLANE, and all the best varieties of deciduous trees.

It also includes EVERGREENS of fine size for single planting, and of small sizes at low prices, from one foot upwards, for massing; among them are NORWAY SPRUCE, BALSAM FIR, AUSTRIAN PINE, HEMLOCK, WHITE PINE, SCOTCH FIR, and other varieties.

The best Shrubs include many fine varieties at low prices, for massing, of which the RHODODENDRON CATAWBIENSE can be particularly recommended for its fine evergreen foliage, showy bloom, and perfect hardiness.

The ROSES are cultivated in very large quantity, on their own roots, of all the most rare varieties, and to those who purchase in quantity, will be sold at greatly reduced rates.

The Exotic Department

Contains a fine assortment of CAMELLIAS, grown as bushy, rather than tall, slender plants; and also contains all the well-known varieties of exotic plants and many rare sorts, introduced from Europe, annually. These are all carefully grown for those who desire plants of symmetry and beauty.

CATALOGUES of all the departments will be furnished on application. Great care will be taken in packing, and trees will be delivered in New York, and thence shipped as directed. v8-16-tf

v9-1

New Treatise on Land Surveying.

JUST PUBLISHED BY

E. C. & J. BIDDLE,

PHILADELPHIA,

A Treatise on Surveying, by S. Alsop. In this work, the theory is plainly and comprehensively presented; directions for practice are given definitely and precisely; and everything which an extensive business in Land Surveying would be likely to require is embraced. Price per copy, mailed to California, $2, postage included. Price of the KEY to the work, mailed to California, 75 cents.

E. C. & J. B. also publish the following popular educational works, and many others extensively used in the Schools and Colleges of our country: and they would respectfully invite School Directors and Teachers to send for a copy of the descriptive catalogue of their publications:

Crittenden's Treatise on Book-keeping. The series comprises the four volumes below named, and for each of them a KEY, and a set of miniature BLANK BOOKS for the exercises:

1. Treatise on Single Entry Book-keeping.
2. On Single and Double Entry, for Common Schools.
3. do do do for High Schools.
4. do do do for the Counting House.

The volumes are severally the text-books in Commercial Colleges in Boston, New York, Philadelphia, Cincinnati, Chicago, St. Louis, Louisville, etc.; in most of the Normal Schools, and a great number of the High Schools of our country in the Public Grammar and Evening Schools of Philadelphia, etc.; while as a book of reference for practical accountants the Counting House edition is, undoubtedly, the most popular work on the Science of Accounts, published in the United States.

Cleveland's English Literature. *Twenty-fifth Thousand just published.* 1. CLEVELAND'S COMPENDIUM OF ENGLISH LITERATURE, from the 14th to close of 18th century: chronologically arranged; consisting of Biographical Sketches of the Authors, and selections from their works, together with Notes explanatory, etc. 2. CLEVELAND'S ENGLISH LITERATURE OF THE NINETEENTH CENTURY. A sequel to the "Compendium"; arranged on the same plan as it. The above two volumes are text-books in many of the Colleges, in the principal Normal Schools, and in a large number of other first-class Seminaries of our country; and they may with confidence be recommended as an admirable guide or chart for private students of English literature.

Cleveland's American Literature. *Cleveland's Compendium of American Literature*, on the same plan as the author's "Compendium of English Literature," will be published early next year.

Harrison on the Rise, Progress, and Present Structure of the English Language.

The Works of Thomas Dick, LL. D. 10 vols. 12mo. Few books are better adapted for the School or the Family Library, than the works of Dr. Dick.

[For the California Farmer.]

The Demands of Agriculture in California. No. 2.

EDITORS FARMER: The claims of Practical Agriculture are evidently, with us, as important as those of Scientific. We learn from use and custom lessons of equal value to those we derive from the most correct reasonings. In 1850, at the Mission Dolores, horticultural operations were chiefly conducted by Americans; now, the best kitchen-gardeners there are Italians and Frenchmen. This is not owing, as all will admit, to those people of foreign origin being more intelligent, or better acquainted with the truths of Vegetable Physiology, but is purely in consequence of their having previously resided in countries where the climate and temperature bear a closer resemblance to California than those of the Atlantic and Western States; and because the value of land in those countries justifies more minute and careful cultivation. The fact is before us, and we are led to conclude that similar results would follow if the same class of men were to extend their operations to the broad field of Agriculture. Apparently we have not any reason to suppose that, as farmers, we Californians would be surpassed, here, by British agriculturists; but I much doubt whether we would not. Let us not bristle up at the insinuation. Let us learn from every available source; and above all things, let us not be too self-conceited. If some of those foreigners are so, there is no reason why we should be so silly. "See'st thou," says Solomon, "a man wise in his own conceit, there is more hope of a fool than of him." How could it be supposed that in the Mississippi Valley, where the rich soil only requires to be turned over to grow with a productiveness unheard of before, Agriculture would be conducted with the same amount of scientific precision as in England, where without a refined system of Agriculture the soil would soon be exhausted? If in the New England States the same amount of skill and talent is wanted, and applied, as in Europe, it is for similar reasons. But there, so far are the inhabitants from entertaining any prejudice against receiving instruction from European systems of Agriculture, that no pains are spared to get themselves made better acquainted with them.

No people can have a stronger prejudice against receiving instruction in Agricultural practice from abroad than the Scots had about two hundred years ago. You might have searched all Europe, and it would have been impossible to have found a more detestable system of farming than theirs. The Dutch had succeeded in reclaiming from the ocean a country of unrivalled fertility, and adopted an agriculture suited to their peculiar circumstances. The Flemings had commenced their garden-like cultivation, which has never been surpassed. The Italians, from the days of Cincinnatus, had been careful farmers, and irrigated their fields with peculiar skill. The philosophical English made Agriculture a study, and furnished works upon the subject which are read with profit to this day; and their practice was consistent with their superior knowledge. The Scots, with that peculiar obstinacy of character for which they are proverbial, refused to be taught, and clung to their time-honored absurdities with a conservative tenacity which was quite ridiculous. Whose system should we make our model? Certainly not that of the pig-headed Scots of two hundred years ago, but any of the others, or rather all of them together.

It was in vain that the Scottish landlords introduced on their home-farms the superior cultivation of England. That system, they said, might do well enough for rich men. It was long before another course, which the landowners found it necessary to adopt, was attended with better results—the introduction among their tenants of English farmers, of whose superior modes of procedure they might be daily observers. They only submitted to learn from those hated strangers their superior practice, when they discovered that, while they themselves continued as poor as ever, their new neighbors were all getting rich. If there is anything which sounds sweeter in a Scotchman's ear than recounting with a laughable gravity the high claims of his ancestors, however rude, it is the jingle of gold and silver coin. They were convinced; and the same determined spirit which had proved their bane, under a wiser policy, became their antidote. They were not content with learning English Agriculture from those English farmers, whom their landlords, so much against their feelings, had settled among them. They sent their sons to England to observe how others did—and not to one county only, but into every county where Agriculture was better understood, and more profitably conducted. And what has been the result? I will not tell your readers; they know already.

So far, as I said, are the people of the older States from disavowing the propriety of benefiting by the introduction of Agricultural knowledge, experience, or improvements of any and every kind from abroad, that the reverse is the case. There is not a good Agricultural work published in England, or in any part of Europe, but it is immediately reprinted (or translated as the case may be), and as readily purchased, and greedily devoured by our intelligent citizens, as in the country where it was written. They have got beyond such narrow prejudices; shall we retain them?

The case of the Scots, which I have cited, is more in point than many may be aware of. It is not only corroborative, as an argument, of the impolicy of allowing any petty jealousy, which may be lurking in our bosoms, to stand in the way of our attainment of profitable knowledge, but the system of Agriculture which those stubborn Northerners had adopted, was also that which is in common use among us, *only not quite so bad*. I would point out their almost exact coincidence, if I could do so without exposing our entire want of system, and setting the people of other States a laughing at us, for farming land as we do, which, in spite of our mismanagement, is so amazingly productive. We ought to do better. We must do better. There is probably no other State possessed of a soil and climate equal to ours. There is certainly no other State so much in want (or more deserving) of skillful management.

AGRICOLA.

MILLERTON, Feb. 20th, 1858.

New Grapes.

THE following remarks upon the two new Grapes, the *Concord* and *Rebecca*, we copy from the committee's Reports of the Massachusetts Horticultural Society, at Boston. This speaks well for these new Grapes, and we believe they will do admirably well in California. These were grown in open culture:

"The *Concord*, so often spoken of heretofore, has ripened in many instances where the Isabella has failed. Mr. Bull has shown them in abundance, but few others have done so, probably for the reason that it has not been planted out a sufficient length of time to allow of a liberal show. Those shown by Mr. B. were large, both in bunch and berry, and few grapes prove more attractive than does the Concord, with its rich bloom overlaying every berry. It is a valuable acquisition, and Mr. B. is deserving of a liberal reward for his patient waiting, biding the time when the community will say he should be amply compensated for originating so valuable a grape.

The *Rebecca* has now become so popular for its early ripening, good qualities and hardiness that if not already in the hands of most grape growers, it soon will be. It is one of the most valuable grapes for out-door culture that has ever been introduced amongst us; and then, too, it is so easy of propagation, that in the hands of almost any person it can be multiplied ad libitum. A person procured one dozen vines in the autumn of 1856, and immediately commenced its propagation in earnest, as may be judged; for he assures us that from that dozen vines he should have ready potted and for sale, *three thousand* vines for the spring of 1848. We were glad to have such evidence of its readiness to propogate, believing that it should be in the hands of every one owning the smallest piece of ground."

WINE MANUFACTURE IN MASSACHUSETTS.

The following report of Wine-making in Massachusetts we also copy from the Massachusetts Horticultural Society Reports:

Native Wine.—At the solicitation of Messrs. E. Paige & Co., of Boston, a full committee, with the addition of several horticulturists from a distance, then attending our Annual Exhibition, made a visit to their manufactory and wine vaults, under the City Reservoir, where they found, in the process of pressing, several tons of native grapes; and were assured by Messrs. Paige & Co. that the whole amount they would make into wine this season would exceed sixty tons, yielding over 20,000 gallons of wine. The grapes were mostly from our own State, though several lots were received from Connecticut. One person from Cape Cod supplied about eight tuns.

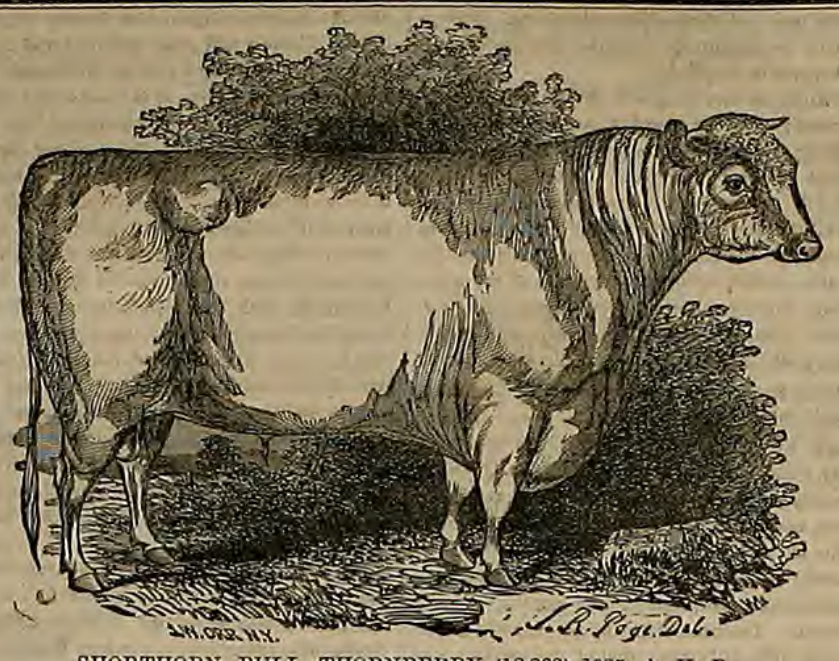
The space allowed us will not admit of our going into particulars; but we would call attention to the native grape as an object of profit, in many instances, since it can be grown in abundance, where it is planted by the side of a stone wall—the liberal price paid by Messrs. Paige & Co. affording compensation for the little care and labor required. As to the quality of the wine, although it was not of sufficient age to enable us to pronounce a positive opinion on it, some of our amateurs, who have had a more extensive acquaintance with other samples from the establishment of Messrs. Paige & Co., speak of it in terms of commendation. Messrs. Paige & Co. have also produced a brandy from the pulp and skins of the grape, after the juice had been expressed, which, according to the opinions of connoisseurs, is likely to become a valuable article for medicinal and other purposes.

STRAWBERRIES.

We also present their report on Strawberries, as it may be of great value to us here:

Last year the committee awarded Isaac Fay the Lyman Plate, valued at fifty dollars, for his seedling called "Jenny Lind," being the best seedling strawberry, after a trial of three years. Mr. Fay had exhibited his strawberry for more than three years, but the committee believed the spirit and meaning of the prospective prize offered was that the fruit should have been tested in regard to prolificness, hardiness, &c., and of this fact we could not have a true knowledge, except through its dissemination. One of the very best strawberries ever grown, Hovey's, was disseminated over the whole country, and there was but one opinion expressed of it; all were unanimous in its favor, and it was some ten years after originating it, that the Society awarded Messrs. Hovey the Society's Plate, valued at fifty dollars.

Though a fruit should have been in the hands of the originator a length of time, and it may be for his interest so to retain it, we do not believe the Society is called on for the fulfilment of its offer under the head of "Prospective Prizes," till the committee is satisfied that it is the best, in all respects, for the time being. The Jenny Lind Strawberry has been shown the past season by several persons, and it has been uniformly good, though the best shown this season was the Sir Charles Napier, by Messrs. Hovey.



SHORTHORN BULL THORNBERRY (12,222) 1035, A. H. B.

BRED by Richard Booth, England. The property of Harness Renick, Circleville, Pickaway county, Ohio. Sired by Hopewell (10,332). Dam Hawthorn Blossom, by Leonard (4210); g. dam Blossom 3d, by Young Red Rover (4905); gr. g. dam Blossom, by Isaac (1129); gr. gr. g. dam Blossom, by Pilot (496); gr. gr. gr. g. dam Twin Cow, by Albion (14); gr. gr. gr. g. dam ——, by Mr. Booth's ——, game bull (359); gr. gr. gr. gr. gr. g. dam ——, by Suwarrow (636); gr. gr. gr. gr. gr. gr. g. dam ——, by Mr. Booth's ——, son of twin brother to Ben (88); gr. gr. gr. gr. gr. gr. g. dam ——, by ——, twin brother to Ben (660).

Letter from Mrs. Farnham.

The following happy, spirited letter of Mrs. E. W. Farnham, will be received and read with great pleasure by her numerous friends, and happy will they be to learn that they may hope to see her again on our Pacific shores:

EDITORS FARMER: The weather is the most harmless of topics for a letter writer, and as I feel today, very neutral, wishing to avoid all offence or shadow of it to any, I shall proceed to treat that inexhaustible theme. Have you Californians heard, and have you realized, that up to this blessed thirty-first day of January, in the year of our Lord eighteen hundred and fifty-eight there has not been a day of winter here? The mercury has not once been down to zero, and there have been, I think, but three days in which the frost of nights has not yielded to the genial airs of midday. Fahrenheit records a temperature from 18° to 35°, since the day before Christmas, which was a little colder. Huge stoves and red anthracite are a nuisance. The coal dealers pocket their idle hands, instead of the cash of frosty customers; and the fur merchants would have been ruined if vanity had not been a more pointed motive with their fair patrons than cold. I saw a paragraph the other day in the Tribune, in which one of "the oldest inhabitants" showed that there had been no such winter since 1824, when steamboats, such as they then were, ran to Albany all winter, laying over now and then a day or two. They are running now to Poughkeepsie, and doubtless could go all the way up if the railroads were not better for public use. Last evening I had occasion to take a long ride up Fifth Avenue. The moon was shining brightly down from the zenith, and filled the chasm between the high walls of that broad way with a flood of warm, summery light, wherein ladies, carelessly shawled, and gallants, forgetful of overcoats and mufflers, disported themselves as it might be on a *springy* night in March. There seemed to be a season of peace granted to us. Beggar women could not look miserable, professional children could not shiver, and the poor, who desired to do neither, could walk abroad and thank God with grateful hearts, that, along with the hunger which they cannot escape, comes not also biting cold. There is a good deal of apprehension that so unnatural a winter must end in unseasonable or destructive rigors, and that famine or pestilence will surely follow it. But I accept what God decrees; fearing nothing. There may be causes of calamity generated by the marvelous mildness of the season; but if there be, and they come, what then? Is not science ready, with pen and page in hand, for the record? Do we not thirst for some further unfolding of the great mysteries which lie in the bosom of nature? Could we not seize and place in harmonious relation to ourselves, a new force or forces, if she is about to present them to us? One cannot know what is coming from the subtle kingdoms whose shadowy borders we have been touching upon for the last few years; but when I remember that, for the soft air that floats in at the open window, I ought to be pierced with needles of frost; for the blue sky over my head there ought to be gray curtains of snowy cloud, I feel as if the hoary god who should be ministering them to us, might be doing an extraordinary work somewhere else, of which the results may surprise or instruct us by and by.

Since my last, I have visited the British Art Exhibition, where, among other things, to be spoken of at some future time, I saw Miss Hosmer's statue of Beatrice Cenci. We hurried through the outer rooms, on hearing that the marble was being put up to be sent away, and found ourselves in a moderate sized apartment, hung with the watercolors of the exhibition, and occupied by six or seven rough, irreverent-looking laborers, who, with hammers and other tools in hand, were consigning the statue to the darkness of a huge strong box. They kindly stood apart as little groups of visitors came in, and there before us lay the first noteworthy work in marble of an American woman. It had been much praised. Mrs. Child, with an excess of kindness, such as she has sometimes before shown, to those who enjoy her rare and rich approval, had said great things of it and the Artist. Your own correspondent, Grace Greenwood, speaking with the enthusiastic love of a generous woman's heart, had pronounced it a triumph. Others, deeming themselves critics as well as friends, had showered praises upon the courageous head and hand of the fair Sculptor. I had not seen a line, nor heard a word qualifying the praise. Thus one felt foredoomed to admiration.

But I confess to having carried with me, into the presence of the stone, a picture of Beatrice on that last morning, sketched on the retina of my mind by the subtle, keen, penetrative imagination of Shelley. I saw her there, exceeding fair in aspect and feature; the suffering, worn spirit immanent in the wasted flesh; the history of that unmatched, and, let us hope, unmatchable life, written on the full, dropped eyelids, in the furrows of the youthful cheeks, in the firm yet drooping mouth; the horrible loathing, the burning sense of outrage, the overmastering passion, which abandoned Heaven and earth for the sweetness of that revenge which vindicates and brightens her womanhood to all time. All these were elements of the Beatrice whom I had seen, and whose image now lay before me, as vividly as the marble which Miss Hosmer had wrought into elegant form and christened Beatrice. In the person of the first had been consummated the sum of all wrong which womanhood can suffer. Through her short life had swept, with the fierceness and blight of the sirocco, oppression the heaviest, shame the most torturing, loathing and self-loathing the most intense, horror, rebellion, despair, till, self-resuscitated, her strong soul asserted its womanliness in the crime which commemorates her life. Such was the experience which Miss Hosmer attempted to express in stone. At the bare idea one thinks well of her *courage*. There need be much else beside skill in the hand, genius in the brain, and fidelity in the eye. There is, one would say, an absolute demand for experience, in the soul of the artist, which would answer to that of the subject, as the mirror to the form before it. Not that the artist need be criminal like Beatrice. Deep chords of life are swept without the touch of that black hand. But she must know what belongs to womanhood—its glory and riches, and, by contrast, its possible humiliation and shame.

To all this, Miss Hosmer seems to be blind. Her Beatrice is a fair girl sleeping, but for her stone bed and the huge ring in its margin, as a young May Queen might lose the last hour of the night before her triumph. There is no suffering in the folded eyelids, no languor in the cheek; no sorrow on the fair, smooth brow; not a shadow of pain on the closed lips—*nor any beam of light from Heaven which might have banished these.*

Calmly considering it, one would say she had attempted with immature genius, and a rash hand, a study which the hoary headed master might tremble and pray over. In all the cunning of her art Miss Hosmer is not lacking. She moulds a beautiful hand and arm, and foot; the draperies are good, the disheveled hair faultless, the anatomy faithful; but this is not art; and if Miss Hosmer lives, and works ten years, she will smile at the over-friendly praise which helps to make her present failure more apparent. It is a glorious promise, though, to see women in the studio. It insures *truth* in Art, because it is in the nature of woman to embody the actual in the ideal. She is, happily for us, incapable of the cold, intellectual conceptions of man; and, both as a worker and an artist, she must, by the laws of her being, clothe the emanations of her inmost life with forms of beauty, or use. With her, Art cannot be a cunning combination of colors, and forms, and spaces; nor merely a deft treatment of stone. It must be the vehicle of true expression, the outward and visible sign of the inner experiences which enrich or impoverish, degrade or exalt the life. Every work, so produced, will have individuality, will speak to the consciousness of truth in the beholder, as it has proceeded rom that in the cre ator.

There was the like disappointment to this, experienced by many, in beholding Palmer's Indian Girl. The Indian Girl was a thoughtful, refined, conventional maiden. Her face drooped over the cross she held in her hand; her hair was combed and knotted, a la Grecque; and if a robe had been substituted for the leather-fringed blanket, which was rather carelessly folded about her person, she might have entered any drawing-room without exciting remark. There was no odor of the *woods* about her, no strength of feature bespoke the forest race, suggesting the mysteries of mind and storm; of leafless winter and redundant summer, of stealthy marches and night-watches amid wierd solitudes by lake and cliff and waterfall. In short, the Indian Girl was not at all our Indian girl, by any shadowing forth of the life you were called upon to apprehend and sympathize with in her. She was a handsome young woman in marble, and might mean anything, from a gentle, well-mannered peasant girl, to a subdued drawing-room belle of the better sort.

Not such was the Greek Slave. Without the manacles you would know her for a high-souled and wronged woman, for whom there was no fate but submission. But I will venture no further on your reader's interest in these subjects. One thing may always be said: we cannot too deeply reverence true Art, since by it and through it the ideal and the actual are brought side by side, a juxtaposition which must ever be profitable to the earnest soul.

We are looking anxiously for confirmation of the good news that there is another line of steamers to be put on. Many people will see California shortly after that event, who now dare not let themselves think of it. Dr. Stillman wrote a letter from Marysville and the Buttes, the other day, to the Tribune, in which he—— well, to keep oneself strictly within the bounds of pastoral propriety, as becomes a correspondent of the FARMER, I ask what right has a humane and scientific man to send such an epistle among exiles? Is he insensible to the possible consequences of such deeds? I only wish he may be caught in the East sometime, and that there may be left in California that day, some one able to return him measure for measure, in pictures as vivid and intolerable (here) as his own are, of winter rains and sunshine, and verdure, and flowers, and purple mountains, bending around distant horizons, steeped in transparent airs; and acres of wild fowl, flocking the rainy green of the lowlands, and beating the sunny blue above with their myriad wings. Ah, Mr. FARMER, what revenge could be taken on such a man, if one were able to do it!

You may have among you for a few months, very soon, the star of the Orthodox Theological world in America. Let California get her fame up for restoring overdone clergymen to health, and power, and there is no telling what unexpected blessings, better than all the golden ones, may fall into her lap. Keep the FARMER bright with records of what Nature has done, and what man can do with her help, and you will gather in by and by, fit cultivators of souls as well as of soils. And when you do, if haply not before, may I be *there* to see.

Yours, truly, E. W. F.

MR. SIMPSON'S GRAPE METHOD.—The report of the Committee of the Massachusetts Horticultural Society assures the world, that Mr. Simpson's two-crop system of cultivating grapes under glass, has proved successful. "The time to ripen grapes averages from four and a half to five months; and thus leaving a month for the ripening of the wood, a crop might be matured every six months. Mr. S.'s practice, however, is to allow the vine to grow naturally, without forcing, every other year, thus preventing any exhaustion which might ensue from continued forcing. The vines grown are Syrian, Hamburghs, Muscats, Black Prince, Zinfindal, Frontignans, and Maready's Early." The Committee on Gardens award high praise to Mr. H. H. Hunnewell's, as well as to his gardener, Mr. Harris.

THE LOGAN GRAPE.—Mr. A. Thompson, of Delaware, Ohio, writes a highly favorable account of a new native grape called the Logan. It is a black grape, ripening before the Catawba, and preferred to the Isabella, and is believed to be a wilding of Ohio; hardy, vigorous; wood, short-jointed and compact; distinct in wood and foliage, productive, and probably the earliest hardy grape of fair quality in cultivation, and will ripen its fruit several degrees further north than the Isabella and Catawba.

California Notes.

ABOUT GRASSHOPPERS AND LOCUSTS
In California and the World.

BY ALEXR. S. TAYLOR, OF MONTEREY.

[CONTINUED.]

"In the territory of Cyrenaica, the capital of which is Cyrene [in the ancient Lybia, or now known as the eastern coast of Barbary, adjoining Egypt, where the Locust is well known by the present Berbers.—A. S. T.], there is a law which even compels the people to make war three times a year against the Locusts; first by crushing their eggs, next by killing their young, and last of all by killing those of full growth; and he who fails to do so incurs the penalty of being treated as a deserter. In the island of Lemnos, in the Egean Sea, there is also a measure fixed by law, which each individual is bound to fill with *Locusts* which he has killed, and then bring it to the magistrates. It is for this reason too, that they pay such respect to the *Jack Daw* [probably meaning the Rose-winged Starling—A. S. T.], which flies to meet the Locusts, and kills them in great numbers. In Syria also, the people are placed under martial law, and compelled to kill them: *in so many countries does this dreadful pest prevail.* The Parthians (people of ancient Persia, on the western line), look upon them as choice food, and the *Grasshopper* as well. The voice of the *Locust* appears to proceed from the back part of the head. It is generally believed that in this place, where the shoulders join on to the body, they have as it were a kind of teeth, and that it is by grinding these against each other that they produce the harsh noise which they make. It is more especially about the two equinoxes that they are to be heard, in the same way that we hear the chirrup of the *Grasshopper* about the summer solstice. The coupling of *Locusts* is similar to that of all other insects that couple, the female supporting the male, and turning back the extremity of the tail towards him; it is only after a considerable time that they separate. In all these kinds of insects, the male is of a smaller size than the female.

"Julius Obsequens, a Latin writer of 214 years before Christ, speaks of a pestilence in Parthia, created by the dead bodies of *Locusts*, which caused the death of 8000 persons."

It will from this appear, that the accounts of Pliny, relating to the *Locusta*, the most of which are taken from Aristotle the Stagirate, teacher of Alexander the Great, and one of the most profound philosophers of antiquity; the old gentleman who is said to have fretted himself to death, because he could not tell why the tides rose and fell with Luna, or why indeed they moved at all by times and seasons. He died 300 years before Christ, and his account of the *Locusta* agrees in the main with that of the California Jesuits, and other modern authors and observers.

A late English writer (1847), makes some curious notes on the country supposed, with good reason, to be the Cyrenaica of Antiquity. This scribe quotes Makrizi, a modern Arab author, on Egypt and Barbara, who relates, that in his day, "he saw at the Oasis of Siwah (in the Lybian desert, southwest from Alexandria), an orange tree as large as an Egyptian sycamore, producing fourteen thousand oranges every year!"

Our writer traveled over Lybia in the track of Alexander, and to search out the sight of the shrine of the oracle of Jupiter Ammon, and to make notes on the countries of the Barbary coast of the Mediterranean, described by Diodorus, Arian, Ptolony, Herodotus, Strabo, and the other savans of the early historic ages, in their days filled with dense populations, and beautiful stone cities—God only knows when they were built. They are now mostly swallowed up in sand and the debris of fossil oysters and Infusoria. What inhabitants are found now-a-days in the ancient duplicate of Alta California, are wretched, murdering, miserable, bigoted Ishmaelites of Mahomet. After he had spied out the nakedness of the land, he comes to the following conclusions: "I could not help, whilst contemplating these ruins, giving way once more to a feeling that had often been aroused in the course of our journey—one of regret—namely, at beholding the triumph of desolation and the unequivocal signs of the victory of barbarism. And I was confirmed in the idea which must present itself to all who transgress the boundaries of the narrow circle of our young civilization, and expand their view of the senile regions of the earth, that 'there is a tide in the affairs of men;' that we advance and retreat, never reaching the goal towards which we tend, and slipping back sometimes even when we fancy we are progressing. Let those who still dream of the perfectability of the human species, go to the Lybian Desert and turn up its soil, and they will find the skeleton of a civilization, now as much extinct as the mammoth or the mastodon." Vide St. John's Adventures in the Lybian Desert, London, 1849. It would seem that in the impenetrable antiquity of Alta California, that there existed millions of men who built cities, and irrigated vast tracts of country, now given to the desert and sterility, by some strange convulsion of nature, drinking up or emptying out the life-giving waters; some volcano, or earthquake, or fanatical, crazy wars of devilish human sacrificers, sweeping off the thick populations, and then *Locusts* and famine coming in afterwards to eat out the last drops of blood in the hearts of the miserable people. Some traveled on in the dim ages of the California antiquity, stopping at the Gila in the Apacharia; then in the Pimeria; then in the Otomaria; then in the Chichemacaria; then in the Toltecaria; then in the Aztecaria; and finally following down into the central countries of America, strewing the illimitable wilderness with stone cities, pyramids and temples, and leaving a language *which we can only call petrified*, as no civilized mortal can yet read their mystical hyeroglyphics, cut out of the basaltic fabric of the heathen shrines of blood. What a mystery is our little world; the extinct animals of the pre-Adamite earth; the creation of man, and the creatures subject to him, and the history of his childish or savage acts, and of the inscrutable, simple folly of his various "cutting up of extras," since he could write in stone with the chisel, or with a pen on paper.

The scientific difference between *Grasshoppers* and *Locusts* is well and simply expressed in the following description from Adams, Baikie & Barron's Manual of Natural History—London, 1854, pp. 750—see p. 211:

"*Sub order of Orthoptera—Leaping, Orthoptera or Saltatoria; Fifth Family—Grasshoppers or Gryllidæ*:

"Antennæ very long and slender; head short, vertical; upper lip rounded, entire; body rather robust; wings large, delicate; wing-covers and wings deflexed in repose; mandibles strongly toothed; ovipositor of female long, sword-shaped; tarsi four-jointed, joints dilated and obed. The chirping of the Grasshoppers is produced like that of the crickets, by rubbing the base of the wing-covers rapidly together, these organs being furnished with a round talc-like plate, and rough, strong ribs, serving as a sort of drum.

Sixth Family, *Locusts* or *Locustidæ*—Antinnæ short, filiform, cylindric; ocelli three, distinct; upper lip notched on front edge; jaws strong, very much toothed; body robust, laterally compressed; wings and wing-covers deflexed in repose, the latter not furnished with a talc-like plate for stridulation; ovipositor short, not exserted; tassi three-jointed; leap with great force; flight continuous; associate in numbers; herbivorous. The noise made by the Locusts is produced differently from that of the crickets and Grasshoppers, and is owing to the friction of the hinder thighs against the sides of the wing-covers."

It will be seen from this analysis and that of Cuvier, that the so-called *Grasshoppers* of California (such as have affected our State before and during 1855), is a *true, indigenous* variety of the *Migratory Locust* of Syria. The difference between the families seems to be mainly, that *Locusts* congregate together in immense swarms at maturity, and are enabled to take wing under kings and leaders, and sustain themselves in prolonged flights, like birds, at great hights in the atmosphere; whereas the *Grasshopper has not* this locomotive faculty—a simple and important distinction, easily understood.

The celebrated navigator William Dampier, in his voyages round the world from 1670 to 1690, mentions a variety of the *Locusta* in the kingdom of Tonquin (southwest of China), which he says are about the bigness of the top of a man's finger, and as long as the first joint. It breeds in the earth in low grounds; and in the months of January and February, which is the season for taking them, they issue from the earth in vast swarms. At first they can hardly fly, so that they often fall into the rivers in great numbers; however, the natives in these months watch the rivers and take them up in multitudes in small nets. They either eat them fresh, broiled on the coals, or pickle them for keeping. They are considered a great delicacy in that part of the world by rich and poor.

Goldsmith adds that Locusts are regularly brought to market in the East and sold as commonly as larks and quails in Europe. Oliver, the Irishman, also states of the great West India Locust, that it "is considered the most formidable of any species of the family. It is about the thickness of the barrel of a goose quill, the body is divided into nine or ten joints, the whole animal about *eight or ten inches* long. It has two small eyes standing out of the head, like those of crabs, and two feelers like long hair (antennæ.) The whole body is studded with long excrescences, not much bigger than the points of pins. The shape is roundish, the body diminishing in circumference towards the tail, which is forked into two horns, between which is a sort of a sheath containing a *small dangerous sting*. If any person happens to touch this insect, he is sure to be stung, and is immediately taken with a shivering and trembling all over the body, which however is stopped by rubbing the parts with palm oil." This is like bringing the description in Revelations, of the army of Apollyon, to a reality and not an enigma.

In Whithaw's Glasgow edition (1840) of Goldsmith's Animated Nature, before quoted, he adds a note from the American Quarterly Review on the Ichneumon fly which preys on the Grasshopper of the Atlantic States:

"The large-winged Grasshopper, found in such abundance in the American meadows in autumn, feeds upon vegetable matter until matured. Before it takes wing, another insect, the Ichneumon, lights upon its body and thrusts under its skin a number of its eggs, by means of a tubular awl, shaped oviduct. These eggs slowly develop into living worms, and feed upon the body of the Grasshopper, until themselves are ready to take wing. So admirably do they perform their office, that they do not injure the vital organs of the Grasshopper, until they are ready to change their state; at the proper season, hundreds of the Grasshoppers, in this condition, have just strength enough remaining to flatter to a tree or fence, and with a dying effort fix their hooked feet so firmly as to retain their position after death. At this state, you will find an empty shell, or one filled with Ichneumon worms, just ready to burst their covering, and become winged insects."—Vide page 478, vol. 2., *para passu*.

Though Goldsmith's Animated Nature has been published since 1774, it remains the best written, most lucid, popular, and entertaining of all the works on Natural History in the English language. Oliver was possessed with the most genial of human feelings; he was a born compiler, editor, and *literaire*. He was more than this—he was a child of genius, and experienced the unhappy luck of this species of the *homo*. And it is surprising, to this day, how many men have been produced among the Protestant and Catholic families of Ireland, who have ornamented the periodical literature of the United States and Great Britain, and her colonies. There is a vivacity and liveliness of thought, a faculty of accommodation to outside pressure and necessities, a quickness of perception, and a knack of being always on hand, that renders the people of the land of Blarney, Barney, and Kilkenny, a most singular, curious compound of human enigmas. In war it is very odd that the Irish and Scotch families of Napiers, Nugents, McDonalds, and many others have *been, at the same time and in opposing armies*, high commanders in the military forces of the United States, Great Britain, Austria, Spain, France, and Russia. In some of these countries these very families hold high command still by descent from father to son, and in Scotland, England, and Ireland, in civil, military, and naval affairs, their name is legion. Oliver Goldsmith, with his Commentator Whitelaw, wrote the best account of Locusta we have been able to read of in our limited range of *literaires*. And quite a number of learned Irishmen have visited California for scientific purposes, *ante* 1846, and commencing since the time of Vancouver in 1792—and latterly—see Prof. Wm. H. Harvey, (of Dublin University) on the Algæ of California and Oregon, 1855-'56-'57—Smithsonian Contributions to Knowledge.

The following account of the appearance of the *Locusta* in Great Britain is taken from a December (1857) number of the London Illustrated News, accompanied by a woodcut from a photograph. The appearance of this specimen is nearly identical with the *Grasshopper* of California, or, as it doubtless is, a true *Locust*:

A Live Locust in London.—Several solitary visitations of the Locust (*Gryllus migratorius*) have recently been recorded in various parts of the kingdom. The first instance, we believe, occurred in Ireland towards the close of the past month, when in the Tyrone Constitution appeared the following statement:

A live Locust, a strange visitant to this part of the world, may now be seen at this office. It was found in a field at Gortrush, in the neighborhood of this town, by a son of Mr. John Houston, ironmonger, on Tuesday morning last (Aug. 25), the day after the thunderstorm. It is clearly a Locust (*Gryllus migratorius*), that destructive insect whose ravages are proverbial—one of those whose approach, from the innumerable myriads that compose their squadrons, is announced in prophetic language as a day of darkness and of gloominess, and whose desolating march is thus described:—"The land is as the Garden of Eden before them, and behind them a desolate wilderness; yea, and nothing shall escape them." This Locust is about two inches and a half long, strong in body, and very active.

A correspondent of the Times next states that on the 31st of August his hat caught on the grass, in his garden at Lambeth, a Locust, which, by way of corroboration, he sent alive to the Times office.

But the specimen Locust we have engraved was taken in the heart of the metropolis: it flew into the shop of Mr. Barratt, of 369 Strand, on the 28th of August last, at half-past seven o'clock in the evening, when it was killed by Mr. Barratt.

Next, a Locust was seen in Ordeal-lane, Salford, where it was caught by Mr. F. Howard, who presented the insect to the Salford Royal Museum, in Peel Park, where it was exhibited alive, in a glass case, in the second room on the ground floor of the new wing. The exhibition of the above specimen attracted many visitors, to whom Mr. Plant, the curator of the Museum, has stated that several instances have been mentioned to him of Locusts having been seen in the districts around Manchester for several years past. A gentleman who possesses a farm on Chat Moss has a Locust, preserved under a glass shade, which was caught on the Moss in the autumn of 1852; another Locust was caught by a farmer in the fields at Bowdon, in 1855; and one was captured in the same autumn, by a cat, near a cottage in the village of Worsley. Other instances have been mentioned of which the particulars are not so carefully remembered. A few weeks back, a live specimen of the Locust was taken in a cellar belonging to Mr. Ransome, Broad street, Pendleton; and another live specimen has just been sent to the Salford Museum, which was caught at Greensides, near Droylsden, by the son of Mr. J. Gibson, farmer, of that place.

There was a general appearance of Locusts in this country in the autumn of 1846, when there were numerous captures, chiefly of single specimens, in several parts of London, and at or near the following, among other places: Knaresborough, Peckham, Rye, Kingsbury, Flamborough Head, Dawlish, Epping, York, Penzance, Richmond (Surrey), Leicester, Worcester, Nottingham, Redcar, Uppingham, Chelmsford, Yarmouth, Glamorganshire, Norfolk, Pegwell (Isle of Thanet), Duxford, and Folborne. A large flight passed over Sunderland, and many were caught. In that year, also, the Locust was seen so far north as Sutherlandshire; but there is no account of one having been caught in Scotland. It is most likely that the recent appearance of these insects was attributable to the easterly winds having brought them from the Continent. This supposition receives confirmation from the fact that eleven years ago, when they made their appearance, they were principally seen along the eastern coast.

Captain A. Smith, of Monterey, who traveled a great deal over the country between Missouri and New Mexico, informs me that the accounts of the *Grasshoppers* of that region, described in these notes, agree with his own experience and knowledge. The mature *Grasshopper*, he states, measures fully as much as three inches in length.

[TO BE CONTINUED.]

THE tradesman who does not advertise liberally, has been very appropriately compared to a man who has a lantern, but is too stingy to buy a candle.

SOMEBODY says there is a decided difference between *perseverance* and *obstinacy*. One is a strong will, and the other a strong won't.

Miscellany.

[For the California Farmer.]

INFANT GRAVES.

BY J. B. M.

Around a sleeping infant's tomb
Methinks bright rays of sunlight fall;
Angelic choirs dispel its gloom,
And Nature weeps upon its pall.

Beneath the sod in peace they sleep,
Calmly as on their mother's breast;
While starry hosts a vigil keep,
And harps æolian soothe their rest.

Dust unto dust alone we give—
Earth hides it even from our sight;
On high their souls immortal live;
Where sin and sorrow ne'er can blight.

Midst angel bands in heaven
They'll raise their sweetest songs;
Thankful that life was given—
That death new life prolongs.

SAN FRANCISCO, Feb. 23, 1858.

[For the California Farmer.]

MY MOTHER'S PRAYER.

On, sweetly it fell on my listening ear!
It seems, even now, the soft cadence I hear.
That voice so sweet, on the morning air,
Was the mellowed tones of my MOTHER'S PRAYER.

She prayed that my future path might be
From every sorrow and danger free;
That the seeds of virtue, sown in my mind,
A fertile soil in my heart would find.

And oft do I think that loved Mother is near,
The sighing heart of her child to cheer;
O'er the stormy wave of Life's dark tide,
A glorious beacon—an *"angel guide."*

And, when I muse on her silent grave,
Away, far away, o'er the OCEAN'S WAVE,
A voice seems to fall on the evening air—
I list—'t is the sound of my MOTHER'S PRAYER.

J. Q. A. W.

A Series of
Musical Entertainments,
Given to the Contributors of the California Farmer.

BY M. A. SARLES,

Professor of Music and Elocution, in the Collegiate Institute at Benicia.

LECTURE SECOND.

PROGRAMME—PART I.

1. Fantasia Operatic, from "Lucia".....Strakosch.
2. "Vi Ravisco," Tenor Aria from "Sonnambula."
3. "Love my Dearest," from "Il Puritani".....Bellini.
4. "By a Fountain".....Bellini.
5. Song of the Drum," "La Fille du Regiment".....Donizetti.

PART II.

1. "Katy Darling Variations.".....Published by Hall & Son.
2. "Ben Bolt."
3. "Sally in our Alley,".....Carey.
4. "King of the Sea."

PART III.

1. "The Cavalier."
2. "The Polka Explained."
3. "The Minute Gun at Sea".....M. P. King.

LADIES AND GENTLEMEN: The wanderer in Nature is constantly reminded of the grandeur and power of the Almighty by the variety of landscape that is presenting itself to his most hasty and unreflecting glance. At one time he is in the shadow of a mountain, that rising its snow-capped summit in kingly magnificence with the unfathomed fields of air, appears as a patriarch of mountains; again he muses by the gently swelling undulations that render her appearance always so attractive, or now roams delighted amid valleys of exquisite beauty.

There is to be found in the mountain all the elements of the sublime; it is an union of striking details. The vast and solemn words, among whose foliage the wind is ceaselessly singing; the huge mass of darkly colored granite; the brilliant tints of the wild flowers; the tangled vines—all, all form one stupendous whole, one sublime thought of God. No one can gaze upon it without experiencing emotions of awe, and without acknowledging its irresistible power.

In the shadow of Mont Blanc, by the side of Cotapaxi, 'neath the fire of Vesuvius, the mind cannot resist the overwhelming deluge of thought that rushes like a storm-created torrent upon him; we feel, and feel intensely, the influence of the sublime.

The soft and gentle undulations, such as are found in sunny New England, upon the ocean-like prairies of the West, or in the highly-cultivated regions of merrie England, exercise a more winning but less impressive influence, for it fails to excite our wonder. They are the medium between the sublime and the beautiful; yet he who can gaze unmoved upon the lovely scenery of the Connecticut; he who looks upon the prairies and their grassy waves and flowery spray, and loves them not—he who can glance carelessly upon the garden-like hills of Gloucestershire and Westmoreland—must have a heart dead to all the refining influences of beauty—a heart fit for an embalmed mummy, not a living creature.

The mind turns with a sensation of pleasure to the contemplation of the exquisite loveliness of the meadow and valley scenes of Nature. We are not astounded by a sublimity; our admiration is not called forth by any wonderful exhibition of natural phenomena, but our hearts are at once assailed, and our love demanded by the various beauties that they present—beauties that appeal to our softer feelings, rather than call forth the more bold and rugged passions of which we are possessed. Nature, in this form, is as a charming woman, with the soul of a Lucretia or a Josephine; she does not dazzle, but binds us to her nearer as we become more intimately acquainted with the depth and purity of her soul—as we advance to that distance of friendship, when we lose sight of the union of character, and examine and become charmed with the details. The exquisitely colored and rich foliage, contrasting with the golden waters of the gurgling river; the velvet-like grass of the meadows and lawns; the variegated shadows, the charming and bright-eyed flowers, and the delightful caroling of the myriads of happy birdlings, are each charming when viewed closely by even the most prejudiced mind, but become infinitely more attractive as we have the heart to love them as we gaze.

The flowers that everywhere in Nature gem her mantle, and that court our closest inspection, are very attractive, either if viewed in the sunny South, or in the colder vicinities of the temperate zones.

As Nature has such a multitude of attractions, so has Music. The opera may be compared to the mountain. It is an union of sublime details, and fills our mind with its magnificence. We believe the genius must be transcendent who can call into requisition all the various forms of instrumental and vocal music, and join them together in one harmonious union. The orchestra with its many instruments, the solo singers and the massive chorus, all become assistants in producing one grand design, and like the many varying tints of sunset are all the emanations of one bright sun, though they each revel in separate beauty.

Our feelings of sublimity are as profoundly aroused by an opera like Norma or Lucia as by the mountain, and my comparison is not therefore an inapt one; and more apt still would it be if I could bring before you an oratorio of that master of music, Handel, represented by thousands of performers, and with all the details of scenic effect. It would seem, to your excited fancy, even more impressive than any effect, however extraordinary, of Nature—and why? Because appealing to all your religious and mental sympathies. You would become, like the Manchester audience, who alone have tested such effects, creatures of enthusiasm. Your minds, your feelings could not resist its indescribable influence; and while you felt the power of man's intellect, you would feel too his insignificance when compared to the Creator of mind.

The operas of composers such as Purcell, Dr. Arne, Balfe and Rooke, are as the gentle undulations; without the elements of the sublime, they are at the same time pleasing to the senses, and lull rather than amuse them. Their instrumentatum, their chorus, their solos, are not grand, but they are very pretty, and so simple as to catch the imagination at once. Hence, while a Handel and a Mozart rarely ever have the satisfaction, if it can be called one, of hearing their most elaborate airs murdered by the idlers and newsboys of the streets, yet such fame is very uncertain, and won by simple rather than gigantic composers.

In our gardens and parks it is an easy matter to duplicate a hill, but who dreams of rearing a mountain imitation. Like the flowers blooming here and there upon the bosom of Nature, and that are perfect in the simplicity of their beauty, are the songs and ballads that are learned and loved by everybody; they bloom within the reach of all, and like the violet, the lily, and the rose, are as easily cultivated in the window-pot, at the home of penury and want, as in the gorgeous garden of the wealthy and aristocratic resident of a splendid mansion.

They are as equally the instigators of refined thought as the more elaborated compositions. They speak as do the flowers to the heart, and win our love if they cannot command our astonishment. They are like the simple-hearted school-girl, without extravagant pretension, and perfectly natural, expressing friendship or love in equally frank language, they leave a far deeper impression upon one's affections, than the elegant young lady who has robed herself in all the arts or wiles of fashionable society. The one is loved because we intuitively have discovered all her virtues. The other coming upon you in all the pomp and array of superior attainments, warns you of her approach, and you gaze upon her as you would upon some magnificently bound, but uninteresting book; you look at it admiringly, but scarcely are willing to take it home; or if you do, it is merely as an ornament for a parlor table.

I hope you will not ladies and gentlemen, deem my prologue unnecessarily long, but good-naturedly take those things that please you, and throw away the rest. My desire is to amuse you successfully, and my aim at least will be acknowledged as commendable.

PART I.

1. My opening is a Fantasia upon themes from the opera of Lucia di Lammermoor, including all its principal beauties. This opera has met with a success that is not wonderful when we consider that its characters are taken from the delightful novel of that most extraordinary writer ("the old man eloquent"), Sir Walter Scott; but that it should always be entertaining, is a fact highly complimentary to the composer; and it *is a fact;* for go where you will in Italy, France, England, or the United States, you will always find the performance of Lucia announced for some time during every operatic season. If popularity is the aim of composers, Donizetti is certainly one of the most successful. Of Strakosch I shall say something hereafter.

2. La Sonnambula is one of the prettiest of Bellini's operas. A short sketch of him may not be uninteresting. Vincenzo Bellini was born in Catania, in the street, and near the church of St. Christophero. In the earliest season of childhood he exhibited a remarkable susceptibility for music, and the dewy tear-drop or the sunny laugh could easily be excited by plaintive or merry music. For some time it was a source of much anxiety to his parents, but he was eventually to follow the bent of his genius, and in Italy, where there is every opportunity offered to cultivate such a peculiar passion, he soon made remarkable progress, and at a very tender age composed sacred music, and could perform with ability upon the organ.

"The course of true love never did run smooth," says the inimitable Shakspeare, and it can be said with equal truth to apply to genius, for almost every out-of-the-way obstacle seems to be placed in its path. If it attain to superiority, it must wade through many a "Slough of Despond." Bellini had to contend with innumerable obstacles, but at last succeeded, and his Il Pirate, Il Straniera, La Sonnambula and Norma, rapidly rose in the estimation of the public, until his "perfection of language," as Tuckerman says, won all hearts, and his name jeweled itself into a constellation for all the world to gaze at.

Bellini died young, in the very morning of his genius, in the full tide of his fame, and wrapping the grave-shroud about him departed into another home, and left but his name and his works to console a mourning circle of friends.

His was a genius pure and undefiled, and capable of attaining any eminence, for we can easily divine from his rapid improvement that he would in time have completely have shadowed all the musical talent possessed by his contemporaries, and have placed his fame where none could have reached it; but as it is the fate of the most beautiful flowers to earliest die, and we can only console ourselves by a remembrance of their perfume, so the most perfect genius rarely buds but withers before it has had time to expand. A celebrated writer says: "Bellini has opened to us a new world; he has brought a hitherto untried influence to still the ocean of feeling; he has created yet another joy in the dim circle of our experience, and woven a fresh and perennial flower in the withered garland of life."

3. "Live my dearest" is from "Il Puritani," an opera that always pleases. Who that has listened to the celebrated Liberty Duet, but feels that it

has, perhaps, sown the seeds that in time will produce the regeneration of liberty in Italy.

4. I have selected yet another beauty from Bellini. It is like all his airs, simple in its beauty, and appeals directly to the heart. When he speaks of love, it is in corresponding language, and when he pictures the more terrible and impetuous passions, his music needs not the aid of words to explain its meaning.

5. La Fille du Regiment is one of the most attractive and dashing operas that ever has been represented upon the stage. It is peculiar and characteristic, and its music is wild and daring as the stirring feelings that move all who are connected with an army.

PART II.

1. Katy Darling is the most popular theme for variations at present, and its air may carry some of my audience back to their far-off homes and dear friends. This is one of the great powers which music wields. It can touch the heart's chords, no matter how or where they may be situated, and open its secret fountains of feeling—when it would really seem as if care and business had heaped upon them so many dead leaves that their waters had become choked.

2. Ben Bolt is one of the most touching ballads I have ever heard. Fancy to yourselves, my friends, your being left alone in this dreary world, and having an old schoolmate to whom you could recount your sensation. Dreary! Oh how inexpressibly dreary, would seem even the sunniest hour of the day, and when you have imagined the bitterness of heart, the loneliness of spirit, the lusterlessness of all life's pleasures; then, and not till then, can you truly appreciate the sentiment of my song.

3. "Sally in our Alley." This song has had the good fortune to be mentioned by Addison, in the highest terms, and is, consequently, of interest to all who are attached to the classical literature of England. I repeat it, because I have a few more words to say of Carey, which may prove interesting. Henry Carey was one of the most popular writers of his time, and by his exceedingly amiable disposition won the hearts of all who knew him. The following is from a journal of his time: "At our friend Carey's benefit last night, the powers of music, poetry and painting assembled in his behalf—he being an admirer of the three sister arts. The body of musicians assembled in the Haymarket, whence they marched in great order, accompanied by all the musical instruments in use, from the time of Tubal Cain, to join the booksellers and printers at Temple Bar; at Convent Garden they were joined by the brothers of the pencil, and after partaking of some refreshment, they proceeded in solemn procession to the Theatre, amidst an immense crowd of spectators." This was in 1730—but Carey, like too many of the kind-hearted, thought only of pleasing others, and never provided for himself, and when he ceased to be of use to the world, they allowed him to die in penury and want.

4. It seems natural to connect a blithe and fearless spirit with the sea, for those who are most accustomed to its vastness, its freedom, and its perils, are generally perversed of sympathetic dispositions. They are unrestrained as the waves that gambol about them, and curbless as the untamed wind that bears them onward in their course. To make a perfect wind, it requires the genius of an Angelo, the philosophy of a Newton, and the *disposition* of a noble Sailor.

PART III.

The Cavalier is not a very funny song, but its melody is chaste and beautiful, and will show you the elevated comic.

2. The Polka explained is a very excellent sarcasm of Parries. This style of ballad has often been the means of bringing into disrepute any custom disapproved of, but, in the present case, the Polka has attained a popularity that no other dance can boast of.

When we see it in fashionable society—in very fashionable circles; when the gentleman's knees are bent nearly double, the head carried as low as possible (maybe to show how prodigal the tailor has been in cloth for collars); when his arms are extended, probably to exhibit the generosity of Nature in the formation of important limbs, we are struck with its peculiar adaptating for monkeys. But still, danced easily and gracefully, it is not very objectionable.

3. I have been requested to sing the Minute Gun at Sea, and although this is the comic part of my entertainment I will take the liberty of introducing it here. This song, about thirty years since, was universally a favorite, and, in every concert, it was the principal charm of the programme. The author of the words is not known, but we are indebted to the celebrated King for the music.

I have rarely ever become acquainted with a finer specimen of the old English Ballad. The music and the words are appropriately united, and the one cannot be separated from the other. To those who have witnessed a scene such as is here described, who have experienced the awful and terrific sensations that deluge the mind, at such a time, it must vividly bring to recollection a heart-rending experience, and prove that the art of the poet and the magical influence of music is not a phantom of the mind.

I will hope that my entertainment has been pleasing to you, and that you have not spent a dull evening.

Butter and Cheese.

The value of these products is often underrated. A few facts will serve to correct this mistake. The amount of butter reported in the census of 1850 was over 315,000,000 lbs. This at 20 cents per lb. (the average wholesale price, a few days since, at New York), would bring over $63,000,000. The amount of cheese reported in the same census was over 100,000,000 lbs. This at 10 cents a pound (also wholesale price at New York), would bring more than $10,000,000. The aggregate of both is $73,000,000. Now the value of slaughtered animals, put down in the census, is $109,000,000. So that the value of the butter and cheese is about two-thirds as great as that of the slaughtered animals in the whole country.

The cotton crop is stated in the same census to be over 800,000,000 lbs. This, at 15 cents a pound (the wholesale price quoted at New York not long since), would bring over $120,000,000. Thus the butter and cheese in the country is worth more than one-half as much as the crop which is regarded as the staple of the entire South.

These rough estimates are full of interest to all who make or eat butter and cheese. They should impress all with the importance of improving the quality of these articles of food, in which the health and comfort of the consumer and the profit of the producers are so intimately concerned. When people come to know that rancid butter is as certainly poisonous as rancid tallow, they will be more cautious about eating it, and we trust about selling it too. Much has to be learned yet in these matters.—[Ohio Farm.

QUERY.—Can a man be said to be inflated when his wife has just blown him up?

Krummacher's Parables.

As the subject of Education is now exciting due attention in the community, it is well to bring before the mind of the young every truth possible, and the more beautiful the truths the more effective and lasting. The following we esteem one of the most beautiful parables written. We hope grown-up children will recognize the beauty of the truths here portrayed:

THE ANGRY FATHER.

One day Sadi was reading the holy Scriptures; but suddenly he closed the book, and looked stern and serious.

Allmed perceived it, and asked the youth: "What ails thee, Sadi? why does thy countenance change?"

Sadi answered: "The Scripture speaks here of the wrath of God, and in other places he is called love. This seems hard and contradictory."

Then his master said, calmly: "Shall not the Scriptures speak humanly to human beings! Thou takest no offence when mortal members are attributed to the Most High."

"No," said the youth, "that is innocent figurative language: but anger—"

Then Allmed interrupted him, saying: "I will relate to thee a tale. There lived two rich merchants in Alexandria, who had two sons of equal age. They sent them to Ephesus on affairs of their trade. Both youths had been well taught in the faith of their fathers.

"When they had lived for some time at Ephesus, they were dazzled by the splendor and the pleasures of the town, and were seduced to deny the faith of their fathers, and to bow down in idolatrous worship in the temple of Diana.

"A friend in Ephesus communicated this to Kleon, one of the fathers in Alexandria. When Kleon had read the letter, he was grieved in his heart, and very wroth with the young man. Then he went to the other, and told him of their apostasy, and his grief.

"But the other laughed, and said: 'If my son carry on his trade the better for it, I shall easily console myself.'"

"Then Kleon turned away from him, and his anger increased."

Now Allmed said to the youth: "Which of these two fathers seemed to thee the wiser and better?"

Sadi answered and said: "He who was angry."

"And who," asked his tutor, "was the most loving father?"

The youth answered again: "He who was angry."

"But was not Kleon angry with his child?" asked Allmed. And Sadi answered: "Not with his child, but with his apostasy and transgression."

"What seemeth to thee to be the origin of such anger at transgression?" asked the master; and the youth answered, "The holy love of truth."

"Behold, my son," said the old man, "if thou only art able to explain the divine by the divine, thou wilt no longer take offence at the human word."

When Sadi had sat for some time in thought, he looked at his tutor; and Allmed said to him: "Thou seemest not yet satisfied,—a question is on thy lips."

Then the youth answered, and said: "Yes, my father, it seemeth to me very daring to speak in such a way of the Highest and Purest."

"Indeed," said the old man, "it is a human expression, and I commend the fear of thy heart. But, behold, my Sadi, when the faithless son, after acknowledging his fall, may have thought, in an hour of repentance, of the time of his innocence and his pious father, how thinkest thou, would then the heart of his father have appeared to him, even if he were not wroth?"

"Ah," said the youth, "I understand thee, my father. His father must have appeared angry to him—and the holy Scriptures speak to a fallen race."

INFLUENCE OF KINDNESS.—Kindness makes sunshine wherever it goes; it finds its way into hidden chambers of the heart, and brings forth golden treasures; harshness, on the contrary, seals them up forever. Kindness makes the mother's lullaby sweeter than the song of the lark, the care-laden brows of the father, and the man of business, less severe in their expression. Kindness is the real law of life, the link that connects earth with heaven, the true philosopher's stone, for all it touches it turns to virgin gold—the true gold wherewith we purchase contentment, peace and love.

SEA SICKNESS.—Dr. Landerer, at Athens, announces that he has discovered a sovereign specific against sea-sickness. His remedy is, to give from ten to twelve drops of chloroform in water. The chloroform, in most cases, removes nausea, and persons who have taken the remedy, soon become able to stand up and get accustomed to the movement of the vessel. Should the sickness return, a fresh dose is to be taken.

THE best friends we have in the world are the spies of our actions, who publish our faults.

MAGAZINES, ETC.

THE
"HORTICULTURIST"
AND
Journal of Rural Art and Rural Taste.
(Commenced by the late celebrated A. J. DOWNING.)
Conducted by J. JAY SMITH, Editor of the North American Sylva.

THE increasing love of Rural Life has brought this popular publication into extended notice. Its success has been amply proved by a large addition of readers, and it is now offered to public patronage with confidence. It embraces in its scope of subjects everything pertaining to the country and country-pursuits, and aims to instruct while it amuses: it is, in short, as now conducted, a popular RURAL MAGAZINE, designed to interest all lovers of the Garden, the Country-house, the Cottage, no less than the Botanist, the admirer of the Green-house, Conservatory, Grape-house, Fruit Cultivator and Planter. Its correspondents are those who have long devoted their energies to these pursuits, and it is believed the number of these, and the information they impart, is greater than any other periodical can boast of either in Europe or America. Indeed, the work has become indispensable to the well-informed country-dweller, who, by a perusal of its varied pages, may maintain an acquaintance with all that is passing in the fruit-garden and orchard, the nursery, the villa, and with the beautiful in nature, whether it is improved by art or adorned by taste. In its Rural Magazine character it is addressed to all who love information, and it has thus become a welcome guest both in town and country. Its circulation now embraces the entire Union and Canada, and endeavors are constantly used to increase its attractions by a liberal outlay in embellishing it with costly engravings of fruit, dwellings, trees, and those numberless rustic adornments which make the individual home attractive.

A NEW VOLUME (13th year) commences with the January number for 1858: and it will be the constant aim to render it still more worthy, by every practicable improvement of the liberal patronage it is receiving.

The work is issued on the first of each month, in the best style, each number containg 42 pages, embellished with a frontispiece and several other original and well-executed engravings. The volumes, taken for a number of years, will make a valuable Encyclopedia of Horticultural Literature. As an advertising medium it has few superiors.

TERMS—Two Dollars a year; Four Copies for Six Dollars, payable in advance.

An edition is published with plates colored in the best style of the Art. Price, $5.

☞ All subscriptions must be addressed to the Agents, or to ROBERT PEARSALL SMITH,
Nos. 17, 19, and 21 Minor street, Philadelphia.

HORTICULTURAL.

A. P. SMITH'S
POMOLOGICAL GARDEN
AND
NURSERY,
On the American River, 2½ miles from the Steamboat Levee,
SACRAMENTO.

THE Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of THE VARIETIES—embracing as they do

All Kinds FRUIT TREES,
SHADE AND ORNAMENTAL TREES,
GREENHOUSE PLANTS,
SHRUBS, ROSES,

And also an unusually fine crop of
GENUINE GARDEN VEGETABLE SEEDS.
All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,
Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:
From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.
We call particular attention to our splendid stock of
CHERRY TREES,
THE FINEST AND LARGEST IN THE STATE,
embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from these. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase theirs, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most RELIABLE SOURCES IN THE EAST, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being CORRECT AS TO NAMES AND VARIETIES, are as PERFECT AS IS POSSIBLE TO MAKE THEM.

In the department of
Shade and Ornamental Trees,
We have a very fine stock of all the leading varieties, some very fine extra large trees of the
ELMS, LABURNUMS AND LOCUST,
particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.
A very extensive collection of all that is rare and desirable.

The Greenhouse Department is quite full, and our really superb stock of
CAMELLIAS
is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,
Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, WARRANTED PURE and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish GRATIS to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.
v8-13-6m A. P. SMITH.

20,000
APPLE TREES,
FOR SALE
AT REDUCED PRICES, AT THE
HOPE NURSERY.

THE Nursery is located second block northeast of the new Steam Flour Mill, on Seventh street, San Jose.

The stock consists of over seventy varieties, carefully selected. No pains or expense has been spared to obtain the best sorts, and to render these Trees what they are, THE BEST APPLE TREES, OF THEIR AGE, in California. D. T. ADAMS.
v8-23-3m

The Concord Grape.
THE ORIGINATOR OF THIS NEW GRAPE offers for sale a fine stock, raised from the parent Vine. It has fully sustained its reputation as
The Best Grape for Out-door Culture
having survived the last two severe winters unharmed, where the Isabella, Catawba, and other vines were killed to the ground.
For Size, Beauty, Quality and Bearing,
it is unsurpassed. It is perfectly hardy, and has never been affected by rot or mildew, while it ripens from three to four weeks earlier than the Isabella, and two weeks earlier than the Diana, in the garden of the proprietor.
Fine, strong plants, at $1 50 each; $12 per dozen. Two years old, at $2 each. Three years old, extra, at $3 each. A liberal discount to clubs and the trade. Orders, with cash or good reference, promptly attended to. Address
2 3m E. W. BULL, Concord, Mass.

Ornamental Shrubbery.
THE Greatest Variety in the State may be found at the
GOLDEN GATE NURSERY,
Corner of Fourth and Folsom streets,
COMPRISING
5,000 Monthly Roses, of 150 varieties;
2,000 Carnations, of 120 kinds;
500 Monthly Honeysuckles, of 8 varieties;
500 Acacias, of 10 varieties;
Laburnums, Arbor Vitæ, Myrtles, Euonymous, Silver Maples, Mimosa, Clematis, Cytisus, Eucalyptus, Lilacs, Jasmines, Mock Orange, Althæas, Spiræas, Weigelias, Deutzias;
and a general variety of
Hardy and Green House Plants.
☞ Skillful Gardeners provided for laying out grounds. Office at the Nursery, and 171½ Clay street, above Montgomery s7-24

FARM STOCK, ETC.

The Collegiate Institute at Benicia, Cal.
THE School Year at this Institution, is divided into two terms of five months each. The Sessions will open on the 4th of January and the 5th of July; closing on the 4th of June and December.
To the Patrons of the Institute we would say, that the facilities for obtaining a good education have been much increased this year. The range of studies will be ample, embracing the Ancient and Modern Languages, and a thorough course in the Physical Sciences. Neither are the accomplishments overlooked: in Piano and Vocal Music, we have the best Teachers in the State. Thoroughness in the Elementary Branches, before advancing into the higher studies, will be a primary requirement. We shall continue to follow, in our government, school arrangements and method of instruction, the Normal School or Prussian system, which has been adopted in the Eastern States with so much success.
Pupils will be fitted for the University, or will be trained with a view to the completion of their education in this School, as may be requested by the parents. Where no special directions are given, the course of the Institution will regard the Modern Languages, Natural Sciences and Practical Avocations of life, as the sine qua non of a good education, and the Ancient Languages as accomplishments.
A daily account of recitations and deportment will be kept and sent monthly to parents.
The location of the School is easy of access from all parts of the State; the buildings are excellent; and the quietness and healthfulness of the village are unsurpassed by any place on the Pacific.

TERMS, PAYABLE QUARTERLY IN ADVANCE:

	PER MONTH.
Tuition in the Higher English Studies (including Natural Philosophy, Chemistry, Algebra, Geometry, &c,..	$ 8 00

Colored Plates of California Fruit.
THE beautiful Fruit Pieces which were so finely prepared, of the FRUIT of California at the State Fair in 1855, are on sale at the Farmer Office. Every person who wishes a beautiful Fruit Piece should have a copy.

Alfalfa Seed.
THOSE who desire pure and clean ALFALFA SEED, are now invited to a new lot, just received fresh from Chile. It is remarkably clean and more than a third better than any Alfalfa heretofore offered in this market.
2 WARREN & CO., 130 Washington st (up stairs).

The California Farmer.

SAN FRANCISCO, FRIDAY, MARCH 5, 1858.

Home Manufactures.

Shall we not give a preference to those articles of our own manufacture, when their very production has been instrumental in building up and sustaining the families of our own people?

Every prominent resident of California is directly interested in this question. How long can California continue to send abroad *three or four million dollars* per month, for the purchase of manufactured articles or products that can be produced here, without complete bankruptcy to the State, or without causing a paralysis upon all the energy and industry of the people?

This question is a plain one, and must be met; there is no dodging it. We know the gold goes. We see, too, the treasury of the State, and of our City, filling up with the gold of the people, drawn from them by taxation. Thus taxed at "Home and abroad."

Gold is everywhere; "the hills and mountains are full of gold." Gold goes abroad by the shipload, to pay for articles that we can manufacture here, or produce here; and gold goes into the vaults of our State and City, and County treasuries, to pay the army of office-holders. Gold goes everywhere, but into the regular business channels, or into the hands of our working-men, to make them prosperous, contented and happy.

And why is this? It is, because the proper attention is not paid to encourage our Home Manufactures!

There are millions of dollars worth of imported manufactures, of every kind that can be made here better and cheaper—and millions' worth of articles of produce, that could be raised and introduced here, if the proper attention and protection were given to encourage Home products.

Hundreds and thousands of our manufacturers and mechanics are crippled, discouraged and broken down, by outrageous taxes, and fees demanded as the *License*, to make or sell the usual products of Home Industry.

California is the only place in the world, where such hindrances are put in the way of industry—and San Francisco is the only city in the world, where a *License* must be obtained to carry on the ordinary mechanical or manufacturing business—a box of soap, box of candles, or a broom, cannot be made without a license. Can prosperity come with such clogs to the wheels of Industry?

Away with this unwise policy—away with this License—and in its stead, grant a *Bounty*, and thus encourage every species of domestic manufacture, and soon we shall see a stop put to importations, a stop to this drain of gold from our shores, and a stop to the cry of dull business and hard times.

In Massachusetts, many thousand of dollars are paid annually as a Bounty to the cod and mackerel fisheries. Here our fishermen are taxed for catching and curing, and selling them!

Here, almost all the departments of agricultural labor feels a tax. There, *special* legislation is brought to bear, to shield, protect and foster every branch of the great agricultural interest, and even among all nations the same protecting laws guard this right arm of industry and prosperity.

While our Legislators are now looking to the matter of our "Swamp Lands," "Mexican Grants," "School Lands," "Settlers' Rights," &c., we trust their united wisdom will be brought to bear to remove all obstructions to the onward progress of industry—especially California Industry.

California Agricultural Implements. The celebrated establishment of T. Ogg Shaw, on Sacramento street, below Front, is indeed worthy a special notice from us. Mr. Shaw, the owner, is a working man. He was the first maker of steel plows at Peoria, and he was the first here. He is a practical manufacturer himself, and can make a plow, harrow, or thrashing machine, and when made, can use them, being himself thoroughly versed in the making and using of every implement. This large establishment is worthy a visit from every farmer, and they will find the proprietor ready to explain the working of every implement. Mr. Shaw employs a large number of workmen, thus providing for many families by reason of the employment he gives. A large steam-engine carries the works in each branch of the moulding, grinding, polishing, turning, &c. We intend, at an early day, presenting our readers with a minute sketch of this great industrial shop; but, in the mean time, we advise all to go and see, for such places do a great deal for California.

Read, Read.—Those desirous of adding to their libraries, good and valuable books, will find an opportunity seldom offered, by calling at Messrs. McGlashan & Co., Washington street, who are now selling their entire stock at one-half their usual prices.

This is no object to draw attention, and then deceive by asking usual prices, but a bona-fide sale, at lowest figures—as we are fully convinced by examination.

Although their stock has been much diminished, by the rush attendant upon such a notice, there is yet a chance for good bargains.

Here are to be found works by all the ancient and modern Poets, in every style of binding—Classical and Theological works, Sacred and light reading, and School books of every description, as well as all the cheaper novels of the day—with the greatest assortment of stationery, drawing-paper, &c., to be found in the city.

We would advise our friends to call and see, and be convinced for themselves, and they will be the gainers in the end. In these hard times, every dollar saved is a dollar earned, and no better investment can be made than in a good book. Those who go to look, even as well as those who purchase, will receive the same courtesy and attention, for which the establishment has been ever noted.

Broom-Corn Seed Food for Horses.

We are glad to lay before our readers the following facts, upon the value of this peculiar kind of *food* for Horses and other stock.

To many persons, this will be entirely a new thought, and as Broom-Corn is already cultivated to a large extent, and will, undoubtedly, be largely increased the coming year, we hope those who have the opportunity, will try it, and furnish us with their experience and all the results:

Editors Farmer: In reply to your inquiries, relative to Broom-Corn seed, as a feed for horses, in your issue of the 12th ult., allow me to say your information coincides with my experience on this subject.

In the township of Webster, Mich., where a man was not deemed sound on the Broom-Corn question unless he had half his farm planted to it, I fed it to horses for years, and had an opportunity of seeing it used extensively for that purpose, and it was generally esteemed, by those who used it most, to be an excellent feed for horses—giving a firm, hard flesh, and a solid, durable muscle, while, by its oily nature, it imparts a bright, glossy color to the hair.

Some horses will not eat it readily at first, but after a continued use of it they will prefer it to Barley.

It is also a fine feed for cattle, sheep, hogs, and poultry. If any one doubts this assertion, let them raise a few acres in a poorly inclosed field, and an army of beligerent cattle and besieging swine will soon compel them to acknowledge the corn.

G. W. Armes.

Can a Public Officer hold Three Offices at the Same Time?—During great political excitements we notice that when a favorite of a party is the winning party, all opponents find fault if the lucky *hombre* holds *two* offices; but we have just been informed of a certain gentleman in a neighboring seaport that holds the office of Port Warden, and was elected as Mayor also. Not content with that, he has secured to himself a *third* office, it being best of the three. While preparing for this last office, he has been carefully *Hyde*ing away treasures, and being a good *Storer* he has thus secured for himself an excellent fortune, as a good *husband*man. The following we find among the *official* records of the day:

Married—At Benicia, on the 25th February, Hon. Timothy B. Storer, Mayor of the city, to Miss Gussie E. Hyde, of Mare Island.

Hovey's Book of Fruits.—For all past time, until within a few years, all American Pomologists have looked to the standard works of European authors as their guide, and all Pomological books with colored plates were imported from thence. But more recently the celebrated works of Downing and Hovey have attracted the attention of our country, and these are now our guide and text books, although new works are constantly being issued from the press of Europe and America. We desire, however, now more particularly to call public attention, and especially the attention of the Fruit cultivators of California, to the most magnificent edition of Hovey's Fruit Book, recently issued, embracing the best fruits of each variety, superbly colored, and most life-like. This work has been got up in the most elegant style, royal octavo edition, antique binding, gilt, in two volumes. There is no work in America equal to it, and it should be in the hands of all pomologists. We call attention to Messrs. Hovey's card in our columns.

To Our Readers and Correspondents. We would call attention to the very spirited letter, from New York, by Mrs. E. W. Farnham. Her description of the mild winter, in that city, makes one feel a longing almost to re-visit home scenes, and renew again the pleasures of by-gone days. Her visit to the British Art Exhibition, and criticism of Miss Hosmer's "Beatrice Cenci," is, indeed, worthy a perusal, by those who have never seen this great work of art by an American woman. It is hoped we may welcome once more to our shores this gifted writer, who still claims California as her home.

Our correspondent B,—the ever witty and mirthful B.—says a few words upon the weather, also, in NewYork, and claims to be ahead of California. His hits at the "Political Cauldron," at Washington, with general news topics of the day, will claim the attention, certainly, of his many friends.

"Building Anew," a sketch, by an ever-welcome correspondent, "Florence Percy," will be read with deep interest, for it is peculiarly appropriate at this time. "Thou or I," a poem, by the same author, is truly beautiful, and should be read with feeling, by those whose hopeful, loving hearts have suffered in saying "farewell."

From the ever-gifted pen of our noble correspondent Agricola, we offer this week an article upon the most prominent subject of the day—the "Demands of Agriculture in California." That we need such information, we are well aware, although we already surpass, in our products of the soil, even foreign countries—yet we must turn our attention more to scientific farming. The agricultural interest of the country is awaking to its deficiencies, and demands knowledge in more comprehensive forms.

"Musical Entertainments," from M. A. Sarles, comes before our readers for their pleasure and acceptance, which we know will be accorded to this earnest friend and disciple of music, whose name is recorded therewith.

Autumn Leaves.—Autumn leaves by millions rotting in heaps unheeded, and yet each one a microscopic wonder of contrivance. And this snow-wreath that half envelopes them, made up of myriads of crystals, melting while I look at them. What an utter waste it seems! Wisdom and beauty thrown wholesale into a pit of corruption. Until the day of resurrection we shall never comprehend this melancholy mystery. Then shall atoms all be portioned out, and every organized particle of the earth's crust be found to be a part of some soul's tabernacle. Then shall we understand how Cæsar's dust has also lived in the leaf, and his moisture effloresced in the snow, duly to be restored and produced when time and its uses are no longer; but meanwhile used everywhere, and nothing lost, mislaid, wasted, or forgotten.—[Dublin University Magazine.

Short-Horn Herd of Messrs. B. & C. S. Haines.

Their farm is situated in Elizabeth, New Jersey, about one hour's ride from New York, over the Camden and Amboy Railroad, to which a visit was paid by our associate editor, previous to his leaving for California. The Messrs. Haines are devoted to the breeding of Short-Horns alone, of which their herd number about twenty-five head, principally of their own breeding and by importation from Europe. They have lately added to their herd some choice animals, from the best blood in the country, which now makes their herd one of the best in the country.

Among the animals we will mention "Lord Vane Tempest" 2d (669), A. H. B., red bull, four years old, calved June, 1853, and winner of numerous first prizes at New Jersey State Shows, as calf, yearling, two-year-old, and three-year-old Bull. Engraving and pedigree has been lately given in the Farmer.

"Marmion," roan bull, two years old, bred by Col. Morris; got by Col. Morris' imported bull "Duke of Gloster" (11382). His dam "Zoe" was imported by Col. Morris. She was got by the Duchess bull 5th "Duke of York" (10168). "Zoe" belongs to B. & C. S. Haines, and is a fine large cow. See pedigree in catalogue.

"Duke of ———," bull calf, very fine animal got by the celebrated bull "Grand Duke" 2d (12961), imported by Samuel Thorn, Esq., and cost $5000 in England. His dam "Dewdrop," is a fine cow, imported within a year or two. She has two or three crosses of Duchess blood, which seems to be the favorite strain of blood.

"Diana Gwynne," bred by J. S. Tanqueray, Esq., Herndon, Eng. Got by the Duke of Lancaster (10,929); dam, Dolly Varden by Ribblesdale (7,422). Her sire was a celebrated prize winner. Diana Gwynne is a large roan cow, and one of the finest in the herd, and was imported at large cost. She has produced two bull calves, that are valued by the owners at $1,000 each. She is now in calf to the "Duke of Gloster."

"Nymph 2d," a beautiful roan cow, for which her owners have refused $1,000; calved July, 1850. Winner of first prize in class of heifers at American Institute and Queens County (N. Y.) Fairs in 1852; also winner of first prize in class of short horns at Fair of New Jersey State Agricultural Society in Newark, 1856. She is considered a remarkable cow, both for her milking as well as fattening qualities. She has produced three heifers, two of which are for sale—Nymph 7th and 9th—and they both bid fair to equal their dam. These are the very animals for California.

"Dulcinea," a fine yearling heifer; got by Young Balco (12,426); dam, Darling by Grand Duke (10,284); gr. d. New Year's Day by 2d Cleveland Lad (3408). She is in calf to Marmion.

"Red Rose 5th," a beautiful cow, combining milking with feeding qualities in a remarkable degree.

"Dew Drop," imported cow, and "Zoe," both fine animals, and gave satisfaction. Their pedigrees are in the catalogue of Messrs. Haines.

The above are but a portion of the herd of Messrs. Haines. We saw a number of bull calves and young bulls, from fine milking cows. It is necessary to say, in connection, that great attention has been paid to the milking properties of their stock as well as feeding. Messrs. B. & C. S. Haines have borne off first premiums at various State Fairs. Particulars of prizes can be seen in their Catalogues.

We were shown by Stewart Haines, Esq., some fine horses, which constitute his principal department. "Black Murat," a beautiful black, six years old, 15 hands 2 inches high, and weighs 1100 pounds, and of remarkable fine action; has trotted a mile in 2:40. His pedigree is in catalogue. As a stock-getter he cannot be beaten. He is the sire of the famous colts "The Spirit of the Times," and "Arsenic." The former, when two years old, trotted a half-mile in 1:38. He is also the sire of Young Murat, who is now three years old, and has trotted a mile in 2:58; he has besides the above many colts, that promise great speed.

"Fanny Kemble," the old trotting mare, is in fine condition. Her performances and colts, are familiar to the public who are interested in good stock.

"Black Hawk Maid," with a fine and speedy colt by her side, by Murat. She is an old track mare, sired by Black Hawk, and has trotted in her prime a mile in 2:35. She also has several fine colts, sired by Murat.

This department is under the charge of Stewart Haines, Esq., who knows all about "horse stock," and is deeply interested in the subject. He will be ready to answer any orders from California, and can show stock which he may well be proud of.

We must mention the fact here that Messrs. B. & C. S. Haines sold to G. H. Howard, Esq., in 1856, some fine animals to go to California, viz: "Young Belvidere," "Prior," "Miss Nightingale," and "Hopeful;" two Bulls and two heifers; all arriving here in good order, and gave perfect satisfaction. They were the first arrival of *blood cattle* in California, by way of the Isthmus. They were exhibited at the State Fair at San José, in 1856, and received first premiums. The animals are now at the farm of Geo. M. Howard, Esq., Howark Park, San Mateo, and have received general commendation for their fine qualities.

Messrs. Haines have received many inquiries relative to further shipments, and we can safely assure our friends in California that they may depend upon getting animals that will give perfect satisfaction.

Our visit was in every respect a truly pleasant one, enhanced by the courtesy extended us, which we shall always remember with unfeigned pleasure.

This subject of stock-breeding is now commanding much attention in California. Our wonderful climate and unsurpassed grazing facilities are so favorable to stock-breeding on a large scale, that many orders may be expected the coming year for the East. Those desirous of making selections, can do so, by applying at our office, as we are fully prepared to give those desiring, all the information they may require.

W.

The Honey Bee in California.

F. G. Appleton of San José, has furnished the Alta with some interesting particulars connected with the introduction of the honey bee in this State, and the adaptation of our climate and products to their success, from which we make the following extracts:

One Shelton (in connection with Commodore Stockton and G. W. Aspinwall) imported, in March, 1853, the first bees into California. He left New York with twelve stands or hives, and arrived with but one; from this one there are now about one hundred and fifty swarms.

Buck, Appleton, Early, Daniels, Lathrop, and Gates, of San José; T. G. Baxter, of Napa; Capt. Hoag and Harbison, of Sacramento, and Neyman, of Mokelumne Hill, are each interested in the business to the extent of 10 to 100 swarms; many others have from one to ten.

About 3000 pounds of honey was produced last year; it being more profitable to increase swarms at present, but little attention has been given to induce bees to store surplus honey; the object has been to force bees to throw of swarms. From some of my swarms I have taken from each, sixty pounds of pure honey in top boxes. In each colony there are, in the swarming season, three kinds of bees—a queen, considerable number of drones, and thousands of workers. The queen is the only fully developed female; the drones are males, and the workers are undeveloped females. The honey bee is not a native of California; those swarmed here do not differ from the original imported; both thrive equally well. Some bees have been brought hither from Mexico, but they are the same in all respects as our bee. The Italian honey bee has not been imported into the United States. Aristotle, who flourished 2200 years ago, speaks of three different kinds of honey bees, as well known in his time. Virgil, in his fourth book of Georgics, speaks of two kinds as flourishing in his time. The better variety he characterizes as a spotted or variegated, and of a beautiful golden color. Strange to say, within a few years, the attention of bee keepers has been called to the very variety described by Aristotle and Virgil, and after a lapse of 2200 years, it is still found to exist, distinct and pure from the common kind, and to be as superior to it as a Durham ox to one of the poorest breeds.

The California honey, made from mustard blossom, the flower from which most of the honey is gathered in this valley, is equal to any I have ever tasted. It has sold in San Francisco at from $1 25 to $1 50 per pound. New swarms issue as early as the 15th of April, and the swarming season continues to the 16th of June. The swarms usually cluster upon a branch of a tree or bush. The operator should have his hive ready; take a blanket or sheet, and spread it upon the ground, under the cluster, place the hive upon it, raised an inch to permit the bees to enter freely; give the branch a smart shake, and they will fall in front of the hive, and, as soon as they perceive it, will enter. If the branch be of no value, it can be cut off, placed under the hive, and the bees will ascend in a few minutes. As soon as all are in, the hive should be placed in the position, or upon the stand it is to occupy, and protected from the heat of the sun. Second swarms issue in about ten days from the first, and the third in two or three days after the second. The hive should be left unplained on the inside, and before putting a swarm into it, washed out with salt and water.

That California is admirably adapted to the honey bee, the experience of five years fully demonstrates. Not only in San José Valley, but at Sacramento, Shasta, Bidwell's Seockton, Columbia and Napa, they multiply rapidly and store abundance of honey. The willow affords the first material for pollen. The bees commence gathering it by the 1st of January; about the 15th of January, it is in bloom and affords considerable honey, though slightly bitter; the bees gather pollen and honey from the willow till March. The wild mustard affords an inexhaustible supply of honey from the last of April to the middle of June. Later in the season, honey is obtained from buckwheat and honey-dew.

Several attempt to import bees from Mexico have failed. Captain Macondray had one or more Mexican swarms, I have been informed, but they soon dwindled away. Last fall, Mrs. Sutter, daughter-in-law to General Sutter, had forty-four hives packed on the backs of Indians to Acapulco, and brought on the steamer to San Francisco; two or three weeks after their arrival, there remained but two hives containing bees; they were taken to San José, but in a short time they also died.

Can a district be overstocked with bees?

Samuel Wagner, of Little York, Pa., in a letter to L. S. Langstroth, says:

"The Russia and Hungary Apiaries, numbering from 2000 to 5000 colonies, are said, not to be unfrequent; and we know that as many as 4000 hives are oftentimes congregated at one point on the heaths of Germany. Hence, I think we need not fear that any district of this country, so distinguished for abundant natural vegetation and diversified culture, will very speedily be overstocked.

"According to the statistical tables of the kingdom of Hanover, the annual production of beeswax in the province is 300,000 pounds; assuming one pound of wax to each hive, we must suppose 300,000 hives are annually "brimstoned;" and assuming one-half of the whole colonies produce a swarm each year, it would require 600,000 colonies (14) to each square mile,) to secure the result given in the tables.

"In the province of Attica, Greece, containing forty-five square miles, and 20,000 inhabitants, 20,000 hives of bees are kept; yielding thirty pounds of honey, and two of wax; one hive to each man, woman and child.—[Longstroth, p. 398.

"East Friesland, a province of Holland, containing 1,200 square miles, maintained 2,000 colonies per square mile."—[Henbel, Beinen Zeitung, 1854, p. 11.

To our Readers.—Those desirous of sending to friends in the States choice packets of Seeds of California growth, will find it an object to call at our office and examine our assortment, ready for mailing, in neat envelopes. We have taken pains in the selection, confident they will be found a most appropriate gift.

Locusts and Grasshoppers.—The following exquisite epicurean touch has been called to our notice after many days. We wonder such a *rare-bit* should have escaped our notice; but we cannot search the whole Globe over every day, especially when the grasshoppers and locusts are about; and they were paying us a flying visit, which seems to have troubled our neighbors, from whose paper we make the extract:

Locusts and Grasshoppers.—These destructives are *eating out* the vitality of the California Farmer. Several columns that ought to have been filled with interesting matter, have been utterly destroyed by these *insects*.

We would, however, remind our neighbors that *they* need not fear a visit from the grasshoppers or locusts, or any other creature, especially if they come for *anything to eat*, for they would hardly find anything in the Globe *worth eating*; so *they* are safe. Our cotemporary should bear in mind that the tribe they have named, came to a garden of fruits and flowers, where there was food enough and to spare; so don't worry neighbors, *you* are safe.

Bell's Carpet Warehouse.—We take pleasure in calling attention to the Carpet Store of J. C. Bell, Esq., Clay street. In this stock of upholstery and furnishing goods, Mr. B. can offer to his patrons one of the best in our market; and from the known character of this establishment to please their patrons, we know our readers will be glad to improve the opportunity which is now given to make purchases.

A Brick.—We have a brick—not in our hat—but in our office; it bears on its surface the name of "Ebenezer Morrell, brickmaker." 'Tis a *real* brick, a *finished* brick, red in the face; in fact a handsome brick, and most creditable to the maker. Right glad are we to notice so handsome a home product. This is proof positive that we can have plenty of bricks this side; needn't bring any from abroad, for if the folks t'other side send over, they'll be *used up bricks!*

State Agricultural Society.—We learn with much pleasure, of the active and preparatory steps taken by the Executive Committee, to lay out their work for the State Fair and Cattle Show of the present year. We visited the Society's rooms, at Sacramento, the present week, and found the Corresponding Secretary, Rev. O. C. Wheeler, actually at work making the Annual Report of the Society, and preparing the books and seeds of the Patent Office for distribution. We say God-speed to all such efforts. We like such aids to build up the great interests of a State. We learn also with most unfeigned pleasure, that the Assembly has passed the bill appropriating $5000 to aid the State Agricultural Society. This is as it should be; and we doubt not the Senate will cheerfully say amen. This is wise legislation; for every dollar given by a State to promote her industrial interests, is like good seed sown in good ground, it will spring up and bear an abundant harvest.

Protection to our Gardens.

One of the great hindrances to a more rapid improvement of our city gardens and our suburban residences, arises from the fact of great numbers of estray hogs, cows and goats, which the owners permit to run at large and get their living out of their neighbor's property, although in many places there are ordinances against animals running at large, yet the laws are not stringent enough, nor are the penalties sufficiently heavy to deter some persons from setting the laws at defiance. Until city ordinances shall be made sufficiently severe, or until the Legislature shall pass a code of laws comprehending the whole subject of estray animals, also depredations upon gardens and orchards, we cannot expect to see that rapid improvement in public taste which would lead men to beautify the public streets and squares, as well as their own premises. When the authorities of our cities and State shall look to this matter, and give it a just consideration and offer proper protection, we may expect to see a wide-spread improvement in all our cities and towns.

We have been led to this subject at this time from the fact of knowing many cases of great loss and disappointment to owners of gardens, by the great numbers of *goats* that reckless owners permit to run at large and prey upon the property of their neighbors; and we are glad to know that our Courts are beginning to notice and punish aggressors of this kind.

Another evil among us is the trespass upon the fruit and flowers of our gardens, by unruly, bad-educated boys. On this subject, and the remedy for it, we copy the following, from Life Illustrated:

Stealing Fruit.—One of our Kentucky correspondents writes us a long account, with appropriate reflections, of the habits of the neighboring boys in taking possession of his fruit, as though it was their own. He has seen a dozen of them go directly from the Sunday-school to his orchard, and fill their pockets with forbidden apples. He proposes that his neighbors should have orchards of their own, so that their sons would not be tempted or compelled to commit depredations on the property of others.

It is always wrong to steal; although, as in all other cases of wrong-doing, the measure of guilt must be determined by a consideration of all the circumstances.

Air, water, and fruit are the birthright of human beings, and of young persons and children especially. Fruit is a necessity of the young. To deprive a child of it is to pervert, to some extent, its whole organization, and dwarf, in some degree, its whole nature.

Children must have fruit; but they should not steal it, nor should they be tempted to do so. And the only sure and practicable method for "overcoming evil with good," in this matter, is, we think, to adopt the suggestion of our friend, and have fruit so plentifully provided, that no further inducement to violate the property-commandment will exist.

Whilst this is being done, however, the following hint may serve as a wholesome restraint on the evil propensity we are deprecating:

Horace Mann, President of Antioch College, when last in this city, in reply to the question, "What moral effect would result from educating the sexes together?" said: "A neighbor of mine has a fine orchard; the grounds are very near Antioch College. The trees bore abundantly of various kinds of fruits, tempting to the sight. But I have no knowledge that a student ever entered the grounds."

As another illustration, he stated that on the grounds of the College was a grape-vine, whose luscious fruit hung within reach of the students, as they passed several times a day to and from the College. But they hung there until they fully ripened, and were plucked only by the hands duly authorized. "Those grapes," said Mr. Mann, "were worth a dollar apiece, as examples of the display of moral courage; for where can another college be found where all the students would do likewise?"

☞ Persons purchasing articles advertised in our columns will confer a favor by saying they saw them advertised in the California Farmer. ☜

RARE SEEDS.

☞ We have just received from the East some of the choicest FLOWER and other rare SEEDS, ever received in California; among them a small invoice of Pure LAWTON BLACKBERRY—the only lot in the country, and warranted fresh and pure, crop of 1857.

The collection was made by Mr. J. Q. A. Warren, and brought out by him on last steamer.

Also, opening, a case of FOREST TREE SEEDS—the finest assortment ever imported.

Those desirous of finding choice Seeds will do well to call at once at our office, 130 Washington st (up stairs).

NEW BOOKS,

☞ Just received, from New York, several cases choice works; also, a complete assortment of Agricultural Books, to which we would invite the attention of our customers.

Frank Forester's Horse and Horsemanship of the United States, in two volumes; the finest work of the kind ever published in the country, can now be seen at our office, bound in different styles—Plain, and Turkey Antique. Having the sole agency of this valuable work, in California, we would invite lovers of the beautiful to call and examine the copies. Subscription books are now open, and those entering their names will receive this work at the earliest day. v9-1

☞ **Farm Stock.**—Having completed our arrangements for the importation of choice stock, we are now prepared to receive orders for any of the following breeds, and would call the attention of those in want, to our unsurpassed facilities for the importation and improvement of the choicest stock:

Thoroughbred Devon Cattle,	French Merino do
Shorthorns do	Spanish do do
Thoroughbred Ayrshire do	Cotswold do do
Suffolk and Essex Pigs.	Chester White Hogs.

Fancy Fowls—all the best varieties.

All communications addressed to us will receive immediate attention, and we shall be happy to correspond with any and all upon the subject. Address

2 WARREN & CO., Cal. Farmer Office.

☞ REGISTRY OF STOCK.—All who are interested in the purchase and sale of Stock, of every description, will find a Register kept at our Office, for the entry of all Stock for sale, and their full and correct pedigrees; so that persons who have Stock for sale, or wish to purchase, can gain important information. Those in want of choice Stock will find this opportunity a valuable one, as we are in correspondence with the principal Stock Breeders in the States, and are fully prepared at all times to make sales of Stock of any quality.

☞ J. Q. A. Warren, just from the East, will be happy to see all interested in the subject, at the Farmer Office. January 8, '58.

The Legislature.

Bravely at work—bravely at work. We stepped into the Legislature a brief time on our visit to Sacramento the present week, to catch a glance at the "agents of the people," or, as some say, the servants of the people; the REPRESENTATIVES we say—and were pleased to observe that they appeared to be earnestly at work. Swamp lands, water projects, &c., were the order of the day. We sincerely trust they will look wisely to the swamp lands of California; these are her richest inheritance.

The swamp lands of our State are the very best property, and will pay a glorious interest in the future. We trust our legislators will look carefully to them, and not permit an acre to become the property of any greedy and heartless speculator. It is upon these lands, priceless in value, that the Rice, Sugar and Tobacco of California will be grown in future years—when ships shall be laden with the products of California, and go out to visit other nations, bearing the *wealth* of this great State.

Look to these lands, legislators, as the crown jewels of this fair domain. Many an acre of these "Tule lands" in coming years, shall sell for *one thousand dollars;* and we now have "millions of acres." Look to these lands, legislators! and guard them wisely, so that our *State* may receive their value.

The Blossoming of Fruit Trees.

The season of Blossoms is upon us, and every breeze that blows comes laden with the fragrance of early flowers. The Peach trees are now presenting their loveliest appearance to us, and never have we seen a fuller blossom than is upon the trees at the present time. The Peach blossomed in some cases, about the middle of February, at San Francisco, and, we believe, at Sacramento; but on the first of March, the trees in those places, in many situations, were in full bloom; and from the first to the middle of this month, they present a most magnificent sight.

We saw Plum trees showing blossom the present week at Sacramento, where all vegetation is rapidly advancing.

We wish the Fruit-growers of every county would do us the favor to note down the time of blossoming of trees of every variety, and send us; it would do much good, and we would then be able to lay the facts from each before our readers.

Chambers' Treasury of Knowledge, 12mo. -	0 75
Chambers' Elements of Drawing, 12mo. -	0 60

The Publishers would ask Teachers to examine these works for themselves. Numerous favorable notices from distinguished sources have been received, and might here be appended, but are omitted, with the exception of one letter respecting Parker's Philosophy, and one respecting Porter's Chemistry, referring the reader to A. S. Barnes & Co.'s "Descriptive Catalogue," for any further information respecting the character and merits of any of the works mentioned, and of their publications generally.

Just published—Root's New Work on School Amusements; or, How to make the School Interesting, $11 25.

v9 A. S. BARNES & CO., 51 and 53 John street, New York.

SALVATOR ROSA,
MUSIC  STORE,
157 Montgomery st., San Francisco,
IMPORTER OF
MUSIC,
..AND..
MUSICAL INSTRUMENTS,
SHEET MUSIC AND MUSIC BOOKS,
Genuine Italian Strings,
Imported direct from Rome, Italy.
Dealers will do well to examine the quality before purchasing elsewhere.
☞ Wholesale and Retail, by S. ROSA,
157 Montgomery street, San Francisco.

Parties in the interior will find it advantageous to send orders directly to S. ROSA, Music Store.
The SAVING will be FROM FIVE TO TEN PER CENT.
7-3m S. ROSA.

To Postmasters.—Postmasters will confer a great favor on us if they will advise us when any subscriber has changed his residence or left the State, without giving the usual notice to him, or when from any cause the paper is not taken from the office.

Change of Residence.—When subscribers change their place of residence they should notify us at once, so that we may alter our mail lists to correspond, and thus secure their papers to them regularly.

SPECIAL NOTICES.

☞ **GOUPIL & CO.**, Publishers and Importers of Engravings, Manufacturers and Dealers in Artists' Materials of every description, 366 Broadway, New York, have constantly on hand a great variety of the above-named articles
*** Catalogues sent per mail to all parts of the United States. v9-2

☞ **Wigs! Wigs!! Wigs!!!** — BATCHELOR'S WIGS AND TOUPEES surpass all. They are elegant, light, easy and durable.
Fitting to a charm—No turning up behind—No shrinking off the Head. Indeed this is the only establishment where these articles are properly understood and made.
v8-13 1y 233 Broadway, New York.

☞ **3000 Pounds California Tobacco.**—We have samples of superior TOBACCO, raised in California, grown and cured correctly, by a person from Kentucky. It is the best lot ever raised in the State, and is worthy the notice of Cigar Makers. For sale at the Farmer office. 6

☞ **THORBURN'S Preliminary Wholesale** CATALOGUE OF VEGETABLE SEEDS, *of the present year's growth*, will be published on the 20TH JULY, and will be mailed to Dealers and others requiring Seeds in quantities, inclosing stamps for return postage.
J. M. THORBURN & CO.,
19-tf 15 John street, New York.

☞ **Hemp Seed.**—A superior lot of pure seed just received at the office of the Farmer.

NOTICE TO NURSERYMEN.

☞ Parties who have ordered Nursery Stock from the Eastern States, to be forwarded by Express, should have made arrangements for the receipt of the same, or remitted charges, as all such freight must be prepaid without exception. Hitherto, a satisfactory guarantee from the shipper was considered sufficient—the charge to be paid at destination. Should any disappointment occur to our friends, this will be a sufficient explanation.
23 A. FROST & CO.

☞ **A. W. FABER'S LEAD PENCILS.**—Lead Points, Propelling Pencils, Colored Pencils, White Crayons, Black Crayons, Slate Pencils, Red Chalk, etc.

These popular Pencils can be had of Stationers, Fancy Goods Dealers, and others in the various cities of California.

Extract of a letter from the eminent artist, Chevalier P. von Cornelius, Director of the Royal Academy in Berlin, 27th Oct., 1842: "It is scarcely necessary to say that I find Faber's Polygrades Lead Pencils in every respect most excellent. They are of all degrees of hardness and shade, and adapted as well for fine and firm outline as for finished drawing. The wood which incloses them has the necessary strength, but yields easily to the knife, and the lead never breaks away."

Extract from the Official Report of the Industrial Exhibition of the German Federal States, 1844, 3d Vol.: "Especially have the Pencils of Mr. A. W. Faber set at defiance all competition, and supplied every desideratum that the Artist can expect or desire in this particular."

Extract from the Report of the Great London Exhibition, 1851:

On referring to the Report, page 450, it will be seen that the Jurors have considered A. W. Faber's Pencils deserving of a more extended notice than has been accorded to any other Pencil Manufacturer. The Report further states as follows: "A. W. Faber's Pencils are of the best description, and the prices extremely low. They are exported throughout the whole civilized world, the demand being created by their good quality and cheapness."

Beware of Counterfeits!

The reputation of A. W. Faber's Lead Pencils has not failed to attract the attention of certain individuals, who have either attempted an imitation of the same, or have undertaken the sale of a counterfeit article, which, though of a totally different manufacture and very inferior quality, are marked, some with the name of the genuine, some with the names, *W. A. Faber, A. W. Fabre, A. K. Faber, C. W. Faber*, etc., and are disposed of as genuine Faber's Polygrade Lead Pencils.

Every person will please to examine carefully the stamps on each Pencil—"A. W. FABER"—and observe that each dozen bears on the label a fac-simile of A. W. Faber's signature; and and further, that every genuine Pencil sold in the United States, has impressed in the wood itself, "E. FABER, 133 William street New York." E. FABER, Sole Agent
v9-1 6m 133 William street, New York.

Fine, beautiful hair—jet black or brown,
Or tresses, curling or golden—
Is the certain result—without chance or doubt—
Of the use of LYONS KATHAIRON.

☞ **The immense sale of Lyons Kathairon**—nearly 1,000,000 bottles per year—proves its excellence and universal popularity. It restores the hair after it has fallen out, invigorates and beautifies it—making it soft, curly and glossy—cleanses it from all Scurf and Dandruff, and imparts to it a delightful perfume. The Ladies universally pronounce it the finest and most agreeable article ever used.
Sold by all dealers, everywhere, for 25 cents per bottle.
HEATH, WYNKOOP & CO.,
Proprietors and Perfumers,
63 Liberty street, New York.
PARK & WHITE, Wholesale Dealers,
9 6m *San Francisco, California.*

☞ **Counterfeit Wistar's Balsam.**—We would caution the purchasers of the *Balsam of Wild Cherry* against an imitation article which has made its appearance in many places, and which might deceive the unwary by its resemblance to the genuine bottle. Of the mixture we need not speak. Unprincipled scoundrels can always be found ready to counterfeit anything by which they can put money in their pockets, and they are sure to choose the most popular and well-known article on which to practice their villanies. It is a lamentable fact that there are also *dealers in medicines* who are willing to lend themselves to carry out this imposition, by selling such *trash* as genuine, because they can buy it for less than half the cost of the real article. Avoid such a man as you would a dealer in counterfeit money, for he is the greater scamp of the two.

They have never dared to forge the written signature of I. Butts, having a wholesome fear of the State Prison before their eyes. *Be sure that you find on the outside wrapper the written signature of I. BUTTS*, and you may rely upon its being genuine. Buy none other.

Seth W. Fowle & Co., 138 Washington street, Boston, Proprietors. Sold by their agents everywhere.

☞ **HAIR DYE! HAIR DYE!! HAIR DYE!!!**
Batchelor's Hair Dye is the Best in the World!

GRAY, RED, OR RUSTY HAIR DYED INSTANTLY TO a beautiful Natural Brown or Black, without the least injury to Hair or Skin.

Fifteen Medals and Diplomas have been awarded to Wm. A. Batchelor since 1839, and over 80,000 applications have been made to the Hair of his patrons of his famous Dye. Prejudice against Dying the Hair and Whiskers is unjust, as it would be against covering a bald head with a wig.

WM. A. BATCHELOR'S HAIR DYE produces a color not to be distinguished from nature, and is warranted not to injure in the least, however long it may be continued.

Made, sold or applied (in 12 private rooms) at the Wig Factory, 233 Broadway, N. Y.

Sold in all cities and towns of the United States, by Druggists and Fancy Good Dealers.

☞ The Genuine has the name and address upon a steel plate engraving on four sides of each bottle, of
WILLIAM A. BATCHELOR,
v8-13 1y 233 Broadway, New York.

☞ **Lawton Blackberry Seed.**—A few packets of this choice seed are now ready, and can be mailed to any address. Price, $1. WARREN & CO.,
California Farmer Office,

HOTEL
INTERNATIONAL.
San Francisco, California.

THE UNDERSIGNED INVITES the attention of the Traveling Public and strangers in particular, to the merits of this House.

It was established under its present management on the 1st January, 1857, as a
FIRST-CLASS HOTEL,
in every particular. The present
Lessee and Managers,
A. S. HALEY,
JNO. J. HALEY, and E. R. ROBINSON,
with a delicacy not wishing to encroach upon the merits of other houses, cannot but recall the marked favor with which their enterprise has been received by a discriminating public, in a constantly increasing patronage of the
FIRST RESPECTABILITY,
showing conclusively the SUPERIOR MODE in which the Hotel is conducted.

It is contiguous to all of the most
POPULAR PLACES OF AMUSEMENT,
THE PRINCIPAL THOROUGHFARES,
THE FASHIONABLE PROMENADES,
AND STEAMBOAT LANDINGS;
thus rendering it at all times the most
DESIRABLE STOPPING-PLACE
For Families or Single Gentlemen,
during their sojourn in this city.

THE "INTERNATIONAL-HOTEL COACH," under the superintendence of P. B. SMITH, late Stage Agent at Sacramento City, is in attendance at all hours to convey passengers to and from the Hotel, for One Dollar each, including Baggage.
A. S. HALEY, Lessee.
Assisted by: JOHN J. HALEY, and
E. R. ROBINSON, formerly of the New York Hotel.

WHEELER & WILSON
MANUFACTURING COMPANY'S
SEWING MACHINES.
343 Broadway, New York.
Agencies throughout the United States.

Highest Premium again awarded by the American Institute, at the Crystal Palace, Nov. 6, 1857.
Also, highest Premium awarded at the Illinois State Fair, and Maryland Institute, Baltimore; and Maine State Fair.

THE COMPANY INVITES THE ATTENTION OF Housekeepers, Seamstresses, Dressmakers, Tailors, Manufacturers of Shirts, Collars, Skirts, Cloaks, Mantillas, Clothing, Hats, Caps, Corsets, Ladies' Gaiters, Linen Goods, Umbrellas, Parasols, and Silk Goods, to the perfect adaptation and unrivaled excellence of these SEWING MACHINES for their uses. They combine all the improvements that have been invented for sewing. Their extensive and increasing sale, and the unanimous commendation that they have received, warrant the Company in warmly recommending them. They have been in use sufficiently long to test them thoroughly, and have given entire satisfaction.

They are simple in construction, efficient and durable in operation, beautiful in model and finish, fitted to adorn the parlor, and suited to the workshop—applicable alike to the use of the family and the manufacturer. Their speed is from 1,200 to 2,000 stiches per minute, or equal in efficiency to 12 seamstresses. Substituting as they do, healthful exercise and rational employment for the soul-and-body-destroying drudgery of hand sewing, they are hailed as Woman's Friend.

The Company feels confident that these machines, in their present form, are the best ever offered to the public; and refers, for confirmation of this opinion, to the thousands of families and manufacturers who use them.

H. C. HAYDEN, Agent,
9v-7 3m 157 Sacramento street

[For the California Farmer.]

THOU OR I.

BY FLORENCE PERCY.

Through the darkness of the years,
Through the trials and the tears,
Shedding radiance near and far
Has thy love shone, like a star;
Like a star, whose light to-day
Fades forever from my way,
For henceforth must heart from heart
Walk forever more apart.
Nay, no vows,—when we are parted,
Time shall try
Which will be most faithful-hearted,—
Thou or I!

Ay, misjudge me—be unjust—
I can bear it—for I must.
Call my heart unkind and cold,—
Half its love hath not been told.
While from hidden wounds it bleeds
Read it, as the wise *world* reads.
I will bear it—nor betray
What I fain would hide to-day—
Better thus,—when we are parted
Time will try
Which shall be most faithful-hearted—
Thou or I!

Though we never meet again
In life's wearisome domain,
If thy love and anguish are
Yearning toward me from afar—
If my parting kiss remain
On thy brow, without a stain—
If my name, in death's eclipse
Linger last upon thy lips—
I shall know, though we are parted;—
Death will tell
Which has proved most faithful-hearted—
So —— farewell!

[For the California Farmer.]

Building Anew.

BY FLORENCE PERCY.

[How truly applicable is the following graphic sketch of life's every day scenes in California; and who among our old Californians cannot look back and see how often they have had to *build anew* in all the varied phases of the history of our people? Amid fires and floods, pecuniary panics, and in every department of business, or social life, hundreds, aye, thousands have uttered, with the deepest feeling, the words of our gifted writer, "I am building anew." Nothing could be more strictly appropriate at this time to the history and condition of our State, than the following, and we hope its tone of encouragement will be heeded. "Don't cry, Archy, says Jamie: *we will build again*." And we say, God speed the brave-hearted till the last block shall be placed, and the cap-stone put on in triumph:]

"One more block for the top of this chimney, Mamma, and this pretty little house will be finished. See, we have used all our basketful of blocks, Jamie and I, and now see what a beautiful house; doors and windows, and chimneys, just as nice as the *great* new house across the street! Isn't fine? Hand me the last block, Jamie!" And in his eagerness, the little house-builder's foot tripped against the foundations of his castle, and down it came, in a shapeless mass of ruin; form and comeliness, doors and windows, chimneys and pillars, all dissolved into their "original elements" of blocks, blocks, blocks.

And there stood the poor little architect, with the "cap-stone" in his hand, and the shadow of a great disappointment shutting out all the light from his childish face, while the tears rained over it warm and fast. Poor Archy! But it is only a forestall of thy manhood; for many an older man than thou, Archy, has grieved to see his "beautiful palaces" laid waste; has wept in utter poverty of spirit at beholding the desolation of the gorgeous castles which his heart and hands have builded!

"Don't cry, Archy, don't cry!" speaks the comforting voice of Jamie, at his side. "Never mind the house, Archy, *we will build another!*"

"Build another!" Hope's our watchword! and the tears are dashed away from the bright eyes to which the light has suddenly flashed back again; the tear-wet tangles are pushed aside from the eager face, and all the strength, hope and ambition of the future man finds voice in the triumphant words, "*we will build another!*" Beautiful faith of childhood! Happy transferable heart, which can so soon forget the ruins of the past in the new and perfect proportions of the present! * * * *

"It was our *home!*" murmured a woman whom we passed at the corner of the street, this morning, as she looked tearfully on the pile of smoldering ruins which had been her home but yesterday; her home! now only a blackened heap of bricks and half-burnt timbers. Her home! It is a sweet word to a *woman's* heart; sweet, indeed, if she has known its blessings, and scarcely less so if they have always been denied her. Her home! Here had she passed the bright days of her early wifehood; here had she known the fullness and perfection of that love for which many a heart yearns emptily, all its life-long; here had she learned the sweet lesson of maternity. What wonder that her tears fell as she repeated, "It was our home!"

"Never mind, darling," said a cheery, loving voice, and a strong arm crept protectingly around her; "don't grieve over it, dry your tears, love, and you shall see how soon *we will build another!*"

Dear hopeful, loving heart! Verily is it easy to "build another," when the foundation is so broadly and firmly laid; when the true heart contains within itself so great a wealth whereof to build—love and faith, cheerfulness, strength and patience! * * * *

"Gone, all gone," whispered a newly widowed heart, the husband of a fair young wife whose name you saw in the morning prints, after the words, "Died yesterday;" "gone, wife and child, and without me!" Here are the very flowers she gathered, lying only half withered on the window seat; there are the little slippers which she last wore; alas! the light feet which pressed them will walk beside him no more forever! Here, across her chair, is the familiar morning robe, its dainty sleeve still rounded by its recent clasp around her dear white arms; and here, saddest of all, is a half-open drawer, over which leans the husband and father, his tears dropping hot and fast on the fairy-like garments within; tiny frocks, embroidered and blue-ribboned, but alas, never worn—folded and smoothed, and kissed, prayerfully, no doubt, by the loving hands and lips of her who "died yesterday!" And he, the husband of a year, the father of an hour, no more. Oh, his grief is bitter, bitter! And he presses the tiny robes to his lips, lips which have lost all their worldly pride and sternness now, and thinks of the small soft face which will never rest against his own; of the satin-like hand, so little, so *very* little, which will never tangle his hair and smooth his cheek, as he had hoped—as he had hoped!

And this is the wreck of his castle of happiness! Nothing left but empty garments, empty rooms, and an empty heart! The memory of a faint voice, a *child's* voice, sounding so new and strange in *this* home; a voice, which though small and feeble, woke up with mighty power all the *father* in his soul; all the love so long dormant within him; aroused it in all its strength and fullness, only to yearn unsatisfied, forever! This, and the recollection of the farewell in *her* dimming eyes, the weak pressure of trembling lips upon his cheek; *her* lips, for whose life he would have died a hundred deaths; and, by and by, a green grave, with roses about the head-stone, partly hiding the letters—"Annie, wife of ——;" and this is all—all!

Years pass, and though the riven heart is yet faithful, time has blunted the keen edge of its torture. But the house is lonely—the heart is lonely. Say not that he is faithless or forgetful if by and by he take another hand in his, and say, "My beautiful places have been made desolate; my castle of love and home has crumbled—we will *build another*."

Is it not better so? The vine that has been torn from its hold will cling again; and surely, surely it is well, wise and merciful that the torn heart may after a time gather up unto itself the fragments of its shattered happiness, and "build another!"

Ay, all you who may, "build another," fairer and firmer than the first, if may be, and more enduring; *all you who may*, for there *are* those to whom this is denied, or if not denied, impossible; death is not the deepest sorrow. Happy are you whose loved ones die true to you. Your love for them, and the memory of that love, is *safe*, forever more. No shadow can come between you. Death *divides*, but it does not *alienate*. Death agonizes, it does not outrage. Death wounds and lacerates, but it does not shake our faith in either God or man.

But you whose ideals live, and yet are dead—dead to you—dead in falsity and unfaithfulness; you whose castle of hope and love has become only a haunt for ghosts and shadows, and bats and creeping things—*you* may never build again. The rock of your defence is shaken; your faith in heaven and earth is weakened; the torn rose-leaf will never grow together; the sullied snow will never be pure and white again. God pity those whose life-structure of truth and love has fallen; God pity and save those who cannot *build another!*

[For the California Farmer.]

Truth and Beauty.

THE following words are beautiful, because they bear the impress of truth, felt by the writer; and in this instance they are doubly beautiful, because they are beautifully true:

"I LOVE YOU."

Who has not "felt his pulses thrill like a rich harp-string," at the sound of these soul-cheering words, when spoken by a kind mother, sister, or brother, either in playful mood, or when parting, perhaps forever; or when breathed into the ear by the breath of love, by some fair being who is walking by our side in the light of the moon's pale beams; or have read them reflected from the depths of beaming eyes, as stars are mirrored in the bosom of the placid lake? All this have I felt and seen, but never did those words fall upon my ear with more of angel sweetness, than when I read these words of our sweet Alice, "Edith, *I love you*." Refreshing tears fell from my eyes like drops of morning dew falling from the branches of trees when melted by the rays of the rising sun, and I asked, for what does she love me? and my heart replied for love alone, as I felt it welling forth to bless her, and to pray that the pent-up fountains of the great heart of humanity might be made to flow together in one pure stream of charity, extending its genial influences over all the waste places of the earth, causing the hearts of the sad and solitary to be glad, and destroying forever the noxious weeds of envy and folly; planting in their stead those of wisdom and love, until "God's will shall be done on earth as it is in heaven." O may that glorious day make haste, though I may not see it with my mortal eyes. E. M.

Churns! Churns!! Churns!!!

A Chance for Every Good Dairyman, that would Save Time, Money and Labor.

THE undersigned is now making the celebrated

THERMOMETER CHURN,

the style and quality that won the FIRST PREMIUM at San Jose, and a Churn that has won the approbation of the people.

Please come and see me at my WORKSHOP, and judge for yourselves. I intend to give you the CREAM of a Churn, and you will patronize me if you know which side your bread is buttered. H G. PRATT,

SANTA CLARA
NURSERY.
Half a Mile West of Santa Clara, on the San Francisco Road.

The Proprietor of this extensive and well-known Nursery, informs the public that he has for sale this winter, a large and very choice stock of the very best varieties of

FRUIT TREES, VINES AND PLANTS.
Consisting in part of
3,000 two year old Apples;
12,000 one year old Apples;
2,500 one year old Pear, on Pear stock;
2,500 one and two year old Cherry.
Besides a large stock of
PEACH, PLUM, APRICOT AND NECTARINE TREES.
Also a lot of
Fig Trees, Raspberries, Currants, Gooseberries, and about 20,000 Grape Vines.
500 lbs. China Sugar-Cane Seed,
At $1 25 per Pound;
One pound and a-half being a great plenty to seed one acre of ground.

The Proprietor will sell his Trees, Bushes and Vines as low as any other responsible nursery in the country. His stock is taken wholly from trees which have borne fruit in California, and is therefore known and reliable.
☞ All orders will be promptly attended to. The expense of packing and freight will be charged to the purchaser. Terms cash.
L. A GOULD, Proprietor.
Santa Clara, Nov. 24, 1857. v7-22 3m

COMMERCIAL NURSERY,
SAN JOSE.

THE Proprietors of this old established Nursery are now prepared to furnish to their friends and patrons the
Largest and Most Select Collection of
FRUIT, SHADE, AND ORNAMENTAL TREES, VINES, &c.,
ever offered in this State,
At Reduced Prices!

The FRUIT TREES offered by us are all grown and worked in the Nursery by us, from varieties obtained from the celebrated MOUNT HOPE NURSERIES, Rochester, most of which we have fruited in our Orchards, and offer for sale only such varieties as we have found to be best adapted to this climate.
We have in Nursery:
25,000 APPLE TREES, of two years' growth, large size, thrifty, fine heads.
10,000 One year from graft.
1,000 Three years' growth, extra large, fine Trees, suitable for planting in yards and gardens, and such as cannot be obtained in any other Nursery in the state.
2,000 PEAR TREES on Pear stocks, one and two years' growth.
2,000 Pear, on Angiers' Quince, one year from bud.
3,000 CHERRY TREES, of twenty-five best varieties.
5,000 PEACH, of twenty varieties, one year from bud.
1,000 PLUM, of twenty best selected varieties.
APRICOTS, six varieties.
NECTARINE, SOFT-SHELLED ALMOND, &c. &c
10,000 GRAPE VINES, Los Angeles, 1, 2 and 3 years' old.
3,000 Catawba, Isabella, Sweetwater, and foreign varieties.
GOOSEBERRY, STRAWBERRY, RASPBERRY, CURRANTS, &c., &c.

Catalogues can be obtained on application at the Nursery, by mail or otherwise
All orders from a distance carefully attended to, securely packed and shipped to any part of the State, at the risk of the purchaser.
Our terms are cash, or short credit, on approved notes, on delivery of the Trees at the Nursery.
Explicit directions for marking and shipping should accompany each order, and when particular varieties are wanted, state whether and to what extent others may be substituted, in case the varieties cannot be furnished. Persons trusting to us to select varieties may rely upon being furnished with the leading sorts, and proper proportion for each season.

SEEDS
OF FRUIT and ORNAMENTAL TREES.
THOMAS MEEHAN,
PROPRIETOR OF THE GERMANTOWN NURSERIES,
Germantown, Philadelphia, Pa.
Includes in his business the collection and importation of
Every Kind of Tree Seeds
That can be obtained in this country or Europe. A Price Current of over Two Hundred Species which can generally be obtained with certainty, is issued every May, in advance of the season of ripening, so as to afford purchasers an opportunity to forward their orders early enough to get them in prime season; fresh, and in the best order for growing.
Most of this year's crops of seeds are now on hand, and they will be sold at the lowest rates at which they can be collected. The supply of PEAR SEED is large this season, and can be supplied at $5 per pound, or $4 50 per pound when 5 pounds are ordered.

MACHINES AND IMPLEMENTS.

TREADWELL & CO.,

IMPORTERS,

N. E. corner California and Battery streets,
SAN FRANCISCO,

have now landing, and will receive by every packet from New York and Boston, the most extensive assortment of

FARMING MACHINERY and Implements,

ever brought to this market, embracing all the

Latest Styles and Improvements,

which will be sold at lowest rates.....consisting in part of:

REAPERS:

MANNY'S COMBINED REAPER AND MOWER, WITH WOOD'S IMPROVEMENT.—These justly celebrated Machines have become too well known in California to require more than a simple announcement where they can be had. We are sole agents for the Pacific coast, and none genuine elsewhere.

McCORMICK'S REAPER....This universally approved Reaper we keep constantly on hand, and are Agents of the Maker.

KETCHUM'S COMBINED REAPER AND MOWER....This Machine is now very popular—having been greatly improved the last two years.

BURRALL'S IMPROVED GRAIN REAPER. This Reaper cuts six feet, and is one of the strongest and most durable Machines in use.

SEYMOUR AND MORGAN'S REAPER; without the Raker attachment and all late improvements.

HUSSEY'S REAPER....Baltimore make.

PALMER & WILLIAMS' SELF-RAKING REAPER.

THRESHERS:

"HALL'S" 8 and 10 horse THRESHER AND SEPARATOR....This Machine we have had made for this season, with great improvements, and it will be the best *THRESHER* in market this year—34, 36 and 38-inch cylinders, and cannot fail to give entire satisfaction.

"SPENCER'S" 8 and 10 horse THRESHER AND SEPARATOR....This is one of the largest and most durable Machines that comes to California, and has been well tried, and found "good."

STEPHENSON & BIRDSALL'S 8 and 10 horse THRESHER AND SEPARATOR....A large, splendid Thresher, with late improvements.

WHITMAN'S 4 horse THRESHER AND SEPTRATOR....This is a very desirable Thresher for small Farmers. It is got up with great care, and will give good satisfaction.

EMERY'S 2 horse THRESHER AND CLEANER....Greatly improved over last year.

EMERY'S 1 and 2 horse THRESHER, WITH FAN MILL.

The above Threshers will be sold with or without Horse Powers.

"Haynes'" Heading Machines or Harvesters.

These Machines are in general use in the Western States, and are pre-eminently adapted to California.

HORSE POWERS:

SMITH'S 8 and 10 horse PLANET POWERS, WITH HALL'S IMPROVEMENT.

PERRAGO'S 8 and 10 horse PLANET POWERS....This is one of the most successful Powers in use; has taken a greater number of premiums in the Atlantic States than any other Power; is simple, strong, and durable.

WHITMAN'S 4 and 6 horse ROTARY POWERS.
BOGARDUS' 2, 4, and 6 horse do do.
FIELDS' 2, 4, and 6 do do do.
EMERY'S 1 and 2 horse TREAD POWERS.

This Machinery comes in compact cases, can be sent to any part of the State or Coast at small expense, and marked so that it can be easily set up.

Extra Castings, for all the above, constantly on hand.

The Celebrated Boston Steel Clipper Plow.

We have these Plows exclusively, and keep a stock on hand at all times. Extra points and parts can always be had.

This Plow can be run with half the power it takes for the "Peoria" Plow of same size, and must commend itself to all who wish to save "horse-flesh."

The Peoria Steel Plow

Constantly on hand.

These styles of Plows come 10 in a case, and the expense is very small in sending them to the remotest parts of the coast or interior.

HAY PRESSES—Several sizes; best makers.
Do. CUTTERS—Several sizes and kinds; hand and power.
HORSE RAKES—wood and steel teeth; 8, 10, and 12 feet.
GRANT'S GRAIN CRADLE—In cases of one dozen each.
Do. FAN MILLS. Also, the Boston Mill.
CORN SHELLERS—Hand and power.
Scythes and Snaiths—best steel Scythes and Lamson's Snaiths.
Hay and Barley Forks—2, 3, and 4 tine; of best makers.
Carpenter's Patent Wire spring-Tooth Horse Rake, 10 to 15 feet long, with wheels, and seat for driver.
Ox Yokes and Bows—all sizes.
Churns—Thermometer, Dash, and Cylinder; also, Dog Powers for do.
Garden Barrows. Caldrons and Furnaces. Cultivators.
Horse Hoes. Seed Sowers. Harrows.

Field and Garden Seeds

Of every description, *via* the Isthmus—this year's growth (1857).

Steam-Engines, 4 to 15 Horse Power.

Suitable for Ranches or Mining purposes.

Portable Floor Mills and Mill Stones—Noyes' make. All sizes, 16 inch to 4 feet.

Belting, Bolting Cloth and Packing—All kinds and sizes of the above.

HARDWARE—The best stock in the State.

MINING GOODS—All kinds in use.

COOPERS' AND TANNERS' TOOLS—Full assortment.

Baling Wire—Annealed.

Hay Rope—Best Manila.

Grindstones—Best dressed Nova Scotia; from 6 inches to 4 feet diameter, packed in casks in sawdust.

Wire Fencing—A neat article for inclosing Gardens, Hemeries, &c. Also, for Ornamental Garden work, Grape and Rose Trellises.

Wooden Ware—In great variety: Tubs, Pails, Buckets, Measures, Baby Cabs and Wagons, Peach and Strawberry Baskets, &c, &c. 9r-4

CHARLES DICKENS' WORKS.

TWENTY-NINE DIFFERENT EDITIONS.

No Library can be Complete without a Set of These Works.

CHEAP EDITION.—PAPER COVER.

Complete in Fourteen volumes.

"PETERSON'S" are the only complete and uniform editions of Charles Dickens' works ever published in the world; they are printed from the original London Editions, and are the only editions published in this country. No library, either public or private, can be complete without having in it a complete set of the works of this, the greatest of all living authors. Every family should possess a set of one of the editions. The cheap edition is complete in Fourteen Volumes, paper covers; either or all of which can be had separately, price 50 cents each, as follows:

Little Dorritt.	Christmas Stories.
Pickwick Papers.	Martin Chuzzlewit.
Dickens' New Stories.	Barnaby Rudge.
Bleak House.	Old Curiosity Shop.
David Copperfield.	Sketches by "Boz."
Dombey and Son.	Oliver Twist.
Nicholas Nickleby.	Two Apprentices. 25

A complete set of the above fourteen books, will be sold, or sent to any one, to any place, *free of postage*, for Five Dollars.

LIBRARY OCTAVO EDITION.

Published in Seven Different Styles.

This Edition is complete in SIX very large octavo volumes, with a Portrait on steel of Charles Dickens, containing the whole of the above works, handsomely printed, and bound in various styles.

Vol. 1 contains Pickwick Papers and Curiosity Shop.
" 2 do Oliver Twist, Sketches by "Boz," and Barnaby Rudge.
Vol. 3 contains Nicholas Nickleby, and Martin Chuzzlewit.
" 4 do David Copperfield, Dombey and Son, and Christmas Stories.
" 5 do Bleak House, and Dickens' New Stories.
" 6 do Little Dorrit. In two books—Poverty and Riches.

Price of a set, bound in Black cloth.....$9 00
" " Scarlet cloth, extra.....10 00

DUODECIMO ILLUSTRATED EDITION.

Complete in Twenty-five Volumes.

The Editions in Duodecimo form are beautifully illustrated with over *Five Hundred Steel and Wood Illustrations*, from designs by Cruikshank, Phiz, Leech, Browne, Maclise, etc., illustrative of the best scenes in each work, making it the most beautiful and perfect edition in the world, and each work is also reprinted from the first original London editions that were issued by subscription in monthly numbers, and the volumes will be found on examination, to be published on the finest and best of white paper.

This edition of Dickens' Works is now published complete, entire, and unabridged, in Twenty-five beautiful volumes, and supplies what has long been wanted, an edition that shall combine the advantages of portable size, large and readable type, and uniformity with other standard English authors.

The Duodecimo edition alone has been gotten up at an expense of *over forty-five thousand dollars*, but the publishers trust that an appreciative public will repay them for the outlay, by a generous purchase of the volumes. All they ask is for the public to examine them, and they are confident they will exclaim, with one voice, that they are the handsomest and cheapest, and best illustrated Set of Works ever published. This edition is sold in sets, in various styles of binding, or any work can be had separately, price Two Dollars and Fifty cents each, and each work but one being in two volumes, handsomely bound in cloth, as follows:

Pickwick Papers.	Sketches by "Boz."
Nicholas Nickleby.	Barnaby Rudge.
David Copperfield.	Martin Chuzzlewit.
Oliver Twist.	Old Curiosity Shop.
Bleak House.	Christmas Stories.
Little Dorrit.	Dickens' New Stories.
Dombey and Son.	*One volume, cloth*..$1 25

Price of a complete set in Twenty-five volumes, bound in

" " " Full calf, gilt edges, backs, etc. 75 00

PEOPLE'S DUODECIMO EDITION.

Published in Six Different Styles.

This Duodecimo edition is complete in Thirteen volumes, or near One Thousand pages each, with two illustrations to each volume, but is not printed on as thick or as fine paper as the Illustrated Edition, but contains all the *reading* matter that is in the Illustrated Edition, printed from large type, leaded. The volumes are sold separately or together, price One Dollar and Fifty cents each, neatly bound in cloth; or a complete set in this style will be sold for $19. The following are their names:

Little Dorrit.	Nicholas Nickleby.
Pickwick Papers.	Christmas Stories.
Dickens' New Stories.	Martin Chuzzlewit.
Bleak House.	Barnaby Rudge.
David Copperfield.	Old Curiosity Shop.
Dombey and Son.	Sketches by "Boz."
Oliver Twist.	

Price of a set, bound in Black cloth.....$19 00

ACHROMATIC MICROSCOPES.

J. & W. GRUNOW & CO., New Haven, Connecticut, invite attention to their superior

Achromatic Simple and Compound Microscopes.

These Instruments have obtained the commendation of the most eminent scientific men of America, and have received the premiums of the New-York World's Fair of 1853, and of the Connecticut State Agricultural Society of 1856.

These Microscopes vary from forms of the greatest possible simplicity to those combining the most elaborate of modern improvements.

They call the particular attention of Students and Teachers to their EDUCATIONAL and STUDENTS' Microscopes; which are provided with object-glasses sufficient for all ordinary investigations, and of a quality never before sold by any American or foreign maker at prices so low.

Priced Catalogues will be sent gratis upon application. J. & W. GRUNOW & CO. have also now ready for distribution, an elaborate Descriptive and Illustrated Catalogue which will be sent post-free upon receipt of of 30c in postage stamps. *eoply

AGRICULTURAL.

FIRST PREMIUM IMPLEMENTS.

TO THE FARMER
AND
Dealer in Agricultural Implements.

PLEASE READ.

HAVING erected a good shop, with facilities not heretofore possessed by any house in this State for manufacturing Agricultural Implements, I beg leave to announce that I am now prepared to receive orders to any extent in this line of business. I employ none but the best and most experienced mechanics, and use only the very best materials. In this way I hope to promote the interest of the good mechanic, the interest of the farmer, the interest of our young and growing Agricultural State; and at the same time that interest which is foremost with all mankind—self. I have had twenty years experience in the manufacturing business;

I ESTABLISHED THE FIRST SHOP,
AND
MADE THE FIRST STEEL PLOW

in the State of Wisconsin, in the dawn of her great agricultural improvement. I also

MADE THE FIRST REAPING AND MOWING MACHINE
AND
THE FIRST STEEL PLOW

Ever Made in this State;

Therefore, with my experience, and a knowledge of the wants of the country (which are different from most others), I feel confident that I can and will do much for the interests of the agriculturists of this county; and in my efforts I trust I shall meet with a good share of patronage from the farmer and all interested in this matter, and in the interest and development of the agricultural improvement of our State.

I design, and have under way, the manufacturing of

1,500 Cast Steel California Plows;
THE DEEP TILLER;
OR,
"QUEEN OF THE WEST;"

Of stock entirely superior to any ever worked before in this country. Also,

GANG PLOWS,
HARROWS,
CULTIVATORS,
FANN MILLS,
&c., &c., &c.

In addition to what I manufacture, I shall constantly be receiving implements from the best makers of the Eastern and Western States, amongst which are now due

500 CINCINNATI

EAGLE, STEEL AND ROVER PLOWS,

which stand, in point of true merit and worth, altogether higher than any others in the great agricultural State of Ohio.

☞ Please favor me with a call, and see for yourself, and be convinced that I am publishing no humbug, but simply facts as they are; and that your young State can, within itself, already provide the farmer with implements inferior to none now in use. All kinds of agricultural implements and machines repaired on short notice, and in the best manner, and on reasonable terms.

LIVER COMPAINT, DYSPEPSIA, JAUNDICE,
Chronic or Nervous Debility, Diseases of the Kidneys, and all diseases arising from a disordered Liver or Stomach.

Such as Constipation, Inward Piles, Fullness or Blood to the Head, Acidity on the Stomach, Nausea, Heartburn, Disgust for Food, Fullness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried and difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, Dimness of Vision, Dots of Webs before the Sight, Fever and Dull pain in the Head, Deficiency of Perspiration, Yellowness of the Skin, and Eyes, Pain in the Side, Back, Chest, Limbs, &c. Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of Evil and great Depression of Spirits.

The proprietor, in calling the attention of the public to this preparation, does so with a feeling of the utmost confidence in its virtues and adaptation to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten years' trial before the American people, and its reputation and sale is unrivalled by any similar preparations extant. The testimony in its favor given by the most prominent and well-known Physicians and individuals in all parts of the country is immense, and a careful perusal of the Almanac, published annually by the proprietor, and to be had gratis of any of his Agents, cannot but satisfy the most skeptical that this remedy is really deserving the great celebrity it has obtained.

Principal Office and Manufactory, No. 96 ARCH STREET Philadelphia, Pa.

J. L. POLHEMUS
DRUGGIST

OFFICIAL NOTICE!
POLHEMUS' DRUG STORE,
No. 190 J street, corner of Seventh.
SACRAMENTO, CAL

FELLOW CITIZENS: I have lived among you since the ever glorious FORTY-NINE, have suffered with you in three fires and three floods, and intend to live among you with my family during the term of my natural life, if not longer. I return you my most sincere thanks for your unfaltering patronage and support, which has enabled me to pay One Hundred Cents on the Dollar through all my adverse fortune. I would also give you a few reasons for your continued patronage, and inducements to new patrons likewise.

FIRSTLY.

I claim to be the Oldest Established Legitimate Druggist in this City.

Persons in this connection will please observe that there is as much difference between a DOCTOR and a DRUGGIST as there is between a Druggist and a Doctor, and rather more so between those who have picked up the Drug Business and those who have devoted their whole lives to it. To this latter class I have the honor to belong, having learned my business in the Atlantic States, and been engaged in said business for the last eighteen years.

SECONDLY.

Believing that life is sweet to all, and that the people wish to know where they can get their prescriptions filled with safety, I will hereafter fill them for

Half the Price Usually Charged

By other Druggists, legitimate or illegitimate, and of **The Purest Drugs and Chemicals.**

THIRDLY.

I intend my store shall be ONE of the best, if not THE BEST place in California to obtain everything, NEW, ODD and STRANGE in the Drug line, and especially to make it the most extensive depot for every valuable Patent Medicine, Drug and Chemical. We invite proprietors of valuable and reliable Patent Medicines to send them along. We have a large and thoroughly fire-proof Drug Warehouse to hold them, and patrons to buy them.

FOURTHLY.

We Keep Open all Night!

And charge no more for medicines than in the day time.

FIFTHLY.

We will furnish those in indigent circumstances with MEDICINES AT COST! the same being attested by two or three good citizens.

SIXTHLY.

Hereafter we will do a business on a CASH BASIS ONLY. The amounts we have lost heretofore by crediting we intend to distribute equally among our patrons, in the future, in the decreased price of our goods.

SEVENTHLY.

We have received the agencies for the following valuable articles:

Dr. Carl Warburg's Tincture. This article is particularly recommended for Ague and Fever, when every other article fails to cure.

Budds' Nerve and Bone Liniment, warranted the best in California.

Flower of the West, for Fever and Ague.

Delight's Spanish Lustral, for the Hair.

HUDSON'S CALIFORNIA GROWN MUSTARD.

Also, agencies for all the other popular medicines too numerous to mention.

EIGHTHLY AND LASTLY.

We import nearly all of our goods. We think we know how to import them, and how to sell them to satisfy the public as to price and quality. At all events, give us a call, and WE WILL TRY.

v6-12 J. L. POLHEMUS.

Letter from New York.

NEW YORK, February 5th, 1858.

EDITORS FARMER: It is usually considered orthodox, when friends meet, after the first salutation, to remark about the weather. One will say, "a very fine morning, this;" the other, just to let him know that he does not suspect him of *fibbing*, will, as in duty bound, answer, "very fine, indeed;" though both may fib a little in saying it. Well then, I will say we are having a glorious winter here, far ahead of any California winter. Why they made large quantities of maple sugar in Michigan, during the past month, and in the city of New York (in ——, I have forgotten *what latitude, you can find it on the map*), not one hundred yards from where I am writing, flowers bloomed in the open air in several gardens, during the past month.

Then we have had a few nice little snow-storms, thrown in by way of variety, spreading a vail over the earth as delicate and much *thicker* than the one that the Princess Royal wore as she stood before the altar and united her destiny with Prussia's future King. Nothing better for the health than a nice little snow-storm. The boys complain bitterly that there is no skating, or sliding down hill. After all what is a winter worth, if you can neither skate or have a sleigh ride, and a game or two at snow-balling?

The warm Southern winds have stirred up the great political cauldron at the Capitol, so fierce, that it bubbles and boils over nearly every day. Mr. Buchanan is said to be wonderfully frightened about the fierce bubbling over of the Southern mass. Gen. Cass has symptoms of the *ague fits* every day; all hands are *shaky* like, all are trying to doctor bleeding Kansas. Some think by welding Minnesota to one end, and Oregon to the other, it may be able to stop bleeding. There is fun ahead at Washington, so look out. The Utah question is opening a grave aspect before the country. Gen. Scott, it is said, will go to California on the steamer that carries this letter, to make arrangements for an early, vigorous, and decisive campaign in the spring. Brigham Young must leave the country, or be punished for treason.

From Europe there is news of some interest. Another attempt has been made to assassinate Louis Napoleon. The Princess Royal was to be married on the 25th ult., to the Prussian Prince. The news from India is in some respects more favorable, in others gloomy. There will be a very large emigration from Germany and the Hanoverian States to America, the present year. I hope you will have your share of them. It is stated that most of them will bring more or less capital with them, and intend to become farmers, and winter in some section of our Union. They are sober and worthy, and the effort to induce them to come to you should be made.

The money market is easy. Provisions plenty, but dear. The city and country generally healthy and prosperous. You will find all the politics you need in the various papers, and all other matters of general or special interest; and to give you time to look over those papers and your private correspondence, I will just bid you and the printers good morning. B.

Shorthorns as Milkers.

As a milk, and dairy-producing cow, *properly bred, and educated for that object*, the Shorthorn has no superior. In England, before they were in so great demand as of late years for breeding and feeding purposes, her feats at the pail were triumphantly set forth by her breeders; but of late years, so much more profitable have been her returns for breeding purposes alone, that the milking quality has been measurably neglected for the greater benefit of obtaining a better calf in the sacrifice of a large portion of her milk. That is to say: If the cow is milked to her utmost capacity in quantity, and time in yielding it, it must be to a considerable extent at the expense of the growth and development of the fœtus, or embryo calf within her: she can not do two things in the best possible manner at one and the same time—give a great yield of milk, and produce the best developed calf together. One or the other must suffer, as the best breeders consider, and the calf being of most consequence, the milk is sacrificed. There are good physiological reasons for this opinion which might be given; but as we are not discussing the science of breeding, it need not now be dwelt upon. But, that the Shorthorn has the natural capacity, and when reared and managed for that object, the tendency to produce milk equal to any breed whatever, there can be no question. Numerous recorded instances in this country, as in England, attest that fact. The several volumes of the American Herd Book may be referred to where Shorthorn cows have produced thirty to even forty quarts per day, for weeks together, of the richest milk, making a corresponding weight of butter.—[Am. Ag.

ACKNOWLEDGEMENT.—We have been favored by Maj. Hensley, with samples of the *Dioscorea Batatas*, or Chinese Potato, just received from China. Those who desire to experiment with the article, and will give us full results and reports of cultivation, can be favored with specimens by applying to us. We shall, in our next, give full particulars as to planting, propagation, &c.

HOLLOWAY'S PILLS.—General weakness and debility, the premonitions of vital decay, are replaced with vigor, activity, and a healthful potency in every organ, and in the entire system, by the restorative, regulating, and exhilarating influence of this life-sustaining vegetable preparation.

Sold at the manufactories, No. 80 Maiden Lane, New York, and No. 244 Strand, London; and by all druggists, at 25c., 62½c., and $1 per box.

WE do our friends a real service in calling attention to a medicine of such acknowledged merit as Wistar's Balsam. We are all liable to coughs and colds, which cease to be dangerous when recourse is had to the Wild Cherry. None genuine unless signed I. Butts on the wrapper.

HORTICULTURAL.

Ravenswood Fruit Garden
PLANTS.
WHOLESALE AND RETAIL.

Brinckle's Orange Raspberry, $70 ₱ thousand, $8 ₱ hundred.
Col. Wilder Raspberry, do do
Cushing Raspberry, do do
Thunderer Raspberry, do do
Linnæus Rhubarb, $50 ₱ thousand, $8 ₱ hundred.
ALSO,
Blackberries: New Rochelle or Lawton, Newman's or Thornless, $15 ₱ hundred.
Strawberries: Hovey's Seedling, Boston Pine, Large Early Scarlet, $6 ₱ thousand, $1 ₱ hundred.
Currants: Black Naples and Cherry, $10 and $12 ₱ hundred.

ALL the above plants of best quality; we cultivate most of them for market fruits.

THE BRINCKLE'S ORANGE RASPBERRY, for market or garden, is considered the best of all Raspberries: is unequaled in flavor and beauty; flavor is rich and vinous; and color beautiful bright orange: a very vigorous grower; hardy and exceedingly prolific.

The Cushing and Col Wilder are the best for making jams, preserves, sirups, &c.

THE LINNÆUS RHUBARB is a new variety originated by Myatt of England, who also originated the Victoria, on which this is a great improvement in both *flavor* and *productiveness*.

Its flavor is deliciously aromatic and spirited, and it is entirely free from the toughness and stringiness which characterize the Victoria, but when cooked becomes a fine uniform pulp, like the most tender apple. The plant is a very strong grower, more productive than the Victoria, and very hardy.

We cultivate most of the above Fruits for market, and selected them from our Fruit Gardens, as the choicest varieties known. Brinckle's Orange Raspberry and Linnæus Rhubarb especially are of exceeding excellence.

Orders will be promptly attended to in the order in which they are received, and Plants packed in careful manner.

Terms cash. Bills payable on delivery of Plants to the agents, or order of the purchaser.

Our plants will be ready to ship any time between the first of November and first of April. Circulars with full description of varieties and testimonials, can be had at the office of the California Farmer, San Francisco.

THOMPSON'S
SUSCOL NURSERIES.
Situated on the Napa River, at Suscol Ferry,
NAPA COUNTY.

THE undersigned wishes to call the attention of the public and patrons of these well-known Nurseries to the present extensive stock of

FRUIT AND SHADE TREES,
GRAPE-VINES, etc;
Also a choice lot of *GARDEN and GREEN-HOUSE PLANTS, ROSES, SHRUBS, &c.*,
Comprising all of the Very Best Varieties of Cultivated Fruits, such as
APPLE, PEAR, PEACH, PLUM, NECTARINE, APRICOT, CHERRY, ALMOND, QUINCE, and FIG TREES, GOOSEBERRY, CURRANT, and RASPBERRY BUSHES, &c.,
Together with a large lot of
Nut-Bearing and Shade Trees,
Consisting in part of Black Walnut, English Walnut (or Madeira Nut), Shell-bark Hickory, Elm, Weeping Willow, Locust, Sugar and Silver Maples, &c.
Grape-vines of all the Best Foreign and Native Varieties.

The Fruit Trees offered for sale are all budded and grafted from the best, most approved and popular varieties now cultivated in the United States and Europe: all of which are growing, and a large majority of which have fruited in our own orchards and vineyards, under our own immediate inspection.

Our trees are of one and two year's growth from Bud and Graft, thrifty and of large size; all of which have been grown *without irrigation*.

We would call particular attention to our large stock of Apple Trees, which for vigor of growth and beauty of form, cannot be excelled in the State.

Our stock of Garden and Greenhouse Plants, Roses, Shrubs, &c., comprise all the leading varieties most desirable for beautifying private gardens and residences.

CATALOGUES containing a full list of all the varieties, with a brief description of each, together with their time of ripening *in this State*, will be forwarded either by mail or express, to all who are desirous of purchasing trees.

Orders from a distance will be promptly attended to, and carefully packed for shipment.

Our prices will be as low as *reliable Trees, Vines, &c.*, of like quality, can be bought for in any Nursery in the State.

Our terms are CASH on delivery of the trees at the Nursery or *approved* notes for a short time, bearing interest. Parties desiring to purchase can apply either in person or by mail, or by Wells, Fargo & Co's Express, to
S. THOMPSON, at the Nurseries.
Or to S. PERKINS & Co, corner of Second and M streets, Sacramento; DERBY & BALDWIN, Petaluma; GOODMAN & Co., Napa City,—*Agents who will show samples and receive orders.*

☞ The above-named gentleman are our sole agents, in whom the public can place implicit confidence, and all who may favor them with their patronage can be assured that they are not getting Trees from *Auction Houses* and *Peddler's Wagons*. 21-3m

LAWTON OR NEW-ROCHELLE
BLACKBERRY PLANTS!!
PRICES REDUCED!

THE subscribers announce to their friends and customers that they have now
OVER SIX ACRES
OF THE
GENUINE LAWTON (or New-Rochelle)
BLACKBERRY PLANTS,
under cultivation, and in good condition.

They are therefore prepared to fill large orders the coming FALL and the next SPRING, at the following reduced prices:

One Thousand Plants	$125 00
One Hundred Plants	15 00
Fifty Plants	8 00
Two Dozen Plants	4 50
One Dozen Plants	2 50
One Half Dozen Plants	1 50

☞ Good Plants for setting, of a second size, will be sold for $100 per 1000 Plants, or $12 per 100 Plants.

N. B.—All Plants ordered of us will be taken up and packed with the greatest care, and under our own personal supervision.

Of the many thousands sent out by us last year, we have heard very few instances of failure, notwithstanding that they have been forwarded to *every part of the country, and to California, with perfect success*, and the setting out has often been entrusted to unskillful hands.

Printed directions for setting and cultivating are sent with every package. GEORGE SEYMOUR & CO.,
v9-2 3m South Norwalk, Conn.

LINDSEY'S
Double Acting Rotary Force Pump.

THIS is a new Pump, patented in America and England in 1855; and for Cisterns, Wells, Mines, Engines, Railroads, &c., has no rival: in that it works easier at great depths, discharges water at different hights, can be used for a hose, is made entirely of wrought and cast iron, without suction or packing, simple in construction, easily put in, not likely to get out of order, will last for an age, and is cheaper than any other Pump. It has a wrought iron pipe, side gearing and balance wheels, with everything complete to raise water by hand, from one to one hundred feet; and costs, boxed and shipped, from $18 to $50.

It must stand in the water, and will not rust.

Drawings and a full description sent to all parts of the world, free of postage, by addressing the general agent.
JAMES M. EDNEY,
56 John street, New York City.
☞ Circulars to be had, and orders received at the Office of the CALIFORNIA FARMER.
Circulars mailed to any address, by sending to the Editors of the FARMER. v7-23 1y eop

BOOKS, &c.

New Treatise on Land Surveying.
JUST PUBLISHED BY
E. C. & J. BIDDLE,
PHILADELPHIA,

A Treatise on Surveying, by S. Alsop. In this work, the theory is plainly and comprehensively presented; directions for practice are given definitely and precisely; and everything which an extensive business in Land Surveying would be likely to require is embraced. Price per copy, mailed to California, $3, postage included. Price of the KEY to the work, mailed to California, 75 cents.

E. C. & J. B. also publish the following popular educational works, and many others extensively used in the Schools and Colleges of our country: and they would respectfully invite School Directors and Teachers to send for a copy of the descriptive catalogue of their publications:

Crittenden's Treatise on Book-keeping. The series comprises the four volumes below named, and for each of them a KEY, and a set of miniature BLANK BOOKS for the exercises:
1. Treatise on Single Entry Book-keeping.
2. On Single and Double Entry, for Common Schools.
3. do do do for High Schools.
4. do do do for the Counting House.
The volumes are severally the text-books in Commercial Colleges in Boston, New York, Philadelphia, Cincinnati, Chicago, St. Louis, Louisville, etc.; in most of the Normal Schools, and a great number of the High Schools of our country: in the Public Grammar and Evening Schools of Philadelphia, etc.; while as a book of reference for practical accountants the Counting House edition is, undoubtedly, the most popular work on the Science of Accounts, published in the United States.

Cleveland's English Literature. *Twenty-fifth Thousand just published.* 1. CLEVELAND'S COMPENDIUM OF ENGLISH LITERATURE, from the 14th to close of 18th century: chronologically arranged: consisting of Biographical Sketches of the Authors, and selections from their works, together with Notes explanatory, etc. 2. CLEVELAND'S ENGLISH LITERATURE OF THE NINETEENTH CENTURY. A sequel to the "Compendium"; arranged on the same plan as it. The above two volumes are text-books in many of the Colleges, in the principal Normal Schools, and in a large number of other first-class Seminaries of our country; and they may with confidence be recommended as an admirable guide or chart for private students of English literature.

Cleveland's American Literature. *Cleveland's Compendium of American Literature*, on the same plan as the author's "Compendium of English Literature," will be published early next year.

Harrison on the Rise, Progress, and Present Structure of the English Language.

The Works of Thomas Dick, LL. D. 10 vols. 12mo. Few books are better adapted for the School or the Family Library, than the works of Dr. Dick.

BLACKIE & SON,
117 Fulton Street, - - - New York,
PUBLISH

THE ENGINEER AND MACHINIST'S DRAWING-BOOK; A complete Course of Instruction for the Practical Engineer; comprising Linear Drawing, Projection, Eccentric Curves, the various forms of Gearing, Reciprocating machinery, sketching and Drawing from the Machine, Projection of Shadows, Tinting, and Coloring, and Perspective.
THE MECHANIC'S CALCULATOR—by Wm. Grier—comprehending Principles, Rules and Tables in the various Departments of Mathematics and Mechanics.
THE MECHANIC'S POCKET DICTIONARY—by Wm. Grier—being a complete Note-book of Technical Terms, Rules and Tables, useful in the Mechanical Arts. Illustrated by Engravings of Machinery, and nearly 200 cuts and diagrams on wood.
THE BOOK OF ORNAMENTAL DESIGNS; A series of Egyptian, Grecian, Roman, Italian, Gothic, Moorish, French, Flemish and Elizabethan Ornaments, suitable for Art-workmen and Decorators. Containing 40 plates, folio size.
REID'S TREATISE ON CLOCK AND WATCH-MAKING, Theoretical and Practical. Illustrated with 20 Folding Plates. Royal 8vo, cloth.
HOW TO CHOOSE A GOOD MILK COW; A description of the marks by which the Milking Qualities of Cows all may be ascertained. Illustrated with engravings, cloth. 2

OIL!
FOR QUARTZ MILLS.
STANFORD BROTHERS,
PACIFIC OIL
AND
CAMPHENE WORKS,

INVITE attention to the following Certificates from GRASS VALLEY:

NEW-ENGLAND QUARTZ LEAD, Dec. 21, 1857.
W. LOUTENHEISER, Agent of Stanford Brothers, Pacific Oil and Camphene Works:
Dear Sir: I have now given those Oils from Stanford Brothers, which I purchased from you, a fair trial, and find them the VERY BEST I have ever used.
Z. WHEELER, Superintendent.

ALISON RANCH, Dec. 25, 1857.
This is to certify, that we have been using the Oils from Stanford Brothers Pacific Oil and Camphene works, for a long time, and find them of a superior quality.
JOHN ANDERSON, First Engineer.

ALTA HILL, Jan. 12, 1858.
I hereby certify, that we are now using on our Machinery, Oils manufactured by Stanford Brothers' Pacific Oil and Camphene works, purchased at their Agency in Grass Valley, and have no hesitation in saying I believe them to be superior to any other manufactured in the State.
L. CARLSSEN, Sup't Alta Mining Co. No. 2.

The SPERM OIL furnished to these Mills is worthy the particular attention of ALL who use OIL for lubricating purposes.

Proprietors of Sawmills, Gristmills, Steamboats, and other Machinery, throughout the State, supplied in quantities to suit, and quality guaranteed in all cases.
STANFORD BROTHERS,
PACIFIC OIL AND CAMPHENE WORKS
v9-4 46 Front street, corner California.

FLOURING AND GRAIN MILLS.
Livingston's, Butler's and Ross' Patent Mills
From twenty to thirty-six inches diameter.

CLARK'S FRENCH BURR STONE CYLINDER MILLS, with the Bolting apparatus combined, being very compact and very desirable, requiring but very small power.
ALSO,
Bark Mills, Smut Machines,
BOLTING CLOTH and SCREEN WIRE.
For sale by BRYANT & CO.,
9v4 3m 68 Battery street.

New Seeds.

FINE LAWTON BLACKBERRY, very choice; the *only* lot imported.
New Melons, comprising, Hybrid Persian, Green Flesh, Bromham Hall, Trentham Hall, Hammond's Green Flesh, Honfleur Persian, Hybrid Persian, Yellow Flesh Hybrid, Webber's Golden Beechwood.
Cucumbers—Walker's Rambler, Manchester Prize, etc.
Flower Seeds—New Balsams, German Asters, Pansies, Picotees, Verbenas, and other choice Seeds, fresh and pure.
One case Fruit and Ornamental Tree Seeds, containing all the choicest Tree Seeds that can be obtained in this country or Europe: Pear, Quince, Apple, and other Fruit Tree Seeds.
Orders will be filled in rotation. WARREN & CO.,
2 California Farmer office 130 Washington st.

Sugar Beet and Chinese Sugar-Cane.

A FINE Invoice of Seed of the above, just received and for sale at our office.
WARREN & CO.

The Leonardi Cauliflower.

THIS famed Cauliflower has already astonished every grower of this species of the Brassica tribe, and specimens have been shown, having grown from twenty to thirty pounds each. The seed is rare, and the price, now, for a quarter pound package is $5. WARREN & CO.,
1 130 Washington street (up stairs).

Landscape Gardener.

THE undersigned offers his services as a Landscape Gardener. Designs made for Parks, Lawns, Carriage Drives, and fine Garden Plats, in the latest style of Gardening, for city or country.

[For the California Farmer.]

The Demands of Agriculture in California. No. 3.

EDITORS FARMER: Admit that we want both Scientific and Practical teaching in Agriculture, and we naturally inquire what are the best means by which we may obtain the necessary information.

It has been suggested that Agricultural Chemistry, including of course the principles of Vegetable Physiology, should be taught at our common schools. The idea is a good one. Even if the teachers themselves are not acquainted with *the application* of such scientific knowledge, it would qualify the students for understanding lectures from men who combined practical skill with a more thorough knowledge of the subjects on which they might afterwards be addressed, and would form an excellent preparatory education for students at an Agricultural College. All the Sciences have a technical phraseology, which, however unnecessary and crabbed it may appear to those who have not studied them, is a key which fits so nicely into the intricate wards of the lock by which every one of them is shut out from the view of the uninquiring, that although it may be picked by other means, it cannot be done without considerable more trouble, and frequently only after repeated trials. To train the youthful mind to comprehend fully this peculiar phraseology in the sciences more particularly connected with Agriculture, would of itself be a great matter. The future instructor would find his pupils prepared to understand him without the necessity of using unnecessary circumlocution, and could in consequence convey his instruction with more ease, and more completely. But more than this might be taught. The principles of Chemistry as a science have nothing to do with its application in any of the arts, although its aid in the present advanced state of Agriculture renders a knowledge of its primary truths indispensable. The schoolmaster might teach the connection between them, and give lessons in regard to the general application of such information in agricultural practice, though unqualified to enter into particulars.

To enable the teachers of schools to do so, it has been proposed that the State Agricultural Society ought to offer a liberal premium for an initiatory treatise, as a class book for the boys; and there is no denying, owing to the peculiarities of our climate, to be of any service that something different from those used in the other States is wanted. The only difficulty in the way is getting the Society to expend a sufficient sum to induce a man of talent to write for them, for the mere chance that the premium might be awarded to him. Both for the sake of economy, and also, as I believe, for the purpose of procuring a more complete treatise, I would suggest that the Society should *select* some one in whom the people have confidence, making a regular bargain with him beforehand to furnish a suitable work for a certain stipulated amount.

Modern times cannot show a more masterly series of scientific productions than the Bridgewater Treatises, which were written under similar conditions. The Earl of Bridgewater (a somewhat eccentric English clergyman, I believe), bequeathed the princely sum of forty thousand dollars, to be given by his literary executors to the writer of a treatise on the Existence and Attributes of the Deity as deducible from Science and Nature, having especial reference to the human hand. Those executors, who were high dignitaries of the Church, considered, as most sensible men would do, that the sum was unnecessarily large to be given to any one individual, and consequently divided the subject into eight divisions, *selecting for their purpose* eight of the most distinguished scientific writers of Great Britain. Thus each was allowed the sum of five thousand dollars, and had besides the entire copyright of his production, which in most cases, it is probable, brought each of the several authors as much more. I do not quote this as an instance of the advantage of giving an extravagant remuneration, but for the purpose of showing that it proves convincingly that a really valuable work is more likely to be obtained by the selection of a properly qualified person, than by making such a subject as the treatise we want the object of competition.

So far the first step may be accomplished in a creditable manner; but many people are too old to go literally to school. What shall we do with them? I answer, what is done in other places. Let the importance of such information be fully understood and appreciated, and we have no reason to suppose there would be any want of competent lecturers, who, by going from place to place, could deliver in each a course of interesting addresses, which would be as profitable to their hearers as they would be agreeable, and the stigma attaching to farmers, of being the only class in the community who do not keep up with the times, be thus removed. Only look at the way in which the conductors of the Mechanics' Institute manage their matters in San Francisc. If the scope of the Agricultural Society's duties includes a wider range, that is no reason why they should not direct their attention to an object of such vital importance.

But the chief object which we ought to have in view is the establishment of an Agricultural College. In some respects we fall behind no State in the Union, why should we do so in this? Every Atlantic Mail brings us the news of what is being done in other States to promote Agriculture, and the growing conviction among intelligent agriculturists of the necessity of such institutions for its proper development. If the reasons which I have adduced are correct, my arguments should not be disregarded. I am sincere about what I have written, and firmly believe that no where is such an institution so much wanted as here. AGRICOLA.

MILLERTON, March 1st, 1858.

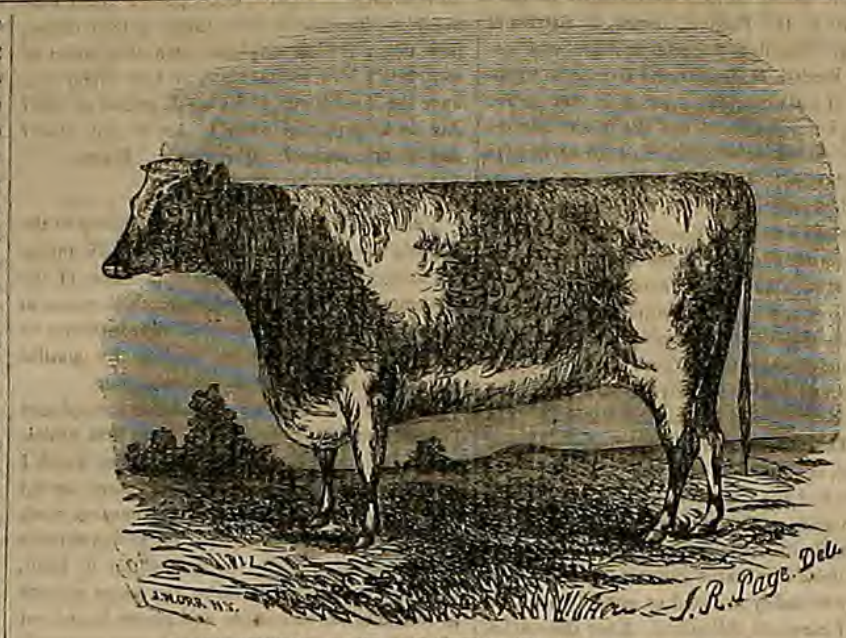
[For the California Farmer.]

Carolina Sweet Potato.

EDITORS FARMER: In compliance with your request, I take this opportunity to give my experience in the cultivation of the Carolina Sweet Potato—the only kind I ever saw growing. I will first state our manner of raising them in New Jersey, where, the soil being sandy and not very rich, we prepared it by plowing and harrowing; then, with a one-horse plow, threw out furrows, two feet apart, across the patch each way, and at their intersection placed a shovel full of well rotted compost, upon which the earth was drawn with a hoe, thus forming small conical hills, about a foot high, touching each other at their base. For seed we selected in the fall, potatoes from an inch to an inch and a half in diameter, which, being dried, were placed in a box with dry sand, in a part of the house where they would not freeze. In the spring most of them would be sound. Then about the middle of April we prepared a hot-bed, by making a frame and putting in it about a foot of manure from the horse stables, over which we put three inches of earth. In a few days, the excess of heat having gone off, the potatoes were laid on the bed near together, but not touching, and covered with about two inches of earth. During the first part of May, the sets being up about three inches high, they were pulled from the potato, without taking it up, and transplanted in the hills, a half pint or more of water being poured on each plant after setting. After that they were worked with a one-horse plow, which cut away part of the hill, and was followed by the hoe, to clear the weeds from around the plant and draw fresh earth to the hills. Throwing the vines over to avoid the plow, kept them from taking root. We dug them immediately after the first frost, and put in heaps in the field, and covered with earth until ready to store for winter, or ship to market. With regard to keeping them, there, with some persons they nearly always rotted, others were generally successful.

Now for their cultivation in California. On coming to this country, and seeing the large Sweet Potatoes or Yams in market, from Sacramento and the Islands, I thought to enjoy an article of diet that we delighted in at home; but every trial of them was a disappointment, they being watery instead of dry and sweet like those of New Jersey; so I concluded to send there for seed, and in the spring of '56 received several pounds, only two potatoes of which I succeeded in sprouting. To see which was best adapted to this section of the country, I planted some of the Sacramento and Tombez varieties with them. Those from Sacramento would not grow here, the sets remaining about the same all summer, making neither top nor root; the Tombez variety grew, and in the fall had some small-sized tubers on them, but being at the end of long roots, deep in the earth, it was more than they were worth to dig them; but the Carolina variety delighted me with good tubers in a bunch near the surface, and proved on digging to be equal to their parents at home. But having that summer an excess of business on hand, the potatoes were neglected, and the gophers and weeds made bad work amongst them, leaving me but few pounds in the fall for seed. I put seven pounds of them in a box with dry chaff, and they all kept perfectly sound until the spring of '57, when, on the third day of March, I made a hot-bed by piling manure about a foot thick on the ground, and putting on it a frame, in which I put about three inches of good soil; on the sixth I laid the potatoes on the bed, and covered them with two inches of earth; on the seventeenth they began to come up, and on the 25th of March I put some out in hills; but, the soil being too cold, they did not do well. After that, the earth being too dry for throwing in ridges, I waited until the middle of May, when giving up all hopes of more rain, I planted them on the level ground, about two feet apart in the rows, which were about three feet from each other, giving each plant a little water at setting. I dug the crop on the 13th of November, after the vines were killed by frost; those planted in May producing about two pounds per hill; each hill yielding about the same. I heaped them in the patch and covered them with earth, where they remained until the 24th, when, finding they were heating, I took them to the house and piled them on the loft floor, where they have remained ever since without covering, and are now as good and sound as when first dug. I am now preparing hot-beds and putting them out, and intend planting about thirteen acres this summer, and will be able to furnish seed, and give more definite information concerning their culture, yield, &c., next fall. Your friend, ISAAC B. RUMFORD.

OAKLAND, Alameda County, March 7, 1858.



SHORTHORN COW AGATHA (TAKEN AT ONE YEAR OLD).

Illustrated in the second volume, A. H. B., and in other works. Roan, bred by and property of Harness Renick, Circleville, Ohio. Calved in March, 1854. Sired by imported Adam (197). Dam Alice, by Prince Charles 2d (860); g. dam Lucy, by imported Prince Charles (2461); gr. g. dam Poppy, by imported Rantipole (5478); gr. gr. g. dam Blossom, imported by the Ohio Company in 1834, by Fitz, Favorite (1042), &c., &c.

Live and Dressed Weight of Animals.

You will greatly oblige farmers by publishing the following Rules, says a writer in the Ohio Cultivator, relating to weights and prices of stock; they are so plain that every farmer can understand them. I have frequently given them to drovers and stock buyers, and they have used them ever after. They will be worth to such more than a year's subscription.

1st. For finding the net weight of stock, etc., where one-fourth is taken out, or allowed for tare.

RULE.—Multiply the gross weight by the decimal 8 tenths, and the product will be the net weight.

EXAMPLE.—Suppose a farmer has a hog that weighs 345 gross, how much will he weigh net? $345 \times .8 = 276.0$. *Ans.*

2d. To find the gross weight, having the net weight.

RULE.—Divide the net weight by the decimal 8 tenths, and the quotient will be the original gross weight.

EXAMPLE.—What is the gross weight of a hog that weighs 345 pounds net? $345 \div .8 = 431\frac{1}{4}$. *Ans.*

3d. To find the price per hundred net, where the price per hundred gross is given.

RULE.—Divide the price per hundred gross by the decimal 8 tenths, and the quotient will be the price per hundred net, and *vice versa*.

EXAMPLE.—How much per hundred net will a farmer get for his hogs, who sells them for three dollars and forty cents per hundred gross? $3.40 \div .8 = \$4.25$. *Ans.*

Thus it will be seen that $3.40 gross, is the same as $4.25 net. The reasons for these are obvious, comment is therefore unnecessary.

COLD WATER TO CURE SCALDS.—I placed a large tub full of cold water, with plenty of ice in it, by the side of a large kettle full of water, which was boiling very fast. I then rolled up my sleeve above the elbow, and thrust it into the water and ice until my arm was cold, then I thrust it into the kettle of boiling water up to the elbow, then immediately back into the tub of ice water, letting it remain a few seconds, then into boiling water again, repeating this process ten times in a minute, without injury or inconvenience, not even making my arm look red. From this experiment I suggested the propriety of using cold water baths instantly after being scalded. I have practiced the above remedy with entire success during the last ten years. Cold water is always handy where there is hot water. The sooner cold water is applied after scalding, the surer will be the cure.

NEW ADVERTISEMENTS.—Please see the valuable cards of business in our columns this week; they are important, embracing many branches of business that affect the welfare of California.

The United States Agricultural Society.

THE following report of this Society's Annual Meeting will be read with interest, as it embraces many important subjects; among these the subject of grants of land by the National Government to Agricultural Colleges; the interesting result of the great trial of Agricultural Implements; the resignation of President Wilder, and the deaths of distinguished patrons of Agricultural science:

The Sixth Annual Meeting of the United States Agricultural Society was held in pursuance of appointment at Washington, 13th January, Mr. WILDER, the President, taking the Chair, and about seventy members being in attendance, representing nineteen States. The opening address by President W. was appropriate—congratulatory to the Society, and referring in terms of commendation to the increased disposition on the part of the general government to pay attention to the claims and interests of Farmers—mentioning the satisfactory results of the Syracuse Trial and the Louisville Show—alluding to the loss sustained by the death of two of the Society's Vice Presidents, Messrs. G. W. P. Custis of Virginia, and T. J. Rusk of Texas—declining, for himself, a third time, re-election as President, having six years discharged the duties of the office at much personal sacrifice, and in conclusion, briefly reviewing the good influences exerted by the association, and the benefits to be derived by the country from perfected systems of husbandry,

"Till plenty, rising from the encouraged plow,
Shall fill, enrich, adorn, our happy land."

Mr. B. O. Taylor of the District of Columbia, responded, expressing his regret at the proposed withdrawal of Mr. Wilder from the presidency, and complimenting the energy, fidelity, and dignity with which he had adorned the position, and, after some further remarks,

Committees on Nominations and the Treasurer's accounts, were appointed as usual. The subject of Mr. Morrill's Bill, donating lands to Agricultural Institutions, was referred to a committee of five, and it was voted that the committee on obtaining from Congress an act of organization for the Society, should renew their application for this purpose. In answer to a call from the chair,

Mr. H. F. French, of New Hampshire, made some remarks on the recent visit made by him to Europe, in which he acted as a delegate of the Society to several Agricultural Exhibitions. He discussed especially the subject of plowing by steam, replying to various interrogatories from different members, and was followed by

Col. B. P. Johnson of New York, on the same subject, alluding also to Evans' Rotary Digger as an American machine of much promise, and concluding with a communication from Gov. King, excusing himself from further continuance as one of the Society's officers. The Chair, after acknowledging the services renderd by Mr. K., continued the subject of the steam plow, on which he was followed by Messrs. Joshua Pierce of the District of Columbia, and Simon Brown of Mass.

The Chair announced the committee on the subject of Mr. Morrill's bill to be Messrs. Johnson of New York, Tilghman of Maryland, Loring of Massachusetts, Taylor of District of Columbia, and Arney of Kansas.

Dr. Antisel was then introduced, and proceeded to address the Society on "the necessity of having a more perfect knowledge of the mineral necessities of our crops developed," and concluding with the recommendation of an appropriation for suitable experiments. Mr. Calvert, of Maryland, spoke warmly in approval of Dr. Antisel's paper, and offered a resolution which was passed, appointing a committee to memorialize Congress for a specific appropriation to carry out the investitions proposed.

The Chair announced the awards to the reapers and mowers at Syracuse, as follows:

Mowers.—First premium—Gold Medal and Diploma—To Ball, Aultman & Co., of Canton, Ohio—Miller & Aultman's patent.

Second premium—Silver Medal—To Walter A. Wood, of Hoosick Falls, N. Y.—Manny's patent, with Wood's improvement.

Third premium—Bronze Medal—To Martin Hallenbeck, of Albany, N. Y.

Diplomas awarded as follows:

To T. D. Burrall of Geneva, N. Y., for simplicity of construction and solidity of workmanship.

To R. L. Allen of New York, for concave knife-blade, and general excellence of material and superior workmanship.

To Buffalo Agricultural Machine Works, Buffalo, N. Y., for cheapness and ingenious adaptation of cutter to uneven surfaces.

Reapers.—First premium—Gold Medal and Diploma—To C. H. McCormick, of Chicago, Ill.

Second premium—Silver Medal—To Walter A. Wood, of Hoosick Falls, N. Y.—Manny's patent with Wood's improvement.

Third premium—Bronze Medal—To Warder, Brokaw & Child, of Springfield, Ohio.

Diploma to Jonathan Haines, of Pekin, Ill., for Illinois Harvester.

Combined Machines.—First premium—Gold Medal and Diploma—To Walter A. Wood of Hoosick Falls, N. Y.—Manny's patent with Wood's improvement.

Second premium—Silver Medal—To Buffalo Agricultural Works, Buffalo, N. Y.—Kirby's improvement.

Third premium—Bronze Medal—To Warder, Brokaw & Child, of Springfield, Ohio.

Transferable Automaton Rakes.—First premium—Bronze Medal—To Seymour & Morgan, of Brockport, N. Y.

Stationary Hay or Cotton Press.—First premium—Silver Medal and Diploma—To William Deering and Co., of Albany, N. Y.

Portable Hay or Cotton Press.—First premium—Silver Medal and Diploma—To William Deering & Co.

Grain Cradles.—First premium—Bronze Medal—To H. Robinson.

Scythe Snaths.—First premium—Bronze Medal—To Frost, Burke & Co.

The first day was brought to a close by resolutions in reference to the deaths of Messrs. Rusk and Custis, offered, after an appropriate address, by Dr. Loring of Mass.

The second day a communication was received from Joshua Vansant, President of the Maryland Institute, inviting the Society to hold its next show at Baltimore. A favorable report was presented by D. Jay Browne, from a committee appointed last year to investigate the merits of the Chinese Sugar-Cane, and a long debate on the subject took place. A medal was awarded to Joseph S. Lovering of Philadelphia, for experiments and samples of sugar made by him. Resolutions in favor of Mr. Morrill's land bill were reported and adopted. The following list of officers was then brought in by the Nominating Committee and unanimously elected:

President—Gen. Tench Tilghman, of Maryland.

Vice Presidents—J. D. Lang, Maine; H. F. French, New Hampshire; Frederick Holbrook, Vermont; John Brooks, Massachusetts; B. B. Thurston, Rhode Island; S. H. Huntington, Connecticut; B. P. Johnson, New York; W. P. Robeson New Jersey; David Landreth, Pennsylvania; John Jones, Delaware; Odin Bowie, Maryland; Philip St. George Cocke, Virginia; H. K. Burgwyn, North Carolina; F. W. Alston, South Carolina; Richard Peters, Georgia; C. C. Clay, jr., Alabama; M. W. Philips, Mississippi; J. B. De Bow, Louisiana; Lucien Buttles, Ohio; W. L. Underwood, Kentucky; T. Fanning, Tennessee; D. P. Holloway, Indiana; H. C. Johns, Illinois; T. R. Barnett, Missouri; A. B. Greenwood, Arkansas; Michael Shoemaker, Michigan; D. L. Yulee, Florida; Guy M. Bryan, Texas; Le Grand Byington, Iowa; B. F. Edgerton, Wisconsn; A. C. Bradford, California; H. M. Rice, Minnesota; J. H. Lane, Oregon; W. W. Corcoran, District of Columbia; M. A. Otero, New Mexico; D. Anderson, Washington Territory; J. M. Bernhisel, Utah; B. B. Chapman, Nebraska; W. F. M. Arny, Kansas.

Executive Committee—Henry Wager, New York; J. McGowan, Pennsylvania; Josiah Ware, Virginia; Frederick Smyth, New Hampshire; Henry Wilson, Ohio; John Merryman, Maryland; James W. Brown, Illinois.

Treasurer—B. B. French, Washington, D. C.

Secretary—Ben. Perley Poore, Newburyport, Massachusetts.

The President, Gen. Tilghman, having taken the chair, closed the exercises of the day with an excellent inaugural address.

Legislative Aid to Agriculture.

WE announce with much pleasure the passage of the bill in our Senate, of $5000, donating that sum annually to the State Agricultural Society for five years. This liberal policy is an evidence that we are having the true interests of the people before our Legislature; and it shows, also, that we have *true Representatives* in our Legislators. All honor to such legislation, say we.

CALIFORNIA MARBLE.—We were presented with a very handsome sample of Marble, from the new veins recently opened by Messrs. Aiken & Co., marble workers, of Sacramento city, who are proprietors of the same. The varieties are pure white, and also finely variegated. There is quantity enough to supply the world. The sample presented us was handsomely polished, showing its character to be most excellent. It can be seen at our office.

EARLY BARLEY.—We were favored with a sight of a stalk of fine Barley, grown on the ranch of J. Beam, Esq., near Sacramento. It was a sample of Barley, of which there are forty acres of the same kind, and it was three to three and a half feet high. It was raised upon land which had been *summer fallowed* the year previous, and this was the *second* or "volunteer crop," and it now gives promise of yielding an enormous crop. When will farmers look carefully to the system of subsoiling and summer fallowing for the grain crops of our State? They must come to it sooner or later.

California Notes.

ABOUT GRASSHOPPERS AND LOCUSTS
In California and the World.

BY ALEXR. S. TAYLOR, OF MONTEREY.

[CONCLUDED.]

The following account is taken from the New Notes on Central America, by E. G. Squier, 1 vol. New York, 1855; from which it will be seen that the *Locusta* of Central America is nearly if not quite identical with that of California. It is a pity that so competent and able a writer as is Squier, should not have made a more detailed history and description of this pest of the countries he speaks of. It should be borne in mind that the uplands or table lands of Honduras assimilate in physical characteristics to the mesas of Guatamala and Mexico, and of the valleys of California, being dry, temperate, and often afflicted with droughts:

"The insect, however, which is *most dreaded* in Honduras, as indeed in all Central America, is the *Langosta*, or *Chapulin*, a species of *Grasshopper* or *Locust*, which, at intervals, afflicts the entire country, passing from one end to the other in vast columns of many millions, literally darkening the air and destroying everything green in their course. I once (in 1853) rode through one of these columns which was fully ten miles in width. Not only did the insects cover the ground, rising in clouds on each side of the mule path as I advanced, but the open pine forest was brown with their myriad bodies, as if the trees had been seared with fire, while the air was filled with them as it is with falling flakes in a snow storm. Their course is always from south to north. They make their first appearance as *Saltones*, of diminutive size, red bodies, and wingless, when they swarm over the ground like ants. At this time vast numbers of them are killed by the natives, who dig long trenches, two or three feet deep, and drive the *Saltones* into them. Unable to leap out, the trench soon becomes half filled with the young insects, when the earth is shoveled back, and they are thus buried and destroyed. They are often driven in this way into the rivers, and drowned. Various expedients are resorted to by the owners of plantations, to prevent the passing columns from alighting. Sulphur is burned in the fields, guns are fired, drums beaten, and every mode of making a noise put in requisition for the purpose. In this mode detached plantations are often saved. But when the columns once alight, no device can avail to rescue them from speedy desolation. In a single hour, the largest maize fields are stripped of their leaves, and only the stems are left to indicate that they once existed.

"It is said that the Chapulin makes its appearance at the end of periods of about fifty years, and that it then prevails for from five to seven years, when it entirely disappears. But its habits have never been studied with care, and I am unprepared to affirm anything in these respects. Its ordinary size is from two and a half to four inches in length, but it sometimes grows to the length of five inches.

"The crops of maize are often destroyed by the *Locusts*, in the course of a few hours. As the visitation is usually general it sometimes results in a great scarcity, bordering on famine, in which case maize advances to as high as four and five, and even ten dollars per bushel. Fortunately the insect seldom attacks the fields which are planted high up on the slopes of the mountains, where the people make their *milpahs* during the periodical visitations of the Chapulin."—Vide pages 188–201.

This statement is consonant with the accounts received from Honduras and Guatamala, of the famine and pestilence of fever in those countries in 1855 and 1856, caused by clouds of Locusts devastating the country, and confirm remarkably, as we have before said, the *naive* and old-fashioned History of Thos. Gage, of the same lands, in 1632. Thousands of people died, in Honduras and Guatamala, in 1855 and 1856, of famine and earthquakes.

MONTEREY, December 1, 1857.—The foregoing notes on the Locusta were mostly compiled in the spring of 1856, but have been withheld from publication for reasons less plentiful than blackberries. They are now offered to the public for what they are worth, with the hope that this *only* Historical Compilation of the Locustæ of California, and of its ancient and modern similitudes, may attract the attention of scientific men of Europe and America, and stimulate to a closer and more careful research into the matter, from books, from new observers, and travelers, and to procure, from *each California under the sun*, specimens of the Locusta preserved in spirits, in the egg, in the grub, and in the perfect animal, so that each variety may be known and figured by naturalists. And this latter method of collection can easily be done by Consuls and Missionaries in foreign countries, or by Medical Officers at military posts.

ADDENDA.—Mr. C. H. Randall of Santa Barbara, in an interesting communication on the Meteorology, etc., of his district, addressed to the Alta California of 8th January, 1858, notices the fact of the appearance of immense swarms of Grasshoppers in the summer of 1857, in the county of Santa Barbara, where they did great injury to growing crops and pastures.

MONTEREY, February 20, 1858.—In reading the travels of Dr. D. Livingston in South Africa—Vide Harper's first N. Y. edition of 1858—that excellent observer makes but a casual and unimportant reference to the *Locusta* of that *California in Africa*. We use this term, because the descriptions of old and new European voyagers of that region make it assimilate most remarkably to the Geognosis of our own State. It has occurred to us, as a most singular fact, that the wealthy and powerful government of Great Britain always, more or less, in trouble of South African wars, have never introduced the camel into their campaigns in that thirsty, desiccated portion of their possessions—one undoubtedly fitted by nature for its propagation and practical use, not only for military purposes, but for commercial traffic and scientific exploration! It would seem from the notes of Livingston, Andersen, and Cummings, that the destructive *teste fly* is an actual bar to interior communication by oxen, and to horses and mules, from scarcity of water, covering immense districts of land. Even the elephant, so abundant in South Africa, seems *never* to have been tamed by the English, Dutch, or natives of the colony. Nor does it seem to have ever occurred to English capitalists and farmers to introduce any of the numerous species of the native ox, sheep, antelope, horse, and the other extraordinarily abundant mammalia of South Africa into the British isles! It is only within a few years that the domestic sheep have been improved to any pecuniary extent in South Africa. Neither have camels or elephants ever been introduced into that other California of Australia, where the physical Geognostics of Palestine and of our own State again duplicate themselves, except as to Zoology and Botany. But there is no doubt that the Fauna and Flora of Australia would take the exotic and indigenous Fauna and Flora of California. There is no doubt, also, that the lama, the vicuna, the guanaca, and the alpaca of Peru and Chile, and the Cashmere goat, and the Rocky Mountain goat, would propagate with facility in California, South Africa, and Australia. The addition of these invaluable animals to our domestic stock may be safely asserted as entirely practicable, and, I may add, felicitous. Even the ostrich could be propagated in our State. In the year 1900, there will be thousands of camels in California, etc.

The world may be assumed to be, throughout its physical extent, as California, and Contra California, i. e., into volcanic earths and alluvial earths.

The California similitudes are the North American countries from the Pacific coast to the eastern boundaries of the great prairies, commencing in the north British possessions, and running by curvings and turnings into the elevated, dry lands of the Central American countries, excepting portions of the thickly-wooded ocean coasts of Mexico and Central America. Also, from Panama, south to Cape Horn, excepting certain regions of New Granada, and Equador. From Cape Horn, it turns, and includes the country up north as far as the Rio de la Plata. The whole remaining eastern coasts of the western hemisphere may be assumed to be alluvial and wooded lands; that is, from the Plata to the Arctic, by all windings and turnings, for an average of 1500 miles inland to the west.

The California of the eastern hemisphere may be assumed to be, all the north and south Mediterranean coasts for three hundred miles inland, the whole of Turkey in Asia, and the countries of the Bible, modern Persia, and the regions of the Indus, and all Central Asia; also, *nearly* all South and East Africa, up to the line; also, the continent of Australia. The remainder of the world may be called washed, deposited, or alluvial tierras—*tierras contra a California*—lands affected or non-affected by the *Locusta*.

This view of things was thrown out by the writer in an article entitled "Volcanic Regions of the Western Continent"—twenty pages foolscap, intended for publication in the National Intelligencer of Washington, but which, by some accident, has been lost, since the date of its mailing, on September 1st, 1851, seven years ago.

Since that period, from reading the numerous accounts of explorers and travelers *despuesdel ano* 1840, we are confirmed in these, our amateur philosophical speculations. It may be a mare's nest with an elephant's egg; and it is well-known that, since February, 1848, many elephants' eggs have been hatched in California, and when the world came to see the little animals blown by winds of heaven, like thistle seeds of Scotia, to every corner of Mother Earth, the simple people were entertained by their pranks and extras; cuddling up lovingly with *a very few*, but with seven-tenths of others inserting cunningly the maggot of a Pandora's box, or a dragon's tooth, in nostrils, eyes, ears, or mouth; making windy speculations, infinite lawsuits, squattings, vigilance committees, sour, quarrelsome, vicious towns and cities, and plunging everything into confusion and social anarchy, until the world's people will learn something of the political, financial, and moral ethics of the California epocha.

In all the physical California of our planet, the *Locusta* scourge; in the rest of the world exist fevers, and harmless congeries of the *Gryllida*. But throughout the moral world of the entire earth the California fever has inoculated man, woman, and child. It will make *everything* in creation, ancient, modern, past, present, and future, come to the *Touchstone of California* to prove if the metal be pure or mixed—of standard fineness, or of unserviceable alloy.

This is our Finis to the *Locusta*. It is a little string of California Grasshopper eggs, to fester thought, and, probably, to hatch into cloudy swarms some new approximations of future truths. We hope that some of these hints may meet the eyes of millionaire Englishmen and Americans, or patient, ingenious, scientific, learned Frenchmen and Germans, who have vast stores of coined and paper moneys, gained from the toil of California's sons, who sent them seven hundred millions *pesos duros* of gold, and added so immensely to all the cabinet, museum, and literary collections of governments, colleges, and institutes; also raised the value of all lands and merchandise throughout the civilized world; commencing from ten years—a single decade—ante this very 20th of February, A. D., 1848. Yes, just ten years ago, there was *no* Gold from California, nor Australia! If the first decade of her existence has given the world the yellow fever, the next ten years we may be under the necessity to salivate them with our stores of mercury. After that, they may be silvered with the plata of Gadsonia, and when this has well struck in, possibly to harden the faces of the world with copper, or braze them with brass, or dust them with bronze.

Well, the thesis is this: gold was found in grains at Sutter's Mill, in February, 1848. Now, in February, 1858, how many golden geese, how many golden fleeces, how many golden calves, how many golden elephants can they count of usufructa? how much more, or how much less, have the inhabitants of the earth gained or lost? Are we as happy as before? Are we any wiser? Are we any worse? *Quien sabe.* FINIS.

REMARKS.

THE substance of this California History of the Locusta was commenced in the fall of 1855, during the excitement caused by the appearance of the Grasshopper Plague of that year, which seems to have simultaneously visited all the countries of the northern hemisphere, affected by similar physical characteristics as our own State.

As the work advanced, it assumed a shape and form of more importance than I at first anticipated. In consulting many authorities, which I have been careful to note, and still more careful to punctuate localities, dates, and times—a work of great difficulty and labor—I found *no* reference to any special authority on the subject in hand, and have endeavored to make the notes answer as reference for all seasons and places, in and out of California. Possibly the work may be useful, in a popular sense, to fix the public mind of our Pacific territories on the importance of more careful observations and investigations at the next appearance of the Locusta in these countries. It may be my privilege to have proposed some useful suggestions to scientific Americans in the Atlantic States, or to Naturalists and officers of government in Europe, having the means and advantages of making a world-wide collection of the Locusta; and more carefully to observe, study, analyze, and perfect the knowledge of this scourge of the human race.

The work, of course, contains many imperfections, but, as Napoleon *primera* said, that no book could be made without great faults of vacancies and of fillings, I rest content that it is as good as could be expected for such a note maker as myself.

When I think of the pleasure it gave me, for two California years, to read and observe about this matter, instead of meddling myself with other people's business, it seems to me time better spent than that of many others who blowed all the common sense out of their heads by trying to make themselves, without knowing how, very rich or very great, in a hurry; or, eating their hearts or brains out with absurd excitements and passions, showing them ridiculous in their own eyes, and making modern nonsense more inflated and incongruous than ancient silliness, confusion, and ambiguity.

And the compiler would say to those engaged in investigations on the subject of these notes, that he would take it as a favor, the transmission, to his address, of any review of the work, or of subsequent acquisitions of new facts relating to the Locusta.

MONTEREY, California, March 1, 1858.

SEA SAND AS A MANURE.—The value of this article as a dressing for land, has not been sufficiently tested in this country. In the West of England a calcareous sand from the shore is a good deal used by the farmers living near tide water, for mixing with their stable manure. It is dragged for in Plymouth harbor, in three to six fathoms of water, put into large scows or barges, and taken up the creeks and rivers where it is wanted for use. In summer, the barges frequently run on the sand bank in White Sand Bay, at two hours before low water mark; when the tide leaves them, they load, waiting for the flood to bring them off. For arable land the sand is thought to be the best mixed with old earth or manure collected in the roads; but for pasture, it is best mixed with stable muck. The proportion is two loads of muck to one of sand.

The sea teems with animal life, not only fishes, but animalculæ too small for observation. It is not improbable that the sand and mud taken from its waters are strongly charged with animal matter, and that this is one source of their fertilizing influence. Sand banks are not unfrequently thickly peopled with clams, quahaugs, muscles, scollops, and other shell-fish. Broken fragments of other shells are intimately mingled with the sand, and form a considerable part of its bulk. Both lime and animal matter must exist in these clam banks, to a considerable extent, and would form good material for the compost heap, or for top dressing clay, or muck lands.

A single instance of the use of sea sand for dressing has come under our observation. A gentleman in one of our seaports had access to sand removed by a steam-dredging machine from the harbor, for the purpose of deepening the channel. He carted several hundred loads upon a part of his garden, covering it two or three inches thick, and mixing it thoroughly with the soil. The result of the dressing was a great increase in its fertility. The yield of carrots, cabbages, squashes, and other vegetables, was enormous; and the pear trees planted in this part of the garden made wood very rapidly, and produced the finest fruit.—[American Agriculturist.

FEEDING BEES.—The Chinese sugar-cane would probably prove a valuable article to feed bees upon during the winter. The stalks might be cut into thin slices, and laid where the bees could get at them, as in the feeding boxes of the Gilmore houses; and it is likely it would prove a great saving of honey. Would it not be well to try it?

What of the Immigration Society?

EDITORS FARMER: I saw in your paper during the summer, or spring, an account of the re-organization of the society above named, in your city. Though much may have been said and written upon the subject, it is linked with interests of sufficient importance, to bear many speeches and essays, before the subject can be exhausted, or before it should lose its hold upon the public mind.

As I have not seen what has been written, or heard what has been said in relation to the subject, I fear I may but repeat much that has been long known. In this, as well as in other great public interests, it is necessary to enlist the masses, to arouse them to united and persevering action. Yes, to *action*, that should now be the watchword. Talking and writing, thinking and hoping, are all very well, but they will not do the work. No, no. Those who wish to see the plans and provisions of this society carried out, to the fullest extent, must put their shoulders to the wheel and give it a start. They must also put their hands in their pockets and afford it material aid. Men qualified for the work must be found; men who have a wide range of thought, and who can grasp, wield, and control, the vast interests, issues and influences connected with it. There is work to be done. Much earnest and hopeful labor must be expended. Immigration in its incipient stages commencing in thousands of dwellings in almost every land, like the mountain springs sending forth their sparkling rills, that, in their winding way, become the brook, the river, and ultimately fill the ocean; so these families, severed from their old homes, will form the neighborhood, the state, the nation. The time has been, when the masses emigrating from Europe, supposed, that if they came to America, they would be in the immediate vicinity of all of their old friends. They had no conception of the extent of the country, its resources, its vast possessions, and its growing importance. Now, through the press they have learned *something* of the people, and the sections of country they inhabit. Farmers in the "Old Country," now examine the localities, with all the light within their reach, and many before leaving their native land make up their minds where their future home shall be reared. Mechanics and citizens will do the same, and settle in a section of country, they believe to be the best adapted to their means, taste, employment and individual interests.

Now, if your society effects anything worthy of the State and people of California, it must take *high ground*, and act in systematic and harmonious concert. It should seek to enlighten the masses, in relation to the resources and capabilities of the soil, and hold out sufficient inducements to the immigrants to encourage them to seek their home in your midst. In order to accomplish this, there must be work done. One of the very first moves made in the matter, it strikes me, should be, to settle, beyond all peradventure, the conflicting land-titles, that all public or private lands proposed to be sold, to the new comer, should have a clear and indisputable title, the same as in other new States. Should not the people of California take such action in the premises as the importance of the subject demands? After this work is completed, your society will, or should be, ready to act, and not till then. For how can Californians invite friends and strangers six or ten thousand miles off, to break up old homes, and come to their shores and buy their lands, while they are uncertain whether they own them or not, or whether one or more parties have claims upon them. Depend upon it, as long as this state of uncertainty exists, the prosperity of the state will be greatly retarded; it will discourage internal improvements, ultimately block up nearly every channel of trade, and paralyze public and private enterprise. Cut, then, I pray you, the gordion knot that has so long trammeled you, by its multiform ramifications,

I noticed that your Society proposed to have auxiliaries formed in each county; this is right. But the object of these auxiliaries should not be to spread information at home merely, or in California. But through the parent society they should diffuse the light that may be gathered in each special locality. They should ascertain the number of acres of land that may be improved; the nature of the soil, and its product; whether best adapted to farming or grazing. If there be iron ore, to what extent may it be found? What are the facilities for working it? Are there coal fields, if so can the coal be easily conveyed to market? What are the varieties of marble to be found and what the probable expense of getting it to market. It may be sent round the Horn as ballast at trifling expense, and that from Eldorado county is surely as fine as any brought from Egypt or Italy.

Information pertaining to these various items should be sought, sent to the parent Society, there classified and properly arranged, then sent here, where there should be a weekly paper established as its organ, and fifty or one hundred thousand copies should be circulated through our whole country, and editions in the German, French, and other European languages should be extensively circulated in those countries. It will not do to send out a rickety, sickly pamphlet, written in a prosy, sleepy, *weakly* style, and even this, poor as it is, to be doled out in homepathic doses, once every leap year. Instead of this policy the truths relating to California should be kept constantly before the world. They are as bright as the glowing furnace itself. Get the truth and facts connected with your State before the world, and your work will be well commenced.

Plans for forming emigration companies should be suggested. Farmers, miners, mechanics, graziers, and men engaged in every department of human industry, with the aid of these facts can determine before leaving their old homes where they will locate, and can tell the cost from their own doors to the place of their destination.

All of these necessary steps and others that will readily suggest themselves should be at once taken. Still there will be more work to be done before you can hope for any considerable addition to your population. There must be a safe, easy, rapid and cheap way of getting there. The old steamship companies have been in the field ten years, and what have they done to induce a large population to settle in your midst! The line of steamers started by Capt. Randall, mentioned in my last letter, is just what California needs and must have, and the wonder is that those whose best interests would be greatly and permanently promoted by it, should be so tardy, that they should be willing to pay enough monthly to foreign companies to build and furnish one of the steamers of the new line. In other words, Californians, since the first of January, 1857, *have paid money enough to the old companies to build and furnish six or seven Steamships capable of carrying three thousand passengers each.* The money has gone from your State, and you are that much poorer. Let those interested in this new company, also take an active part in promoting the Immigration Society. They will materially benefit each other. The ships will carry *all* you can induce to go from the East, and the Society can secure as many to settle there as they can well carry. No one can fail to see, if we are to judge from the past and the present, that in less than three years from the time these steamers start, a weekly line will be called for. In five years steamers will leave New York and San Francisco semi-weekly, the tendency of cheap fare always being to increase travel more than ten-fold.

Again, I say, the Immigration Society should be *wide awake*; an immense emigration from Europe may be expected next season. Do you wish to secure any portion of it, or do you not? If you wish it, what are you willing to do, to secure it, and when and where will you begin?

If I mistake not, this or a similar company some years since, endeavored to make an arrangement with the steamship companies to bring to your State, those wishing to come, at rates much lower than those established by the companies. I understood that they agreed to carry all that the Society would send them, *provided they would pay them their regular price*, not without, oh no! How *kind they were!* how *very, very* anxious to benefit the State.

The Society, it is true, was yet young, but it felt able to battle against all opposition, to surmount any difficulty, to overthrow any obstacle, and with a giant's power, scatter all the combined machinations against its onward and triumphant march. But under the bland influences of such unheard-of kindness, and such marvelous condescension, it *wilted* like Jonah's Gourd in the night, and where is it now? May the present one, rising from its ashes, phenix like, be able to grapple with all the combined elements of opposition and sway the hearts of the people in its favor. With this new line this organization can act. Indeed the interests of *the two are inseparable*, and must go hand in hand. I hope for the good of the State, for the sake of private and public interests, for the sake of a brilliant future, that Californians will view this matter in its proper light, and act in accordance thereto, with promptness and efficiency. B.

A Chance for California Boys.

HERE'S an example worthy of imitation, and we ask particular attention to it, and hope before the year is out to be able to lay before the readers of the FARMER some noble example of the "Boys of California:

A Good Day's Work for a Boy.—A correspondent at Pleasant Ridge, Rock Island county, Illinois, whose farm we had the pleasure of visiting last summer, writes to us, says the Country Gentleman, as follows:

My son, the plow-boy, whom you will remember to have seen breaking up the prairie sod with one pair of horses at the rate of nine acres per week, wishes me to tell you, that the summer before he was fourteen years old, he broke eighteen acres of prairie in eleven days, with the same plow and team he had when you saw him. Also one month before he was fourteen years old, he milked six cows before breakfast. Then with our hired man and his team, drove two miles into a neighbor's wheat-field; there he met two men and team, and one man to stack. The wheat was heavy, yielding thirty bushels per acre, and bound in large double-banded sheaves. He pitched on ten loads of 240 sheaves each, and went three-quarters of a mile for water; then one and a half miles to dinner. In the afternoon pitched on nine more loads, and one load on to a high stack, and reached home before sundown and milked his six cows—making eight and a half miles travel out of the field, and pitching on 4800 sheaves, weighing ten pounds each, equal to twenty-four tuns, and milking twelve cows between sun.

OIL!

FOR QUARTZ MILLS.

STANFORD BROTHERS,

PACIFIC OIL AND CAMPHENE WORKS,

INVITE attention to the following Certificates from GRASS VALLEY:

NEW-ENGLAND QUARTZ LEAD, Dec. 23, 1857.

W. LOUTZENHEISER, Agent of Stanford Brothers, Pacific Oil and Camphene Works:

Dear Sir: I have now given those Oils from Stanford Brothers, which I purchased from you, a fair trial, and find them the VERY BEST I have ever used.

Z. WHEELER, Superintendent.

ALISON RANCH, Dec. 25, 1857.

This is to certify, that we have been using the Oils from Stanford Brothers Pacific Oil and Camphene works, for a long time, and find them of a superior quality.

JOHN ANDERSON, First Engineer.

ALTA HILL, Jan. 12, 1858.

I hereby certify, that we are now using on our Machinery, Oils manufactured by Stanford Brothers' Pacific Oil and Camphene works, purchased at their Agency in Grass Valley, and have no hesitation in saying I believe them to be superior to any other manufactured in the State.

L. CARLSSEN, Sup't Alta Mining Co. No. 2.

The SPERM OIL furnished to these Mills is worthy the particular attention of ALL who use OIL for lubricating purposes.

Proprietors of Sawmills, Gristmills, Steamboats, and other Machinery, throughout the State, supplied in quantities to suit, and quality guaranteed in all cases.

STANFORD BROTHERS,

PACIFIC OIL AND CAMPHENE WORKS

Miscellany.

I'M ALONE.

I look around, and feel the awe
Of one who walks alone
Among the wrecks of former days,
In mournful ruin strewn.

I start to hear the stirring sounds
Among the distant trees;
The voice of the departed
Is borne upon the breeze.

The melody of early spring,
The trembling notes of birds,
Can never be so dear to me
As her remember'd words.

I sometimes dream her pleasant smiles
Still on me sweetly fall;
Her tones of love I fondly hear
My name in sadness call.

I know that she is happy,
With angels' bright garments on;
But my heart is sad and desolate,
To think I am alone.

February, 1858. J. Q. A. W.

CATAWBA WINE.

BY HENRY W. LONGFELLOW.

This song of mine
Is a Song of the Vine,
To be sung by the glowing embers
Of wayside inns,
When the rain begins
To darken the drear Novembers.

It is not a song
Of the Scuppernong,
From warm Carolinian valleys,—
Nor the Isabel
And the Muscatel
That bask in our garden alleys,—

Nor the red Mustang,
Whose clusters hang
O'er the waves of the Colorado,
And the fiery flood
Of whose purple blood
Has a dash of Spanish bravado.

For the richest and best
Is the wine of the West,
That grows by the Beautiful River;
Whose sweet perfume
Fills all the room
With a benison on the giver.

And as hollow trees
Are the haunts of bees
Forever going and coming,
So this crystal hive
Is all alive
With a swarming and buzzing and humming.

Very good in their way
Are the Verzenay,
And the Sillery soft and creamy;
But Catawba wine
Has a taste more divine,
More dulcet, delicious, and dreamy.

There grows no vine
By the haunted Rhine,
By Danube or Guadalquivir,
Nor on island or cape,
That bears such a grape
As grows by the Beautiful River.

Drugged is their juice
For foreign use,
When shipped o'er the reeling Atlantic,
To rack our brains
With the fever pains
That have driven the Old World frantic.

To the sewers and sinks
With all such drinks,
And after them tumble the mixer!
For a poison malign
Is such Borgia wine,
Or at best but a Devil's Elixir.

While pure as a spring
Is the wine I sing,
And to praise it, one needs but name it;
For Catawba wine
Has need of no sign,
No tavern-bush to proclaim it.

And this Song of the Vine,
This greeting of mine,
The winds and the birds shall deliver
To the Queen of the West,
In her garlands dressed,
On the banks of the Beautiful River.

[Atlantic Monthly.

Success and Failure in Life.

BY REV. H. W. BEECHER.

Lecture before the Mercantile Library Association of Portland, Maine—Reported for the Transcript.

Mr. Beecher drew out an immense crowd, Deering Hall being filled to its utmost capacity. It was the best audience of the season, and quite recalled the most prosperous times of the lecture system.

Mr. Beecher's lecture was a vigorous production, and was delivered in his usual vehement and dramatic style. It was full of strong, practical thoughts enforced by beautiful illustrations and pungent wit. The style was more forcible than elegant. Mr. Beecher thunders out his thoughts without much regard to rhetorical niceties.

No other creature, he said, was so apt to lose his way as man. He is master of all, yet requires more training than any other. The lion, although he has no training, never misses lionhood. So birds at their commencement aim at the very things they were intended for. Even the bee and the ant carry each its whole self with it from the beginning. In the animal, as in the plant, the whole branch is wrapped in the bud, and growing only is necessary for its development. But mere growing never makes a man. He needs training that ends in character. Those animals which reach their full powers at once, are lowest, those which are furthest from their education at the beginning, are highest. The worm matures in a few hours, but man begins as a babe at zero, and has a long journey up to his object and end. He carries with him a whole regiment of faculties, whose united action is necessary to his highest development. An undeveloped man is not a man, any more than an acorn is an oak. More than ninety per cent of human life is wasted. One half of those born die in the cradle. Joy comes when the cradle is rocked, sorrow when it stands still. Of the residue, one half scarce reach their majority, and yet this is not the worst. The waste is not so much in those that die as in those that live. We are impressed with the achievements of the world, in the arts and sciences, but we forget that the present has its root in the past. All ages have acted for ours. The old Greek brain is thinking still; the old Hebrew heart is throbbing yet. If we look at mankind generally, how many drones we shall see. How many are born that do not live; how many live that do not ripen, how many ripen that are not worth the plucking!

Before looking at the causes of success and failure in life, let us define what is failure, and what success. Man is not to be judged by externals, but by that which is within; not by what he *is*. Success in a man's business is not always true success, for our avocations are but highways along which we travel to our heart purposes Secular life is secondary to moral and social life—that man only succeds whose soul blossoms. And many men's souls blossom through misfortunes. As the vine, when it grows unpruned, reaches high, but bears no fruit, and when kept low by pruning, gives ruddy clusters, so some men bear fruit only when subjected to worldly losses.

The first element of success is good sound health. It is important to good morals, and ought to be taught as a duty from the pulpit. If not one of the Christian graces it bears an important relation to them all. Almost all the higher ends of life require health for their accomplishment. In a high state of physical health, there is enjoyment in the mere act of sentient, conscious living. The social affections depend much on a healthy body. Where one man is sweetened by bodily ailments, a hundred are soured. The dyspeptic suffers more than ever did martyr at the stake, without the martyr's privilege of dying! Health is still more needful to the intellectual and moral nature of man. The mind is not what the bird's nest is to the tree, but what the blossom is, a part of it, and affected by whatever affects the body. You cannot keep God's moral law and neglect his natural law. It is easier to keep them both together. Every sanitary reform is a step toward moral improvement. Ministers ought to be healthy, and those who are not should be suspected of heresy? Health is necessary to the Christian graces, many of which are impossible to sickness. Asceticism, false philosophies, and other evils which have distracted the world, have sprung from understandings clouded by unhealth. Most of the greatest heresies were biliary in their origins. It was well for the old anchorites that they retired into seclusion where men would not know how peevish they were, for had they not, they would never have got into the calendar, or they would have got into the other one! There are exceptions to this rule, for there have been invalids, who have taught noble lessons, but health is essentially the prime element of success in life, because it gives value to all the other elements. What good would all the wealth of a continent do, if one had the colic?

The second element of success, is the ability to open and exert all the parts of a man's nature. As some men who have large farms cultivate only small parts of them, so in human husbandry, men leave many lots untilled and unused. The faculty of using everything within you is education. A man's power lies in the combined action of all his powers. With one finger we can do a little, with two, more, but when we wish to grasp in earnest, we take the whole hand. So the mind should be not one-fingered, but many-handed. Men are too much afraid of their force-giving powers, the passions, which give strength, because they may produce evil results. But right use is the way to cure wrong tendencies. It is only by using every part of the mind that great results can be attained.

It is important that we should distribute the elements of our enjoyment so that if one fails, we may not be bankrupt of happiness. [Here the lecturer asked that the windows might be opened, and descanted upon the importance of pure air, both in giving smartness to a lecturer, and in keeping an audience awake.] Men are too apt to make their happiness depend upon one or two faculties. As the capitalist does not invest all his money in one kind of property, so we should not stake all our happiness on a single source of enjoyment. Yet some men enjoy only animal sensations, eating, drinking and sleeping. But when sickness comes their whole stock of happiness is exhausted. God gave them a mansion with many rooms, but they shut them all up and lived in the kitchen, and when that was flooded, there were no other apartments to retire to. Other men seek their whole happiness in business enterprise. So long as they are prosperous they may be happy, but how do they feel about these days, when all things are turned upside down? Others take pleasure in their pride, but there is nothing that God likes better to blast with lightning, or men to cut down with axes. Others find pleasure only in the praise of men, but this is a tower that will easily fall, and as it is their only tower, when it falls, all is lost. Man should be able to fly from one resource to another. It is not often they are all taken from him at once.

Education should make it possible for man to retreat from one faculty to another, till he has gone through the whole mind. There are tunes of joy to be played on the top of the scale when all the lower notes are destroyed.

Another capital element of success in life is the art of living with men. No man has succeeded in life who has not learned to live with his fellow-men. There is no trouble in living with men if you can love them, and the power to live depends more on what you are than on what they are. Love will always gain an echo of response. That man who gathers joy out of every human countenance, as the bee gathers honey from every flower, cannot be said to have lost success in life. Many young men think that the necessities of business require them to be in the world like a saw, to rip and tear along, regardless of others. The man who has worked to enrich himself, has not succeeded in life. That man pays more than its worth for gold, who pays his heart.

The next element of success is for a man to have such a training as to use his external circumstances when propitious, and not to lose himself, while at the same time he does not break down under adversity. We may mark the progress of the world by this, that men who have attained wealth have employed it in these disastrous times to do the behests of their better nature. We were pleased to see a man standing on the pedestal of prosperity, and giving such noble witness of true manhood, but it was something greater than that to go down from worldly prosperity and exhibit a Christian phase of character at the other extreme. It is a great thing to stand with a perpetual equipoise of contentment. That is manhood, and that is success

The last element of success to be now mentioned is the greatest—the religious—but it need not detain us, for it is presented every Sabbath from all our pulpits.

To win success in life, it is not needful to do what we set out to do, or to succeed in the material part of life at all. All his worldly desires may be thwarted and yet man may succeed.

Some persons deem a man ruined—not when he has lost his integrity, his honor, his reason, his family, his wife, his health—but when he has lost his property. That may be the way that man makes man, but that's not the way that God makes man. The bankruptcies that hurt men are not the bankruptcies of the pocket.

Many men would have done better in this world had they not been wrongly placed. No person would wonder at the failure of an ox on the race-course, or at the failure of a racer in the plow. No one will do well who has not that occupation that fits him. The fitness of a man for his work is scarcely ever thought of. It is not to what occupation a young man is adapted that men look, but to what people think of it. Many men are forced into the ministry, for instance, for which they have as much fitness as the multiplication table has to be the ten commandments. It takes a very honest man to stand in a place where he cannot succeed. Passing by all the points on which, did time permit, we might enlarge, such as the effect of the imagination, pride, and the like, we come at last to a close with that which embraces in itself all that is needed for success in life.

"Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things."

Fidelity.—Never forsake a friend. When enemies gather around—when sickness falls on the heart—when the world is dark and cheerless—is the time to try true friendship. They who turn from the scene of distress betray their hypocrisy, and prove that interest only moves them. If you have a friend who loves you and studies your interest and happiness, be sure to sustain him in adversity. Let him feel that his former kindness is appreciated. Real fidelity may be rare, but it exists in the heart. Who has not seen and felt his power? They only deny its worth and power who have never loved a friend or labored to make a friend happy.

I compare the art of spreading rumors to the art of pin-making. There is usually some truth, which I call wire; as this passes from hand to hand, one gives it a polish, another a point; others make and put on the head, and at last the pin is completed.—[Newton.

Insults, says a modern philosopher, are like counterfeit money; we can't hinder them being offered, but we are not compelled to take them.

Grief knits two hearts in closer bonds than happiness ever can; and common sufferings are far stronger links than common joys.

FARM STOCK, ETC.

WEBB, SOUTHDOWN SHEEP.

HAVING RAISED MY FLOCK OF PURE WEBB SHEEP (by importations, and purchase of Col. L. G. Morris), to as large a number, as my land will accommodate, I now offer a few EWES, and several BUCKS, for sale, at from $40, to $100 each.

I believe mine to be the only flock of pure Webb Sheep in America, and am confident, that no other person can sell as fine quality, at as reasonable prices.

Also for sale BERKSHIRE and ESSEX PIGS, of the best blood, from Col. Morris' importations.

For further information—address,

J. C. TAYLOR,
Holmdel, Monmouth Co., N. J.

Or Warren & Co., Editors Cal. Farmer, San Francisco.

N. B.—Col. L. G. Morris, of Mt. Fordham, N. Y., has very kindly given me the privilege of referring parties to him, as he is well acquainted with my flock at the present time. [24 3mis

French Merino Sheep.

HAVING been engaged in importing and breeding FRENCH MERINO SHEEP for several years past, I can now furnish Rams and Ewes, either imported, or raised by myself from imported stock, equal to any that can be found in this country or Europe.

I was awarded all the prizes on French Merino Sheep at our last State Fair; and all the premiums awarded to this class of Sheep at our last National Fair, and the most of those at the State Fairs of California, Michigan, Indiana, Missouri, Wisconsin, and also at the Provincial Show of Upper Canada, for the present year, were awarded either to Sheep raised by myself, or to stock from Sheep raised by me, and sold to others.

Circulars, giving a full description of my flock, sent by mail to all applicants. Information can also be obtained of the Editors of the California Farmer.

Prices as low as the *same quality* can be purchased of any other person, and Sheep delivered in New York, free of charge. JOHN D. PATTERSON,

WESTFIELD, Chautauque County, NEW YORK.

HORTICULTURAL.

20,000

APPLE TREES,

FOR SALE

AT REDUCED PRICES, AT THE

HOPE NURSERY.

THE Nursery is located second block northeast of the new Steam Flour Mill, on Seventh street, San Jose.

The stock consists of over seventy varieties, carefully selected. No pains or expense has been spared to obtain the best sorts, and to render these Trees what they are,

THE BEST APPLE TREES, OF THEIR AGE,

in California. D. T. ADAMS.

v8-23-3m

A. P. SMITH'S

POMOLOGICAL GARDEN

AND

NURSERY,

On the American River, 2½ miles from the Steamboat Levee,

SACRAMENTO.

THE Proprietor has the pleasure of offering to the Patrons of the above establishment the present season, the finest collection of TREES that will be offered to the public, both as to fine size and superior beauty of the trees themselves, and also the most extensive as to number of the varieties—embracing as they do

All Kinds FRUIT TREES,
SHADE AND ORNAMENTAL TREES,
GREENHOUSE PLANTS,
SHRUBS, ROSES,

And also an unusually fine crop of

GENUINE GARDEN VEGETABLE SEEDS.

All of which we offer upon as reasonably low terms as they can be had at any reliable establishment.

Our Peach, Apple, Cherry, Apricot, Nectarine, and Plum Trees,

Are very large-sized, many of them of very superior size, making it an object to persons who desire to make plantations of large-sized trees, to give us an early call, and examine for themselves before purchasing elsewhere. For the convenience of purchasers we have divided our trees according to the following scale of size, and persons in making their orders will please to mention the size they wish, as follows:

From 3 feet to 5 feet high;
From 5 feet to 7 feet high;
From 7 feet to 10 feet high.

We call particular attention to our splendid stock of

CHERRY TREES,

The Finest and Largest in the State, embracing all the finest varieties, and of which we can furnish trees in large quantities, and of the very finest and largest size.

All the varieties of fruits that we sell, we are cultivating in our Orchards, and we propagate only from those. Every year some new varieties are fruiting, and we thus soon acquire the means of knowing whether we are cultivating a superior or a worthless variety.

Our Catalogue of Fruits being now very extensive, and always adding to our collection, we can supply parties who desire to increase theirs, much more to their satisfaction, than they can import themselves. Our varieties are from one of the most reliable sources in the East, and having been propagated here by us, we can sell them BETTER TREES than they can import.

The immense quantity of fruit sent every year from this establishment to Sacramento and San Francisco Markets, has as yet been unsurpassed for size, quality and flavor, and we believe our facilities for being

CORRECT AS TO NAMES AND VARIETIES,

are as Perfect as is Possible to Make them.

In the department of

Shade and Ornamental Trees,

We have a very fine stock of all the leading varieties, some very fine extra large trees of the

ELMS, LABURNUMS AND LOCUST,

particularly the latter, we have a large lot of from 10 to 18 feet high.

Shrubs and Roses.

A very extensive collection of all that is rare and desirable.

The Greenhouse Department is quite full, and our really superb stock of

CAMELLIAS

is unequaled by anything of that sort in the State.

Garden Vegetable Seeds,

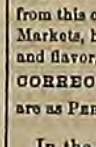
Of this year's crop, fine and of first quality, put up in packages, all sizes, suitable to the trade, Warranted Pure and sure to grow.

For fuller particulars, see our new Catalogue, which we will furnish gratis to all applicants.

☞ All orders, sent either by mail or express, accompanied by the cash, will be promptly attended to, and Trees carefully packed, to carry safely to any part of the State.

v8-18-6m A. P. SMITH.

The Concord Grape.



THE Originator of this New Grape offers for sale a fine stock, raised from the parent Vine. It has fully sustained its reputation as

The Best Grape for Out-door Culture

having survived the last two severe winters unharmed, where the Isabella, Catawba, and other vines were killed to the ground.

For Size, Beauty, Quality and Bearing,

it is unsurpassed. It is perfectly hardy, and has never been affected by rot or mildew, while it ripens from three to four weeks earlier than the Isabella, and two weeks earlier than the Diana, in the garden of the proprietor.

Fine, strong plants, at $1 50 each; $12 per dozen. Two years old, at $2 each. Three years old, extra, at $3 each. A liberal discount to clubs and the trade. Orders, with cash or good reference, promptly attended to. Address

2 3m E. W. BULL, Concord, Mass.

Ornamental Shrubbery.

THE Greatest Variety in the State may be found at the

GOLDEN GATE NURSERY,

Corner of Fourth and Folsom streets,

COMPRISING

5,000 Monthly Roses, of 150 varieties;
2,000 Carnations, of 120 kinds;
500 Monthly Honeysuckles, of 8 varieties;
500 Acacias, of 10 varieties;

Laburnums, Arbor Vitæ, Myrtles, Euonymous, Silver Maples, Mimosa, Clematis, Cytisus, Eucalyptus, Lilacs, Jasmines, Mock Orange, Ailacus, Spiræa, Weigelias, Deutzias; and a general variety of

Hardy and Green House Plants.

☞ Skillful Gardeners provided for laying out grounds. Office at the Nursery, and 171½ Clay street, above Montmery v7-24

HORTICULTURAL.

SANTA CLARA

NURSERY.

Half a Mile West of Santa Clara, on the San Francisco Road.

The Proprietor of this extensive and well-known Nursery, informs the public that he has for sale this winter, a large and very choice stock of the very best varieties of

FRUIT TREES, VINES AND PLANTS.

Consisting in part of

3,000 two year old Apples;
12,000 one year old Apples;
2,500 one year old Pear, on Pear stock;
2,500 one and two year old Cherry.

Besides a large stock of

PEACH, PLUM, APRICOT AND NECTARINE TREES.

Also a lot of

Fig Trees, Raspberries, Currants, Gooseberries, and about 20,000 *Grape Vines.*

500 lbs. China Sugar-Cane Seed,
At $1 25 per Pound;

One pound and a-half being a great plenty to seed one acre of ground.

The Proprietor will sell his Trees, Bushes and Vines as low as any other responsible nursery in the country. His stock is taken wholly from trees which have borne fruit in California, and is therefore known and reliable.

☞ All orders will be promptly attended to. The expense of packing and freight will be charged to the purchaser. Terms cash.

L. A. GOULD, Proprietor.

Santa Clara, Nov. 24, 1857. v7-22 3m

COMMERCIAL NURSERY,
SAN JOSE.

THE Proprietors of this old-established Nursery are now prepared to furnish to their friends and patrons the

Largest and Most Select Collection of

FRUIT, SHADE, AND ORNAMENTAL TREES, VINES, &c.,

ever offered in this State,

At Reduced Prices!

The FRUIT TREES offered by us are all grown and worked in the Nursery by us, from varieties obtained from the celebrated MOUNT HOPE NURSERIES, o Rochester, most of which we have fruited in our Orchards, and offer for sale only such varieties as we have found to be best adapted to this climate.

We have in Nursery:

25,000 APPLE TREES, of two years' growth, large size, thrifty, fine heads.
10,000 One year from graft.
1,000 Three years' growth, extra large, fine Trees, suitable for planting in yards and gardens, and such as cannot be obtained in any other Nursery in the State.
2,000 PEAR TREES on Pear stocks, one and two years' growth.
2,000 Pear, on Anglers' Quince, one year from bud.
3,000 CHERRY TREES, of twenty-five best varieties.
5,000 PEACH, of twenty varieties, one year from bud.
1,000 PLUM, of twenty best selected varieties.
APRICOTS, six varieties.
NECTARINE, SOFT-SHELLED ALMOND, &c. &c
10,000 GRAPE VINES, Los Angeles, 1, 2 and 3 years' old.
3,000 Catawba, Isabella, Sweetwater, and foreign varieties.
GOOSEBERRY, STRAWBERRY, RASPBERRY, CURRANTS, &c., &c.

Catalogues can be obtained on application at the Nursery, by mail or otherwise

All orders from a distance carefully attended to, securely packed and shipped to any part of the State, at the risk of the purchaser.

Our terms are cash, or short credit, on approved notes, on delivery of the Trees at the Nursery.

Explicit directions for marking and shipping should accompany each order, and when particular varieties are wanted, state whether and to what extent others may be substituted, in case the varieties cannot be furnished. Persons trusting to us to select varieties may rely upon being furnished with the leading sorts, and proper proportion for each season.

The California Farmer.

SAN FRANCISCO, FRIDAY, MARCH 12, 1858.

Agricultural Colleges.

Glorious are the signs of the times! Light is abroad! At the capital of our nation; in the Legislatures of all our States; in all the assemblies of scientific men, the importance of Agricultural Colleges, and Mechanic Institutes, is the theme of discussion. Our public writers are awake to the subject; and we now feel that it is in the *hearts* of the people, and we trust the subject will not rest until every State has its Agricultural College, and Board of Agriculture, liberally endowed, and this noble science opened before the minds of the youth of our State by suitable books, as has been done by some of the States, already.

This subject is made prominent in the recent action of the U. S. Ag. Society, at Washington, as reported in our columns; in several of the legislative bodies now in session in our Union; in the letters of Agricola, and of our correspondent B., in this week's issue, and the generous and prompt action of our own Legislature, lead us to hope that this subject will receive proper attention during the present session, and plans be adopted to form a Board of Agriculture for California that shall have the true interest of California at heart. Such action will do as much for our State as a new Steamship Company, by revealing the rich resources that now lie untouched.

Union of Interests for Agriculture and the Mechanic Arts.

The Executive Committee of the State Agricultural Society, the State Horticultural Society, and the Mechanics' Institute, met the present week, to arrange preliminaries for the Annual Fairs of their several bodies, and we learn from them officially that the several Boards of Officers have agreed upon places by which each Society shall unite with and aid the other; and as they have fixed the time of their Annual Exhibitions at different dates, each can greatly aid the other, and thus greatly promote the success of their institutions.

The State Agricultural Society will hold their Annual Fair at Marysville, commencing on the 23d of August, and lasting one week. The Mechanics' Institute commence their Exhibitions about the 7th of September, the State Horticultural Society uniting with them; and thus, by a hearty and generous co-operation, they will add to the interests of all, both contributors and visitors.

To Our Readers and Correspondents. We bespeak of our readers a careful reading of Agricola. It contains a seires of truths that should be regarded by all engaged in the science of Agriculture.

Our correspondent B. presents facts and suggestions in regard to the subject of immigration and the new steamers, which we hope will not be lost upon our community. These are questions of moment, and now is the time for action. The interest and zeal manifested by our correspondent B. to awaken public attention, merits and should receive the grateful thanks of our citizens.

We finish the History of the "Locusta," the present week, and shall put the work to the binders, and have it ready in a few days. As the edition is not large, those wishing should send orders. This history will be of great value to all public libraries and public institutions, as it is the only complete history ever published, and it will reflect great credit upon the author for his untiring research and his excellent arrangement in the compilation and preparation of this history.

We solicit the attention of our readers to the excellent communication of Edith Montressor, upon Education. Here is a field for meditation, and we are happy to know we have so goodly a number of fair correspondents, that present from week to week "food for thought." Edith is winning a host of friends.

Our valued correspondent Sallie, with her generous-hearted spirit, comes before us to claim justice for "old maids," and nobly hath she spoken. We pity those who shall take up the pen against her. Even Alice, with all her wit, must yield to the truthful pleadings of Sallie. We ourselves feel that she has the right side of the case, and we feel that Sallie will win the day.

We return many thanks to our correspondents for their many favors, now on hand, and promised to be forthcoming. Having finished the "historical," our columns will now receive those deferred contributions before spoken of.

We are happy to announce having made arrangements for a series of Criticisms upon the Drama and those who "tread the Stage." The object of such criticisms will be to awaken attention to existing evils, and to strive to *elevate* the standard of the Drama in California. Places of amusement must be had; the people will have them; then let them be so freed from evil tendencies that they may be made a source of *instruction* as well as amusement, and then the public will be a gainer.

Queen Bess, in a brief notice of the *debut* of Mrs. John H. Wood at Sacramento, will appear next week.

Mary Glen is accepted. The manuscript 'All alone in the World," will appear. Our thanks for our new correspondents.

Articles laid over for several weeks, will appear immediately.

Manuscript received from Stockton, upon the Value of Agricultural Implements, on file.

"The proper time to Plow," by Agricola, received, and will appear next week. This Communication we trust, will receive from our farmers, that attention it justly merits.

"Musical Entertainments," No. 3, by M. A. Sarles, Esq., Professor of Music at the Collegiate Institute at Benicia, marked to appear in our next. These Entertainments we are pleased to know are awakening considerable attention.

"The Hills With Verdure Clad."

Beautiful Sacramento! However we may be pleased or delighted with the many fine and beautiful cities of our State; or, however much we may esteem, or be delighted with the happy homes that lie embosomed in our rich and fertile valleys, we can never visit the Levee City, without having warm and gushing feelings of admiration and affection rise in our heart.

Being among the first settlers in '49, we can look back and remember her in her wild and romantic days. We, too, can recall the golden visions of '49. We remember her wild and cheerless condition; the tents and camp-fires; her wagon-loads of settlers, with their houses on wheels. We remember the old trees around which the pioneers rested at night; the tent-stores on the Levee. We can call to mind the visions of gold that floated on the brain of all new-comers. Those were the times that tried men's working powers, and their powers of endurance. White kids were out of fashion; and hard bread and salt pork were preferred to oyster stews and venison steak; because the first were no account, and the latter were not come-atable. This was a glorious time, for men had to work for a living. There were no fat offices in the gift of politicians. Men in those days acted more like men. Those were the days before politics and stealing were fashionable; before the days of prisons, and jails, and chain-gangs; and in those days men were comparatively happy, and labor and enterprise made them so.

We remember, too, this now famed city as she rose so speedily to wealth and fame; we can call to mind when the cannon roared, and a city came out to welcome the *first steamer* to the bank of the Sacramento, then amid her rapid strides to greatness. Then came floods and fires, pestilence and earthquakes, and yet for all these, like the Phenix from the ashes; like Neptune in his triumphal car; like a mighty giant, this city has made her onward and upward march, and she is now the Capital of the Golden State, the Queen City of the Pacific. However much praise is due to other cities, none can for a moment doubt that this famed city is justly entitled to the appellation of the *beautiful city*.

One thing most prominent in the rise and progress of Sacramento, has been the faithful adherence of great numbers of her old pioneer citizens. Go through the streets, and her merchants and her business men are those who look back to '49. Go to the splendid mansions and lovely cottages, and there are '49 citizens; they have lived through all trials; and love, with ceaseless affection, this city of their adoption; and this is what has made the city what it is. No city on the Pacific shores has paid so heavy taxes, and none have paid them more cheerfully; and in all her trials, and all her glory, Sacramentans have been true to their city, and the city will repay them in after years by her fame and prosperity.

At the present time we have spent a little time among her citizens, among her business men, and at scenes of festivity, and in the social circle; and in all we have been happy. We have roamed over her hills and among her gardens, and we love them all, for as we enter the pleasant cottages or richer mansions, now the homes of happy families; as we breath the fragrance that comes to us from the many beautiful gardens, that make this city pre-eminently (and justly so) entitled to great praise; as we look to the hills that encircle this fair city, and see them "with richest verdure clad;" as we behold all this, and remember the past, we cannot but feel within our very heart that Sacramento City is truly worthy of being called the *beautiful city*; and those who can appreciate the beautiful, must feel it to be so. Now is the time for all who love the song of birds, or love to roam over hills and prairies, and gather early flowers, to go to this famed city and spend a month or two. Sacramento will welcome you and make all happy.

Public Square at Folsom.—Within a few months, a number of stores and other buildings have been removed from the triangular piece of ground opposite the Patterson House, and it now forms an open square. Now is the time to make this vacant lot a fine public square; and we were delighted with the public spirit manifested by several of the citizens to whom we suggested this improvement. The facilities to make this square elegant are unusual, for the ditch company can supply ample water for a fountain, and for irrigating purposes. By grading this ground, fencing it, planting with trees, and laying down the soil to alfalfa, this spot can be made beautiful, and an increased value to property around it will also be given, and this example would prompt the citizens to other improvements.

We were much pleased to hear of the liberality of N. B. Waddilove, H. B. Merideth, D. Wellington of the Central House, Mr. Waters of the Patterson, and other gentlemen of the city. We hope the citizens of Folsom will immediately secure this improvement, and thus beautify their public street and thoroughfare.
